Where the product is flagged as RoHS compliant or where the or ● is used, this means that, based on information provided by our suppliers, the product does not contain the substances restricted by the European Community Directive (2002/95/EC) on the Restriction of the use of certain Hazardous Substances, commonly known as the RoHS Directive, at levels in excess of the anticipated maximum concentration values or the existence of the restricted substances in the product at levels in excess of those concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive.

RoHS Compliant Available means that those products, within a product family, which are marked with a ● are RoHS Compliant.

This information is of a general nature and is not intended to address the circumstances of any particular individual or entity. No one should act on such information without appropriate professional advice. Please see our website, www.newark.com, for updated information and a current listing of RoHS compliant product. The information contained on our website supersedes the information contained in any printed catalog or other publication.

TIME-SAVING SERVICES TO SUPPORT
YOUR FACILITY NEEDS

- **Same-day Shipping always,** with no minimum order requirement.
- **One-on-One Technical Support from Engineering Experts:** Connect via Live Chat 24/5 or by phone at 1.877.736.4835.
- **Calibration Services:** Pre-Calibration for off-the-shelf Test & Measurement equipment from the most trusted brands, shipping within 48 hours or less. Learn more at newark.com/calibrate.
- **Custom Panel Meters:** Customized analog and digital panel meters to meet your specs. Email panelmeters@newark.com.
- **Custom Enclosures:** Standard modification or customization of electronic enclosures.
- **Weekend Emergency Service:** If an emergency arises on a Saturday or Sunday, we offer emergency shipping and weekend courier services on stocked products (service fee may apply.)
- **Vendor-Managed Inventory:** Our experienced team can prepare and implement a custom stockroom solution for your needs.
- **Scheduled Orders:** Products procured, scheduled and ready to ship for future release dates.

TI Presents

NEXFET™ Power MOSFETs

Now Featuring 40V to 100V FETs

Features

- Ultra-Low Qg and Qgd
- Low Thermal Resistance
- Avalanche Rated
- Pb-Free Terminal Plating
- RoHS Compliant

TI's CSD19506KCS and CSD19536KCS are the world's lowest RDS(on) 80V and 100V TO-220 MOSFETs respectively, while offering an excellent Figure of Merit that does not sacrifice gate charge at the expense of low on resistance. These FETs are ideal for power supply, motor control, and industrial applications.

CSD19506KCS

This 80V, 2.0mΩ, TO-220 NexFET™ power MOSFET is designed to minimize losses in power conversion applications.

CSD19536KCS

This 100V, 2.3mΩ, TO-220 NexFET power MOSFET is designed to minimize losses in power conversion applications.

Contact Newark® element 14® to learn more about TI's newest MOSFETs.

We offer an

EXTENSIVE RANGE

of top quality embedded processors, development kits, debuggers and programmers.

We have 8 bit, 16 bit, and 32 bit microcontrollers (MCUs) including ARM cores, microprocessors, digital signal processors and digital signal controllers, from world leading manufacturers, including: Atmel, ST Electronics, Microchip, Freescale, NXP, and Texas Instruments.

THE LEADERS IN
ANALOG TECHNOLOGY COME TOGETHER HERE

Connect with the world-leaders in signal processing and a

BEST-IN-CLASS RANGE OF PRODUCTS & SOLUTIONS

for data conversion, sensing, power management and amplifiers & comparators.

You'll find:

- **Data Conversion** – The latest precision ADC and DAC converters, V/F and F/V, plus everything from RMS to DC converters.
- **Sensing Board** – Board mounted like touch, hall effect and temperature plus MEMs technology: accelerators, gyroscopes, pressure and inertial modules.
- **Power Management** – Regulators, AC/DC and DC/DC converters, battery management, PFC controllers, LED, motor drivers, power modules and ICs.
- **Amplifiers & Comparators** – Precision, high-speed or lowest power-op-amps, current sense & differential, sensor conditioners, sample & hold, instrumentation and more.

8-BIT MCUS & DEVELOPMENT TOOLS

ASSEMBLED DATA LOGGING SHIELD FOR ARDUINO

RoHS Compliant Available

adafruit

Features:
- Dimensions (assembled): 70mm x 53mm x 17mm (2.7in x 2in x 0.65in)
- SD Card protrudes by 10mm (0.4in) when inserted. Works with FAT16 or FAT32 formats.
- Weight: 22g/0.8oz
- Works with Arduino UNO, Duemilanove, Diecimila, Leonardo or ADK/Mega R3 or higher. ADK/Mega R2 or lower are not supported.

An inexpensive but well-rounded Arduino data logging shield. Not only is it easy to assemble and customize, it also comes with great documentation and libraries. The sheild now comes with all the components soldered on and tested but does not have headers installed. You'll need some basic soldering skills to put it together, but even if you don't have much experience you can get it done in under 15 minutes.

Mfg. Part No.	Description	Stock No.	Price Each 1-9
● 1141	Data logging shield for Arduino	56W4347	19.95

(210343)

ARDUINO MCU DEVLOPMENT PLATFORM

RoHS Compliant Available

ARDUINO

Arduino is an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software. Boards come with defferent controllers and features. Additional functionalities can be added with premade shields (daugther cards) or a designer can make custom shields with the available prototyping shields.

(194890)

ARDUINO ETHERNET SHIELD

RoHS Compliant Available

ARDUINO

Ethernet Shield connects your Arduino to the internet in mere minutes. Just plug this module onto your Arduino board, connect it to your network with an RJ45 cable (not included) and follow a few simple instructions to start controlling your world through the internet. As always with Arduino, every element of the platform – hardware, software and documentation – is freely available and open-source. This means you can learn exactly how it's made and use its design as the starting point for your own circuits.

Mfg. Part No.	Description	Stock No.	Price Each

● A000075	W5100 ENET SHIELD R3, W/POE	45W6210	66.92

(207478)

ARDUINO MINI 05

RoHS Compliant Available

ARDUINO

Features
- 14 digital input/output pins (6 can be used as PWM outputs)
- 8 analog inputs
- 16 MHz crystal oscillator

The **Arduino Mini** is a small microcontroller board intended for use on breadboards and when space is at a premium. The revision 05 has a new package for the ATmega328, which enables all components to be on the top of the board. Besides an onboard reset button, the 05 version has the same pin configuration as revision 04 and is sold with the pre-soldered pin headers on the two long sides.

Mfg. Part No.	Description	Stock No.	Price Each
● A000087	ARDUINO MINI 05 W/ HEADERS	07W3937	20.98
● A000088	ARDUINO MINI 05 W/O HEADERS	07W3938	15.74

(208175)

TOUCH SENSOR CONTROLLER EVALUATION KITS

RoHS Compliant Available

Atmel

Touch sensor evaluation kits allow the user to evaluate all functions of their corresponding touch sensor controller. The kits provide a convenient reference design and allows the user to visualize discrete touch buttons and LEDs for per channel touch indication. There are movable jumpers on the board so that the Adjacent Key Suppression® (AKS®) functionality and speed settings can be evaluated. The kits are battery powered and work stand-alone. For the EVK1040A: Connections are included on the board which can be used to access debug data from the chip. The EVK1060A and EVK2160A can be connected to a PC using the 9206 USB Plug-in card.

Mfg. Part No.	Supported Devices	Stock No.	Price Each
● ATEVK1012A	AT42QT1012	68T2353	18.80
● EVK1060A	AT42QT1060	70T7040	76.25

USB PLUG-IN CARD

JTAGICE MKII MID-RANGE DEVELOPMENT TOOL FOR 8 AND 32-BIT AVR DEVICES WITH ON-CHIP DEBUGGING

RoHS Compliant Available

Atmel

The **AVR® JTAGICE mkII** is a powerful development tool for On-chip Debugging of all AVR 8-bit RISC microcontrollers with IEEE 1149.1 compliant JTAG interface or debugWIRE interface. DebugWIRE enables on chip debug of AVR microcontrollers in small pin count packages, using only a single wire for the debug interface. The **JTAGICE mkII** and the AVR Studio® user interface give the user complete control of the internal resources of the microcontroller, helping to reduce development time by making debugging easier.

Mfg. Part No.	Description	Stock No.	Price Each
● ATJTAGICE2	AVR JTAGICE mkII On-chip Debug System	68T2494	436.25

(197952)

COMPLETE TOUCH DEVELOPMENT KIT FOR BUTTONS, SLIDERS, AND WHEELS

RoHS Compliant Available

Atmel

The **ATQT600** is a complete touch development kit for buttons, sliders, and wheels. It allows designers to experiment with touch technology and serves as the easiest way to analyse and validate touch products. Both QTouch® and QMatrix® acquisition methods are supported. The kit uses QTouch Studio as its front-end software. It includes a USB-powered interface board, three MCU boards (ATtiny88, ATmega324PA, and ATxmega128A1), three sensor boards that support up to 64-channels, and cables.

Mfg. Part No.	Description	Stock No.	Price Each
ATQT600	QT600 Complete Touch Development Kit	68T3304	217.50

(197954)

AVR BUTTERFLY EVALUATION KIT

RoHS Compliant Available

Atmel

AVR Butterfly is an evaluation tool demonstrating the capabilities of the latest AVR Technology. The tool is shipped with preloaded firmware supporting temperature sensing, light measurement, voltage readings and music playback. AVR Butterfly can also be used as a nametag. AVR Butterfly can be reprogrammed from AVR Studio using just a serial cable. This allows the tool to be used as a development kit for the onboard ATmega169PV, or even as target hardware for simple applications.

Mfg. Part No.	Description	Stock No.	Price Each
ATAVRBFLY	AVR Butterfly Evaluation Kit	68T2059	21.25

(177508)

AVR EVALUATION KIT FOR AT90CAN128/6

RoHS Compliant Available

Atmel

The **ATDVK90CAN1** is a development kit for AT90CAN AVR microcontrollers. The board is designed to easily evaluate the product using demonstration software. To complement evaluation and enable additional development, the board can also be plugged into the STK500 starter kit. The standalone board has numerous serial interfaces (dual RS232, CAN, LIN, SPI & TWI) and resources such as keyboard, LEDs, voltage reading, light and temperature sensors, and speaker.

Mfg. Part No.	Description	Stock No.	Price 1-24
ATDVK90CAN1	ATDVK90CAN1 Development Kit	68T2349	115.00

(197938)

STK500 AVR STARTER KIT

RoHS Compliant Available

Atmel

STK500 starter kit and development system for AVR Flash microcontrollers enables designers to quickly begin AVR code development, engineer prototypes, and test new designs. The kit interfaces with AVR Studio an Integrated Development Environment (IDE) for code writing and debugging.

Mfg. Part No.	Description	Stock No.	Price Each
ATSTK500	STK500 Starter Kit	68T3407	81.42

(197940)

megaAVR® SERIES 8-BIT MCUs

RoHS Compliant Available

Atmel

megaAVR family offers the widest selection of devices in terms of memories, pin counts and peripherals and offers substantial program and data memories, as well as performance approaching 1 MIPS per MHz. Built-in support for in-system programming and on-chip debug is also included.

megaAVR® SERIES 8-BIT MCUs WITH PICOPOWER

RoHS Compliant Available

Atmel

The **megaAVR®** family offers an extremely wide selection of devices in terms of memories, pin counts and peripherals which are ideal for applications requiring large amounts of code. Offering substantial program and data memories with performance up to 20MIPS, all devices feature self-programmability for fast, secure, cost-effective in-circuit upgrades.

8-BIT MCUS & DEVELOPMENT TOOLS

1

AVR XPLAIN KIT FOR ATXMEGA128A1

RoHS Compliant Available

Atmel

The **ATAVRXPLAIN** kit contains complete hardware for evaluating the highly accurate analog functionality of AVR devices and demonstrating how to interface external memories. The kit includes 8MB SDRAM and 8MB DataFlash connected to the ATxmega128A1, and eight push buttons and eight LEDs for user interaction. The USB interface is a communication gateway between the ATxmega128A1 USB COM port and power source. The ADC can be used to read a temperature sensor and potentiometer, and the DAC can be used to generate sound on a mono speaker.

Mfg. Part No.	Description	Stock No.	Price Each
● ATAVRXPLAIN	AVR XMEGA-A1 Xplained MCU Evaluation Kit	68T2094	29.50

xmegaAVR® SERIES 8-BIT MCUs

RoHS Compliant Available

Atmel

Features:
- High-precision analog
- Real-time performance
- picoPower® technology
- High Integration
- AVR Software Library
- QTouch® Sensing
- USB Connectivity

xmegaAVR® microcontrollers deliver the best possible combination of real-time performance, high integration and low power consumption for 8/16-bit MCU applications. Some with peripherals like DMA Controller, an innovative event system, crypto engine and high speed ADC and DAC, **xmegaAVR®** pushes the boundaries for high performance 8 bit MCUs while still remaining highly compatible with tinyAVR® and megaAVR®.

tinyAVR® 8-BIT MICROCONTROLLERS

RoHS Compliant Available

Atmel

tinyAVR® offers a combination of, processing power, analog performance, system-level integration and ease of use in a small package based on the same compatible architecture as other AVR® devices. Designers will find significantly shorter time to market with integrated features and peripherals like flash memory, ADC, EEPROM and Brown out detector and on-chip debug for fast, secure, cost-effective in-circuit upgrades. The **tinyAVR®** is the most compact device in the AVR® family and is capable of operating at just 0.7V.

AT89STK-11 STARTER KIT

RoHS Compliant Available

Atmel

Features
- Flash ISP Single cycle core
- On-board Voltage Regulator
- Microcontroler on its sockets
- PLCC44-pin package
- On-board 3V or 5V power supply circuitry
- On-board RESET
- External MCU clock connector
- External PCA clock connector
- Expansion area with prototyping facilities
- Temperature Range: 0°C to +70°C
- Dimension: 95mm x 120mm

AT89STK-11 Starter kit for easy product evaluation of ISP-standard Flash C51 microcontrollers. This kit replaces the discontinued AT89STK-08

Mfg. Part No.	Description	Stock No.	Price Each
AT89STK-11	AT89C51, AUTO ISP, STARTER KIT	68T5012	123.75

PSOC™ MIXED-SIGNAL CONTROLLERS

RoHS Compliant Available

CYPRESS PERFORM

PSoC(R) mixed-signal arrays are programmable systems-on-chips (SOCs) that integrate a microcontroller and the analog and digital components that typically surround it in an embedded system. A single PSoC device can integrate as many as 100 peripheral functions with a microcontroller, saving engineers design time, board space, and power consumption.

M8C PROCESSOR SPEEDS UP TO 24 MHZ

STAR-XL-S08 DEVELOPMENT KIT

element14

Features:
- The STAR-XL-S08 offers a complete MCU development environment
- The tools are supported and maintained by Freescale Semiconductor
- The MC9S08MM128 offers industry leading peripheral on-chip modules like the 16-bit ADC
- Ideal for applications that require more processing performance without a PCB re-design

➤ CONTINUED ➤

STAR-XL-S08 DEVELOPMENT KIT (CONT.)

Mfg. Part No.	Description	Kit Contents	Stock No.	Price Each
STAR-XL-S08	XL-STAR MC9S08MM128 MCU board, S08MM Core, MMA8451Q accelerometer, star array of LEDs	Board, CD, USB cable	27T2966	32.91

(194900)

TOWER SYSTEM PERIPHERIAL BOARDS

RoHS Compliant Available

freescale

Peripheral boards are used in the Tower System to provided added functionality and connectivity to the system.

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-ELEV	Elevator Boards	11R0867	29.00
● TWR-SER	Serial Module Board	11R0870	49.00
● TWR-PROTO	Blank Prototyping Board	51R8552	14.99
● TWR-LCD	LCD Controller Board	68R1767	99.00
● TWR-MEM	Memory Controller Board	68R1768	89.00
● TWR-SENSOR-PAK	Sensors Controller Board	69R0538	149.00

(148760)

UNIVERSAL TOWER SYSTEM MODULE FOR S08 & RS08 DEVICES

RoHS Compliant Available

freescale

Features

- Tower system module:
  Stand-alone mode
  Swappable MCU daughter cards
  Available as a kit with six initial daughter boards
- Daughter cards:
  unique ID associated with MCU
  Automatic identification by development tools
  5V MCU cards have the option to select between 3V and 5V
  Control the system voltage on the TWR-S08UNIV module board

TWR-S08UNIV provides a Tower System development solution for pre-existing S08 and RS08 devices, initially including the RS08KA family, the S08AC, QD, QE, QG and SH families. This combination of Tower module and attachable daughter cards provides an easy way to switch between different S08 and RS08 MCUs without purchasing the same development board over and over again. The TWR-S08UNIV should always be ordered in combination with one or more of the plug-in daughter cards (TWR-(R)S08DC-xxxx). The **TWR-S08UNIV-DEMO** is also available, providing the TWR-S08UNIV main module along with all six initial daughter cards.

TOWER UNIVERSAL MCU MODULE BASE BOARD

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-S08UNIV-DEMO	Universal RS08/S08 Tower Module Kit	47T9555	99.00
● TWR-S08UNIV	Universal RS08/S08 Tower Module only	47T9554	35.00
TOWER UNIVERSAL MCU MODULE DAUGTHER BOARDS			
● TWR-RS08DC-KA8	RS08KA MCU Module	47T9548	14.00
● TWR-S08DC-AC60	S08AC60 MCU Module	47T9549	14.00
● TWR-S08DC-QD4	S08QD4 MCU Module	47T9550	14.00
● TWR-S08DC-QE64	S08QE64 MCU Module	47T9551	14.00
● TWR-S08DC-QG8	S08QG8 MCU Module	47T9552	14.00
● TWR-S08DC-SH8	S08SH8 MCU Module	47T9553	14.00

(196689)

MC9S08PT60 RUGGED 5V 8-BIT MODULE AND KIT

RoHS Compliant Available

freescale

Features

- MC9S08PT60 MCU
- 8 MHz Crystal for system clock
- Potentiometer for ADC input
- Low-G sensor (MA8451) through IIC connection
- Infra-red Tx/Rx through SCI
- RS232 port
- 4 touch pads each with LED indicator
- Reset button and 3 functional switches
- Sockets for touch sensing & motor control daughter card expansion
- On-board OSBDM debug support with Mini-B USB connector

Kit contents

- TWR-S08PT60 board with MC9S08PT60 8-bit MCU
- Necessary cables
- DVD with lab tutorials, software, training and collateral
- Quick Start Guide document
- Tower System kit also includes:

TWR-PROTO- Tower System Prototyping Module
TWR-ELEV- Tower System Elevator Modules

TWR-S08PT60 development tool is part of the Tower System and features the new rugged 5V MC9S08PT60, combining exceptional EMC/ESD performance with integrated touch sensing and EEPROM. It provides everything a designer needs to develop and evaluate application code. The integrated OSBDM allows a designer to communicate with the board and target device with only a USB cable and the board highlights the MCU's touch sensing and motor control features. Available as a Tower System kit or just the MCU module.

RUGGED S08P FAMILY STAND-ALONE DEMONSTRATION BOARD

RoHS Compliant Available

freescale

Features

- MC9S08PT60 MCU
- GPIO output through LEDs
- Touch Sensing Interface (TSI) with one touch pad
- ADC from potentiometer input
- IIC to low-g inertial sensor (accelerometer)
- Flash/EEPROM operation on silicon
- Additional functionality in conjunction with TWR-S08UNIV mother board

Kit contents

- TWR-S08PT60 board with MC9S08PT60 8-bit MCU
- Necessary cables
- DVD with lab tutorials, software, training and collateral
- Quick Start Guide document

TWR-S08DC-PT60 daughter card is a low-cost stand-alone demo board with on-board debugger designed to demonstrate the capabilities of the MC9S08P family. It comes pre-programmed with a potentiometer demo, accelerometer demo with orientation/shake/tap/transient modes, flash and EEPROM demo, and a BDM debugger demo. It enables quick and cost-effective product evaluation and application development, and can be used in stand-alone mode or mounted to the TWR-S08UNIV module to gain access to the full breadth of our Tower ecosystem. The TWR-S08UNIV module is not included but can be ordered separately.

FLEXIS™ QE 8-BIT MICROCONTROLLERS

RoHS Compliant Available

freescale

Flexis™ QE series 8-bit to 32-bit compatible microcontrollers are also some of the lowest power devices in the marketplace. Using the new ultra-low-power technology that reduces power consumption while meeting your target performance needs. These Flexis devices also share common sets of peripherals and development tools to deliver the ultimate in migration flexibility.

AMICUS18 DEVELOPMENT TOOLS

RoHS Compliant Available

Amicus 18

Amicus18 board consists of an 8-bit Microchip PIC® microcontroller with complementary components to facilitate programming and incorporation into other circuits. The board includes both 5-volt and 3-volt linear regulators and a 16 MHz crystal oscillator, thus allowing 16MIPS (Million Instructions Per second) operation. The Amicus18's microcontroller is also pre-programmed with a bootloader that simplifies uploading of programs to the on-chip flash memory programmed via a USB cable and serves as a means of power and communication to the board. The entry level shield is labelled **The Companion Shield**. This is a PCB laid out in the pattern of a solderless breadboard.

LOW PIN COUNT USB DEVELPMENT KITS

MICROCHIP

The low pin count USB development kits provides an easy, low cost way to evaluate the functionality of the PIC18F14K50 and PIC18F13K50 20-pin USB microcontrollers. The all-inclusive kit contains the hardware, software, and code examples necessary to bring your next USB design from concept to prototype including a self-directed course and lab material designed to ease the learning curve associated with adding USB connectivity to embedded systems. The **DM164127** kit contains one fully populated low pin count USB Development Board, one unpopulated spare development board, one PIC18F14K50 Debug Header, and a CD containing the user guide, course materials, and product documentation.

Mfg. Part No.	Description	Stock No.	Price Each
DM164127	PIC18F14K50, USB, with debug header, dev kit	45P4598	39.99

MPLAB® STARTER KIT FOR PIC18F MCU

MICROCHIP

Features

- PIC18F46J50 8-bit MCU w/ 64KB Flash & 4KB RAM and nanoWatt XLP™
- USB mouse, joystick or mass storage device functions
- On-board capacitive touch sense pads availible to all functions
- MicroSD memory card, potentiometer, acceleration sensor, and OLED display
- On-board debugger & programming
- Completely USB-powered
- mTouch capacitive touch sensing
- USB communication
- FREE USB bootloader and software framework

PIC18F Starter Kit contains everything needed to experience the high performance and versatility of the PIC18F microcontroller family. It includes an on-board debugger/programming capability as well as USB communication, a capacitive touch pad, potentiometer, acceleration sensor, MicroSD™ memory card, and an OLED display. The board can function as a USB mouse, joystick or mass storage device (thumb drive) all using the on-board capacitive touch sense pads.

PIC18F26J50 EVK FLOWCODE DEVELOPMENT KIT

RoHS Compliant Available

element14

Board Specifications

- MCU: PIC18F26J50 PIC18F26J50
- On-chip memory: 32KB ROM & 3776bytes SRAM
- One ICSP interface
- One high-speed Mini USB Host Port
- One PICKit interface
- One power output port
- Two User buttons
- 8 Users LED
- 8 I/O Pins User Extension Interface
- On board touch key
- On board potentiometer
- On board temperature sensor
- Power: 5VDC from Mini USB port
- Working temperature: -10 to 70 Deg C
- Dimension: 88x 52 mm

Kit contents

- PIC18F26J50 PIC18F26J50 EVK board
- USB Cable (Mini USB type)
- CD-ROM
- One page Package list

PIC18F26J50 EVK Flowcode Development Kit is a development and demonstration platform designed to provide developers a easier hands-on approach to learning Flowcode 4. The kit is based on PIC18F26J50 microcontroller, and integrates temperature sensor, capacitor touch sensor and potentiometer to help developers verify their programs designed by Flowcode 4. Flowcode 4 is an advanced graphical programming language that allows those with little to no programming experience to create complex electronic systems in minutes. The included Flowcode 4 supports code generation for the PIC12, PIC16, PIC18 series, PIC24 and dsPIC® for microcontrollers and is compatible with PICkit® programmers, third party programmers, as well as compatible with the Hi-TECH C compiler. The professional edition includes drivers for a wide range of subsystems like LCDs, keypads, 7-segment displays, ADC, and PWM, as well as communication protocols including I2C, SPI, RS-232 RS-232 , Zigbee, TCP/IP, etc.

PIC18 FULL SPEED USB DEMONSTRATION BOARDS

MICROCHIP

These full speed USB demo boards are USB 2.0 full speed and low speed demonstration and development boards featuring the PIC18F microcontrollers. They are recommended as an initial USB development platform for applications that will be using any of the PIC18F family microcontrollers. These boards can also be used as a Plug-In Module (PIM) to the HPC Explorer Board (DM183022) or the PIC18 Explorer Board (DM183032).

PIC18 DEVELOPMENT KIT

MICROCHIP

Contents

- PIC18 Explorer Board
- PICkit 3 Debugger/Programmer
- USB cable
- 9V power supply

PIC18 Explorer Board is a low-cost demo board is for evaluation of our PIC18 MCU families. The PIC18 is our highest performance 8-bit architecture and has three different families: standard PIC18, PIC18 J-series and PIC18 K-series. This single development board supports dozens of the general purpose PIC18 families using various processor Plug-In Modules (PIMs).

Mfg. Part No.	Description	Stock No.	Price Each

8-BIT WIRELESS DEVELOPMENT KIT - 2.4GHZ MRF24J40

MICROCHIP

Kit Contains

- Two PIC18 Wireless Development Boards
- Two MRF24J40MA transceiver PICtail daughter boards
- Two RS-232 Serial Accessory boards
- Two LCD Serial Accessory boards
- Two Mini B USB cables
- Two RS-232 serial cables

Features

- MiWi Stack support - MiWi, MiWi P2P and MiWI Pro
- PIC18F46J50 MCU featuring nanoWatt XLP Technology for extreme low power
- MRF24J40MA FCC/IC/ETSI certified module with 25AA02E48 EUI Node Identity serial EEPROM on PICtail daughter board
- MCP9700A Temperature sensor
- LCD display to develop interactive wireless demos (Removable for lower power)
- Board can be powered by either AA batteries or 9V power supply or External Power supply or USB
- RS-232 Serial Accessory board - for debug purposes
- Support other radios - both in 2.4GHz and Sub-GHz frequencies through PICtail connector

8-bit Wireless Development Kit w/ 2.4 GHz MRF24J40 is an easy-to-use evaluation and development platform for IEEE 802.15.4 application designers. This kit includes MRF24J40 transceiver module and also features the PIC18 XLP microcontroller family with complete hardware needed to rapidly prototype wireless applications. The demonstration kit is pre-programmed with MiWi™ protocol stack.

PIC12/16 F1 EVALUATION KIT

MICROCHIP

Features

- 44-pin development board with generous prototyping area
- Populated with a PIC16LF1937 featuring nanoWatt XLP technology
- 3 Volt, 40 segment multimeter LCD glass
- Potentiometer
- Mechanical button
- MCP9800 temperature sensor
- 32kHz low power crystal
- Current monitoring connector to measure low power XLP capabilities
- In Circuit Serial Programming Interface for PICkit3
- PICkit serial interface
- Expansion header for the F1 BLDC Motor add-on
- Included Demos:
- Low Power Demonstration
- LCD Demonstration
- LEDs

Kit Contents

- F1 Evaluation Platform
- PICkit 3 In-Circuit Debugger
- USB Cable
- Platform & Demonstration Guide
- Source code for included demonstrations
- Board schematics

F1 Evaluation Platform is a simple development tool for Enhanced Mid-range PIC microcontrollers (PIC12F1xxx/PIC16F1xxx) and demonstrates the capabilities & low power enhancements of these new PIC microcontrollers. Included with a PICkit3 for quick programming, this kit provides a platform for general purpose development and offers the ability to develop code for any PIC12F1xxx/PIC16F1xxx microcontroller.

8-BIT PIC16 FLASH MICROCONTROLLERS

PIC16 family offers a wide range of options, from completely upward compatible devices in 18- to 44-pin packages to devices with digital peripheral integration at varying levels.

RoHS Compliant Available

MICROCHIP

STM8L ULTRALOW POWER DISCOVERY KIT

RoHS Compliant Available

Features

- STM8L152C6T6 MCU, 32 KB Flash, 2 KB RAM, 1 KB EEPROM in 48-pin LQFP
- On-board ST-Link with selection mode switch
- Two red LEDs; LD1 for USB communication, LD2 for 3.3 V power on
- Can be powered by USB or an external supply of 5 V or 3.3 V
- Can supply target application with 5 V and 3 V
- Two user LEDs, LD3 and LD4 (green and blue)
- Two push buttons (User and Reset)
- IDD current measurement
- LCD 28-pin DIP (24 segments, 4 commons)
- Extension header for all QFP48 I/Os

STM8L-DISCOVERY helps you to discover the STM8L ultralow power features and to develop and share your applications. It is based on an STM8L152C6T6 and includes an ST-Link embedded debug tool interface, LCD (24 segments, 4 commons), LEDs and push buttons.

Mfg. Part No.	Description	Stock No.	Price Each
● STM8L-DISCOVERY	STM8L ultralow power Discovery Kit	21T4027	9.88

STM8 SERIES 8-BIT DEVELOPMENT TOOLS

RoHS Compliant Available

STM8L and STM8S microcontrollers are supported by a complete range of high-end and low-cost development tools. This complete line includes evaluation, software, debugging and programming tools.

Mfg. Part No.	Description	Stock No.	Price Each
● STM8/128-SK/RAIS	STM8S208 Starter Kit	57P1438	228.75
● STM8/128-EVAL	STM8S208 Evaluation Kit	57P1437	162.50
● STM8L101-EVAL	STM8L101 Evaluation Kit	55R6965	162.50

(148873)

EMBEDDED DESIGN TOOLS

IDEs, Compilers, Debuggers and programming tools for all your MCU/DSP/FPGA needs.

8-BIT PIC18 MICROCONTROLLERS

RoHS Compliant Available

MICROCHIP

PIC18 family of microcontrollers are ideal for applications requiring 10-16 MIPS performance, with up to 128KB program memory, ranging from 18-100 pins and include: C compiler efficiency, 16-bit program word, self programming Flash, Industry leading peripherals and firmware including USB, ZigBee™, Ethernet, and CAN. **PIC18F series** microcontrollers utilize low-power, high-speed FLASH technology in a fully static design. Upwardly compatible with the **PIC16C5X, PIC12CXXX, PIC6CXX** and **PIC17CXX series** MCUs. Wide operating voltage range (2.0V to 5.5V). 'C' compiler friendly development environment. 77 single-word instructions and up to 10 MIPS operation: DC 40MHz oscillator/clock input, 4-10MHz oscillator/clock input with PLL active. 16-bit wide instructions, 8-bit wide data path. 8 x 8 single cycle hardware multiplier. 31 levels of hardware stack; software stack capability. Analog features include programmable brown-out reset and programmable 16-level voltage detection module with interrupt on low voltage detection. Additional features: programmable code protection, selectable oscillator options, Power-On Reset (POR), Power-Up Timer (PWRT), Oscillator Start-up Timer (OST), ICSP™ via 2 pins. Ideal for use in instrumentation and monitoring, data acquisition, power conditioning, environmental monitoring, telecom and consumer audio/video applications. LF versions are optimized for low power consumption. 'I' suffix denotes -40°C to +85°C. 'E' suffix denotes -40°C to +125°C.

PSoC™ 3 DEVELOPMENT KITS

RoHS Compliant Available

CYPRESS PERFORM

Kit Contents
- PSoC Development Board
- PSoC3 CY8C38 Family processor module
- PSoC CY8C29 Family processor module
- MiniProg3 Debug and Evaluation Device
- Prototyping Cable Kit
- USB Cable
- 12V AC Power Adapter
- Quick Start Guide
- Kit CD, which includes: PSoC Creator™, PSoC Designer™, PSoC Programmer, Projects, and Documentation

PSoC™ 3 is a single-cycle, pipelined 8-bit 8051 core and a high-performance configurable digital system provide unmatched analog and digital BOM integration with the flexibility to handle late design changes anywhere in the design process. The **CY8CKIT-001** PSoC® Development Kit provides a common development platform to prototype and evaluate different solutions using the PSoC3 architecture. In addition, the kit gives several example projects with step-by-step instructions and includes a PSoC CY8C29 family processor module for PSoC 1 development. **PSoC® 3 FirstTouch™** is a full-featured starter kit that includes an array of sensors, I/O's, projects, and software to allow you to evaluate to help users get acquainted PSoC® programmable system-on-chip design methodology and architecture. **PSoC® CY8C29** for PSoC 1 and **PSoC® CY8C38** for PSoC 3 are family processor modules can be used in conjunction with the PSoC Development Kit (CY8CKIT-001) is designed to evaluate and experiment with PSoC 1 design methodology and architecture.

Mfg. Part No.	Description	Stock No.	Price Each
● CY8CKIT-002	PSOC 1, PSOC 3, PSOC 5, MINIPROG3, PROG/DEBUG KIT	26R2364	89.00
● CY8CKIT-001C	DEV KIT, PSOC 1/3/5, MINIPROG3	56W4907	248.94
● CY8CKIT-029A	LCD SEGMENT, EXPANSION BOARD, FOR CY8CKIT-001 KIT	58T0042	49.97

S12ZVH MAGNIV MIXED SIGNAL MCU

RoHS Compliant Available

NEW

freescale

Features:
- S12Z core at 32 MHz bus speed
- Up to four stepper motor drivers
- Segment LCD driver
- Real time clock
- Temperature sensor

The S12ZVH platform is for automotive instrument cluster applications. It integrates a sophisticated MCU together with a voltage regulator, CAN and LIN physical layer, display controller and instrument gage drivers to address entry level requirements for automotive instrument clusters.

EXPLORER 16 STARTER KIT W/ MPLAB ICD 3

MICROCHIP

MPLAB ICD 3 with Explorer 16 Kit is a complete set of tools for application development using Microchip PIC24F, PIC24H, and dsPIC33 16-bit MCUs. It also includes a 9V universal power supply for the Explorer 16 Development Board, a PIC24FJ128GA010 and a dsPIC33F256GP710 device (mounted on plug-in modules for quick replacement). Also included with the kit is Microchips MPLAB IDE. MPLAB C Compiler for 16-bit decies Lite Edition, tutorials and user manuals on CD-ROM. The complete kit introduces the developer to Microchips family of 16-bit microcontrollers with all the tools for writing code in C, hardware debugging the application and programming devices.

Mfg. Part No.	Description	Stock No.	Price Each
DV164037	Explorer 16 Kit w/ MPLAB ICD3	25R7377	299.99

(176996)

PIC24E STARTER KIT

RoHS Compliant Available

MICROCHIP

Explore the PIC24E family using the 60 MIPS PIC24EP512GU810 MCU with USB-OTG. Pre-loaded demo software, USB mini-B and USB Micro B are included with the kit.

Mfg. Part No.	Description	Stock No.	Price Each
DM240012	MPLAB Starter Kit for PIC24E MCUs	55T2291	64.99

(207450)

PIC24/dsPIC33 EXPLORER 16 KIT

RoHS Compliant Available

MICROCHIP

Features
- PIC24FJ128GA010 microcontroller and dsPIC33FJ256GP710 digital signal controller PIMs included
- Alpha-numeric 16 x 2 LCD display
- Interfaces to MPLAB ICD 2, USB, and RS-232
- Includes Microchip's TC1047A high accuracy, analog output temperature sensor
- Expansion connector to access full devices pin-out and bread board prototyping area
- PICTailTM Plus connector for future expansion boards
- Full documentation CD includes user's guide, schematics and PWB layout

The Explorer 16 is a low cost, efficient development board to evaluate the features and performance of Microchip's new PIC24 Microcontroller and dsPIC33 Digital Signal Controller (DSC) families. Coupled with the MPLAB ICD 2 In Circuit Debugger, real-time emulation and debug facilities speed evaluation and prototyping of application circuitry. The Explorer 16 features two interchangeable Plug-In Modules (PIMs), one each for the PIC24FJ128GA010 and the dsPIC33FJ256GP710 DSC.

Mfg. Part No.	Description	Stock No.	Price Each
● DM240001	Board, 2x PIM Cards	04M6008	129.99
DM240002	Explorer 16 kit(44-PIN) w/ PIC24FJ64GA004 and dsPIC33FJ32GP204 PIMs	54M4471	129.99

(87543)

PIC24F ACCESSORY DEVELOPMENT STARTER KIT FOR ANDROID

MICROCHIP

Features
- PIC24F 16-bit PIC® MCU with USB OTG
- Type A USB connector
- User interface buttons
- LEDs and potentiometer
- Device charger circuitry up to 500mA
- Arduino footprint compatible for prototyping

Kit Contains
- 16-bit PIC24F Development Board
- PICkit 3 In-Circuit Debugger (PG164130)
- RJ-11 to ICSP Adapter (AC164110)
- 9V Power Supply (AC002014)
- Royalty Free, No Fee Licensed Software Library

PIC24F Accessory Development Start Kit for Android™ is a standalone board used for evaluating and developing electronic accessories for Google's Android operating system for smartphones and tablets.

Mfg. Part No.	Description	Stock No.	Price Each
DM240415	PIC24 Android Accessory Dev Kit	47T4879	79.99

(200551)

dsPICDEM™ MCLV-2 DEVELOPMENT BOARD

RoHS Compliant Available

MICROCHIP

Features
- Three-phase inverter bridge with a power rating of 48V/15A
- Hall sensors/Quadrature encoder interface for sensored motor control
- Phase voltage feedback for sensorless BLDC operation
- DC bus current sense resistor for single shunt vector control
- Phase current sense resistor for dual shunt vector control
- Overcurrent protection
- Two push buttons
- Reset push button
- 10 kΩ potentiometer
- LED indicator for PWM outputs
- Communication Ports: CAN, LIN, UART
- Auxiliary Power Tab Fast-On connectors

The **dsPICDEM MCLV** Development Board is targeted to control a Brushless DC (BLDC) motor or Permanent Magnet Synchronous Motor (PMSM) in sensor or sensorless operation. This board can be configured in different ways for use with specialized motor control digital signal controllers. The **dsPICDEM MCLV** Development Board supports the dsPIC33F motor control device family. It offers a mounting option to connect either a 28-pin SOIC device or a generic 100-pin Plug-In Module (PIM). The board also has a three-phase inverter bridge circuit. The circuit drives a BLDC or PMSM motor using different control techniques without requiring any additional hardware.

GRAPHICS PICTAIL™ PLUS DAUGHTER BOARD

RoHS Compliant Available

MICROCHIP

Features
- 65K color support
- Supports portrait and landscape orientations
- Stand-alone graphics controller, Solomon Systech SSD1906, supporting ⅛-bit STN, ⅛-bit CSTN, 18-bit HR-TFT and 9/12/18-bit TFT interfaces via connector
- 4MB (512Kx8) flash memory for graphic data storage
- Sound buzzer

Kit contents
- QVGA (320x240) LCD module with built-in graphics controller and resistive touch screen
- Horizontal PICtail™ Plus Daughter Board connection interface
- AC164127-3: 3.2 Display Kit

AC164127 is a demonstration board for evaluating Microchip Technology's graphic LCD display solution and Graphics Library for 16-bit microcontrollers. It is an expansion board compatible with the Explorer 16 Development Board. **AC164127-3** contains a 3.2 Display Kit which allows evaluating Microchip Technologys solution and graphics library for 16- and 32-bit microcontrollers. This is a bundle kit of the AC164127-4 and AC164127-5. The kit provides a cost-effective method of evaluating and developing graphics display applications and support both Explorer-16 and PIC32 Starter Kits.

Mfg. Part No.	Description	Supported	Stock No.	Price Each
AC164127-3	Graphics Display Truly 3.2 Board, LCD Controller Board, Display & Starter Kit Connectors, Interface	Explorer 16 Dev Board or PIC32 Starter Boards	08R1077	160.00

(113833)

LOW-COST CONTROLLERLESS (LCC) GRAPHICS PICTAIL PLUS DAUGHTER BOARD

MICROCHIP

Features
- Can drive QVGA 8bpp with PIC32 alone
- Can drive WQVGA 16bpp with external 256KB SRAM Frame buffer
- Display connector for interfacing with different display boards
- PICtail Plus Interface for connecting to Explorer 16 Development Board
- Starter Kit Connector

Low-Cost Controllerless (LCC) Graphics PICtail Plus Daughter Board enables development of graphics solutions without an external graphics controller, thus reducing system BOM cost for many applications. The board is designed to attach to a PIC32 starter kit (DM320001, DM320003-2, DM320004) or an Explorer16 development board (DM240001) and one of Microchip LCD Modules including the Truly 3.2" QVGA board (AC164127-4) and the 4.3" WQVGA Powertip display panel (AC164127-6).

Mfg. Part No.	Description	Stock No.	Price Each
AC164144	Graphics Pigtail Daughter Card	55T1443	89.99

MICROSTICK II

MICROCHIP

Features
- Low Cost
- Integrated USB programmer / debugger
- USB Powered
- MPLAB support
- DUT Socket
- 0.025" Pin headers
- Easy access to all device signals for probing
- Small size, easily Portable
- On board user LED and reset switch
- Free demo code

Kit contents
- Microstick II Board
- USB Cable
- 1x14 header pins (2)
- PIC24FJ64GB002
- PIC24HJ64GP502
- dsPIC33FJ64MC802
- PIC32MX220F032
- Guides and instructions

Microstick II delivers a complete development hardware platform for 16-bit and 32-bit PIC MCUs and dsPICs. It's the perfect solution to those looking for a low-cost, easy-to-use development platform. The USB-powered kit includes an on-board debugger/programmer, a DUT socket for easy device swapping, a user LED and reset button. It is designed for insertion into a standard prototyping board for easy connection to additional circuitry. The kit is extremely portable as well and is still about the size of a stick of gum!

16-BIT PIC24 MICROCONTROLLERS

RoHS Compliant Available

MICROCHIP

With 16 MIPS performance and an extensive peripheral set, the PIC24F microcontrollers are a highly cost-effective solution for all but the most demanding 16-bit applications. The PIC24F also offers a new migration option for design engineers whose applications may be outgrowing the performance offered by 8-bit microcontrollers, and need to stay cost competitive. For more demanding applications, the PIC24H offers 40 MIPS performance, more memory and additional peripherals. The PIC24H family adds up to 2 CAN communication modules, user selectable 10/12-bit Analog-to-Digital (A/D) converter and enhanced timer functions. And integrated Direct Memory Access (DMA) between peripherals and dual-port RAM provides zero overhead data transfers, optimizing CPU throughput.

16-BIT DSPIC DIGITAL SIGNAL CONTROLLERS

16-bit dsPIC® Digital Signal Controllers (DSCs) make your demanding applications more competitive by providing lower system cost and improved efficiency. Choose from either the dsPIC30(30MIPS) or dsPIC33(40MIPS) for higher performance.

RoHS Compliant Available

MICROCHIP

MSP430 LAUNCHPAD VALUE LINE DEVELOPMENT KIT

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- 14-/20-pin DIP (N) socket
- Built-in flash emulation for debugging and programming
- 2 programmable LEDs
- 1 power LED
- 1 programmable button
- 1 reset button
- Preloaded sample programs.

LaunchPad

Capacitive Touch BoosterPack

Kit Contents
- 10-pin PCB Connector (2 male/2 female)
- 32kHz crystal
- LaunchPad Development board (MSP-EXP430G2)
- LaunchPad sticker
- MSP430G2211IN14 flash device (preloaded with sample program)
- MSP430G2231IN14 flash device (preloaded with sample program)
- Mini USB cable
- QuickStart Guide

MSP-EXP430G2 LaunchPad is an easy-to-use flash programmer and debugging tool that provides everything you need to start developing on MSP430 Value Line devices. It includes a 14-/20-pin DIP socketed target board with integrated emulation to quickly program and debug MSP430 Value Line devices in-system through the Spy Bi-Wire (2-wire JTAG) protocol. The flash memory can be erased and programmed in seconds with no external power supply required due to the MSP430's ultra-low power flash. LaunchPad interfaces MSP430 devices to an free and unrestricted integrated software environment such as Code Composer Studio Version 4 or IAR Embedded Workbench for all MSP430G2xx flash parts in a 14 or 20 pin DIP package.

MSP-EXP430FR5739 EXPERIMENTERS BOARD

TEXAS INSTRUMENTS

Features
- MSP430FR5739, 16Bit, 16KB FRAM, 8MHz
- 3 axis accelerometer
- NTC Thermister
- 8 Display LED's
- Footprint for additional through-hole LDR sensor
- 2 User input Switches
- Connection to MSP-EXP430F5438
- Connection to most Wireless Daughter Cards (CCxxxx RF)

MSP-EXP430FR5739 Experimenter Board is a development platform for the MSP430FR57xx devices which features integrated Ferroelectric Random Access Memory (FRAM). MSP430FR57xx MCUs provides very low overall power consumption, fast data read /write and unbeatable memory endurance. The Experimenter Board can help evaluate and drive development for data logging applications, energy harvesting, wireless sensing, automatic metering infrastructure (AMI) and many others. The MSP430FR5739 device on the experimenter board can be powered and debugged via the integrated ezFET, or via TI Flash Emulation Tool, like the MSP-FET430UIF.

Mfg. Part No.	Description	Stock No.	Price Each
MSP-EXP430FR5739	FRAM Device Eval Board	45T9740	35.70
MSP-FET430U40A	FRAM FET Tool and 40-Pin Target Board	45T9743	178.50

MSP430F5438 EXPERIMENTER BOARD

TEXAS INSTRUMENTS

TAS3108EVM2 features
- 100-pin socket for MSP430F5438
- 256KB Flash Memory
- 16KB RAM
- 18MHz Clock Speed
- 4x UART/LIN/IrDA/SPI
- 4x I2C/SPI
- 5-position joystick (up, down, left, right, push down)
- 138x110 grayscale, dot-matrix LCD
- 3-Axis Accelerometer (ADXL330)
- Microphone (Amplified by TLV2760)
- 3.5mm audio output jack (Features TPA301, 350mW Mono Audio Power Amplifier)
- Support for TI Low Power RF Wireless Evaluation Modules and eZ430-RF2500T
- USB connectivity for data transfer
- JTAG header for real-time, in-system programming

➤CONTINUED➤

MSP430F5438 EXPERIMENTER BOARD (CONT.)

MSP430F5438 experimenter board is a development platform for the latest generation MSP430 MCUs. The experimenter board helps designers quickly learn and develop using the new F5xx MCUs, which provide low active power consumption, more memory and leading integration for applications such as energy harvesting, wireless sensing and automatic metering infrastructure (AMI). A Flash Emulation Tool, like the MSP-FET430UIF, is required to program and debug the MSP430 devices on the experimenter board.

Mfg. Part No.	Description	Stock No.	Price Each
MSP-EXP430F5438	MSP430 Experimenter Board	09R4951	178.50

CC3000 FRAM EVALUATION MODULE KIT

TEXAS INSTRUMENTS

Features
- Embedded Wi-Fi and networking software including drivers, stack, and supplicant
- Universal IP connectivity enabled anywhere
- Pair easily with low-memory, low-cost, low-power microcontroller systems
- Implement Wi-Fi quickly without previous Wi-Fi or RF experience
- Long range, reliable coverage throughout the entire house
- Proven Wi-Fi interoperability
- Complete platform solution and certified modules
- Get started quickly with sample applications on multiple platforms
- Comprehensive documentation and support community
- Wi-Fi, FCC /IC /ETSI certified
- Porting documentation available to allow MCU flexibility

CC3000 FRAM Evaluation Module Kit is a full turn-key Wi-Fi evaluation and demonstration tool for MSP430 FRAM MCUs and Simplelink Wi-Fi modules and includes all of the necessary hardware and software to get started quickly. SimpleLink™ CC3000 Wi-Fi is a self-contained wireless solution that simplifies the process of implementing Internet connectivity and minimizes host microcontroller (MCU) software requirements making it the ideal solution for embedded applications. The kit also allows users to take advantage of the new gnereation of MSP430 microcontroller devices with integrated Ferroelectric Random Access Memory (FRAM). **CC3000 FRAM Evaluation Module Kit** is available with the LS Research(LSR) CC3000-TiWi-SL module and/or the Murata CC3000-Type VK module. The EM boards have standard RF1 & RF2 headers that connect to many TI platforms including some kits for MSP430, Stellaris and C5000 DSP. SimpleLink™ CC3000 Wi-Fi modules can also be purchased separately.

Mfg. Part No.	Description	Stock No.	Price Each
CC3000FRAMEMK-M	FRAM Wi-FI Eval Kit w/ Murata VK module and EM	92T2025	159.00

CC110L RF BOOSTERPACK FOR MSP-EXP430G2 LAUNCHPAD

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- 1.8 to 3.6 V operation
- Low power consumption
- SPI interface between RF module and MSP430
- Prototyping area
- MCU, pushbutton switch, and LED footprints
- ROHS and REACH compliant
- Module is ETSI compliant and FCC/IC certified

Kit Contains
- Two CC110L RF BoosterPack boards
- Two MSP430G2553 devices (preloaded with a sample program)
- Quick Start Guide
- CD with software and documentation

CC110L RF BoosterPack is a low-power wireless transceiver extension kit for use with the MSP-EXP430G2 LaunchPad development kit. Based on the CC110L device, the on-board Anaren Integrated Radio (AIR) A110LR09A radio module with integrated antenna operates in the European 868-870MHz and US 902-928MHz ISM bands. The included software application, called AIR BoosterStack, demonstrates an example sensor network as well as network status reporting.

Mfg. Part No.	Description	Stock No.	Price Each
● 430BOOST-CC110L	CC110L RF BoosterPack	74T6826	19.40

CC430 WIRELESS DEVELOPMENT TOOL

TEXAS INSTRUMENTS

Features
- 2 XCC430F6137
- AES-128 hardware encryption module
- 96 segment LCD Driver
- 1 USCI (UART, 2xSPI, I2C, IrDA)
- 12-bit ADC, 200 ksps
- 2 LEDs / CC430 wireless target board
- 2 pushbuttons / CC430 wireless target board
- 18 4x2 pin headers
- 2 AAA battery packs with 2-wire power connectors

Kit Contents
- 2 CC430 wireless target boards
- 2 868/915 MHz Antennas
- Software
- Full Documentation

EM430F6137RF900 is a complete wireless development tool for the CC430 that includes all the hardware required to develop an entire wireless project. The sample kit includes two sub-1GHz wireless target boards (including antennas) featuring the highly integrated MSP430F6137IRGC RF System-on-chip. Projects may be developed and instantly deployed using the included batteries. The EM430F6137RF900 development board supports all CC430F613x and CC430F612x flash parts in the 64-pin QFN (RGC) package. It also supports software development for the CC430F513x parts (48-pin QFN (RGZ) package).

EM430F6137RF900	CC430 Wireless Development Tool	63R9909	151.98

(196448)

MSP430F2013 EZDSP USB STICK DEVELOPMENT TOOL

TEXAS INSTRUMENTS

Features:
- **eZ430-F2013** development tool including a USB debugging interface and detachable **MSP430F2013** target board
- LED indicator
- Removable USB stick enclosure
- Debugging interface supports development with all **MSP430F20xx** devices
- Integrated IAR Kickstart user interface which includes an assembler, linker, simulator, source-level debugger and limited C-compiler
- Full documentation on CD-ROM

The **eZ430-F2013** is a complete **MSP430** development tool including all the hardware and software to evaluate the MSP430F2013 and develop a complete project in a convenient USB stick form factor. The IAR Embedded Workbench Integrated Development Environment (IDE) provides full emulation with the option of designing with a stand-alone system or detaching the removable target board to integrate into an existing design. The USB port provides enough power to operate the ultra-low-power **MSP430** so no external power supply is required.

Mfg. Part No.	Decription	Stock No.	Price Each
EZ430-F2013	MSP430 USB Stick Development Tool	87K7632	24.48

eZ430 - CHRONOS WIRELESS WATCH DEVELOPMENT TOOL

TEXAS INSTRUMENTS

Features
- Fully functional sports watch based on the CC430F6137, an MSP430 with integrated <1GHz wireless transceiver
- Watch reprogrammable for custom wireless applications
- Highly integrated watch includes on-board 3-axis accelerometer, pressure sensor, temperature sensor, battery voltage sensor
- 96-Segment LCD display driven directly by CC430
- Can be paired wirelessly with heart rate monitors, pedometers or other devices based RF transceivers like the CC1101 or SoCs such as the CC430 or CC111x
- Includes an eZ430 USB emulator that connects the Chronos to a PC for real-time, in-system programming and debugging
- Includes IAR Kickstart and Code Composer Studio integrated development environments which includes an assembler, linker, simulator, source-level debugger, and code limited C-compiler

eZ430-Chronos is a highly integrated, CC430F6137 based wearable wireless development system based for the CC430 in a sports watch. It may be used as a reference platform for watch systems, a personal display for personal area networks, or as a wireless sensor node for remote data collection. The integrated wireless feature allows the Chronos to act as a central hub for nearby wireless sensors such as pedometers and heart rate monitors. The eZ430-Chronos offers temperature and battery voltage measurement and is complete with a USB-based CC1111 wireless interface to a PC. The eZ430-Chronos watch may be disassembled to be reprogrammed with a custom application and includes an eZ430 USB programming interface.

Mfg. Part No.	Description	Stock No.	Price Each
EZ430-CHRONOS-433	eZ430-Chronos 433MHz RF	55R3045	59.16

EZ430-RF2500 WIRELESS DEVELOPMENT TOOLS

TEXAS INSTRUMENTS

eZ430-RF2500 is a complete wireless development tool for the MSP430 and CC2500 that includes all the hardware and software required to develop an entire wireless project with the MSP430 in a convenient USB stick. The **eZ430-RF2500T** is an additional wireless target board for the eZ430-RF2500 wireless development tool. The **eZ430-RF2500-SEH** is a complete solar energy harvesting development kit to help create a perpetually powered wireless sensor network based on the ultra-low-power MSP430 microcontroller.

ADUC7XXX EVAL BOARD

RoHS Compliant Available

ANALOG DEVICES

The **EVAL-ADUC7029QSZ EVAL** QuickStart Plus Kit is for evaluating the ADuC7029 Precision Analog Microcontrollers, fully integrated, 1 MSPS, 12-bit data acquisition systems incorporating high performance multichannel ADCs, 16-bit/32-bit MCUs, and Flash/EE memory on a single chip. The QuickStart Plus Kit features debug via UART and an assembly & C-source debugging environment. In addition it allows true non-intrusive JTAG emulation.

This kit is intended for any new users who want to have a comprehensive hardware development environment. It also contains general purpose prototye areas which are provided at the bottom of the evaluation board for adding external components as required in the user's application.

Mfg. Part No.	Descriptoin	Stock No.	Price Each
● EVAL-ADUC7029QSZ	ADuC7029 QuickStart Plus Kit	06W2257	55.32

NXP LPC1768 SERIES (CORTEX-M3) EVALUATION BOARD

ARM DS Development Tools

Features

- 100MHz LPC1768 ARM Cortex™-M3 MCU
- On-Chip Memory: 512KB Flash & 64KB RAM
- Color QVGA TFT LCD
- 10/100 Ethernet-Port
- USB 2.0 Full Speed - USB, USB-OTG, & USB Host
- 2 CAN Interfaces
- 2 Serial Ports
- SD/MMC Card Interface
- 5-position Joystick and push-button
- Analog Voltage Control for ADC Input
- Amplifier and Speaker
- 70 GPIO pins
- Debug Interface Connectors
  20 pin JTAG (0.1 inch connector)
  10 pin Cortex debug (0.05 inch connector)
  20-pin Cortex debug + ETM Trace (0.05 inch connector)

MCB1760 evaluation board introduces the NXP LPC1760 family of ARM Cortex-M3 processor-based devices, allowing you to create and test working programs for this advanced architecture. The MCB1760 has a wide range of interfaces making it a great starting point for your next Cortex-M3 project.

Mfg. Part No.	Description	Stock No.	Price Each
MCB1760	NXP LPC1768 series (Cortex-M3) Evaluation Board	74T4584	320.00

STM32F107VC (CORTEX-M3) EVALUATION BOARD

ARM®DS Development Tools

Features

- 72MHz STM32F107VC ARM Cortex™-M3 processor-based MCU in 100-pin LQFP
- On-Chip Memory: 256KB Flash & 64KB RAM
- External Memory: 8KB I2C Flash
- Color QVGA TFT LCD with touchscreen
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, & USB Host
- 2 CAN Interfaces
- Serial/UART Port
- MicroSD Card Interface
- 5-position Joystick and push-button
- 3-axis Motion sensor / Accelerometer
- Analog Voltage Control for ADC Input
- Audio CODEC with Line-In/Out and Speaker
- 80 GPIO pins
- Debug Interface Connectors
  20 pin JTAG (0.1 inch connector)
  10 pin Cortex debug (0.05 inch connector)
  20-pin Cortex debug + ETM Trace (0.05 inch connector)

MCBSTM32C evaluation board enables you to create and test working programs based on the STMicroelectronics STM32 Connectivity Line family of ARM Cortex™-M3 processor-based devices.

Mfg. Part No.	Description	Stock No.	Price Each
MCBSTM32C	STM32F107VC (Cortex-M3) Evaluation Board	74T4580	320.00

(199453)

STM32F107VC (CORTEX-M3) EVALUATION BOARD

ARM®DS Development Tools

Features

- 72MHz STM32F103ZG ARM Cortex™-M3 MCU
- On-Chip Memory: 1MB Flash and 96KB RAM
- External Memory: 8MB SPI Flash and 1MB RAM
- USB 2.0 Full speed Device Interface
- CAN 2.0 and Serial Interfaces
- Potentiometer for ADC Input
- Up to 42 GPIO
- QVGA LCD-TFT color display with 16-bit interface
- MicroSD Card Interface
- Speaker for analog output
- Joystick with 5 positions
- 8 User LEDs and 4 push-buttons
- Power via USB connector
- Debug Interface Connectors
  20-pin ARM JTAG (0.1 inch connector)
  20-pin Cortex debug + ETM Trace (0.05 inch connector)

MCBSTM32EXL evaluation boards enable you to create and test working programs based on the STMicroelectronics STM32 family of ARM Cortex™-M3 processor-based devices.

Mfg. Part No.	Description	Stock No.	Price Each
MCBSTM32EXL	STM32F103ZE/ZG (Cortex-M3) Evaluation Board	74T4581	290.00

(199454)

STM32F207IG (CORTEX-M3) EVALUATION BOARD

ARM®DS Development Tools

Features

- 120MHz STM32F207IG ARM Cortex™-M3 MCU
- On-Chip Memory: 1MB Flash & 128KB RAM
- External Memory: 8MB NOR Flash, 512MB NAND Flash,
- External Memory: 2MB SRAM, 8KB I2C EEPROM with NFC interface
- 2.4 inch Color QVGA TFT LCD with resistive touchscreen
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, & USB Host
- USB 2.0 High Speed - USB, USB-OTG, & USB Host
- 1 CAN Interface
- Serial/UART Port
- MicroSD Card Interface
- 5-position Joystick
- 3-axis digital Accelerometer
- 3-axis digital Gyroscope
- Analog Voltage Control for ADC Input (potentiometer)
- Audio CODEC with Line-In/Out and Speaker/Microphone
- Digital Microphone
- Digital VGA Camera
- Push-Buttons for Reset, Wakeup, Tamper and User
- 8 LEDs directly connected to port pins
- Power Supply via:
  High Speed and Full Speed USB (micro) connectors
  Power jack (8V-12V) with Voltage Regulator supplying both USB host interfaces (500mA each)
- Debug Interface Connectors
  20 pin JTAG (0.1 inch connector)
  10 pin Cortex debug (0.05 inch connector)
  20-pin Cortex debug + ETM Trace (0.05 inch connector)

MCBSTM32F200 evaluation board enables you to create and test working programs based on the STMicroelectronics STM32 F2xx series of ARM Cortex™-M3 processor-based devices.

Mfg. Part No.	Description	Stock No.	Price Each
MCBSTM32F200	STM32F207IG (Cortex-M3) Evaluation Board	74T4582	360.00

(199455)

STM32F407IG (CORTEX-M4) EVALUATION BOARD

ARM®DS Development Tools

Features

- 168MHz STM32F407IG ARM Cortex™-M4 processor-based MCU in 176-pin BGA
- On-Chip Memory: 1MB Flash & 192KB RAM
- External Memory: 8MB NOR Flash, 512MB NAND Flash, 2MB SRAM, 8KB I2C EEPROM with NFC interface
- 2.4 inch Color QVGA TFT LCD with resistive touchscreen
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, & USB Host
- USB 2.0 High Speed - USB, USB-OTG, & USB Host
- 1 CAN Interface
- Serial/UART Port
- MicroSD Card Interface
- 5-position Joystick
- 3-axis digital Accelerometer
- 3-axis digital Gyroscope
- Analog Voltage Control for ADC Input (potentiometer)
- Audio CODEC with Line-In/Out and Speaker/ Microphone
- Digital Microphone
- Digital VGA Camera
- Push-Buttons for Reset, Wakeup, Tamper and User

- 8 LEDs directly connected to port pins
- Power Supply via:
  High Speed and Full Speed USB (micro) connectors
  Power jack (8V-12V) with Voltage Regulator supplying both USB host interfaces (500mA each)
- Debug Interface Connectors
  20 pin JTAG (0.1 inch connector)
  10 pin Cortex debug (0.05 inch connector)
  20-pin Cortex debug + ETM Trace (0.05 inch connector)

MCBSTM32F400 evaluation board enables you to create and test working programs based on the STMicroelectronics STM32 F4xx series of ARM Cortex™-M4 processor-based devices.

Mfg. Part No.	Description	Stock No.	Price Each
MCBSTM32F400	STM32F407IG (Cortex-M4) Evaluation Board	74T4583	360.00

(199456)

STM32 ARM CORTEX-M EVALUATION BOARDS WITH ULINK-ME DEBUG ADAPTER

ARM®DS Development Tools

Features

- 8MB NOR Flash, 512MB NAND Flash, 2MB SRAM, 8KB I2C EEPROM on Board
- 2.4 inch Color QVGA TFT resistive touchscreen LCD
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, & USB Host
- USB 2.0 High Speed - USB, USB-OTG, & USB Host
- CAN Interface
- Serial/UART Port
- MicroSD Card Interface
- 5-position Joystick
- 3-axis digital Accelerometer
- 3-axis digital Gyroscope
- Analog Voltage Control
- Audio CODEC with Line-In/Out and Speaker/Microphone
- Digital Microphone
- Digital VGA Camera

- Push-Buttons for Reset, Wakeup, Tamper and User
- 8 LEDs directly connected to port pins
- Powered by High / Full Speed USB or Power jack (8V-12V)
- ULINK-ME Debug adapter

Keil MCBSTM32F evaluation boards enables you to create and test working programs based on the STMicroelectronics STM32 series of ARM Cortex™-M processor devices.

Mfg. Part No.	Description	Stock No.	Price Each
MCBSTM32F200UME	STM32F207IG Cortex-M3 128KB RAM, 120MHz	93T1345	420.00
MCBSTM32F400UME	STM32F407IG Cortex-M4 192KB RAM, 168MHz	93T1346	420.00

32-BIT MCUS & DEVELOPMENT TOOLS

AT91SAM9G45-EVK EVALUATION KIT

RoHS Compliant Available

element14 Atmel

Kit contents
- AT91SAM9G45-EVK Board
- IDC10 Cable
- Mini USB Cable
- 10/100 Ethernet Cable
- DB9-IDC10 Cable
- 20Pins-10Pins JTAG Converter
- TFT LCD Panel
- Power Adapter

Hardware specifications
- Support Andriod2.3, Linux2.6 and WinCE6.0 OS, with free relevant board support packages (BSPs)
- Includes one 4.3" QVGA 480x272 LCD panel with Resistive touch screen
- CPU: Atmel AT91SAM9G45 AT91SAM9G45 (ARM926EJ-S Core), 400MHz
- On-chip memory: 64KB ROM & 64KB SRAM
- External memory: 256MBNandFlash, 2MB NorFlash, 4MB DataFlash & two 64MB DDR2 SDRAM
- Four UART interfaces
- One high-speed USB Host Port
- One high-speed Host Device Port
- One JTAG Debug Interface
- One 10/100 Ethernet interface
- One SD/MMC card interface
- One Micro SD card interface
- One IIS Audio output port
- One IIS Audio input port
- Two User buttons
- One Wake-up button
- One Reset button
- One User LED
- One Power LED
- 60 I/O Pins User Extention Interface
- Power: 5VDC from connector, with back-up battery on board
- Working temperature: -10 to 70 Deg C
- Dimension: 120 x 90 mm

AT91SAM9G45-EVK is a full-featured evaluation board based on the Atmel AT91SAM9G45 running at up to 400MHz, with 128 Mbytes DDR2 memory and 256 Mbytes SLC NAND Flash. The board provides a wide range of peripherals, including a high-speed USB host/device port, an Ethernet 10/100 interface, two high-speed SD/MMC slots and a QVGA 320x240 LCD panel with Resistive touch screen. In addition, the board supports Linux, WinCE and Android OS with plenty of example applications help to develop the AT91SAM9G45 processor into your application.

XPLAINED PRO MCU EVALUATION KITS

RoHS Compliant Available

Atmel

Xplained Pro boards provide everything needed to start designing new microcontroller (MCU) based applications in minutes. These boards are easy to connect using an embedded debugger through USB, easy to develop with automatic recognition in Atmel Studio 6 integrated development platform (IDP), easy to extend with hardware extension boards and a large set of software drivers and components. Xplained Pro kits are available as *evaluation kits* for evaluating MCUs and developing with example projects in the Atmel Studio IDP, *starter kit* bundle of MCU and extension boards for rapid application prototyping and development with Atmel Studio and Atmel Software Framework, *extension boards* to connect with Xplained Pro MCU boards adding functionality.

Mfg. Part No.	Description	Stock No.	Price Each
EVALUATION KITS			
● ATMEGA256RFR2-XPRO	ATMEGA256RFR2 Eval Kit	66W5519	42.65
● ATSAM4L-XPRO	SAM4L Eval Kit	66W5523	42.65
● ATSAM4S-XPRO	SAM4S Eval Kit	66W5525	42.65
STARTER KITS INCLUDES EXTENSION BOARDS			
● ATMEGA256RFR2-XSTK	ATMEGA256RFR2 Starter Kit w/ Ext Boards	66W5520	108.26
● ATSAM4L-XSTK	SAM4L Starter Kit w/ Ext Boards	66W5524	119.20
● ATSAM4S-XSTK	SAM4S Starter Kit w/ Ext Boards	66W5526	108.26
EXTENSION BOARDS			
● ATSLCD1-XPRO	Segment LCD add-on wing	66W5527	24.06
● ATIO1-XPRO	I/O evaluation add-on wing	66W5518	27.00
● ATOLED1-XPRO	128x32 OLED add-on wing	66W5521	24.06
● ATPROTO1-XPRO	prototyping add-on wing	66W5522	19.69

AT91SAM7SE-EK EVALUATION BOARD

RoHS Compliant Available

Atmel

Features
- SAM7SE512 (128-pin LQFP package)
- 256 Mbytes of NAND Flash memory
- One USB device port interface
- One DBGU serial communication port
- One additional serial communication port with RTS/CTS handshake control
- One JTAG/ICE debug interface
- One Atmel® AT73C213 Stereo Audio DAC
- One power LED and two general-purpose LEDs
- One joystick and two user input pushbuttons
- One EBI expansion BGA-like footprint connector
- 32 Mbytes of SDRAM memory

AT91SAM7SE-EK enables the evaluation of and code development for applications running on an AT91SAM7SE device.

Mfg. Part No.	Description	Stock No.	Price Each 1-24
● AT91SAM7SE-EK	AT91SAM7SE512 ARM Core, JTAG, DBGU, Evaluation Kit	68T5123	200.00

(210282)

AT91SAM9G20-EK EVALUATION BOARD

RoHS Compliant Available

Atmel

Features
- 256 Mbytes of NAND Flash memory
- One Atmel® serial DataFlash®
- One Atmel TWI serial EEPROM
- One USB Device port interface
- Two USB Host port interfaces
- One DBGU serial communication port
- One complete MODEM serial communication port
- One additional serial communication port with RTS/CTS handshake control
- JTAG/ICE debug interface
- One PHY Ethernet 100-base TX with three status LEDs
- One on-board Audio DAC
- Two DataFlash SD/MMC card slots

AT91SAM9G20-EK evaluation Kit enables the evaluation of and code development for applications running on an AT91SAM9G20 device. The board supports the AT91SAM9G20 in a 217-ball LFBGA RoHS-compliant Package.

Mfg. Part No.	Description	Stock No.	Price Each
● AT91SAM9G20-EK	AT91SAM9G20 ARM Core ENET, JTAG, Eval Kit	68T5197	546.73

(210284)

AT91SAM7S-EK EVALUATION BOARD

RoHS Compliant Available

Atmel

Features
- SAM7S256 (64-pin QFP package)
- USB device port interface
- Two serial communication ports
- JTAG/ICE debug interface
- Four buffered analog inputs
- Four general-purpose LEDs and pushbuttons
- Expansion connector
- Prototyping area

AT91SAM7S-EK evaluation board enables the evaluation of and code development for applications running on an AT91SAM7Sxx device

Mfg. Part No.	Description	Stock No.	Price Each
● AT91SAM7S-EK	AT91SAM7S256 ARM Core, JTAG, USB, Evaluation Kit	68T5122	100.00

(210331)

AT91SAM7X-EK EVALUATION BOARD FOR AT91SAM7X AND AT91SAM7XC

RoHS Compliant Available

Atmel

Features
- SAM7X256(100-pin LQFP Green package)
- USB device port
- DBGU serial communication port
- RS232 serial communication port with RTS/CTS
- JTAG/ICE debug interface connector
- Serial CAN communication ports
- MII Ethernet 100-base TX with auto MDIX capability
- Buffered analog input and PWM output
- Power LED and general-purpose LEDs
- DataFlash® card slot
- Expansion connector
- One footprint for Atmel Serial EEPROM (MN11)

AT91SAM7X-EK evaluation kit enables evaluation capabilities and code development of applications running on the AT91SAM7X or the AT91SAM7XC microcontroller.

Mfg. Part No.	Description	Stock No.	Price Each
● AT91SAM7X-EK	AT91SAM7X ARM Core, ENET, JTAG, CAN, Evaluation Kit	68T5169	218.70

(210332)

AT91SAM7SE-EK EVALUATION BOARD

RoHS Compliant Available

Atmel

Features
- SAM7SE512 (128-pin LQFP package)
- 256 Mbytes of NAND Flash memory
- One USB device port interface
- One DBGU serial communication port
- One additional serial communication port with RTS/CTS handshake control
- One JTAG/ICE debug interface
- One Atmel® AT73C213 Stereo Audio DAC
- One power LED and two general-purpose LEDs
- One joystick and two user input pushbuttons
- One EBI expansion BGA-like footprint connector
- 32 Mbytes of SDRAM memory

AT91SAM7SE-EK enables the evaluation of and code development for applications running on an AT91SAM7SE device.

FULL-FEATURED SAMA5D3 CORTEX A5 MCU EVALUATION PLATFORMS

RoHS Compliant Available

Atmel

Kit Contents
- 5" display module (not included with SAMA5D35-EK)
- Power supply
- USB cable
- Crossed ethernet cable

SAMA5D3 evaluation kits enable you to fully evaluate SAMA5D3 devices. The kits are pre-loaded with Linux and Qt. Except for the SAM5D35-EK, all boards feature a 5" WVGA display module.

Mfg. Part No.	Description	Stock No.	Price Each
ATSAMA5D31-EK	SAMA5D31 CORTEX A5 EVAL KIT	66W6047	614.18
ATSAMA5D33-EK	SAMA5D33 CORTEX A5 EVAL KIT	66W6048	614.18

32-BIT ARM BASED MCUs

RoHS Compliant Available

Atmel

ARM-based Flash Microcontrollers offer different flavours of ARM® that allow you to take control of your application development. With ranges from low-cost, entry-level devices to advanced, highly integrated microcontrollers with extensive connectivity, refined interfaces and iron-clad security, these MCUs also benefit from a worldwide ecosystem consisting of development tools, operating systems and protocol stacks, Flash programming, software and technical support from industry-leading suppliers.

STK600 AVR STARTER KIT

RoHS Compliant Available

Atmel

STK600 is a complete starter kit and development system for the 8-bit and 32-bit AVR microcontrollers that gives designers a quick start to develop code on the AVR, with advanced features for prototyping and testing new designs. The AVR device connects to the board using an innovative routing and socketcard sandwich system, which routes the signals from the device to the appropriate hardware. The system consists of a generic socket-card, on which the AVR device is inserted, and a device specific signal routing card, which routes the signals from the socket pins to the different functions on the main board dependant on the device.

AVR32 32-BIT MICROCONTROLLERS

RoHS Compliant Available

Atmel

The **AVR32** line of MCUs takes efficiency to a new level, going beyond high performance and low power consumption with intelligent peripherals moving performance and power consumption to the next step. Ideal for high throughput applications, selected UC3 devices include an integrated Floating Point Unit (FPU) which improves arithmetic performance on decimal numbers, with better precision and wider dynamic range.

SAMD20 SERIES 32-BIT MCUs

NEW

RoHS Compliant Available

Atmel

Features:

- ARM Cortex-M0+ based MCU running up to 48MHz
- Low power consumption at <70µA/MHz
- 12-bit ADC
- Hardware touch support
- Flexible serial communication modules (SERCOM)

A rich set of peripherals, flexibility and ease-of-use combined with low power consumption make the Atmel SAM D20 ARM Cortex-M0+ based microcontroller series ideal for a wide range of home automation, consumer, metering and industrial applications. The SAM D20 is designed for simple and intuitive migration between SAM D devices with identical peripheral modules, hex compatible code and a linear address map.

PSOC 4 PIONEER KIT

RoHS Compliant Available

CYPRESS PERFORM

Features:
- Infinitely Expandable
- Includes connectors for **Arduino™** compatible shields
- Designed for Low Power
- Debug like a Pro

Kit Contents:
- PSoC 4 Pioneer Kit Board
- Quick Start Guide
- USB A to mini-B Cable
- Jumper Wires (x6)

PSoC 4 Pioneer Kit is an easy-to-use and inexpensive development platform enabling you to create unique designs with the flexibility of **PSoC®4**. Featuring the PSoC 4200 device family, this kit gives you the power of an ARM Cortex-M0 combined with the fully customizable analog and digital fabric of the PSoC in the palm of your hands. Use it with **PSoC Creator™** to create unique designs, shorten development schedules, and accelerate your time-to-market. Kit includes connectors for Arduino™ compatible shields and Digilent® Pmod™ daughter cards, enabling you to pick from a variety of 3rd party expansion boards. The board also features a CapSense® slider, an RGB LED, a user button, and more!

PSOC 5 PROGRAMABLE SYSTEM ON CHIP

RoHS Compliant Available

CYPRESS PERFORM

Features:
- Precision analog integration
- Flexible low power PSoC
- Many production-ready components

PSoC 5LP is a family of low power ARM® Cortex™ - M3 based programmable system on chip devices offering unmatched high-precision analog and the flexibility to design custom system solutions. Use PSoC 5LP with PSoC Creator components to shorten design schedules accelerating your time-to-market. PSoC devices employ a highly configurable system-on-chip architecture for embedded control design, offering a flash-based equivalent of a field-programmable ASIC without lead-time or NRE penalties. PSoC devices integrate configurable analog and digital circuits, controlled by an on-chip microcontroller, providing both enhanced design revision capability and component count savings.

STM32F207XX FAMILY ARM CORTEX-M3 DEVELOPMENT BOARD

RoHS Compliant Available

Embest

Features
- 120MHz STM32F207IGT6 ARM Cortex-M3 32-bit Flash Microcontroller
- CPU Internal 1MBytes of Flash and 128 (system) +4 (backup) KBytes of SRAM
- USB2.0 OTG Full-speed Port and USB2.0 OTG High-speed Port
- 3.5-inch TFT LCD and 4-wire Resistive Touch Screen
- 10/100 Ethernet with IEEE 1588v2, CAN2.0B, Serial Port, IrDA, TF, Audio, JTAG
- G-sensor 3-Axis Acceleration Sensor
- Supports for uC/OS-II and FreeRTOS Real-time Operating Systems
- Optional 1.3 megapixel Digital Camera Module

DevKit1207 Evaluation Kit is a complete development platform for STM32F207IGT6 device, a 120MHz high-performance ARM Cortex-M3 32-bit RISC MCU, which enables engineers to easily and rapidly evaluate, prototype and test designs built around the STMicroelectronics STM32F207xx series MCUs. The DevKit1207 board features a full range of hardware peripherals to support HS/FS USB OTG, Ethernet, CAN, Serial port, IrDA, TF card, LCD, Touch screen, Camera, Audio, G-sensor, RTC, JTAG, etc. The kit is also provided with an industrial-level 3.5 inch LCD with resistive touch screen and all other necessary accessories to help user observe the testing result and use the platform more conveniently.

CO-SHINING EVALUATION BOARD

RoHS Compliant Available

mbest

Features:

- Hardware CAD design files open under CC BY-SA 3.0 license n Eagle format.
- Fully compatible with Arduino, hundreds of Shields can be reused.
- Types of 32-bit ARM Cortex MCUs avaible (M0/M3/M4).
- Working on both 3.3V and 5V, selectable with jumper.
- CoLinkEX (USB-JTAG/SW depub probe) onboard, depug IN/Out selectable with jumper
- A set of free development tools provided by CooCox.
- Component platform makes it easy to share code.

XDS100V2 USB JTAG EMULATOR

RoHS Compliant Available

mbest

Features:

- All of the XDS100 General Features
- Support for USB High Speed (480 Mbit/s)
- Support targets with 14-pin TI JTAG connector or 20-pin TI JTAG connector as used by Texas Instruments embedded processors. (Please check your vendor for hardware details)
- Supports processor cores: TMS320C28x, TMS320C54x, TMS320C55x, TMS320C64x+, TMS320C674x, TMS320C66x, ARM 9, ARM Cortex R4, ARM Cortex A8, ARM Cortex A9 and Cortex M3 (requires CCSv4.2.2 or later).
- Supports cable-break detection
- Supports target power loss detection
- Support for multiple FTDI devices
- Adaptive clocking
- LED light to indicate active USB connection
- Support for Code Composer Studio v4 and newer (Does not support Code Composer Studio v3.3)

XDS100v2 USB JTAG Emulator is the second release of the XDS100 JTAG emulator technology supporting debug of a variety of Texas Instruments devices. It allows the user direct access between the host computer and the DSP through a 14-pin JTAG header. It is compatible with Code Composer Studio (CCS) V4 IDE and compatible with Windows 2000/XP/Vista. It can be used for debugging Embest DevKit8000, SBC8100, DevKit8500D/A and SBC8018 Boards.

DEVKIT8500D EVALUATION KIT

RoHS Compliant Available

Embest

Features:
- TI DM3730/AM3715 Processor based on 1GHz ARM Cortex-A8 core
- Onboard 512MByte DDR SDRAM and 512MByte NAND Flash
- UART, 4 USB Host, USB OTG, Ethernet, Audio, TF, Keyboard, Jtag...
- Supports 24-bit TFT LCD, DVI-D and S-Video Output Display
- Supports VGA, Camera, WiFi, GPS, GPRS, 3G Functions through Modules
- Supports for Linux2.6.32, Android 2.2 and WinCE 6.0.15

Embest **DevKit8500D** Evaluation Kit is an ideal hardware and software platform with the incorporation of Texas Instruments' DaVinci DM3730 media processor, as well as supporting running high-level operating systems such as Linux, WinCE and Android. It's a complete development system accelerating time to market for more media-rich, portable applications include navigation systems, media players, medical patient monitoring devices, industrial test and measurement devices, industrial vision and portable communications.

KINETIS K60 MCU MODULE KIT

RoHS Compliant Available

freescale

Features
- MK60FN1M0VLQ12: K60FN1M in a 144 LQFP with 120 MHz operation
- S08JM60 based Open Source BDM (OSBDM) circuit
- NAND flash
- 4 user-controlled status LEDs
- 4 Capacitive Touch Pads and 2 mechanical push buttons
- Socket for Capacitive Touch Pad daughter board (Touch TWRPI)
- Socket for Tower Plugin (TWRPI, e.g. sensor board)
- Potentiometer
- Three-axis digital accelerometer (MMA8451Q)
- SD Card slot

MCU Module Board Kit Contains
- TWR-K60F120M MCU module board
- DVD with software installers and documentation
- Quick Start Guide document
- Tower System Kit also includes:
  TWR-ELEV – Tower System Elevator Modules
  TWR-SER – Tower System Serial Module

The K60 MCU module demonstrates the capabilities of the 120/150MHz K60, K20 and K10 families of Kinetis microcontrollers and can operate as a standalone debug tool and can be purchased separately from the kit or purchased as part of a Tower System kit.

Mfg. Part No.	Description	Stock No.	Price Each

TWR-K60D100M: KINETIS K60 MCU MODULE

RoHS Compliant Available

freescale

Features:
- MK60DN512VMD10 Kinetis MCU with 512 KB flash and 128 KB SRAM
- Integrated open-source JTAG via USB
- SD card slot
- MMA8451Q 3-axis accelerometer
- General purpose TWRPI socket for expansion (sensors, etc.)
- Touch TWRPI socket adds support for various capacitive touch boards
- Tower connectivity for access to USB, Ethernet, RS232/RS485, CAN, SPI, I²C, Flexbus, etc.
- Four capacitive touch pads
- Potentiometer, four LEDs, two push buttons and infrared port

Kit contents
- TWR-K53N512 board with a MK60DN512VMD10 (144 MAPBGA) 32-bit MCU
- DVD with IDE software, training materials and collateral
- Quick Start Guide document

The **TWR-K60D100M** is a development tool for the 100 MHz K60, K20, and K10 families of Kinetis microcontrollers. The TWR-K60D100M operates as a standalone debug tool and can also be combined and used as part of the modular Tower System development platform. TWR-K60D100M is also available as a Tower System Kit that includes Elevator and Serial Modules

freescale

Features
- MK70FN1M0VMJ12: K70FN1M in a 256 MAPBGA with 120 MHz operation
- Touch Tower Plug-in Socket
- General purpose Tower Plug-in (TWRPI) socket
- On-board JTAG debug circuit (OSJTAG) with virtual serial port
- 1Gb of DDR2 SDRAM memory
- 2Gb of SLC NAND flash memory
- Three axis accelerometer (MMA8451Q)
- Potentiometer
- Micro-SD Card slot

MCU Module Board Kit Contains
- TWR-K70F120M MCU module board
- DVD with software installers and documentation
- Quick Start Guide document
- Tower System Kit also includes:
  TWR-ELEV – Tower System Elevator Modules
  TWR-SER – Tower System Serial Module

The K70 MCU module demonstrates the capabilities of the K70 and K61 families of Kinetis microcontrollers and can operate as a standalone debug tool and can be purchased separately from the kit or purchased as part of a Tower System kit.

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-K70F120M	K70 MCU Module Board Only	73T5793	109.00
● TWR-K70F120M-KIT	K70 MCU Module Board w/ Tower System Kit	73T5794	179.00

KINETIS K10 FAMILY OF BASELINE MCUS

RoHS Compliant Available

freescale

Features:
- Low Power
- Mixed Signal
- Encryption and Tamper Detect

K10 MCU family is the entry point into the Kinetis portfolio with a rich suite of analog, communication, timing and control peripherals. High memory density K10 family devices include a single precision floating point unit and NAND flash controller. Pin compatibility, flexible low-power capabilities and innovative FlexMemory help to solve many of the major pain points for system implementation.

KINETIS K40 FAMILY OF USB & SEGMENT LCD MCUS

RoHS Compliant Available

freescale

Features:
- Low Power
- Mixed Signal
- USB
- Segment LCD

K40 MCU family is pin, peripheral and software compatible with the K10 MCU family and adds full-speed USB 2.0 On-The-Go with device charge detect capability and a flexible low-power segment LCD controller.

KINETIS K60 FAMILY OF ETHERNET CRYPTO MCUS

RoHS Compliant Available

freescale

Features:
- Low Power
- Mixed Signal
- USB
- Ethernet
- Encryption and Tamper Detect
- DDR

K60 MCU family includes IEEE® 1588 Ethernet, full- and high-speed USB 2.0 On-The-Go with device charge detect capability, hardware encryption and tamper detection capabilities. These devices come with a rich suite of analog, communication, timing and control peripherals. High memory density devices include an optional single precision floating point unit, NAND flash controller and DRAM controller.

TWR-K20D72M: KINETIS K20 72 MHZ MCU MODULE

RoHS Compliant Available

freescale

Features:
- Stand-alone USB host and device function
- S08JM60 based Open Source BDM (OSBDM) circuit
- Four user-controlled status LEDs
- Two Capacitive Touch Pads and two mechanical push buttons
- Socket for Capacitive Touch Pad daughter board (Touch TWRPI)
- Socket for Tower Plug-in
- Microphone, buzzer, potentiometer and MMA8451Q 3-axis accelerometer
- Battery holder for 20mm lithium battery (e.g. 2032, 2025)
- Board power select with 3.3-volt or 1.8-volt MCU operation

Mfg. Part No.	Description	Stock No.	Price Each

32-BIT MCUS & DEVELOPMENT TOOLS

FREESCALE FREEDOM PLATFORM DEVELOPMENT HARDWARE

RoHS Compliant Available

freescale

Features
- Low–cost
- Designed in an industry-standard compact form factor
- Easy access to the MCU I/O pins
- Integrated open-standard serial and debug interface (OpenSDA)
- Compatible with a rich-set of third-party expansion boards

Freedom development platform is a small, low-power, cost-effective evaluation and development system perfect for quick application prototyping and demonstration of Kinetis MCU families. The platform offers an easy-to-use mass-storage device mode flash programmer, a virtual serial port and classic programming and run-control capabilities.

KINETIS M SERIES TOWER SYSTEM MODULE

RoHS Compliant Available

freescale

NEW

Features:
- MKM34Z5128CLL5 MCU (50 MHz, 128 KB flash, 16 KB RAM, low power, LQFP100 package)
- USB interface with mini-AB USB connector
- Large 160-segment glass LCD
- Onboard debug circuit
- Three-axis accelerometer
- Four user-controllable LEDs
- Potentiometer
- Independent, battery-operated power supply for real-time clock (RTC)

Kit Contents:
- TWR-KM34Z50M board
- A to mini-B USB cable
- CR2025 coin cell battery

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-KM34Z50M	Kinetis M Series Module Kit	08X2857	159.00

KINETIS KL2 TOWER SYSTEM MODULE

RoHS Compliant Available

freescale

Features
- Tower compatible MCU module
- MKL25Z128VLK4 MCU (48 MHz, 128 KB flash, 16 KB RAM, low-power, 80LQFP package)
- Dual role USB interface with micro-AB USB connector
- Touch Tower plug-in socket
- General purpose Tower plug-in (TWRPI) socket
- On-board debug circuit MK20 openSDA serial debug interface with virtual serial port and mass storage device bootloader
- Three-axis accelerometer (MMA8451Q)
- Four user-controllable LEDs

Kit Contents
- TWR-KL25Z48M 32-bit MCU module with MKL25Z128VLK4 MCU (80LQFP)
- 3ft A to mini-B USB cable for debug interface and power
- 3ft A to micro-B USB cable for MKL25Z128VLK4 USB interface
- Micro-B to A adapter for MKL25Z128VLK4 USB host applications
- Quick Start Guide

The **TWR-KL25Z48M** MCU module is designed to work either in standalone mode or as part of the Freescale Tower System, a modular development platform that enables rapid prototyping and tool re-use through reconfigurable hardware.
The **TWR-KL25Z48M** is supported by a range of Freescale and third-party development software.

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-KL25Z48M	Eval Kit for MKL25Z128VLK4 MCU	48W4973	99.00

Features
- Low Power MCU Architecture
- Energy-Saving Peripherals
- Ultra-Low Power Modes

The new Freedom Development Platform for the Kinetis® KL0 MCUs. This platform is a small, low-power, cost-efficient evaluation and development system for quick application prototyping and demonstration based on the Kinetis L series, the industry's first microcontrollers built on the ARM Cortex-M0+ processor. The development platform combines an industry-standard form factor with a rich set of third-party expansion board options. Using this platform to speed development, applications such as small appliances, gaming accessories, portable medical systems, audio systems, smart meters, lighting and power control, can now leverage 32-bit capabilities and the scalability needed to expand future product lines, all at 8- and 16-bit price and power consumption levels.

KINETIS L SERIES MCUS

RoHS Compliant Available

freescale

Kinetis L series are a line of MCUs that combine the exceptional energy-efficiency and ease-of-use of the new ARM® Cortex™-M0+ processor with the performance, peripheral sets, enablement and scalability of the Kinetis 32-bit MCUs. This arrangement frees power-critical designs from 8- and 16-bit MCU limitations by combining excellent dynamic and stop currents with superior processing performance, a broad selection of on-chip flash memory densities and extensive analog, connectivity and HMI peripheral options. They are also hardware and software compatible with the ARM Cortex-M4-based Kinetis K series, providing a scalable migration path to more performance, memory and feature integration.

i.MX6Q SABRE LITE BOARD

RoHS Compliant Available

freescale

Features:

- Quad-Core ARM® Cortex A9 processor at 1GHz per core
- 1GByte of 64-bit wide DDR3 @ 532MHz
- Three display ports (RGB, LVDS, and HDMI 1.4a)
- Two camera ports (1xParallel, 1x MIPI CSI-2)
- Multi-stream-capable HD video engine
- Triple Play Graphics system
- Serial ATA 2.5 (SATA) at 3Gbps
- Dual SD 3.0/SDXC card slots
- PCIe port (1 lane)
- Analog (headphone/mic) and Digital (HDMI) audio
- 10/100/Gb Ethernet
- 3 High speed USB ports (2xHost, 1xOTG)
- 1xCAN2 port,10-pin JTAG and I2C
- General Purpose I/O for Device Control

Kit Contents

- SABRE-Lite Board
- 4GB SD card preloaded with Timesys Linux BSP
- Power Adaptor
- USB cable
- Quick start guide

i.MX6x SABRE Lite Board, a low-cost development platform featuring the powerful i.MX 6Quad application processor.

i.MX6 SABRE DEVELOPMENT TOOLS

RoHS Compliant Available

freescale

i.MX6 SABRE Tools allow for evaluating the i.MX 6 series of processors, a truly scalable multicore platform which includes single-, dual- and quad-core families based on the ARM® Cortex™-A9 architecture. Together with a robust ecosystem, i.MX 6 series provides the ideal platform to develop a portfolio of end devices based on a single hardware design. With high-performance multimedia processing, pin*- and software- compatible product families and integrated power management, i.MX 6 series is purpose built for the new era of smart devices.

i.MX 6 SERIES OF APPICATION PROCESSORS

RoHS Compliant Available

freescale

The **i.MX 6** series of applications processors unleashes a scalable multicore platform that includes single-, dual- and quad-core families based on the ARM® Cortex™-A9 architecture for consumer, industrial and automotive applications. By combining the power-efficient processing capabilities of the ARM Cortex-A9 architecture with 3D and 2D graphics, as well as high-definition video, the i.MX 6 series provides a high level of multimedia performance to enable an unbounded user experience.

VYBRID CONTROLLER SOLUTION EVALUTATION KITS

RoHS Compliant Available

freescale

Features

- Vybrid VF61NS151CMK50 dual-core processor
- Kinetis K20DX128VFM5-based OpenSDA circuit
- 1 Gb x 16 (128 MB) DDR3 in 96 FBGA package (Samsung)
- 2 Gb x 16 (256 MB) NAND flash (Micron)
- Two 128 Mb (16 MB) quad I/O serial flash (Spansion)
- Dual USB with on-chip PHY
- Interfaces to TWR-LCD-RGB board
- Four user-controlled status LEDs
- Two mechanical push buttons for user input and one for reset
- Potentiometer and MMA8451Q 3-axis digital accelerometer
- Micro SD card slot
- Independent battery-operated power supply for real-time clock and tamper detection module
- Enablement Solutions
  ARM DS-5 Starter Kit for Vybrid Controller Tower System module/kit
  Timesys Linux BSP
  IAR Embedded Workbench for ARM
  Processor Expert (PEx)
  PEG Graphical User Interface Solutions
  Qt UI Framework

The TWR-VF65GS10-PRO professional kit contains:

- TWR-VF65GS10 module
- TWR-SER2 Enhanced Serial module (dual Ethernet)
- TWR-LCD-RGB Graphical LCD module
- TWR-ELEV Elevator modules
- Quick Start Guide
- ARM DS-5 Starter Kit (256 KB code size limitation)

TWR-VF65GS10 controller module kit contains:

- TWR-VF65GS10 module
- Quick Start Guide
- ARM DS-5 Starter Kit (256 KB code size limitation)

TWR-VF65GS10-KIT Tower System Kit contains:

- TWR-VF65GS10 module
- TWR-SER Serial module (single Ethernet)
- TWR-ELEV Elevator modules
- Quick Start Guide
- ARM DS-5 Starter Kit (256 KB code size limitation)

TWR-VF65GS10 processor module, based on the Vybrid VF6xx dual heterogeneous core solution that utilize ARM® Cortex™-A5 and optional ARM Cortex-M4 together with a peripheral set commonly required for control and communications in a broad range of industrial applications. This processor module (or development board) can operate as a standalone debug tool or as part of an assembled Tower System development platform. Add full support from MQX™ RTOS Software Solutions, Timesys Linux® BSP and the ARM® DS-5™ Starter Kit for Vybrid Controller Tower System module and your next application-rich design is at your fingertips. For more robust functionality, the TWR-VF65GS10 is availble in three bundled kits to suite your development needs. Each kit comes with the free ARM DS-5 Starter Kit for Vybrid Controller Tower System module.

Mfg. Part No.	Description	Stock No.	Price Each
TWR-VF65GS10	Vybrid Tower System Board	45W4113	199.00
TWR-VF65GS10-KIT	Vybrid Tower Kit	45W4115	269.00

32-BIT MCUS & DEVELOPMENT TOOLS

1

TWR-MCF51JF COLDFIRE+ MCF51JX MCU MODULE KIT

RoHS Compliant Available

freescale

Features:

- Based on the MCF51JF128 device in a 64 LQFP package
- On-board debugger (OSBDM)
- Full-speed USB 2.0 dual-role interface
- Capacitive touch and push buttons
- Potentiometer
- Audio Input/Output
- Power plug-in sockets
- Three Axis Accelerometer
- On Board Debug Circuit
- Infrared Transmit & Receive

The **TWR-MCF51JF** module is a development board for the ColdFire+ MCF51Jx 32-bit MCUs and is designed to enable rapid prototyping and development of consumer and industrial applications. The TWR-MCF51JF operates as a standalone debug tool and can also be combined and used as part of the modular Tower System development platform. TWR-MCF51JF module is also available as a Tower System Kit that include elevator and serial boards.

Mfg. Part No.	Description	Stock No.	Price Each
● TWR-MCF51JF	COLDFIRE+MCP51JX MCU Module	45T2779	79.00
● TWR-MCF51JF-KIT	COLDFIRE+ MCP51JX Tower System Kit	45T2780	119.00

MCF5225X 32-BIT MICROCONTROLLERS

RoHS Compliant Available

freescale

Features:

- V2 ColdFire® core with 66 MHz and 80 MHz options
- Complimentary Freescale MQX™ software solutions
- Connectivity: USB 2.0 full-speed host/device/OTG controller; FlexCAN controller; 10/100 Ethernet controller
- External Mini-FlexBus interface
- Cryptographic accelerator unit
- Up to 512Kbytes of flash memory
- Up to 64Kbytes SRAM

Applications:

- Industrial Control
- Industrial Networking
- Human Machine Interface (HMI)
- High End Lighting Control
- Fire & Alarm System/ Applications
- Security Panels
- HVAC System/ Applications
- Medical devices

The **MCF5225x** family consists of highly integrated devices with on-chip USB, Ethernet, CAN and encryption functions, featuring the complete Freescale MQX RTOS software at no additional cost.

CODEWARRIOR DEVELOPMENT TOOLS

RoHS Compliant Available

freescale

Development tool suites

- CodeWarrior Professional Suite - Full featured development suites
- CodeWarrior Standard Suite - Selectively featured development suites
- CodeWarrior Basic Suite - Compiler upgrades to special editions, Linux Applications Editions and Flash programmers

CodeWarrior Development Studio is a complete integrated Development Environment (IDE) suite that provides a highly visual and automated framework to accelerate the development of the most complex embedded applications. These suites allow ready access to any or all of the CodeWarrior products contained within each suite. This means you can license the entire portfolio of CodeWarrior tools within the suite you purchase. Each suite also contains all functionality of the products in the suites below it.

KINETIS KV10 FAMILY OF MOTOR CONTROL MCUS

RoHS Compliant Available

freescale

NEW

Features:

- ARM Cortex-M0+
- Multiple motor control timers
- 4-channel DMA controller
- 16-bit SPI module
- I2C module
- UART modules
- 16-bit SAR ADCs
- 12-bit DAC

Kinetis KV10 MCU family is the entry point into the V Series and provides a solution for 3-phase sensorless BLDC and PMSM motor control.

KINETIS KV1X FAMILY TOWER SYSTEM MODULE

NEW

freescale

Features

- MKV10Z32VLF7 MCU (ARM® Cortex™-M0+ 75 MHz, 32 KB Flash, 8 KB SRAM, 12-bit ADC, 48 LQFP)
- Three-axis accelerometer (MMA8451Q)
- Eight user-controllable LEDs
- Two user push-button switch
- Four thermistors for single ended or differential analog inputs
- Power selectable 3.3 V/1.8 V
- Motor control auxiliary connectors
- Can be powered by external supply such as APMOTOR56F800E motor board and TWRMCLV3PH
- OpenSDA debug interface

TWR-KV10Z32 is a development tool for the Kinetis V series KV1x family built on the ARM® Cortex™-M0+ processor. The TWR-KV10Z32 MCU module is designed to work either in standalone mode or as part of the Freescale Tower System, a modular development platform that enables rapid prototyping and tool re-use through reconfigurable hardware.

KINETIS E SERIES FREEDOM DEVELOPMENT PLATFORM

RoHS Compliant Available

freescale

NEW

Features

- MKE02Z64VQH2 MCU – 20 MHz, 64 KB Flash, 4 KB SRAM, 64QFP
- Capacitive touch slider, MMA8451Q accelerometer, tri-color LED
- USB or external power supply options
- Easy access to MCU I/O
- IrDA transmitter and receiver
- Thermistor sensor to measuring temperature
- Form factor compatible with Arduino™ R3 pin layout
- New, OpenSDA debug interface

Freescale Freedom development platform is a set of software and hardware tools for evaluation and development. It is ideal for rapid prototyping of MCU-based applications. The Freescale Freedom KE02Z hardware, FRDM-KE02Z, is a simple, yet sophisticated design featuring a Kinetis E series MCU, the industry's first 5-volt MCU built on the ARM® Cortex™-M0+ core.

Mfg. Part No.	Description	Stock No.	Price Each
FRDM-KE02Z	KINETIS E SERIES FREEDOM DEVELOPMENT PLATFORM	97W2173	12.95

KINETIS K21 120 MHZ TOWER SYSTEM MODULE

RoHS Compliant Available

freescale

Features

- MK21FN1M0VMC12 MCU (120 MHz, 1 MB flash, 128 KB RAM, FPU, USB OTG,121 MAPBGA)
- Dual-role USB interface with Micro-AB USB connector
- On-board open source JTAG (OSJTAG) circuit with virtual serial port
- General-purpose Tower plug-in (TWRPI) socket
- Three-axis accelerometer (MMA8451Q)
- Four user-controlled status LEDs
- Push buttons for GPIO interrupts and MCU reset
- Potentiometer, SD card socket and coin cell battery holder
- Independent, battery operated power supply for real-time clock and tamper detection modules

NEW

TWR-K21F120M is a development board for the Kinetis K21 and K22 120 MHz 32-bit ARM® Cortex™-M4 MCUs with floating point unit. The board provides rapid prototyping for applications requiring high feature integration, as low as 240uA/MHz low-power consumption and mid/high flash memory density (up to 1 MB) that need to support multiple communication stacks.

KINETIS K64 FAMILY TOWER SYSTEM MODULE

RoHS Compliant Available

freescale

Features

- MK64FN1M0VMD12 (120 MHz, 1 MB Flash, 256 KB RAM, FPU, USB, encryption, low power, 144 MAPBGA)
- Dual-role USB interface with Micro-AB USB connector
- Onboard open-standard serial and debug adaptor (OpenSDA)
- General-purpose Tower plug-in (TWRPI) socket
- Three-axis accelerometer (MMA8451Q)
- Four user-controlled status LEDs
- Pushbuttons for GPIO interrupts and MCU reset
- Potentiometer, SD card socket and coin cell battery holder
- Independent, battery-operated power supply for real-time clock and tamper detection modules

NEW

TWR-K64F120M is a development board for the Kinetis K24, K63 and K64 120 MHz 32-bit ARM® Cortex™-M4 MCUs. It features the Kinetis MK64FN1M0VMD12 low-power MCU with 1MB Flash, 256 KB SRAM, USB USB and Ethernet MAC. Board can operates as a standalone debug tool and can also be combined and used as part of the modular Tower System development platform.

KINETIS K20 FAMILY OF USB MCUS

RoHS Compliant Available

freescale

Features:

- Low Power
- Mixed Signal
- Encryption and Tamper Detect
- USB

K20 MCU family is pin, peripheral and software compatible with the K10 MCU family and adds full and high-speed USB 2.0 On-The-Go with device charge detect capability. These devices come with a rich suite of analog, communication, timing and control peripherals. High memory density K20 family devices include a single precision floating point unit and NAND flash controller.

KINETIS K50 FAMILY OF MEASUREMENT MCUS

RoHS Compliant Available

freescale

Features:
- Low Power
- Mixed Signal
- USB
- Segment LCD
- Ethernet
- Encryption and Tamper Detect
- Operational & transimpedance amplifiers

K50 MCU family is pin-, peripheral- and software-compatible with other Kinetis microcontrollers and provides designers with an Analog Measurement Engine consisting of integrated operational and transimpedance amplifiers and high-resolution ADC and DAC modules. The family also features IEEE® 1588 Ethernet and hardware encryption, full-speed USB 2.0 On-The-Go with device charger detect capability and a flexible low-power segment LCD controller.

CHIPKIT UC32 PROTOTYPING PLATFORM

RoHS Compliant Available

DIGILENT BEYOND THEORY

Features
- Microchip® PIC32MX340F512H microcontroller
- Compatible with many existing Arduino™ code examples, reference materials and other resources
- Arduino™ "Uno" form factor
- Compatible with many Arduino™ shields
- 42 available I/O
- Two user LEDs
- PC connection uses a USB A > mini B cable (not included)
- 12 analog inputs
- 3.3V operating voltage
- 75mA typical operating current
- 7V to 15V input voltage (recommended)
- 20V input voltage (maximum)
- 0V to 3.3V analog input voltage range
- +/-18mA DC current per pin

The **chipKIT uC32** is based on the popular Arduino™ open-source hardware prototyping platform and adds the performance of the Microchip PIC32 microcontroller. The **uC32** is the same form factor as the Arduino™ Uno board and is compatible with many Arduino™ shields. It features a USB serial port interface for connection to the IDE and can be powered via USB or an external power supply. The **uC32** board takes advantage of the powerful PIC32MX340F512 microcontroller. This microcontroller features a 32-bit MIPS processor core running at 80Mhz, 512K of Flash program memory and 32K of SRAM data memory. The **uC32** can be programmed using the Multi-Platform Integrated Development Environment (MPIDE), an environment based on the original Arduino IDE modified to support PIC32. It contains everything needed to start developing embedded applications. In addition, the uC32 is fully compatible with the advanced Microchip MPLAB® IDE and the PICKit3 in-system programmer/debugger. The uC32 provides 42 I/O pins that support a number of peripheral functions, such as UART, SPI, and I2C ports and pulse width modulated outputs. Twelve of the I/O pins can be used as analog inputs or as digital inputs and outputs.

CHIPKIT WIFI SHIELD

RoHS Compliant Available

DIGILENT BEYOND THEORY

Features
- IEEE 802.11b/g-compliant RF transceiver
- Serialized unique MAC address
- Data rates: 1 - 11 Mbps for 802.11b; 6 - 54 Mbps for 802.11g
- IEEE 802.11b/g/n-compatible networks
- Integrated PCB antenna
- Wi-Fi certified as an application specific device
- Radio regulation certification for the United States (FCC), Canada (IC), Europe (ETSI), and Japan (ARIB)
- Micro SD card connector
- Four LEDs

The **chipKIT™ WiFi Shield** is an interface board designed for use with Digilent's chipKIT line of microcontroller boards such as the **Uno32™**, **uC32™**, or **Max32™**. The **chipKIT** line is a family of microcontroller boards based on the high performance Microchip PIC32 family of microcontrollers. The WiFi Shield makes use of the Microchip MRF24WB0MA WiFi module and provides chipKIT microcontroller boards the ability to connect to and communicate via IEEE 802.11 compatible wireless networks. The WiFi Shield is intended for use with the Digilent network libraries, DNETcK and DWIFIcK, available for free download from the Digilent web site. These libraries make use of, and include a custom version of the Microchip Applications Library licensed from Microchip. The WiFi Shield also provides a micro-SD card connector for use with micro-SD flash memory cards. The **chipKIT** MPIDE SD library can be used to read/write files stored on the micro-SD card.

PIC32 ACCESSORY DEVELOPMENT STARTER KIT FOR ANDROID

MICROCHIP

Features
- PIC32 PIC® MCU with USB OTG
- Type A USB connector and micro A/B/ connectors
- I/O expansion board
- On-board programming/debugging

Kit contents
- PIC32 USB Starter Kit II (DM320003-2)
- PIC32 I/O Expansion Board (DM320002)
- 9V Power Supply (AC002014)
- Royalty Free, No Fee Licensed Software Library

PIC32 Accessory Development Start Kit for Android™ is used for evaluating and developing accessories for Google's Android operating system for smartphones and tablets.

CHIPKIT UNO32™ ARDUINO™ - COMPATIBLE PROTOTYPING PLATFORM

MICROCHIP

Features
- Microchip® PIC32MX320F128 processor
- Compatible with existing Arduino™ code examples, reference materials and other resources
- Can also be programmed using Microchip's MPLAB (along with a PICkit 3 or 6-pin header)
- Arduino™ "Uno" form factor
- Compatible with Arduino™ shields
- 42 available I/O
- User LED

chipKIT™ Uno32™ combines compatibility with the popular Arduino™ open source hardware prototyping platform with the performance of the powerful Microchip PIC32MX320F128 microcontroller in the same form factor as the Arduino™ Uno board and is compatible with Arduino™ shields. This microcontroller features a 32-bit MIPS processor core running at 80Mhz, 128K of flash program memory and 16K of SRAM data memory. The board can be programmed using an environment based on the original Arduino™ IDE modified to support PIC32. In addition, the Uno32 is fully compatible with the advanced Microchip MPLAB development environment and the PICKit3 in-system programmer/debugger.

PIC32 ETHERNET STARTER KIT

MICROCHIP

Kit contents
- PIC32 Ethernet Starter Board
- Standard A to mini B cable for debugger
- Standard A to micro B cable for USB application development
- Ethernet cable
- Software CD

PIC32 Ethernet Starter Kit provides the easiest and lowest cost method to experience 10/100 ethernet development with PIC32. Combined with free TCP/IP software, your project will be running in no time. The PIC32 has an available CAN2.0b peripheral and USB host/device/OTG.

Mfg. Part No.	Description	Stock No.	Price Each
DM320004	PIC32 Ethernet Starter Kit	51R8564	74.99

CHIPKIT MAX32™ ARDUINO™ - COMPATIBLE PROTOTYPING PLATFORM

MICROCHIP

Features
- Microchip® PIC32MX795F512 processor
- Provides additional memory and advanced communications peripherals
- Compatible with existing Arduino code examples, reference materials and other resources
- Can also be programmed using Microchip's MPLAB (along with a PICkit 3 or 6-pin header)
- Arduino™ "Mega" form factor
- Compatible with Arduino™ shields
- 83 available I/O
- User LED

chipKIT™ Max32™ combines compatibility with the popular Arduino™ open source hardware prototyping platform with the performance of the powerful Microchip PIC32MX795F512 microcontroller in the same form factor as the Arduino Mega board and is compatible with standard Arduino™ shields as well as larger shields for use with the Mega boards. This microcontroller features a 32-bit MIPS processor core running at 80Mhz, 512K of flash program memory and 128K of SRAM data memory. The board can be programmed using an environment based on the original Arduino™ IDE modified to support PIC32. In addition, the Uno32 is fully compatible with the advanced Microchip MPLAB development environment and the PICKit3 in-system programmer/debugger.

MICROSTICK DEVELOPMENT BOARD FOR DSPIC33F AND PIC24H

MICROCHIP

Features
- Low Cost development
- Integrated USB programmer / debugger
- USB Powered
- Socketed dsPIC/PIC24
- 0.025" Pin headers
- Easy access to all device signals for probing
- Small size
- Status LEDs and Reset Switch
- Free demo code

Microstick for dsPIC33F and PIC24H devices is designed to provide designers with an easy to use, economical development environment for 16-bit Digital Signal Controllers and Microcontrollers. It has never been more affordable to get started with 16-bit, dsPIC33F and PIC24H devices! Microstick includes a socket for the device under test for quick and easy chang-out and can be used stand-alone or plugged into a prototyping board for extremely flexible development. MPLAB Integrated Development Environment also supports Microstick.

Mfg. Part No.	Description	Stock No.	Price Each
DM330013	Microstick for dsPIC33F and PIC24H Development Board	83R7946	24.99

MULTIMEDIA EXPANSION BOARD AND PIC32 STARTER KIT

RoHS Compliant Available

MICROCHIP

Features - PIC32 Ethernet Starter Kit
- PIC32MX795F512L 32-bit MCU
- PIC32MX440F512H USB MCU for on-board debugging
- Green power indicator LED
- On-board crystal for precision microcontroller clocking (8 MHz)
- USB connectivity for on-board debugger communications
- Ethernet 10/100 bus speed indicator LED
- 50 MHz Ethernet PHY oscillator

Features - Multimedia Expansion Board
- 3.2 inch (8.1 cm) QVGA touch screen display with backlight
- Solomon Systech Graphics Controller (SSD1926)
- Accelerometer and temperature sensor (BMA150)
- 24LC08 EEPROM
- SPI Flash (SST25VF016)
- 24-bit audio codec (WM8731)
- PICtail expansion connector
- microSD card slot
- Integrated 802.11 wireless connectivity

Kit Contains
- PIC32 Ethernet Starter Kit
- Multimedia Expansion Board
- Standard A to mini B cable for debugger
- Standard A to micro B cable for USB application development
- Ethernet cable
- Information Sheet and Documentation

Multimedia Bundle Kit includes a PIC32 Ethernet Starter Kit and Multimedia Expansion Board providing PIC32 users with a powerful interface and great connectivity when two boards are fitted together with a PICTail socket providing access to various I/O if extra functionality is needed. **Multimedia Expansion Board** provides PIC32 Starter Kit users with an integrated yet flexible solution for developing high impact user interfaces. The board comes with a 3.2 Color TFT touch-screen QVGA display, an onboard FCC certified WiFi module, a 24-bit stereo audio code, a three-axis accelerometer, a joystick and a MicroSD memory card slot.

32-BIT PIC32 FLASH MICROCONTROLLERS

RoHS Compliant Available

MICROCHIP

Building on Microchip's 8-& 16-bit PIC microcontrollers, the PIC32 MCU family delivers 32-bit performance with more memory to solve your increasingly complex embedded designs. Supported by MPLAB development environment and well-known industry tools and software providers, the PIC32 products are pin, peripheral and software compatible with Microchip's 16-bit PIC MCU families and also across the PIC32 MCU family.

LPCXPRESSO EVALUATION BOARDS FOR LPC SERIES MCUS

RoHS Compliant Available

NXP

Features

- Eclipse-based IDE using very low-cost target boards.
- The target boards comes with an integrated JTAG Debugger. No need for a separate debug probe!
- Easy upgrade options to full-blown suites (from Code Red) and hardware kits (from Embedded Artists).
- End-to-end solution for creating applications all the way from evaluation through to production.

Target Board

LPCXpresso™ is a low-cost development platform supporting ARM-based LPC microcontrollers. LPCXpresso is an end-to-end solution enabling embedded engineers to develop their applications from initial evaluation to final production. The platform is comprised of a simplified Eclipse-based IDE and low-cost target boards which include an attached JTAG debugger. Designed for simplicity and ease of use, the LPCXpresso IDE (powered by Code Red) will provide software engineers a quick and easy way to develop their applications.

mbed RAPID PROTOTYPING MICROCONTROLLERS

RoHS Compliant Available

NXP

Features:

- USB Drag 'n' Drop Programming Interface
- Entry-level Online Compiler
- High-level Peripheral Abstraction Libraries

mbed platform is designed as a sketch pad for quick experimentation of new ideas for anyone from professional embedded engineers to people exploring microcontrollers for the first time. mbed is not a replacement for professional embedded development tools rather its focus is an eazy to use prototyping platform. Therefore, traditional embedded tools such as JTAG interface, a breakpoint debugger, integrated peripherals, or even a standard offline compiler are not included with mbed.

LPC4330 XPLORER BOARD

RoHS Compliant Available

NXP

Features

- Controller: LPC4330, 100 pin BGA
- PCB: 4-layer (86mm x 40mm, RoHS Compliant)
- Two LEDs
- One user switch and one reset switch
- Boot select switch
- 32Mb Quad SPI flash
- On board crystals for controller, RTC and audio codec
- On board Ethernet PHY, 50 MHz Oscillator and RJ45 connector with magnetics
- On board audio codec and audio jacks
- On board USB host power switch
- On board Micro SD card slot
- Two USB ports, one HS (High speed) port and one FS (Full Speed) port
- 10-pin cortex debug header
- Unused I/Os brought to a header

LPC4330-Xplorer features the dual-core LPC4330 cortex-M4/M0 microcontroller from NXP. It is bundled with a ULINK-ME debug adapter from Keil, as well as all needed USB cables, to enable development to get started quickly.

LPC1114 EVALUATION BOARD MODULES

RoHS Compliant Available

NXP

OM11085 Kit Contents:

- IAR LPC1114 Evaluation Board
- IAR Embedded Workbench for ARM, 8K KickStart edition
- IAR visualSTATE evaluation edition, 20-state limitation
- Example projects included
- Associated Software included

OM11086 Kit Contents:

- Keil LPC1114 Evaluation Board
- MDK-Lite (evaluation version)
- ULINK-ME debug adapter
- Associated Software included

LPC1114 Evaluation Board lets you get up-and-running quickly in evaluating the performance and capability of the **LPC1114**. The **LPC1114** is designed for 8/16-bit microcontroller applications, offering performance, low power, simple instruction set and memory addressing together with reduced code size compared to existing 8/16-bit architectures. The LPC1114 evaluation board is available with either IAR or Keil tools.

- MDK ARM (evaluation version)
- Associated Software included

LPC11C14 Evaluation Board lets you get up-and-running quickly in evaluating the superior performance and capability of the **LPC11C14**. The **LPC11C14** is designed for low-cost, low-power CAN-based applications. On-chip CAN and CANopen drivers provide design engineers with easy-to-use API commands to the CANopen protocol, enabling rapid integration of the **LPC11C00** series into CAN-based networks and thereby greatly simplifying the plug-and-play integration process. The LPC11C14 evaluation board is available with either IAR or Keil tools.

Mfg. Part No.	Description	Stock No.	Price Each
● OM13003,598	Eval Board for IAR LPC11C1x ARM CORTEX-M0	46W5429	163.69
● OM13004,598	Keil Eval Board for MCB11C1x ARM CORTEX-M0	46W5430	176.07

(210283)

LPC11U1 EVALUATION BOARD MODULES

RoHS Compliant Available

LPC11U14 Evaluation Board lets you get up-and-running quickly in evaluating the superior performancea and capability of the **LPC11U14**. The **LPC11U14** is developed with a highly flexible USB architecture featuring simplicity and diversity of design for a wide range of USB solutions. The LPC11U14 evaluation board is available with either IAR, Keil or NGX tools.

Mfg. Part No.	Description	Stock No.	Price Each
● OM13017,598	IAR LPC11U1x KSK with J-Link lite	46W5438	206.33
● OM13018,598	Keil LPC11U1x Eval Board	46W5439	176.07
● OM13021,598	NGX LPC11U1x Eval Board	46W5441	38.51

(210285)

LPC1200 EVALUATION BOARD MODULES

RoHS Compliant Available

OM13013 Kit Contents:
- IAR LPC1227 Evaluation Board
- IAR J-Link-Lite for ARM
- IAR Embedded Workbench for ARM, 8K KickStart edition for Cortex-M0
- IAR visualSTATE evaluation edition, 20-state limitation
- Example applications made for the evaluation board from IAR Systems
- RTOS board support from the IAR RTOS partner program

OM13011 Kit Contents:
- MCB1200 Evaluation board
- ULINK-ME Debug adapter
- MDK-ARM (evaluation version)
- MDK-ARM Evaluation Tools
- ULINK-ME

LPC1227 Evaluation Board lets you get up-and-running quickly in evaluating the performance and capability of the **LPC1227**. The **LPC1227** is specifically designed with flexibility and customization in mind, making it particularly suitable for a wide variety of energy-efficient system and power management requirements. The **LPC1200** series offers a wide range of Flash memory sizes, spanning 32KB to 128KB in 8KB increments. The LPC1227 evaluation board is available with either IAR or Keil tools.

Mfg. Part No.	Description	Stock No.	Price Each
● OM13011,598	IAR LPC1200 KSK with J-link Lite	46W5433	176.07
● OM13013,598	Keil LPC1200 Eval board	46W5435	198.07

(210288)

KEIL LPC1768 EVALUATION BOARD

RoHS Compliant Available

Features
- Color QVGA TFT LCD
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, and USB Host
- 2 CAN interfaces
- 2 Serial Ports
- SD/MMC Card Interface
- 5-position Joystick and push-button
- Analog Voltage Control for ACD Input
- Amplifier and Speaker
- Up to 70 GPIO
- Debug Interface Connectors

LPC1768 Evaluation Board lets you get up-and-running quickly in evaluating the performance and capability of the **LPC1768**. The **LPC1768** is developed with an extensive set of peripherals that allow for a broad array of designs and applications. The microcontroller, board, and accompanying features make it a great starting point for your next Cortex-M3 project. Populated with the **LPC1768** to demonstrate LPC176x features, the LPC1768 board allows the evaluation of the high level integration and low power consumption of the **LPC1768**.

Mfg. Part No.	Description	Stock No.	Price Each
● OM11032,598	LPC1768 evaluation board	72R6098	320.00

KEIL LPC1758 EVALUATION BOARD

RoHS Compliant Available

Features
- Color QVGA TFT LCD
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, and USB Host
- 2 CAN interfaces
- 2 Serial Ports
- SD/MMC Card Interface
- 5-position Joystick and push-button
- Analog Voltage Control for ACD Input
- Amplifier and Speaker
- Up to 70 GPIO
- Debug Interface Connectors

The Keil **LPC1758** Evaluation Board allows you to quickly and easily evaluate the LPC175x family of microcontrollers. The microcontroller, board, and accompanying features make it a great starting point for your next Cortex-M3 project. Populated with the **LPC1758** to demonstrate LPC175x features, the LPC1758 board allows the evaluation of the high level integration and low power consumption of the **LPC1758**. The **LPC1758** is developed with an extensive set of peripherals that allow for a broad array of designs and applications.

● OM11036,598	LPC1758 Evaluation board	72R6102	320.00

(210310)

KEIL LPC1343 EVALUATION BOARD

RoHS Compliant Available

Features
- Controller: LPC4330, 100 pin BGA
- PCB: 4-layer (86mm x 40mm, RoHS Compliant)
- Two LEDs
- One user switch and one reset switch
- Boot select switch
- 32Mb Quad SPI flash
- On board crystals for controller, RTC and audio codec
- On board Ethernet PHY, 50 MHz Oscillator and RJ45 connector with magnetics
- On board audio codec and audio jacks
- On board USB host power switch
- On board Micro SD card slot
- Two USB ports, one HS (High speed) port and one FS (Full Speed) port
- 10-pin cortex debug header
- Unused I/Os brought to a header

LPC4330-Xplorer features the dual-core LPC4330 cortex-M4/M0 microcontroller from NXP. It is bundled with a ULINK-ME debug adapter from Keil, as well as all needed USB cables, to enable development to get started quickly.

Mfg. Part No.	Description	Stock No.	Price Each
● OM13027,598	LPC4330-Xplorer development board	27W5660	66.25

(210311)

KEIL LPC1343 EVALUATION BOARD

RoHS Compliant Available

Features
- USB 2.0 Device
- Serial Interface
- Potentiometer for ADC Input
- Up to 42 GPIO
- 8 User LEDs + power
- 4 push-buttons (2 GPIO, ISP, & reset)
- Power via USB connector
- Debug Interface Connectors

Keil's **LPC1343** Evaluation Board lets you get up-and-running quickly in evaluating the superior performance and capability of the **LPC1343**. The **LPC1343** is developed with a highly flexible USB architecture featuring a high level of integration and low power consumption. The **LPC1343** includes on-chip USB drivers for mass storage class (MSC) and human interface device (HID).

Mfg. Part No.	Description	Stock No.	Price Each
● OM11039,598	LPC1343 Evaluation board	72R6105	160.00

(210313)

KEIL LPC1769 EVALUATION BOARD

RoHS Compliant Available

Features
- Color QVGA TFT LCD
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, and USB Host
- 2 CAN interfaces
- 2 Serial Ports
- SD/MMC Card Interface
- 5-position Joystick and push-button
- Analog Voltage Control for ACD Input
- Amplifier and Speaker
- Up to 70 GPIO
- Debug Interface Connectors

Keil's **LPC1769** Evaluation Board lets you get up-and-running quickly in evaluating the superior performance and capability of the LPC1769. The **LPC1769** is developed with an extensive set of peripherals that allow for a broad array of designs and applications.

CODE RED LPC4078 RDB BOARD

RoHS Compliant Available

Features
- 120 MHz ARM® Cortex-M4
- Floating point in hardware and DSP extensions
- 512 KB Flash
- 96 KB SRAM
- 4032 bytes EEPROM

An excellent platform for evaluating and developing with NXP's LPC40xx series microcontrollers. It features an on-board debug connection suitable for use with Red Suite or LPCXpresso IDE without need for additional debug probe, 20-pin 0.05" JTAG/SWD/ETM connector for use with external debug probe also provided and a suite of example applications, including an embedded web server, audio examples, and an SD-card filing system.

Mfg. Part No.	Description	Stock No.	Price Each
● 0M13038,598	Code Red LPC4078 Evaluation Board	46W5455	220.00

(210316)

EA ANDROID EVALUATION BOARD

RoHS Compliant Available

The Android™ Open Accessory Application Kit ("AOAA") kit from Embedded Artists lets you get up-and-running with AOA experiments immediately. It is a standalone platform for evaluation and prototyping electronic accessories for Google's Android operating system. The AOAA kit is also suitable for experimenting with CAN, Ethernet and RF networks.

Mfg. Part No.	Description	Stock No.	Price Each
● 0M13036,598	Android Open Accessory Application (AOAA) Kit	46W5454	99.04

(210317)

EA LPC11D14 EVALUATION BOARD

RoHS Compliant Available

Features
- All LPC11D14 pins are available on expansion connectors around the processor
- UART-to-USB bridge interface for LPC11D14 UART, with mini-B USB connector and proper ESD protection
- Flexible powering, with on-board 800mA 3.3V voltage regulator
- All LPC11D14 pins are available on connector
- mini-B USB connector
- SWD/JTAG connector
- LCD with 8 14-segment characters
- LM75 I2C temperature sensor
- Trimming potentiometer on analog input
- 4 capacitive sensors
- Onboard reset generation and reset push-button
- Push-button for enabling Bootloader mode of the LPC11D14
- Push-button for enabling start logic of the LPC11D14
- Push-button for wakeup logic of the LPC11D14
- Possibility to measure current consumption for LPC11D14 core, I/O and LCD controller parts individually
- LED on pin PIO0_7

EA's **LPC11C14** Evaluation Board lets you get up-and-running quickly in evaluating the superior performance and capability of the **LPC11D14**. The **LPC11D14** is designed for low-cost, low-power LCD-based applications. In contrast to typical segment LCD driver solutions today, the highly reliable NXP PCF8576D LCD driver, a wide LCD supply range from 2.5 V to 6.5 V making the LPC11D00 series an ideal choice for interfacing with both low threshold and high-threshold LCDs. The integrated PCF8576D increases system reliability and quality, reduces electrical interconnect and compatibility issues while incorporating key features such as on-chip display RAM and versatile blinking modes.

Mfg. Part No.	Description	Stock No.	Price Each
● 0M13023,598	LPC11D14 QuickStart Evaluation Board	46W5443	72.90

(210320)

LPC4088 DEVELOPER KIT

RoHS Compliant Available

Features
- NXP's ARM Cortex-M4 LPC4088 microcontroller in BGA package
- 32 MBit QSPI flash on SPIFI interface
- External FLASH memories: 128 MB NAND FLASH
- External data memory: 32 MB SDRAM
- 12 MHz crystal
- 32.768kHz RTC crystal
- 00/10M Ethernet PHY/interface based on SMSC LAN8720
- Onboard reset generation
- +3.3V only powering

Embedded Artists' **LPC4088** OEM Board lets you get up-and-running quickly. The small form factor OEM board offers many unique features that ease your learning curve and program development.

● 0M13029,598	LPC4088 Developer Kit	46W5448	273.73

(210323)

KEIL MCB4357 EVALUATION BOARD

RoHS Compliant Available

Features
- 204 MHz LPC4357 device with ARM Cortex-M4 processor and Cortex-M0 coprocessor (LBGA256)
- 136 KB On-Chip SRAM
- 1MB dual bank On-Chip Flash
- On-Board Memory
- Color QVGA TFT LCD with touchscreen
- 10/100 Ethernet Port
- High-speed USB 2.0 Host/Device/OTG interface
- Full-speed USB 2.0 Host/Device interface
- CAN interfaces
- Serial/UART Port
- MicroSD Card Interface
- 4 user push-buttons + reset
- Digital Temperature Sensor (I2C)
- Analog Voltage Control for ACD Input
- Audio CODEC
- Debug Interface Connectors

The Keil **MCB4357** Evaluation Board enables you to create and test working programs based on the LPC4300 family of Dual Core ARM Cortex™-M4/M0 devices. The **MCB4357** Evaluation Board and Starter Kit includes the MDK-ARM Lite Edition Tools. These tools help you get started writing programs and testing the microcontroller and its capabilities

(210329)

IAR LPC11A14 KSK W/ J-LINK LITE

RoHS Compliant Available

Features
- Mounted with LPC11A14 (Cortex-M0) device
- 32 kB flash, 8 kB SRAM, 4 kB EEPROM
- configurable analog/mixed-signal
- 50MHz CPU frequency
- Debug, user and communication interface
- 3-axis accelerometer
- Prototyping area

IAR KickStart Kit for NXP LPC11A14 contains all the necessary hardware and software and and allows you to design, integrate and test your applications. The IAR KickStart Kit for LPC11A14 mounted with LPC11A14 (Cortex-M0) device, 32 kB flash, 8 kB SRAM, 4 kB EEPROM; configurable analog/mixed-signal, 50MHz CPU frequency. The **LPC11A14** is an ARM Cortex-M0 based, low-cost 32-bit MCU family, designed for 8/16-bit microcontroller applications, offering performance, low power, simple instruction set and memory addressing together with reduced code size compared to existing 8/16-bit architectures. The LPC11Axx operate at CPU frequencies of up to 50 MHz.

LPC177x/178x EVALUATION BOARD MODULES

RoHS Compliant Available

0M13001 Kit Contents:
- One LPC1788 OEM Board
- One OEM Base Board
- One USB cable, type A to mini-B
- Headset with microphone
- Serial number that gives you access to the EA's support site for this product, which includes: User's Manual, LPC1788 OEM Board Datasheet, LPC1788 OEM Board Schematics, OEM Base Board Schematics, Links to datasheets for key components, Software examples

0M13020 Kit Contents:
- LPC1788-SK Evaluation Board
- IAR J-Link Lite for ARM
- IAR Embedded Workbench for ARM 32K limited edition
- IAR visualSTATE 20-state evaluation edition
- Example applications from IAR
- Example code from NXP
- RTOS board support

Embedded Artists' **LPC1788** Developer's Kit lets you get up-and-running quickly with the **LPC1788** OEM Board. The **LPC1788** OEM Board is equipped with NXP's Cortex-M3 based **LPC1788** microcontroller suitable for a wide range of applications that require advanced communication and high quality graphic displays. IAR's **LPC1788** Developer's Kit contains all the necessary hardware and software and and allows you to design, integrate and test your applications. The **LPC1788** Evaluation Board is equipped with the Cortex-M3 **LPC1788** microcontroller and is suitable for a wide range of applications that requires advanced communication and high quality graphic displays.

32-BIT ARM CORTEX-M4/M0 MICROCONTROLLERS

RoHS Compliant Available

Features

- 204 MHz, 32-bit ARM Cortex-M4
- 204 MHz, 32-bit ARM Cortex-M0 asymmetrical coprocessor
- Up to 1 MB Flash
- Up to 264 kB SRAM
- Two High-speed USB 2.0 interfaces (on-chip High-speed PHY)
- LCD Interface
- Ethernet MAC
- Unique Quad-SPI Flash Interface
- Unique State Configurable Timer Subsystem
- Unique Serial GPIO
- Up to 164 GPIO

LPC4300 Digital Signal Control (DSC) processors, bring high-performance signal processing capabilities within the reach of the typical MCU programmer. These DSC processors offer a high level of system integration, reducing system design cost and complexity, while simplifying the design cycle using a single tool chain. These products are an ideal single-chip solution for applications such as motor control, power conversion, audio, and communications. The **LPC4300 series** combines an ARM Cortex-M4 based digital signal controller with an ARM Cortex-M0 coprocessor designed for embedded applications requiring signal processing. The ARM Cortex-M4 core offers single-cycle Multiply-Accumulate and SIMD instructions and a hardware floating-point unit to support signal processing while the M0 coprocessor handles I/O and digital control processing.

RASPBERRY PI MINI COMPUTER

RoHS Compliant Available

Features

- Broadcom BCM2835 SoC (CPU, GPU, DSP, and SDRAM)
  CPU: 700 MHz ARM1176JZF-S core (ARM11 family)
  GPU: Broadcom VideoCore IV, OpenGL ES 2.0, 1080p30 h.264/MPEG-4 AVC high-profile decoder
- Memory (SDRAM): 512 Megabytes (MB)
- Video outputs: Composite RCA, HDMI
- Audio outputs: 3.5 mm jack, HDMI
- Onboard storage: SD, MMC, SDIO card slot
- 10/100 Ethernet RJ45 onboard network
- Storage via SD/ MMC/ SDIO card slot

Raspberry Pi is a low-cost small form factor mini computer intended for students to learning programing. This system capable of many functions as standard PC like spreadsheets, word-processing, games and video playback in full HD. Extremely low-cost, the unit can function with only the addition of a screen, keyboard, mouse and memory card.

STM32F4 HIGH-PERFORMANCE DISCOVERY BOARD

RoHS Compliant Available

element14

Features

- STM32F407VGT6 MCU featuring 32-bit ARM Cortex-M4F core
- On-board ST-LINK/V2 with selection mode switch to use as a standalone ST-LINK/V2
- Board powered through USB bus or ext 5V supply
- LIS302DL, motion sensor, 3-axis digital output accelerometer
- MP45DT02, audio sensor, omni-directional digital microphone
- CS43L22, audio DAC with integrated class D speaker driver
- Eight LEDs
- Two push buttons (user and reset)
- USB OTG FS with micro-AB connector
- Extension header for all LQFP100 I/Os

STM32F4DISCOVERY helps you to discover the STM32F4 high-performance features and to develop your applications easily. It includes everything required for beginners and experienced users to get started quickly.

(200546)

STM32 VALUE LINE DISCOVERY KIT

RoHS Compliant Available

Features

- 128 KB Flash, 8 KB RAM in 64-pin LQFP MCU
- On-board ST-Link with selection mode switch
- Can be powered by USB or an external supply of 5 V or 3.3 V
- Can supply target application with 5 V and 3 V
- Two user LEDs (green and blue)
- One user push button
- Extension header for all QFP64 I/Os

STM32VLDISCOVERY is a low-cost and quick way to discover the STM32 value line. It includes everything required for beginners and experienced users to get started quickly. The STM32 value line Discovery includes an STM32F100 value line microcontroller in a 64-pin LQFP and an incircuit ST-Link debugger / programmer to debug Discovery applications and other target board applications. A large number of free ready-to-run application firmware examples are available on www.st.com/stm32-discovery to support quick evaluation and development using the LEDs, button and extension header for connection to other boards or devices.

STM32 F1 SERIES MCUs FOR MAINSTREAM APPLICATIONS

RoHS Compliant Available

STM32 F1 is a series of mainstream MCUs based on the ARM Cortex™-M3 core - a core specifically developed for 32-bit embedded applications and offers many degrees of freedom by combining high-performance, real-time, low-power and low-voltage operation, while maintaining full integration and ease of development and covering the needs of a large variety of applications in the industrial, medical and consumer markets. The series consists of product lines which are pin-to-pin, peripheral and software compatible.

VALUE LINE - 24MHZ CPU WITH MOTOR CONTROL AND CEC FUNCTIONS

STM32 F2 HIGH PERFORMANCE SERIES OF MCUs

RoHS Compliant Available

STM32 F2 series of high-performance microcontrollers are ARM® Cortex™-M3 based and is built on an advanced 90 nm NVM process technology with the innovative adaptive real-time memory accelerator (ART Accelerator™) and the multi-layer bus matrix. This series is characterized by a high degree of integration combining high density Flash memory and SRAM with communications peripherals, hardware encryption and external memory support. ART Accelerator technology enables these MCUs to achieve up to 150 DMIPS at 120 MHz FCPU which is equivalent to zero wait state execution, while keeping the dynamic current consumption at the outstandingly low level of 188 µA/MHz.

STM32 F4 HIGH PERFORMANCE SERIES OF MCUs w/ DSP AND FPU

RoHS Compliant Available

STM32 F4 series of high-performance devices combine the real-time control capabilities of an MCU and the signal processing performance of a DSP into a class of digital signal controller (DSC) devices complementing the STM32 portfolio of microcontrollers. Based on a ARM® Cortex™-M4 core with DSP instructions and a floating point unit, they feature more SRAM, peripheral improvements such as full duplex PS, improved RTC and faster ADCs. Like the STM32 F2 series, they leverage an advanced 90 nm NVM process and ART Accelerator™ technology to reach the highest benchmark scores for Cortex-M-based microcontrollers and remains pin-to-pin and software compatible with the STM32 F2 series.

SITARA ARM CORTEX-A8 PROCESSORS

RoHS Compliant Available

TEXAS INSTRUMENTS

Features

- Low-cost solutions
- High-level operating systems and RTOS support
- Production-ready reference platforms
- Large 3P ecosystem for support and additional resources
- Comprehensive integration
- Software and hardware enablement
- Advanced 3D graphics acceleration
- Flexible communications interfaces
- Robust display options

Sitara ARM Cortex-A8 processors offer power and cost optimized solutions that go beyond the core, delivering a broad portfolio of ARM Cortex-A8 devices that help innovators create a variety feature-rich, low-power applications. With the ability to scale in speed from 275MHz to 1.35GHz, the ARM Cortex-A8 processor can meet the requirements for power optimized devices with a power budget of less than 300mW and enables performance-optimized consumer applications requiring greater than 2500 Dhrystone MIPS. Compared to the ARM11 core, the Cortex-A8 processor is a dual-issue superscalar, achieving twice the instructions executed per clock cycle at 2 DMIPS/MHz.

BEAGLEBONE CAPES

RoHS Compliant Available

TEXAS INSTRUMENTS

BeagleBone Capes are add on boards that can be connected to the BeagleBone to add functionality. BeagleBone is a bare-bones BeagleBoard that acts as a USB or Ethernet connected expansion companion for your current BeagleBoard and BeagleBoard-xM or works stand-alone. The BeagleBone brings full-featured Linux to places it has never gone before.

TMS320F28335 EZDSP STARTER KIT

TEXAS INSTRUMENTS

Features

- TMS320F28335 Floating-Point Digital Signal Controller(DSC)
  150 MHz operation
  512 KB on-chip flash memory
  68 KB on-chip RAM
  12-bit ADC with 16 input channels
- 128k x 16 off-chip SRAM
- Clamshell socket for the F28335 DSC
- RS-232 interface with on-board transceiver and 9-pin DSUB connector
- CAN interface with on-board transceiver and 9-pin DSUB connector
- Multiple expansion connectors provide access to all F28335 I/O signals
- Embedded USB JTAG Controller
- Operates from a single 5V supply with provided AC adapter
- IEEE 1149.1 JTAG emulation connector
- Code Composer Studio™ Integrated Development Environment for C2000 including C compiler, assembler, linker, real-time debug support, data visualization, a profiler and a flexible project manager.
- eZdsp diagnostic software, including test examples for UART, CAN, I2C, and memory
- Texas Instruments' Flash APIs to support the F28335
- Texas Instruments' F28335 header files and example software

Kit Contents

- Code Composer Studio v3.3 for C2000, eZdsp diagnostic software, and code examples on CD
- Quick Start Guide
- Target board for the F28335 DSC
- Technical Reference Manual
- USB Cable
- Universal 5v power supply w/ power cord

The **F28335** eZdsp starter kit is a complete software development platform for the **TMS320F2833x** series of floating-point Digital Signal Controllers. The eZdsp kit includes an **F28335** target board that features integrated JTAG emulation, 128Kx16 asynchronous SRAM, CAN 2.0 and RS-232 interfaces, and expansion headers that provide access to all **F28335** I/O signals. Also included in the kit is the Code Composer Studio™ Integrated Development Environment, USB interface to the host PC, and a universal power supply.

C2000 PICCOLO LAUNCHPAD

TEXAS INSTRUMENTS

Features:

- Pre-programmed C2000 Piccolo F28027 MCU
- Built in isolated XDS100 JTAG Emulator enables real-time in-system programming and debugging via USB
- CPU reset button and programmable push button
- Enables development on any Piccolo F2802x device
- Free unrestricted version of Code Composer Studio integrated development environment (IDE) v5
- Free download of controlSUITE™ software with examples, libraries, application software and more

Kit Contents:

- C2000 Piccolo LaunchPad Evaluation Board (LAUNCHXL-F28027)
- Mini USB Cable
- Quick Start Guide

C2000 Piccolo LaunchPad evaluation kit, based on the F28027 microcontroller (MCU), is a modular, quick-launch evaluation kit that contains device, emulation and software to explore the latest digital control techniques in areas such as power, lighting and motor control.

C2000 LED BOOSTERPACK FOR PICCOLO LAUNCHPAD

TEXAS INSTRUMENTS

Features:

- 3 Booster Converters
- 8 RGB LEDs
- MSP430 Capacitive Touch Interface

Kit Contents:

- LED BoosterPack
- Power Supply
- Quick Start Guide

C2000 LED BoosterPack demonstrates the control of 3 boost converters to drive 3 LED (Red, Green, and Blue) strings. A variety of user interface options are provided included capacitive touch control using an MSP430 and the MSP430 Cap Touch BoosterPack (430BOOST-SENSE1), as well as, a PC GUI application. This boosterpack is ideal to learn about real time digital control techniques and LED lighting. This kit requires a C2000 LaunchPad to function as intended.

Piccolo™ SERIES MICROCONTROLLERS

RoHS Compliant Available

Texas Instruments

Features
- 32-bit, fixed-point C28x™ core
- 60 to 100 MIPS operation
- 1.8-V core and 3.3-V peripherals
- Easy-to-use software and development tools speed time-to-market

Applications
- Digital motor control
- Digital industrial power supplies
- Advanced sensing in industrial

Piccolo™ family of microcontrollers provide the power of the C28x™ core coupled with highly integrated control peripherals in low pincount devices. This family is code compatible with previous C28-based code, as well as providing the highest level of analog integration to date for the C28x family.

C2000™ MICROCONTROLLERS

RoHS Compliant Available

Texas Instruments

Applications
- Digital motor control
- Digital power supplies
- Intelligent sensors

The TMS320C2000™ Platform of real-time signal processing controllers combines the control peripheral integration and ease of use of a microcontroller (MCU) with the processing power and C efficiency of TI's leading DSP technology. This makes them ideal for embedded industrial applications. Supply Voltage Max: 3.3V

WL1271 WI-FI AND BLUETOOTH DAUGHTER CARD FOR EVMs WITH COM CONNECTOR

Texas Instruments

Features:
- IEEE 802.11 b/g/n Wi-Fi
- v4.0 with Bluetooth Low Energy (BLE)
- On module 38.4MHz Reference Oscillator, DC-DC Voltage Regulation, and U.FL Coaxial
- Hardware and Linux/Android Software Pre-integration With TI's DM814x/AM387x, AM335x and other Evaluation Modules
- Software Upgradable for ANT
- FCC/IC/ETSI Certified

The **Wi-Fi and BlueTooth ®** daughter card for the AM335x EVM (TMDXEVM3358) is a combo wireless connectivity add-on card, based on the Murata Type-TN Module (WL1271-TYPETN) with Texas Instruments WiLink 6.0 (WL1271) solution.

Mfg. Part No.	Description	Stock No.	Price Each
TMDXWL1271COM6M	Daughter card for the AM335x EVM	95T1064	80.01

SAMA5D3 SERIES 32-BIT MPU

NEW

RoHS Compliant Available

Atmel

The **SAMA5D3** series is a high-performance, power-efficient embedded MPU based on the ARM® Cortex®-A5 processor, achieving 536 MHz with power consumption levels below 0.5 mW in low-power mode. The device features a floating point unit for high-precision computing and accelerated data processing, and a high data bandwidth architecture. It integrates advanced user interface and connectivity peripherals and security features.

Mfg. Part No.	SRAM	Embedded Interface Type	Pkg.	Stock No.	Price Each 1-9

I.MX28 EVALUATION KIT

RoHS Compliant Available

freescale

Features
- i.MX287 Applications Processor
- DDR2 memory
- DC/DC Converter components
- 4.3" WVGA Touchscreen LCD Display (add-on module)
- Navigation keys
- NAND socket—48 pin TSOP package
- Debug Serial Port
- JTAG

Applications
- Consumer
- Industrial
- Automotive

i.MX28 evaluation kit (EVK) offers developers a price effective platform to ultimately develop, debug and demonstrate the personality of their next great product without compromising performance. The EVK supports all the features of the i.MX28 Family in a small, single-board design. An optional LCD add-on module is available to enable developers with a complete development platform at a low price point.

Mfg. Part No.	Description	Stock No.	Price Each
MCIMX28EVK	i.MX28 Evaluation Kit	87R1026	399.00
MCIMX28LCD	Touch LCD Option 4.3" 800x600	84R7256	199.00

(196437)

I.MX51 APPLICATIONS PROCESSOR EVALUATION KIT (EVK)

RoHS Compliant Available

freescale

Features:
- i.MX51 Applications Processor (529 BGA)
- Audio In/Out connectors
- 2 SD/MMC Card Slots
- USB Host x2 / USB OTG x1
- Ethernet Port
- Mini PCI express
- SATA HDD connector
- SIM Card connector
- USB Camera connector
- RGB output through DVI-I connector
- Expansion Header
- Ambient light sensor footprint
- FM receiver footprint
- Debug Serial Port
- JTAG
- Power Measurement Header

The **i.MX51 evaluation kit** enables the cost-effective development, debug and demonstration of the i.MX51 ARM Cortex-A8 core processor. The i.MX51 EVK delivers extreme performance and provides long battery life helping developers design products that meet today's demands for energy efficiency. A range of connectivity options makes the i.MX51 EVK suitable for developing many different types of user applications. The i.MX51 EVK has two optional add-on modules; an LCD and an expansion board.

Mfg. Part No.	Description	Stock No.	Price Each
MCIMX51EVKJ	I.MX51, USB HOST/OTG, LCD DISPLAY, JTAG, EVAL KIT	29R0561	699.00
MCIMX51LCD	LCD MODULE, I.MX51, W / RESISTIVE TOUCHSCREEN	52R7576	250.00

(176049)

I.MX53 QUICK START BOARD

RoHS Compliant Available

freescale

Features
- i.MX53 1 GHz ARM Cortex-A8 Processor
- 1 GB DDR3 memory
- VGA connector
- SPDIF output via HDMI add-on card
- Freescale SGTL5000 audio codec
- Enables parallel LCD or HDMI output
- Full-size SD/MMC card slot
- 7-pin SATA data connector
- Two High-Speed USB host ports
- JTAG connector
- 3-axis Freescale accelerometer

Contents
- i.MX53 1 GHz ARM Cortex-A8 processor
- 4 GB microSD card with Linux image
- 5V power supply with worldwide adapters
- Micro USB cable
- Quick Start Guide
- DVD with VMware player, getting started video, demos and other documents

i.MX53 Quick Start board is a open source development platform integrated with an ARM® CortexTM™-A8 1 GHz processor. The Quick Start board includes a display controller, hardware-accelerated graphics, 1080p video decode and 720p encode as well as numerous connectivity options ideally suited for applications such as human machine interface in embedded consumer, industrial and medical markets. Can be used with the i.MX28 LCD module (MCIMX28LCD) to create a low cost development platform.

BEAGLE BOARD XM

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- Super-scalar ARM Cortex-A8
- 512-MB LPDDR RAM
- USB 2.0 OTG port optionally powers the board
- Four-port USB 2.0 hub w/ 10/100 Ethernet
- DVI-D (digital computer monitors and HDTVs)
- S-video (TV out)
- Stereo audio out/in
- microSD slot and 4-GB microSD card
- JTAG
- Camera port

Kit contents
- BeagleBoard
- uSD card
- uSD Card to MMC Adapter

BeagleBoard-xM delivers extra ARM® Cortex TM -A8 MHz now at 1 GHz and extra memory with 512MB of low-power DDR RAM, enabling hobbyists, innovators and engineers to go beyond their current imagination and be inspired by the BeagleBoard.org community. Designed with the community inputs in mind, this open hardware design improves upon the laptop-like performance and expandability, while keeping at hand-held power levels. Direct connectivity is supported by the on-board four-port hub with 10/100 Ethernet, while maintaining a tiny 3.25" × 3.25" footprint.

CRANE BOARD FEATURING AM3517 Sitara ARM Cortex-A8

TEXAS INSTRUMENTS

Features
- AM3517 Sitara ARM Cortex-A8 – 600MHz
- Integrated 3D Graphics Accelerator
- Support for on-chip peripherals like 10/100 EMAC, USB OTG, 3.3V I/O, CAN, and DDR2
- Power over Ethernet and other power options including USB and DC
- Fully open-source four-layer PCB
- Fully Open Source Linux Board Support package (2.6.32)
- Based on existing AM3517 Sitara ARM evaluation module (EVM) software
- All software available via GIT
- Arago File System
- Flashing tool and board diagnostics
- Ethernet / Power Over Ethernet (POE) utilizing on-processor 10/100 EMAC
- DVI-D (HDMI Connector)
- RS-232
- JTAG
- TV Out (CVBS)
- Expansion

CraneBoard is a low-cost, open-source hardware development platform based on the AM3517 Sitara™ ARM® Cortex™-A8 microprocessor. The CraneBoard provides robust processor performance while delivering integrated peripherals not found on existing low-cost development boards.

BLACKFIN® SERIES DEVELOPMENT TOOLS

RoHS Compliant Available

ANALOG DEVICES

BLACKFIN® development tools feature an RS-232 interface, I/O and Memory Expansion Ports as well as an evaluation suite of Visual DSP++ software. The ADSP-BF537 STAMP board support package has been specifically designed to support the development and porting of open source uClinux applications, while maintaining the same functionality as other BLACKFIN® boards.

The ADSP-BF548 EZ-KIT Lite® provides developers with a cost-effective method for initial evaluation of the ADSP-BF54x Blackfin® Processors via a USB-based, PC-hosted tool set. With this EZ-KIT Lite, users can learn more about the Analog Devices ADSP-BF548 hardware and software development, and quickly prototype a wide range of applications. The EZ-KIT Lite includes an ADSP-BF548 Blackfin Processor desktop evaluation board along with an evaluation suite of the VisualDSP++® development and debugging environment, including the C/C++ compiler, assembler, and linker. The evaluation suite of VisualDSP++ is designed to be used with the EZ-KIT Lite only.

ADSP-BF537 BLACKFIN® EZ-KIT LITE EVALUATION KIT

RoHS Compliant Available

ANALOG DEVICES

Features
- ADSP-BF537 Blackfin® Processor
- Max. core clock rate of 600MHz
- 64 MB (32M x 16) SDRAM
- 4 MB (2M x 16) FLASH memory
- SMSC LAN83C185 10/100 PHY w/ RJ45 connector
- CAN TJA1041 transceiver w/ 2 RJ10 connectors
- AD1871 96 KHz stereo ADC w/ ⅛"Jack Connector
- AD1854 96 KHz stereo DAC w/ ⅛" Jack Connector
- RS-232 UART line driver/receiver
- National Instruments Educational Laboratory Virtual Instrumentation Suite (NI ELVIS) interface

Kit Contents
- ADSP-BF537 processor desktop evaluation board
- Evaluation suite of the VisualDSP++® development and debugging environment
- Sample processor application programs
- CE-approved power supply
- USB cable
- Straight through and cross-over Ethernet cables
- 3.5mm stereo cable
- Pair of stereo headphones

The ADSP-BF537 EZ-KIT Lite® provides developers with a cost-effective method for evaluation of the ADSP-BF537 Blackfin® processor and its rich set of system peripherals, including the IEEE 802.3 10/100 Ethernet MAC and CAN 2.0B controller. A TCP/IP stack with integrated device driver and example code is provided in VisualDSP++ release 4.0. Additionally, the ADSP-BF537 EZ-KIT Lite contains the National Instruments Educational Laboratory Virtual Instrumentation Suite (ELVIS) interface which allows the use of the DC voltage and current measurement modules, oscilloscope and bode analyzer modules, function generator, arbitrary waveform generator and digital I/O.

EZ-KIT LITE EVALUATION KIT FOR ADSP-218x PROCESSOR FAMILY

RoHS Compliant Available

ANALOG DEVICES

The **ADSP-2189M EZ-KIT Lite** provides developers with a cost-effective method for initial evaluation of the powerful ADSP-218x DSP family architecture. Includes a stand-alone ADSP-2189M DSP board and fundamental code generation debug software. With this EZ-KIT Lite, users can learn about DSP hardware and software development and evaluate potential applications of the ADSP-218X M family of DSPs. Provides an evaluation suite of the VisualDSP++ development environment with the C compiler, assembler, and linker. All software tools are limited to use with the EZ-KIT Lite product.

BLACKFIN EMULATOR

RoHS Compliant Available

ANALOG DEVICES

Features

- 5MHz JTAG TCLK frequency
- Support ONLY ADI Blackfin processors
- USB 2.0 interface enabling download speeds of up to 255 KB/sec
- 1.8V, 2.5V, and 3.3V compliant and tolerant
- Multiprocessor support
- IEEE 1149.1 14-pin JTAG connector
- PlugFest Certified USB Bus-powered design
- CE-certified
- ROHS Compliant
- Solder points for attaching a wire to reset the target board

ADZS-ICE-100B is an easy, portable, nonintrusive, target-based debugging solution that facilitates communication with Blackfin processors using a high speed USB 2.0 port on the host PC. The emulator performs a wide range of emulation functions, including single-step and full-speed execution with predefined breakpoints, and viewing and/or altering of register and memory contents. Applications and data can easily and rapidly be tested and transferred between the emulator and the separately available VisualDSP++ development and debugging environment(sold separately).

C5000™ POWER-EFFICIENT DSPs

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications

- Digital music players
- VoIP
- Hands-free accessories
- GPS receivers
- Portable medical equipment

The **TMS320C5000™** DSP platform is optimized for personal and portable products by offering the industry's lowest standby power and advanced automatic power management. **TMS320C54x™** DSPs provide a broad range of performance and peripheral options for personal and portable communications systems. **TMS320C55x™** DSPs feature advanced power management techniques which automatically power down inactive peripherals, memory and core functional units increasing battery life. Also included are the OMAP™ devices with low-power, real-time signal processing coupled with the command and control functionality of an ARM. Power dissipation: 40mW @ 50MHz.

TMS320C67x DSP STARTER KITS

TEXAS INSTRUMENTS

Hardware Included:
- C6713 DSP Development Board with 512K Flash and 8MB SDRAM
- C6713 DSK Code Composer Studio™ v2.2 IDE including the Fast Simulators and access to Analysis Toolkit on Update Advisor
- Quick Start Guide
- Technical Reference
- Customer Support Guide
- USB Cable
- Universal Power Supply
- AC Power Cord(s)
- MATLAB from The Mathworks 30 day free evaluation
- Ordering Information: TMDSDSK6713 includes a standard US power cord, TMDSDSK6713-0E version includes both UK & European power cords

The DSK features the **TMS320C6713** DSP, a 225 MHz device delivering up to 1800 million instructions per second (MIPs) and 1350 MFLOPS. This DSP generation is designed for applications that require high precision accuracy. The **C6713** is based on the **TMS320C6700** DSP platform designed to needs of high-performing high-precision applications such as pro-audio, medical and diagnostic. Other hardware features of the **TMS320C6713** DSK board include: Embedded JTAG support via USB ,high-quality 24-bit stereo codec, four 3.5mm audio jacks for microphone, line in, speaker and line out, 512K words of Flash and 8 MB SDRAM, expansion port connector for plug-in modules, on-board standard IEEE JTAG interface +5V universal power supply .

CYCLONE IV INDUSTRIAL NETWORKING KIT (INK)

terasIC www.terasic.com

Kit Contents
- Altera DE2-115 Board
- Terasic industrial communications board
- USB programming cable
- Power DC adapter 12V / 2A
- Altera complete design suite DVD
- INK system CD
- Remote controller
- Black and red wire strips
- Two single pin headers
- Six silicon footstands

The **Industrial Networking Kit** (INK) offers a comprehensive development platform for industrial communications and automation applications. The kit consists of the DE2-115 board featuring the Altera Cyclone® IV device and an Industrial Communications Board (ICB-HSMC) that supports RS-485, RS-232, CAN, and additional I/O expansion. The INK gives industrial equipment designers greater flexibility in implementing real-time Ethernet communications with the availability of Industrial Ethernet IP cores.

DE0-NANO CYCLONE IV DEVELOPMENT BOARD

RoHS Compliant Available

terasIC www.terasic.com

Features
- Featured device
- Altera Cyclone® IV EP4CE22F17C6N FPGA w/ 153 maximum I/O pins
- On-board USB-Blaster circuit for programming
- EPCS16 serial configuration device
- 72 I/O pins, 5V, 3.3V power pins and GND pins on 2x 40-pin GPIO headers
- 32MB SDRAM
- 2Kb I2C EEPROM
- 8 green LEDs
- 2 debounced pushbuttons
- 4-position DIP switch
- 3-axis accelerometer with high resolution (13-bit)
- 8-Channel, 12-bit, 50 Ksps to 200 Ksps ADC
- On-board 50MHz clock oscillator

Kit Contents
- DE0-Nano Board
- USB Mini-B Cable
- DE0-Nano system CD
- Altera Design Suite CD
- DE0-Nano Quick Start Guide

DE0-Nano board is a compact-sized development platform featuring a powerful Altera Cyclone IV FPGA with 22,320 logic elements that is suited for to a wide range of portable design projects, such as robots and mobile projects. The DE0-Nano board includes a built-in USB Blaster for FPGA programming, and the board can be powered either from this USB port or by an external power source. The board includes expansion headers that can be used to attach various Terasic daughter cards or other devices, such as motors and actuators.

NANOBOARD 3000

Altium

Features
- Rich IO capabilities including TFT touch screen, USB Hub connections for up to three devices, SPDIF, tri-color LEDs, ADCs/DACs, and high current drivers
- On-board user FPGA device
- Peripheral board expansion slot for additional system flexibility
- Inbuilt configuration memory for standalone deployment
- Prototyping area
- Includes Altium Designer 12 month Soft Design (Hardware linked) license complete with royalty free 32-bit soft processors, peripherals, source code libraries, C-compilers, debuggers and embedded instruments.

NanoBoard 3000 provides the perfect entry-point to explore the world of soft design in a low-cost, fun way. The NanoBoard 3000 makes it easy to harness the power of high-capacity, low-cost programmable devices and a range of peripherals without having to build your own hardware. Explore your ideas in this live development environment that together with Altium's software, provides you with rapid and interactive implementation/debugging capabilities.

DESKTOP NANOBOARD NB2

Altium

Features
- Supports daughter boards for Actel, Altera, Lattice, and Xilinx devices
- Expansion slots for up to 3 peripheral boards.
- QVGA TFT touchscreen, PS2, Can, RS232, PS/2 and Analog IO.
- Live Voltage/Current monitoring to all major sub-systems.
- Complemented by Altium Designer's royalty free processors, peripherals, source code libraries, C-compilers, debuggers and embedded instruments
- Includes Altium Designer 12 month Soft Design (Hardware linked) license complete with royalty free 32-bit soft processors, peripherals, source code libraries, C-compilers, debuggers and embedded instruments

Desktop **NanoBoard NB2** is a unique, reconfigurable hardware platform that harnesses the power of today's programmable devices so that next generation products can be developed, implemented, tested and brought to market faster than ever before. Have the freedom to explore the complex design and device trade-offs, moving functionality between hardware and software at will, and rapidly develop systems within a graphical drag-and-drop, plug-and-play environment. Target devices are housed on plug-in swappable daughter boards supported by Altium's software providing you with a truly device and vendor-independent development solution.

SPLD DEVICES

RoHS Compliant Available

Atmel

Features

- Industry-standard Architecture
- High speed Electrically-Erasable Programmable Logic Devices (EE PLD)
- CMOS and TTL compatible inputs and outputs
- Advanced Flash Technology
- High-reliability CMOS Process
- Commercial and Industrial Temperature Ranges

SPLD products consist of industry standard 16V8, 20V8 and 22V10s in a variety of voltage and power-saving options. Offering low-voltage, zero-power and quarter power versions as well as our proprietary "L" automatic power down low-power devices. All versions are EE-based for high-reliability and easy re-programming and are supported by all popular third party programmers.

SPLD-INDUSTRY STANDARD ULTRA LOW POWER

ATF15XX FAMILY CPLD DEVICES - INDUSTRY STANDARD COMPATIBLE

RoHS Compliant Available

Atmel

FEATURES

- Logic Doubling™
- Programmable SCHMITT Trigger
- Programmable Pin Keeper circuit enables Bus interfacing
- Programmable Pull Up
- 100,000 Program/Erase cycles

ATF15xxBE family of CPLDs are designed for applications that require ultra low power, blazing speed and operate at low voltages. They are also a pin compatible replacement for Xilinx CPLDs. The **ATF15xxAS/ASL/ASV/ASVL CPLD family** offers pin-compatible supersets of the popular Altera 7000 and 3000 series devices ranging from 32 to 128 macrocells with propagation delays from 7.5 to 15 ns for 5V standard power versions and 15 ns for 3.3V versions. Proprietary low-power ("L") versions use Input Transition Detection (ITD) to power down the device automatically when nothing is switching. All devices also support JTAG in-system programming (ISP).

CPLD DEVICES - PROPRIETARY

RoHS Compliant Available

Atmel

FEATURES

- ATF750C/CL: Advanced, High-speed
- ATF2500C: High-performance, High-density
- D- or T-type Flip-flop
- Product Term or Direct Input Pin Clocking
- Advanced Electrically-erasable Technology
- Flexible Design

ATF750C has twice the logic of a standard 22V10 in a pin-out compatible 24- or 28-pin package and is ideal for those 22V10 designs that need a bit more logic than is offered in a 22V10 device, but need to maintain the 22V10 pin-out. The **ATF2500C** is a very high-density (2500 usable gates) 44-pin CPLD, ideally suitable for the most difficult 44-pin designs and has replaced the ATV2500B/BQ/BQL/BL in commercial, industrial and military temperature grade offerings.

MACHXO FAMILY OF NON-VOLATILE, INFINITELY RECONFIGURABLE PLDS

RoHS Compliant Available

LATTICE SEMICONDUCTOR

MachXO family of non-volatile, infinitely reconfigurable Programmable Logic Devices (PLDs) is designed for applications traditionally implemented using CPLDs or low-density FPGAs. Widely adopted in a broad range of applications that require general purpose I/O expansion, interface bridging and power-up management functions, MachXO PLDs offer the benefits of increased system integration by providing embedded memory, built-in PLLs, high performance LVDS I/O, remote field upgrade (TransFRTM technology) and a low power sleep mode, all in a single, low-cost device.

MACHXO2 FAMILY OF NON-VOLATILE INFINITELY RECONFIGURABLE PLDS

RoHS Compliant Available

LATTICE SEMICONDUCTOR

MachXO2™ family of non-volatile, single chip reprogrammable FPGAs is optimized for applications that require the highest number of feature rich I/O for I/O expansion applications. Plus, with an on-chip regulator, embedded Flash and hard IP, MachXO2 devices are ideally suited for instant-on multi-voltage system control functionality. Combining an optimized SRAM based look-up table (LUT) architecture together with embedded Flash technology, the affordable MachXO2 family is the industry's most feature rich, ultra low density FPGAs for cost-sensitive system designs. MachXO2 FPGAs are available in three options: high performance (HC, HE) and low power (ZE).

ICEBLINK40-HX1K EVALUATION KIT

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- High-performance, low-power iCE40HX1K FPGA in 100-TQFP
- USB programming, debugging, virtual I/O functions, and power supply
- Four user LEDs
- Four capacitive-touch buttons
- 3.3 MHz clock source
- 1Mbit SPI serial configuration PROM
- Supported by Lattice iCEcube2 design software
- 68 LVCMOS/LVTTL (3.3V) digital I/O connections on 0.1" through-hole connections
- Supports third-party I/O expansion boards and modules; like 3.3V Arduino Shield boards (requires additional sockets, not supplied)

Kit contents
- iCEblink40 HX1K Board
- USB Mini Cable for power & programming
- QuickStart Guide

iCEblink40-HX1K Evaluation Kit is a low-cost platform for evaluating and developing with the low-power iCE40HX1K FPGA. The board provides access to general-purpose I/O and includes capacitive-touch buttons and LEDs. The board is powered and programmed via USB. An on-board microcontroller enables 2-way communication with the iCE40HX1K FPGA.

Mfg. Part No.	Description	Stock No.	Price Each Each
ICE40HX1K-BLINK-EVN	iCEblink40-HX1K Evaluation Kit	48W5876	34.94

(210357)

ICEBLINK40-LP1K EVALUATION KIT

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- Low power, small Footprint iCE40LP1K FPGA in 84-pin QFNS package
- USB programming, debugging, virtual I/O functions, and power supply
- Four user LEDs
- Four capacitive-touch buttons
- 3.3 MHz clock source
- 1Mbit SPI serial configuration PROM
- Supported by Lattice iCEcube2 design software
- 63 LVCMOS/LVTTL (3.3V) digital I/O connections on 0.1" through-hole connections
- Supports third-party I/O expansion boards and modules, including 3.3V Arduino Shield boards (requires additional sockets, not supplied)

Kit contents
- iCEblink40 LP1K Board
- USB Mini Cable for power & programming
- QuickStart Guide

iCEblink40-LP1K Evaluation Kit is a low-cost platform for evaluating and developing with the low-power iCE40LP1K FPGA. The board provides access to general-purpose I/O and includes capacitive-touch buttons and LEDs. The board is powered and programmed via USB. An on-board microcontroller enables 2-way communication with the iCE40LP1K FPGA.

MACHX02280 BREAKOUT BOARD EVALUATION KIT

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- MachX02280 PLD (LCMX02280C-3FTN256C)
- USB mini-B connector for power and programming
- Eight LEDs
- 40-hole prototype area
- Eight 2x20 expansion header landings for general I/O, JTAG, and external power
- 1x8 expansion header landing for JTAG
- 3.3V supply rail

Kit contents
- MachX02 Breakout Board
- USB Connector Cable

MACHX02280 Breakout board includes a pre-loaded counter design that highlights use of the embedded MachX02 oscillator and programmable I/Os configured for LED drive.

Mfg. Part No.	Description	Stock No.	Price Each Each
LCMX02280C-B-EVN	MACHX02280 Breakout board	48W6158	26.87

ICESTICK EVALUATION KIT

RoHS Compliant Available

LATTICE SEMICONDUCTOR

NEW

Features
- USB thumb drive form factor
- iCE40HX-1k on board
- 2 x 6 position Digilent Pmod™ connector for other peripheral connections
- FTDI 2232H USB device allows iCE device programming and UART interface to a PC
- Vishay TFDU4101 IrDA transceiver
- Five user LEDs
- Discera 12 Mhz MEMS oscillator
- Micron 32 Mbit N25Q32 SPI flash
- USB connector provides the power supply
- 16 LVCMOS/LVTTL (3.3 V) digital I/O connections on 0.1" through-hole connections

Mfg. Part No.	Description	Stock No.	Price Each 1-4
ICE40HX1K-STICK-EVN	ICESTICK EVALUATION KIT	07X1682	29.05

(212473)

LATTICEECP3 FPGA FAMILY

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- Low Power process
- Optimized FPGA Architecture
- Cascadable sysDSP™ With ALU
- High Speed Embedded SERDES
- Flexible sysIO™ Buffers

LatticeECP3 family is the third generation high value FPGA offering multi-protocol 3.2G SERDES with XAUI jitter compliance, DDR3 memory interfaces, powerful DSP capabilities and high density on-chip memory, all at a lower with half the power consumption and half the price of competitive SERDES-capable FPGAs.

ICE40 ULTRA LOW DENSITY NON-VOLATILE FPGAS

RoHS Compliant Available

LATTICE SEMICONDUCTOR

iCE40™ family of FPGAs is designed for applications that have the most aggressive power, cost and footprint requirements. Ideally architected for smartphones, tablets, digital still cameras, and other space and power constrained systems, the iCE40 family uses a highly cost optimized fabric. This family is a popular choice for functions such as sensor management, video and imaging, custom connectivity, memory / storage expansion and glue logic. iCE40 FPGAs are available in two series: low power (LP) and high performance (HX).

HX-SERIES FOR TABLET APPLICATIONS

ISPMACH 4000ZE CPLD FAMILY

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- Ultra Low Power CPLD
- Small Form Factor
- Easy System Integration
- High Performance CPLD
- Easy to Design

ispMACH 4000ZE CPLD family is ideal for ultra low-power, high-volume portable applications. Based on the low power ispMACH® 4000Z CPLD family architecture, the second-generation ispMACH 4000ZE offers ultra-small, space saving Ball Grid Array packages; 3.3V, 2.5V, and 1.8V I/O standards support; and 5-volt tolerant I/Os.

ISPMACH 4A5 FAMILY OF CPLDS

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- Vcc 5.0 volts
- 182 MHz System Performance
- 5.0 ns Pin-to-Pin Delay
- SpeedLocking Performance - Guaranteed Fixed Timing
- High Density (32-256 Macrocells)
- 44 Pin to 208 Pin Package Options
- Low Power Consumption
- Excellent Routability and Pin-Locking
- Flexible Architecture
- Hot-Socketing Capability
- Programmable Bus-FriendlyTM or Pull-up I/Os
- In-System Programmable

ispMACH 4A5 family family features high operating frequencies combined with its SpeedLocked performance and low power consumption, make it the best choice for most system logic applications.

Mfg. Part No.	LUTs (No.)	Prop. Delay (nS)	Freq. (MHz)	I/O (No.)	Pkg	Stock No.	Price Each 1-24

ISPMACH 4256ZE BREAKOUT BOARD EVALUATION KIT

RoHS Compliant Available

LATTICE SEMICONDUCTOR

Features
- ispMACH 4256ZE CPLD (LC4256ZE-5TN144C)
- USB mini-B connector for power and programming
- Eight LEDs
- 4x15 prototype area
- Four 2x20 expansion header landings for general I/O, JTAG, and external power
- 1x8 expansion header landing for JTAG
- 3.3V and 1.8V supply rails

ISPMACH 4256ZE evaluation kit provides a pre-programmed demo to illustrate basic operation of the ispMACH 4256ZE CPLD device. The design integrates an up-counter with the on-chip oscillator and timer (OSCTIMER) hardware feature. The design alternates to CPLD outputs, illuminating LEDs D1, D3, D5 and D7 then LEDs D2, D4, D6 and D8.

Mfg. Part No.	Description	Stock No.	Price Each Each

USB-BASED EMULATORS FOR JTAG PROCESSORS

CE

RoHS Compliant Available

ANALOG DEVICES

Features
- ADZS-USB-ICE specific
  Full speed USB 1.1 interface up to 150 KB/Sec
- ADZS-HPUSB-ICE specific
  High speed USB 2.0 interface up to 1.5MB/sec
  Background Telemetry Channel (BTC) for data exchange at up to 2.0 MB/sec
- 1.8V, 2.5V, and 3.3V compliant and tolerant
- Support for all ADI JTAG processors and DSPs
- 5V tolerant and 3.3V compliant for 5V processors and DSPs
- Multiprocessor support
- 14-pin JTAG connector
- 3-meter USB cable for difficult-to-reach targets
- CE-certified

Kit Contents
- USB-based emulator w/ 14-pin JTAG connector
- 3-meter USB cable

USB-based emulators provide an easy, portable, non-intrusive, target-based debugging solution for Analog Devices JTAG processors and DSPs. These powerful USB-based emulators perform a wide range of emulation functions, including single-step and full speed execution with pre-defined breakpoints, and viewing and/or altering of register and memory contents. Applications and data can easily and rapidly be tested and transferred between the emulators and the separately available VisualDSP++ development and debugging environment(sold separately). With the ability to automatically detect and support multiple I/O voltages, these emulators enable users to communicate with all of the Analog Devices JTAG processors and DSPs through USB. **ADZS-USB-ICE** supports full speed USB 1.1 and **ADZS-HPUSB-ICE** supports high speed USB 2.0 in addition to a Background Telemetry Channel (BTC), a non-intrusive method for exchanging data between the host and target application without affecting the target system's real-time characteristics.

Mfg. Part No.	Interface	Stock No.	Price Each
● ADZS-USB-ICE	USB 1.1, up to 150Kbps	21M6780	1305.00
● ADZS-HPUSB-ICE	USB 2.0, up to 1.5MB/sec	14M7074	4176.00

(89619)

DSTREAM HIGH-PERFORMANCE DEBUG AND TRACE

RoHS Compliant Available

ARM DS Development Tools

Features
- Run control debug and trace unit supporting all ARM and Cortex processors
- USB 2.0 and Ethernet interface allows direct and remote connections from the host PC
- Support for JTAG and Serial-Wire Debug target interfaces
- Code download at speeds of up to 2500 KBytes per second
- JTAG clocks of up to 60 MHz provide fast software upload over the existing debug port
- 16-bit wide trace capture at 300 MHz DDR (600 Mbit/s per pin)
- Flexible trace clock positioning (relative to trace data)
- Large 4 GB trace buffer enables long-time trace on fast targets
- Device bring-up and test utilities
- Support for Virtual Ethernet link over JTAG
- Third party IP and debugger support

DSTREAM™ high-performance debug and trace unit enables software debug and optimization on any ARM processor-based hardware target. DSTREAM extends the functionality of RVI and RVT2 with faster memory download and trace capture, as well as wider support for physical debug and trace interfaces and enables the connection of DS-5 Debugger, RVD and third party debuggers to ARM-based devices via JTAG or Serial-Wire Debug.

Mfg. Part No.	Description	Stock No.	Price Each
● DSTRM-KT-0181A	DSTREAM Debug and Trace Unit	75T9199	3500.00

(199451)

ENERGY PROBE FOR EMBEDDED SYSTEMS

RoHS Compliant Available

ARM DS Development Tools

Features

- Lightweight power measurement for software developers
- Correlates power consumption with software execution in Streamline
- Monitor up to three probe points simultaneously
- Helps developers to make informed decisions at all layers of the software stack

Energy probe is part of the DS5 tool chain that allows monitoring of power consumption to software activity. Used in conjuction with ARM Streamline, the engery probe has a small form factor and is easy to setup with very low impact on development.

Mfg. Part No.	Description	Stock No.	Price Each
AEP03-KT-0311A	ARM DS5 Energy Probe	91T7810	199.00

(203730)

ULINK FAMILY OF DEBUG AND TRACE ADAPTERS

KEIL Tools by ARM

ULINK2

ULINK Pro

Features

- Download programs to your target hardware
- Examine memory and registers
- Single-step through programs and insert multiple breakpoints
- Run programs in real-time
- Program Flash Memory
- Connect using JTAG or Serial Wire modes
- On-the-fly debug of ARM Cortex-M based devices
- Examine Trace information from ARM Cortex-M3 and Cortex-M4 devices

ULINKpro Debug and Trace Unit connects to a PC's USB port and a target system (via a JTAG, Cortex Debug, or Cortex Debug+ETM connector) and allows the programming, debugging, and analysis of embedded applications using its unique streaming trace technology. Processor control, setting breakpoints, and read/write memory contents while the processor is running at full speed. Together with MDK-ARM, ULINKpro provides extended on-the-fly debug capabilities for Cortex-M devices. **ULINK2** Debug Adapter connects between a PC's USB port and target system (via JTAG, SWD, or OCDS) and allows for Flash memory programming (using user-configurable Flash programming algorithms) and on-chip debugging of embedded programs on target hardware using on-chip JTAG, SWD, or SWV. ULINK2 supports various ARM7, ARM9, Cortex-M, 8051, and C166 devices.

ULINK DEBUG AND TRACE UNITS

Mfg. Part No.	Description	Stock No.	Price Each
ULINK2	ULINK2 Debug Adapter	74T5673	395.00
ULINKPRO	ULINKpro Debug and Trace Unit	74T5672	1250.00

ISO-ADPT	ULINKpro Target Isolation Adapter	74T3812	250.00

(199452)

AVRISP MKII ISP AND PDI INTERFACE PROGRAMMER

RoHS Compliant Available

Atmel

The **AVRISP mkII** tool is used for field upgrades of 8-bit AVR microcontrollers with ISP or PDI interfaces. Using the included AVR Studio® software, designers can program tinyAVR and megaAVR devices using the ISP Interface, tinyAVR devices using the TPI interface, and AVR XMEGA devices using the PDI Interface.

Mfg. Part No.	Description	Stock No.	Price Each
ATAVRISP2	AVRISP Programmer	68T2065	37.50

(197950)

AVR ONE! PROFESSIONAL DEBUGGER FOR 8 AND 32-BIT AVR DEVICES WITH ON-CHIP DEBUGGING

RoHS Compliant Available

Atmel

AVR ONE! is a professional development tool for all 8-bit and 32-bit AVR devices with On-Chip Debug capability. It is used for source level symbolic debugging, program trace and device programming and supports the complete development cycle. It supports SPI, JTAG, PDI, and aWire programming modes and debugging using debugWIRE, JTAG, PDI, and aWire interfaces. It also supports LiveDebug, which makes it possible to attach to a running target non-intrusively, and the Nexus auxiliary interface for high-speed program, data or ownership trace at up to 200MHz in either buffered or streaming mode. Driven by a powerful FPGA, this tool provides high-speed data transfer between the host PC and the target AVR device, facilitating rapid program download and a most responsive debugging experience.

Mfg. Part No.	Description	Stock No.	Price Each
ATAVRONEKIT	AVR ONE! Development Tool	68T2076	655.00

(197951)

AVR DRAGON ON-CHIP DEBUGGER AND PROGRAMMER

RoHS Compliant Available

Atmel

The **AVR Dragon** sets a new standard for low cost development tools for 8-bit and 32-bit AVR devices with On Chip Debug (OCD) capability. It can perform a symbolic debug on all devices with OCD with SPI, JTAG, PDI (selected devices), high voltage serial programming, parallel programming, and aWire modes, and supports debugging using SPI, JTAG, PDI interfaces. A development area lets designers build their own circuitry or add sockets for the desired device footprint. The debugger also supports NanoTrace, depending on the OCD module on the AVR device, using the target device's memory.

Mfg. Part No.	Description	Stock No.	Price Each Each
ATAVRDRAGON	AVR DRAGON JTAG Debugger Starter Kit	68T2063	50.74

(197953)

SAM-ICE™ JTAG EMULATOR FOR SAM3/7/9 ARM-BASED MCUs

RoHS Compliant Available

Atmel

SAM-ICE™ is a JTAG emulator designed for SAM3, SAM7 and SAM9 ARM-based microcontrollers, including the Thumb® mode. It supports download speeds up to 720K Bytes per second and maximum JTAG speeds up to 12 MHZ. It also supports Serial Wire Debug (SWD) and Serial Wire Viewer (SWV) from SAM-ICE hardware V6.

Mfg. Part No.	Description	Stock No.	Price Each
AT91SAM-ICE	USB JTAG Emulator	68T5115	109.35

(197949)

DATAMAN-40PRO UNIVERSAL ISP 40-PIN PROGRAMMER

DATAMAN

Features

- Universal 40 pin ZIF socket accepts both 300/600 mil DIP devices up to 40 pin
- Intelligent pin drivers allow varying voltages to be applied to any pin delivering signals without overshoot, increasing programming yield
- Pin drivers operate down to 1.8V so you'll be ready to program the full range of tomorrow's advanced low-voltage devices
- ISP capable using the JTAG interface
- USB 2.0/1.1 connectivity allowing fast and easy connection to PC's and laptops

Kit contents

- Dataman 40Pro Universal ISP Production Programmer
  Dimensions: 160x95x35 mm (6.3x3.7x1.4 inches)
  Weight: 500g (17.65 oz)
- Switching Power Supply Adaptor
  Input: 100-240V @ 50-60Hz & 400mA
  Output: 15V @ 0.5A, 7.5W
- Moulded USB Cable
- ISP cable
- Diagnostic POD for self test of the programmer
- Anti-dust cover for ZIF socket
- User manual
- Software
- Optional range of adapters and socket converters also available

40Pro is a universal 40 pin driver, PC based programmer with in-circuit serial programming (ISP) capabilities and USB 2.0 connectivity. Built to meet the demands of development labs and field engineers it offers fast and powerful programming of a wide range of programmable devices in a small portable package. **40Pro** isn't only a programmer, but also a static RAMs tester.

Mfg. Part No.	Description	Supported	Stock No.	Price Each

DEBUGGERS, PROGRAMMERS, EMULATORS & COMPILERS

DATAMAN 48PRO2C SUPER FAST UNIVERSAL ISP PROGRAMMER

Features
- USB 2.0 high-speed compatible port
- Banana jack for ESD wrist strap connection
- Banana jack for connection to ground
- Powerful microprocessor and FPGA based state machine
- Selftest capability
- 48-DIP ZIF socket for both 300/600 mil devices
- Current limitation, overcurrent shutdown, power failure shutdown
- 20-pin male ISP Connector
- 2V to 6V/250mA Target system supply voltage

The **Dataman 48Pro2C** is a super fast universal 48-pin chip programmer with ISP capabilities, USB 2.0 connectivity and built to meet the demands of development labs and field engineers for super fast universal programming. This model can program without the need for a family-specific module, giving you the freedom to choose the optimal device for your design.

DATAMAN S6 USB POWERED UNIVERSAL 48-PIN PROGRAMMER

Features
- USB powered - no additional power supply is required
- Over 14,000 (April 2013) devices supported with new devices added monthly
- Intelligent pin drivers operate down to 1.8V
- Hi-speed USB 2.0 connectivity
- Easy to use software compatible with the latest operating systems including Windows 8
- Comprehensive 3 years parts and labour warranty
- Free life-time software updates

Package Contents
- Dataman S6 Compact USB Programmer
- Moulded USB Y Cable
- Carry Case
- User Manual
- Software

Dataman S6 is a USB powered universal 48-pin programmer with compact dimensions and minimal weight. The S6 is built to meet the demands of development labs and field engineers for universal programming. Supporting over 14,000 (April 2013) devices with new support being added monthly, the Dataman S6 can program without the need for family-specific modules, giving you the freedom to choose the optimal device for your design.

448PRO2 SUPER FAST MULTI-SOCKET GANG PROGRAMMER

Features:
- Up to 70% faster programming of highcapacity memory devices
- Over 51,000 devices supported
- Independent modules supporting concurrent programming
- ISP capable using the JTAG interface
- Hi-speed USB 2.0 connectivity
- Easy to use software
- Compatible with latest operating systems including Windows 7

Specifications:
- 4 x 48-pin DIL ZIF sockets and 4 x ISP connectors
- Dimensions: 361 x 234 x 56mm (14.2 x 9.2 x 2.2in)
- Weight: 3.5Kg (7.72lbs)
- Operating voltage: 100-240VAC
- Power consumption: 60W max.
- Power and operation status LEDs
- USB 2.0 high-speed compatible port
- Surge and ESD protection on power supply input
- Banana jack for ESD wrist strap connection
- Banana jack for connection to ground

Kit Contents:
- Programmer
- Moulded USB cable
- (4) ISP cable
- Programmer diagnostic POD
- ISP connector diagnostic POD
- (4) Anti-dust cover for ZIF socket
- ESD wrist strap w/ cord and banana plug
- Vacuum pen
- User manual
- Software
- Transport case

USB TAP FOR COLDFIRE

RoHS Compliant Available

Features
- High-speed USB 2.0 connectivity
- Self-powered from USB
- Run-control visibility and control
- Flash memory programming
- Low voltage target support
- Fully integrated with CodeWarrior tools and supports all run-control debug features
- Software or hardware breakpoints
- On-chip debug (OCD) features support
- Powerful C/C++ symbolic debugger with an integrated debugging interface
- Debug code in ROM, RAM, and flash
- Low-voltage processor compatible

CodeWarrior USB TAP® host target interface is a feature-packed, run control tool that allows developers to save precious development time during target bring-up and debugging of ColdFire processors. The USB TAP integrates seamlessly with the CodeWarrior integrated development environment, giving the developer a powerful tool for complex debug tasks and providing excellent visibility into, and control of, on-chip debug features. With the USB TAP, you will have complete run control functionality and easy flash programming for fast downloads and convenient production testing.

CYCLONE MAX STAND-ALONE IN-CIRCUIT PROGRAMMER AND DEBUGGER

RoHS Compliant Available

Features
- USB, Serial, and Ethernet communications interfaces
- Pre-programmed with a non-volatile programming image
- Controlled via the LCD/Buttons or remotely from a PC
- Stores mutiple images
- Stand-alone operation
- Backlit liquid crystal display
- Autodetects target voltage 1.8v-5.25v

Contents
- CycloneMAX unit
- Power Supply
- DB9 Serial Cable
- Ethernet Cable
- USB 2.0 A/B Cable
- Target connection cables

Cyclone MAX is a powerful stand-alone in-circuit programmer and debugger for Freescale's high-end ColdFire (5xxx), Power Architecture (MPC5xx/8xx), Power Architecture Nexus (MPC55xx), and ARM (MAC7xxx) architectures. Once configured, programming operations are completed in one touch. Processor control avalable thru the processor's debug port and communication occurs via Ethernet, USB, or Serial Port, allowing the user to quickly debug code and program it onto a microprocessor.

Mfg. Part No.	Description	Stock No.	Price Each

(196436)

USB POWERPC® BDM MULTILINK FOR FREESCALE MPC5XX/8XX MCUS

RoHS Compliant Available

freescale

Features
- USB 2.0 interface from PC to Multilink
- Draws power from USB interface
- Target Voltage: 1.8V-5.0V
- Compatible with MPC5xx and MPC8xx families of microcontrollers.
- Supported by P&E software, Freescale Codewarrior, and other third party development suites

USB PowerPC® BDM Multilink is an easy-to-use debug and programming interface, which allow the PC to communicate with a target processor through the USB port of the PC for the PowerPC MPC5xx/8xx line of microprocessors. The Multilink controls the microprocessor by accessing the Background Debug Mode (BDM) of the target. USB cable is included.

Mfg. Part No.	Description	Stock No.	Price Each
USBMLPPCBDM	BDM Multilink for MPC5xx/8xx MCUs	01M6487	249.00

(196440)

UNIVERSAL MULTILINK DEVELOPMENT INTERFACE

RoHS Compliant Available

freescale

Features
- Fast, hassle-free USB 2.0 communications interface
- Draws power directly from the USB port – no external power supply needed
- Multi-voltage support for targets ranging from 1.6 to 5.25 Volts
- Includes ribbon cables for supported architectures
- Natively supported by recent versions of CodeWarrior®
- Compact size

Supported architectures
- Kinetis
- HCS08
- RS08
- HC(S)12(X)
- ColdFire +/V1
- ColdFire V2-4
- Qorivva MPC55xx/56xx

The **USB Multilink Universal** is an easy-to-use debug and programming interface which allows the PC to communicate through the USB port with a target processor through the debug port. It combines support, in a single interface, for many Freescale architectures, including: HCS08, HC(S)12(X), ColdFire® V1/ColdFire+ V1, ColdFire V2-4, Qorivva® MPC55xx/56xx, and Kinetis® by featuring multiple headers that are accessed by simply flipping open the plastic case. It is natively supported by recent versions of CodeWarrior®, current P&E software applications, and Kinetis toolchains from IAR, Keil, and Mentor Graphics.

Mfg. Part No.	Description	Stock No.	Price Each
U-MULTILINK	Universal Multilink Interface	38T3448	119.00

(203425)

USB MULTILINK INTERFACE FOR Qorivva® MCUs

RoHS Compliant Available

freescale

Features
- Fast, hassle-free USB 2.0 communications interface
- Draws power directly from the USB port – no external power supply needed
- Multi-voltage support for targets ranging from 1.8 to 5.5 Volts
- Compact size

USB Power Architecture® Nexus Multilink is an easy-to-use debug and programming interface for the Qorivva 55xx/56xx line of Power Architecture microprocessors. It is the hardware interface between a USB port on a Windows 2000, 2003, XP, Vista, or Windows 7 machine and the standard 14-pin "Berg" debug connector on the target. By providing access to the JTAG/Nexus port on Qorivva MPC55xx/56xx processors, the user can take advantage of the JTAG/Nexus debug mode to halt normal processor execution and use a PC to control the processor. The user can then directly control the target's execution, read/write registers and memory values, debug code on the processor, and program internal or external FLASH memory devices by using the appropriate software packages.

Mfg. Part No.	Description	Stock No.	Price Each
USBMLPPCNEXUS	USB Qorivva Multilink Interface	01M6488	249.00

USB HCS08/HCS12 IN-CIRCUIT DEBUGGER / PROGRAMMER

RoHS Compliant Available

freescale

Features
- Real-time in-circuit debug through HCS08/RS08 or HCS12 BDM interface
- Fast in-circuit Flash programming
- Supports 1.8 V to 5.5 V HCS08/RS08s and HCS12s
- USB-to-BDM interface

Kit Contents
- **USBMULTILINKBDME** in-circuit debugger/programmer
- USB cable
- CodeWarrior™ Development Studio for HC(S)08/RS08, Special Edition
- CodeWarrior™ Development Studio for HCS12, Special Edition

Interface provides access to the Background Debug Mode (BDM) on **HCS08, HC12 and HCS12** microcontrollers. Users can take advantage of the background debug mode to halt normal processor execution and use a PC to control the processor. The user can then directly control the target's execution, read/write registers and memory values, debug code on the processor, and program internal or external FLASH memory devices.

CYCLONE PRO IN-CIRCUIT DEBUGGER / PROGRAMMER

RoHS Compliant Available

freescale

Features
- Supports all HC08, HCS08, HC12, HC(S)12(X), ColdFire V1 and RS08
- Ethernet, USB, and serial interfaces
- Fast in-circuit Flash programming
- Scripting capability automates programming of test routines, test execution, erase and final SW programming
- Auto-detects baud rate and frequency of MCU
- Provides optional overdrive clock to MCU
- Automatically cycles power for security checks (up to 500 mA)
- Supports 1.8 V to 5.5 V

Kit Contents
- Cyclone Pro universal standalone in-circuit debugger/programmer
- Power supply
- DB9 serial cable, USB 2.0 A/B cable, Ethernet cable and IDE connection cables (6-pin and 16-pin)

The Cyclone PRO is able to debug and program Motorola 68HC908 targets in-circuit via the Monitor ROM (MON08 Port). In addition, the Cyclone PRO is able to program and debug the ColdFire V1, HC(S)12(X), HCS08, and RS08 families of microcontrollers through the on-board Background Debug Modules of those processors. It can communicate with a PC through either RS-232, Ethernet, or USB interfaces. The Cyclone PRO, once configured properly, can function as a stand-alone programmer independent of a PC.

USB COLDFIRE MULTILINK INTERFACE

RoHS Compliant Available

freescale

Features
- Compatible with MCF52xx, MCF53xx, and MCF54xx families of microcontrollers
- Target voltage: 1.8V-5.5V
- Synchronous and asynchronous operation
- USB 2.0 interface from PC to Multilink allows for fast, easy programming and debugging, with the ease and compatibility of the USB interface
- USB cable is included
- Draws power from the USB bus (draws less than 1mA from the target)

USB ColdFire® Multilink is an easy-to-use debug and programming interface for Freescale's ColdFire V2/V3/V4 line of microprocessors which allows the PC to communicate with a target processor through the USB port of the PC. The Multilink controls the microprocessor by accessing the Background Debug Mode (BDM) of the target.

DEBUGGERS, PROGRAMMERS, EMULATORS & COMPILERS

MPLAB PM3 UNIVERSAL DEVICE PROGRAMMER

RoHS Compliant Available

MICROCHIP

Features
- RS-232 or USB Interface
- ICSP™ Integrated Circuit Serial Programming
- 3 Operating Modes (PC Host Mode, Safe Mode, Standalone Mode)

The **MPLAB® PM3** programs Microchip's entire line of PICmicro® MCU devices as well as the latest dsPIC30F DSC devices. The programmer has exceptional programming speed to allow high volume production, and includes a Secure Digital /Multimedia Card slot for easy and secure data storage and transfer. Programmer includes 40 socket pins, allowing each socket module to be configured to support many devices. The socket module adapter (AC164350) allows current PROMATE® II socket modules to be used with the **MPLAB® PM3 programmer**.

DV007004	MPLAB PM3 Programmer Unit	88H6738	895.00
● AC002021	ICSP CABLE	08J5777	23.00

(78734)

MPLAB C COMPILERS

RoHS Compliant Available

MICROCHIP

Features
- ANSI '89 compatibility
- Integration with the MPLAB IDE for easy-to-use project management and source-level debugging
- Generation of relocatable object modules for enhanced code reuse
- Compatibility with object modules generated by the MPASM assembler, allowing complete freedom in mixing assembly and C programming in a single project
- Strong support for inline assembly when total control is absolutely necessary
- Efficient code generator engine with multi-level optimization
- Extensive library support, including PWM, SPI, I2C, UART, USART, string manipulation and math libraries

Full-featured ANSI compliant C compilers, the C18 and C30 compilers are fully compatible with Microchip's MPLAB Integrated Development Environment (IDE), these compilers allow source level debugging with the MPLAB ICE In-Circuit Emulator, MPLAB ICD 2 In-Circuit Debugger and MPLAB SIM Simulator.

Mfg. Part No.	Description	Stock No.	Price Each
● SW006011	MPLAB C COMPILER, FOR PIC18 OTP/FLASH MCU	12C1964	495.00

(87548)

MPLAB C COMPILER FOR PIC32 MCUS

MICROCHIP

Features
- up to 22% Faster 16- and 32-bit FFT functions
- Easier FFT - Eliminated setup function
- DSP Library Compatibility Wrapper eases migration between dsPIC DSCs and PIC32 MCUs.
- Linker Memory-Usage Report showes the program- and data-memory usage
- Assembler and Linker documentation added to the compiler help file

The MPLAB C Compiler for PIC32 is a full-featured ANSI compliant C compiler for Microchip's PIC32 family of 32-bit microcontrollers. The compiler is fully compatible with Microchip's MPLAB IDE and popular third party IDEs.

Mfg. Part No.	Description	Stock No.	Price Each
SW006015	MPLAB C Complier for PIC32 MCUS	75M9283	895.00

MPLAB REAL ICE IN-CIRCUIT EMULATOR

RoHS Compliant Available

MICROCHIP

Features
- Real-time Execution
- Fast Programming
- USB 2.0 Interface to PC
- FREE MPLAB IDE
- Overvoltage / Short-circuit Monitor Protection
- Read/Write Program Memory Space with Verification
- Stopwatch
- Hard and Software Breakpoints
- Real-time Watch
- Capture Trace to Log Instruction Contents
- Port Trace for High-Speed Upload of Trace Data

MPLAB® REAL ICE is the next generation of emulator / programmer for Microchip flash products. Can be used to debug and program dsPIC® and PIC® microcontrollers with a powerful yet simple to use graphical user interface of the MPLAB integrated developement environment.

Mfg. Part No.	Description	Supported	Stock No.	Price Each
● DV244005	REAL ICE emulator pod and standard driver board, literature, cables and software	PIC and dsPIC Flash Microcontroller	16M6059	499.98

MPLAB® ICD 3

MICROCHIP

Package Contents:
- MPLAB ICD 3 In-circuit debugger unit (1)
- Diagnostics Test Interface module (1)
- USB 2.0 to PC Interface cable (1)
- RJ-11 Cable from MPLAB ICD 3 to Target (1)
- MPLAB IDE CD with full documentation and User's Guide (1)
- MPLAB ICD 3 Poster (1)
- MPLAB ICD 3 Design Advisory (1)
- Notepad with Troubleshooting Guide (1)

Features:
- In-Circuit Debugging for Flash PIC microcontrollers and dsPIC Digital Signal Controllers
- Full-speed, Real-time emulation
- Source debugging, stopwatch, complex breakpoints, and in-circuit programming
- MPLAB IDE compatible
- Firmware upgrade via MPLAB IDE
- Overvoltage and undervoltage protection
- High Speed USB 2.0 (480 Mbps)
- USB powered
- Target power, up to 100 MA
- Internal 1MB memory buffer for increased download speed
- Vdd range 2-5.5V
- Vpp range 2-14V
- CE and RoHS compliant

The **MPLAB® ICD 3 In-Circuit Debugger System** is Microchip's latest and most cost effective high-speed programmer and debugger for Microchip Flash Digital Signal Controller (DSC) and microcontroller (MCU) devices. It debugs and programs 8-, 16- and 32-bit PIC® Flash microcontrollers and dsPIC® DSCs with the powerful, yet easy-to-use graphical user interface of MPLAB Integrated Development Environment (IDE). The **MPLAB ICD 3 In-circuit debugger** provides significant performance enhancements for embedded systems designers. Programming times are typically 15X faster than previous systems. Its onboard 40 MHz dsPIC33 and high-speed FPGA yield faster communications, downloads and debugging.

PICKIT™ 2 DEBUG EXPRESS

RoHS Compliant Available

MICROCHIP

Features
- PICkit 2 Device Programmer with 44-pin demo board
- Surface mount prototyping area

Kit contents
- 44-pin PIC16F917 Flash MCU
- PICkit CD-ROM
- MPLAB Integrated Development Environment CD
- UART Tool Software
- Logic Tool Software
- User's guide
- Code examples
- USB interface cable

PICkit 2 Debug Express is a low-cost development kit with an easy to use interface that allows in-circuit debugging on selected PIC microcontrollers. Designed to help developers get up to speed using PIC MCUs, it provides everything needed to program, evaluate, and develop applications.

Mfg. Part No.	Description	Supported	Stock No.	Price Each

PICKIT 3 DEBUG EXPRESS

MICROCHIP

Features:
- Low cost
- Minimum of additional hardware needed for debug
- Expensive sockets or adapters are not required
- Production and post-production products can be re-flashed with firmware updates
- USB (Full speed 12 Mbits/s interface to host PC)
- Real-time execution
- MPLAB IDE compatible (free copy included)
- Built-in over-voltage/short circuit monitor
- Firmware upgradeable from PC/web download
- Totally enclosed
- Supports low voltage to 2.0 volts (2.0v to 6.0v range)
- Diagnostic LEDs (power, busy, error)
- Read/write program and data memory of microcontroller
- Erase of program memory space with verification
- Freeze-peripherals at breakpoint

Software Includes:
- PICkit 3 User's Guide
- A series of 12 Lessons on assembly programming that cover I/O, A/D converters, timers, interrupts, and data tables (All source code files are provided)
- A Debugging Tutorial on using the PICkit 3 as a debugger with the MPLAB IDE
- A FREE CCS compiler for the PIC18F45k20 (2kWord Program Limit)
- HI-TECH PICC™ LITE C Compiler
- Microchip's MPLAB IDE software

Microchip's **PICkit 3 In-Circuit Debugger/Programmer** uses in-circuit debugging logic incorporated into each chip with Flash memory to provide a low-cost hardware debugger and programmer. The **MPLAB PICkit 3** allows debugging and programming of PIC® and dsPIC® Flash microcontrollers at a most affordable price point using the powerful graphical user interface of the MPLAB Integrated Development Environment (IDE).

PROCESSOR PLUG-IN MODULES

RoHS Compliant Available

MICROCHIP

Processor Plug-In Modules are small circuit boards to be used with the various Microchip Development Boards to evaluate PIC and dsPIC devices. These plug into the main processor socket of the development Boards so that different microcontrollers can be used for prototyping, demonstration or development quickly and easily. Microchip development tools such as the MPLAB© REAL ICE™ and MPLAB ICD 2 connect directly to these development boards and provide quick, full-featured hardware/software/firmware development environment using the free MPLAB Integrated Development Environment software.

DEBUGGERS, PROGRAMMERS, EMULATORS & COMPILERS

1

FLASHER FAMILY OF PRODUCTION TOOLS

Flasher ARM

Flasher is a line of production Flash programming tools available for ARM, Cortex, PowerPC, Renesas, ST Microelectronics, and Toshiba devices. They ease the implementation into a production site by allowing the flash programming to be triggered manually or remotely. Once set up, Flasher can be controlled without the use of PC application in stand-alone mode.

Mfg. Part No.	Description	Stock No.	Price Each
5.05.01 FLASHER 5	Flasher 5	91T5750	498.00

8.16.11	J-Link ULTRA/J-Flash Bundle	91T5785	898.00

(202225)

J-TRACE PROBES FOR ARM AND CORTEX-M

J-Trace is a line of high speed hardware Trace Probes for ARM and Cortex-M. It connects via USB to the PC host running Windows. J-Trace integrates seamlessly into a wide range of IDEs and are compatible to J-Link.

J-Trace for Cortex-M

Mfg. Part No.	Description	Stock No.	Price Each
8.10.00 J-TRACE ARM	J-Trace ARM	91T5781	1248.00
8.13.00 J-TRACE FOR CORTEX-M	J-Trace for Cortex-M	91T5783	1248.00

(202226)

J-LINK™ AND FLASHER RELATED ADAPTERS

These optional hardware adapters are used industry standard J-Link Debug Probe, and Flash Programmers. These adapters also supports the DIGI JTAG Link, Atmel SAM-ICE, and IAR J-Link.

10-Pin Needle Adapter

Mfg. Part No.	Description	Stock No.	Price Each
8.06.00 J-LINK 19-PIN CORTEX-M	J-Link 19-pin Cortex-M Adapter	91T5768	30.00
8.06.01 J-LINK RX ADAPTER	J-Link RX Adapter	91T5769	30.00
8.06.02 J-LINK 9-PIN CORTEX-M	J-Link 9-pin Cortex-M Adapter	91T5770	30.00

ST-LINK V2 IN-CIRCUIT DEBUGGER AND PROGRAMMER FOR STM8 AND STM32

RoHS Compliant Available

Features
- 5 V power supplied by a USB connector
- USB 2.0 full speed compatible interface
- USB standard A to mini B cable
- SWIM interface
- JTAG interface
- Direct firmware update feature supported (DFU)
- Status LED which blinks during communication with the PC
- Operating temperature 0 to 50 °C

ST-LINK/V2 is an in-circuit debugger and programmer for the STM8 and STM32 microcontroller families. The single wire interface module (SWIM) and JTAG/serial wire debugging (SWD) interfaces are used to communicate with any STM8 or STM32 microcontroller located on an application board.

Mfg. Part No.	Description	Stock No.	Price Each
ST-LINK/V2	STM8 / STM32 In-Circuit Debugger / Programmer	59T6605	21.25

(203482)

MSP430 GANG PROGRAMMER

TEXAS INSTRUMENTS

Features
- 3x Faster than the previous MSP-GANG430 GANG programmer
- Quickly and reliably program Flash or FRAM-based MSP devices
- Both RS-232 and USB interface
- Several programming modes
- Intuitive GUI for configuring, programming and testing production setup
- SD Card slot for storing images
- LCD screen for easy programming without a PC
- Supports up to 8 targets simultaneously
- Supports all current and future MSP430 devices

MSP Gang Programmer is an MSP430 device programmer that can program up to eight identical MSP430 flash or FRAM devices at the same time. The MSP Gang Programmer connects to a host PC using a standard RS-232 or USB connection and provides flexible programming options that allow the user to fully customize the process. The MSP Gang Programmer is provided with an expansion board, called the Gang Splitter, that implements the interconnections

➤CONTINUED➤

MSP430 GANG PROGRAMMER (CONT.)

between the MSP Gang Programmer and multiple target devices. Eight cables are provided that connect the expansion board to eight target devices (via JTAG or Spy-Bi-Wire connectors). The programming can be done with a PC or as a standalone device. A PC-side Graphical User Interface is also available and is DLL-based.

Mfg. Part No.	Description	Stock No.	Price Each
MSP-GANG	MSP430 GANG Programmer	64T3682	254.00

(100982)

CODE COMPOSER DEVELOPMENT TOOLS

TEXAS INSTRUMENTS

Code Composer is a fully integrated development environment (IDE) with DSP-specific functionality. With its familiar MS-Visual C++ like environment, Code Composer lets you edit, build, debug, profile and manage projects from a single unified environment. Other unique features include graphical signal analysis, injection/extraction of data signals via file I/O, multi-processor debugging, automated testing and customization via a C-interpretive scripting language and much more.

Mfg. Part No.	Supports
TMDSCCS-MCUN01	MSP430, C28x and Stellaris
TMDSCCS-ALLN01	C6000, C55x, C54x, C28x, ARM, OMAP, DaVinci, Stellaris and MSP430
TMDSCCS-ALLF01	C6000, C55x, C54x, C28x, ARM, OMAP, DaVinci, Stellaris and MSP430
TMDS3240130	C3x, C4x
TMDSCCSALL-1	C6000/C5000/C2000/OMAP Processors

Mfg. Part No.	Description	Stock No.	Price Each

10-PIN TO 20-PIN JTAG ADAPTER MODULE

TEXAS INSTRUMENTS

MDL-ADA2 is a convenient 10-pin to 20-pin JTAG Adapter Module with flexible cable that is designed to convert between the new ARM mini-JTAG connector (10-pin) and the standard ARM JTAG connector (20-pin). With the included flexible 10-pin cable, it can easily connect to small modules using the 10-pin mini-JTAG connector in nearly any orientation.

Mfg. Part No.	Description	Stock No.	Price Each
MDL-ADA2	10 to 20-pin JTAG Adapter Module	45P3740	20.05

(196450)

XDS100 EMULATORS

TEXAS INSTRUMENTS

Features
- USB bus powered, no power supply required
- Supports USB 1.x and USB 2.0 (high speed)
- Compatible with +1.8V to +3.3V processors

XDS100 JTAG scan-based emulator is a robust and efficient JTAG emulation controller supporting debug of a variety of TI devices. It is compatible with Code Composer Studio™.

Mfg. Part No.	Description	Stock No.	Price Each
TMDSEMU100V2U-14T	XDS100v2 USB JTAG Emulator 14-pin	64R0681	79.20
TMDSEMU100V2U-20T	XDS100v2 USB JTAG Emulator 20-pin	64R0682	79.20

(196452)

SUPERPRO M UNIVERSAL IC DEVICE PROGRAMMER

RoHS Compliant Available

XELTEK

Features
- Supports 19,880 IC devices from 158 manufactures
- ARM7 MCU for an ultra-fast programming experience
- Programs devices with Vcc as low as 1.2V
- Built-in 48 universal pin drivers
- Over-current and over-voltage protection
- IC manufacturer approved programming algorithms
- ISP/ICP programming capability through optional ISP/ICP adapter
- Compatible with Windows 7 & Vista & XP 32/64 bit
- CE and ROHS Compliant

Specifications
- PC interface: USB2.0 (High speed)
- Stand-alone memory: Compact FLASH Card
- Power supply: AC Adapter: Input AC 90V- 250V, 50/60Hz; DC Output: 12V/2A; power 15W
- Main unit: Dimensions 70mm (L) * 52mm (W) * 15mm (H) Weight 0.85 lbs (0.4Kg)
- Package: Dimensions 150mm (L) * 120mm (W) * 30mm (H) Weight 3 lbs (1.4Kg)

Kit contents
- SuperPro M Programmer with a DIP48 Adapter
- AC adapter
- Software CD

ARM® DEVELOPMENT STUDIO 5 (DS™-5)

ARM DS Development Tools

Features

- Integrated Development Environment & ARM Compilation Tools
  Customized Eclipse IDE, compatible with third party plug-ins
  ARM Compiler, optimized compilation tool co-developed with ARM cores
  Powerful C/C++ editor and project manager
  Integrated productivity utilities such as the Remote System Explorer, SSH and Telnet terminals, and more.
- DS-5 Debugger
  Debug support for bare-metal, RTOS and Linux-based systems
  Non-intrusive cycle-accurate ETM and PTM instruction trace
  Automated debug sessions for faster debug cycles
  ITM and STM instrumentation trace
  Support for pre-configured and custom platforms
- Streamline Performance Analyzer
  System-wide performance analysis for Linux and Android systems
  Data collection over network - No debug adapter required
  CPU usage statistics per process, thread, function and source code
  Event-based sampling allowing to assign PMU events, such as cache misses, to source code
  Critical path identification and dynamic memory usage analysis
- Real-Time Simulator
  Cortex™-A8 and dual-core Cortex-A9 model simulator
  Typical simulation speed over 250 MHz
  Stop-mode or run-mode debug connection to simulator
  ARM Embedded Linux distribution provided for Linux application debug on Cortex-A8
- ARM Quality on Product and Services
  All the information you need to start developing quality software from day one
  See Resources tab to see product documemtation, videos, blog posts, etc
  Specialist support to advise you on how to get the most out of your tools
  Wide choice of technical training courses

DS-5™ is the toolkit of choice for software developers who want to fully realize the benefits of the ARM Architecture. Comprising features such as the best-in-class ARM Compiler, powerful OS-aware debugger, system-wide performance analyzer, and real-time system simulator, DS-5 is an integrated development environment that assists engineers in delivering optimized and robust software for ARM processors.

MDK-ARM SOFTWARE DEVELOPMENT KIT

KEIL™ Tools by ARM

Features

- Complete support for Cortex-M, Cortex-R4, ARM7, and ARM9 devices
- Industry-leading ARM C/C++ Compilation Toolchain
- µVision4 IDE, debugger, and simulation environment
- Keil RTX deterministic, small footprint real-time operating system (with source code)
- TCP/IP Networking Suite offers multiple protocols and various applications
- USB Device and USB Host stacks are provided with standard driver classes
- ULINKpro enables on-the-fly analysis of running applications and records every executed Cortex-M instruction
- Complete Code Coverage information about your program's execution
- Execution Profiler and Performance Analyzer enable program optimization
- Numerous example projects help you quickly become familiar with MDK-ARM's powerful, built-in features
- CMSIS Cortex Microcontoller Software Interface Standard compliant

MDK-ARM is a complete software development environment for Cortex™-M, Cortex-R4, ARM7™ and ARM9™ processor-based devices that is specifically designed for microcontroller applications. The application is easy to learn and use, yet powerful enough for the most demanding embedded application. All editions provide a complete C/C++ development environment with MDK-Professional including extensive middleware libraries.

PK51 PROFESSIONAL 8051 SOFTWARE DEVELOPMENT KIT

RoHS Compliant Available

KEIL™ Tools by ARM

Features

- µVision IDE
- Keil Extended 8051 Compilation Tools
- Keil Classic 8051 Compilation Tools
- Target Debuggers
- RTX51 Tiny Real-Time Kernel

Benefits

- Work with a variety of 8051 microcontrollers
- Develop code in C
- Support for the Dallas 390 or Philips 51MX devices
- Create complex, single-chip applications that require a small real-time kernel

PK51 professional developer's kit for the 8051 microcontroller family supports all 8051 derivatives including new devices with extended memory and instruction sets (like the Dallas 390/5240/400, Philips 51MX, and Analog Devices MicroConverters) and classic devices and IP cores from companies like Analog Devices, Atmel, Cypress Semiconductor, Dallas Semiconductor, Goal, Hynix, Infineon, Intel, NXP (founded by Philips), OKI, Silicon Labs, SMSC, STMicroelectronics, Synopsis, TDK, Temic, Texas Instruments, and Winbond.

µC/OS-II™ REAL-TIME OPERATING SYSTEM

Micriµm
For the Way Engineers Work

Features
- Manages up to 250 application tasks
- Constant and deterministic execution time for most services provided
- Execution times do not depend on the number of tasks running in the application
- Unprecedented ease-of-use combined with an extremely short learning curve enables rapid time-to-market advantage.
- Runs on the largest number of processor architectures with ports easily downloaded.
- Scalability--Between 5 Kbytes to 24 Kbytes I Max interrupt disable time: 200 clock cycles (typical configuration, ARM9, no wait states).
- Sufficiently robust to meet rigorous safety-critical system requirements
- Complete ANSI C source code is available for a 30-day trial use.

Applications
- Avionics
- Medical Equipment/Devices
- Data Communications Equipment
- White Goods (Appliances)
- Mobile Phones, PDAs, MIDs
- Industrial Controls
- Consumer Electronics
- Automotive

µC/OS-II is a portable, ROMable, scalable, preemptive, real-time deterministic multitasking kernel for microprocessors, microcontrollers and DSPs delivered with complete 100% ANSI C source code and in-depth documentation. Offered in a royalty-free single product license which allow software components to be embedded into an unlimited number of units for the life-time of the end product. Also available in per product line or CPU platform licenses. Go online or call.

SST SERIAL FLASH MEMORY

RoHS Compliant Available

MICROCHIP

SST Serial Flash offers lower pin count means less space, smaller PCBs, reduced system costs and lower power consumption.

SST PARALLEL FLASH MEMORY

RoHS Compliant Available

MICROCHIP

SST Parallel Flash is based on SuperFlash® technology featuring high performance, superior reliability, and low power consumption. The MPF™ (Multi-Purpose Flash) products, including MPF+ and Advanced MPF+, provide fast read and program times with features such as erase-suspend/erase-resume, boot block, security ID, hardware reset and heightened protection features.

S29GL SERIES MIRRORBIT FLASH MEMORY

RoHS Compliant Available

SPANSION®

FEATURES

- Fast Page Access Time: 25ns
- 100,000 Erase Cycles (Typ.) per Sector
- 20 yr. Data Retention (Typ.)
- Hardware Reset Input Resets Device
- Support for CFI (Common Flash Interface)
- Single 3V Read/Program/Erase

DENSITY: 32 Mb

SERIAL NOR FLASH MEMORY DEVICES

NEW

RoHS Compliant Available

SPANSION®

FEATURES

- Fast Page Access Time: 25ns
- 100,000 Erase Cycles (Typ.) per Sector
- 20 yr. Data Retention (Typ.)
- Hardware Reset Input Resets Device
- Support for CFI (Common Flash Interface)
- Single 3V Read/Program/Erase

MPLAB SERIAL MEMORY PRODUCTS STARTER KIT

MICROCHIP

Kit contents

- MPLAB Starter Kit for Serial Memory Products board
- MPLAB IDE
- Integrated Serial EEPROM interface tool
- Total Endurance™ software model
- User's Guide
- USB cable
- Serial EEPROM sample pack

Features

- 3.3V / 5.0V on-board voltage selection
- Supports Microchip UNI/O™ bus, I²C™, SPI, and Microwire Serial EEPROMs
- 1.8V to 5.5V external voltage support
- Includes free copy of MPLAB IDE
- USB interconnect

Designers of Serial EEPROM applications can enjoy the increased productivity, reduced time to market and rock-solid design that only a well thought out development system can provide. Microchip's MPLAB Starter Kit for Serial Memory Products includes everything necessary to quickly develop a robust and reliable Serial EEPROM design, and greatly reduces the time required for system integration and hardware/software fine-tuning.

Mfg. Part No.	Description	Supported	Stock No.	Price Each
DV243003	MPLAB Starter Kit, MPLAB IDE, interface tool, guide, cables	Serial Memory	98M0791	79.98

CRYPTOCONTROLLER EMBEDDED DEVELOPMENT KIT

RoHS Compliant Available

Atmel

The **AT97SC3204T-X1K180 CryptoController Embedded Development Kit** is based on the AVR AT90USBKey kit with an added Embedded TWI (2-wire) TPM card and Embedded TWI TPM demonstration and evaluation software. The kit includes TPM TWI module, AT90USBKey, USB adapter cables, USB flash drive with sample code and documentation and an alternate 9V battery supply cable.

Mfg. Part No.	Description	Stock No.	Price Each
AT97SC3204T-X1K180	Embedded Development Kit	68T5306	99.95

(197959)

CRYPTOMEMORY (2.7V - 3.6V) STARTER KIT

RoHS Compliant Available

Atmel

The **AT88SC-ADK2 CryptoMemory Starter Kit** is a low-cost starter kit for prototyping, designing, and code development for CryptoMemory™ and CryptoCompanion™ chips on AVR®-based flash microcontroller platforms. It features the Crypto Evaluation Studio and the Crypto Core Development Library to let designers easily apply CryptoMemory security to their host and client-side applications. The library architecture permits code porting to other microcontroller platforms. The kit connects to the PC and power to the AT88SC-ADK2 board using a USB interface.

Mfg. Part No.	Description	Stock No.	Price Each
AT88SC-ADK2	CryptoMemory Starter Kit	68T4763	99.95

CRYPTORF AT88CK201STK STARTER KIT

RoHS Compliant Available

Atmel

The **CryptoRF AT88CK201STK Starter Kit** adds secure HF RFID capabilities to prevent counterfeiting of medical and consumable products; track and record ownership, access control, and loyalty; and to conveniently store configuration and other sensitive data. The included pluggable CryptoRF® reader board contains the necessary circuitry and antenna to communicate with any HF RFID transponder compliant with the ISO 14443 type B standard. The kit's reference design makes it possible to include HF RFID capability in spaces smaller and more confined than previously possible. The core of the open-standards HF RFID reference design features the AT88RF1354 HF RFID reader IC, which supports ISO 14443 type B open standards for 13.56MHz RFID communications. The reader IC interoperates with any compliant HF RFID transponder, including the CryptoRF.

I2C SERIAL EEPROMS

RoHS Compliant Available

ON Semiconductor

Serial EEPROM products are used in many applications to store user reconfigurable data. Common applications are disk drives, modems, cellular phones, VCRs, CD players, hearing aids, PCMCIA cards, cordless phones, laser printers, computers and pagers. These serial EEPROMs are compatible with I²C™ bus protocol and are offered in high density, 1K to 256K, and wide voltage, 1.8V to 6V, ranges. These EEPROM products also meet the automotive specifications for both inside-the-cabin and under-the-hood applications and are specified over the entire voltage range of 1.8V to 6.0V at the automotive temperature extremes.

PE SERIES UV EPROM ERASING LAMPS

SPECTROLINE®

- Small size
- Robust Design
- Efficient and Complete Erasing In As Little As 11 to 13 Minutes

Small capacity and medium intensity personal user lamps specially designed for small systems users. The are the fastest, most efficient unit of its size utilizing a single 4-watt tube (rated life of 6,000 hours). *Order replacement tubes* **BLE-2537S** *separately.* A UV-absorbing light indicator in the tray endcap shows tubes are operating, while protecting eyes from UV exposure. Tray has conductive foam pad to prevent electrostatic build-up and protect chips from possible static charge. **PE-140T** erases 9 chips with an erasing time of 12.5 minutes for 1 chip. Automatic timer included. Inside tray dimensions are 2.00W x 6.63L x 0.63"H (50.80 x 168.40 x 16.00). UL listed, CSA certified. *For specifications, refer to the chart shown online or call .*

Mfg. Part No.	Description	Stock No.	Price Each
PE-140T	9 chip erasing capacity	87F3962	270.00
BLE-2537S	Replacement tube	87F3967	32.40

PL-265T UV EPROM ERASING LAMP

SPECTROLINE®

- Medium Capacity
- Medium Intensity
- Compact Size
- 30 Chip Erasing Capability
- Efficient and Complete Erasing in Under 11 Minutes

Ideal lamp for data-processing centers and medium capacity industrial requirements. Will erase up to thirty 24-pin EPROM chips at once. Erasing time: 10.4 minutes. Accommodates PC boards to 4.00 x 9.00" (101.60 x 228.60). Lamp with timer utilizes two 6-watt tubes with rated life of 6,000 hours. UV-absorbing light indicator in tray endcap shows tubes are operating, while protecting eyes from UV exposure. Tray insert adjusts to varying heights to maintain optimum exposure distance and has a conductive foam pad to prevent electrostatic build-up and to protect chips from possible static charge. Inside tray dimensions: 4.13W x 9.88L x 1.38"H (104.90 x 250.95 x 35.05). UL listed. *For specifications, refer to the chart shown online or call*. *Order* **Mfg. Part No. BLE-6254S** *replacement tube separately.*

Mfg. Part No.	Description	Stock No.	Price Each
PL-265T	UV EPROM erasing lamp	87F3964	415.00
BLE-6254S	Replacement tube	87F3968	38.00

SPI™ COMPATIBLE SERIAL SRAM

RoHS Compliant Available

MICROCHIP

SPI-compatible Serial SRAM devices provide high-speed performance at low power making them ideal for embedded applications needing more RAM. The devices use fewer pins with fewer interface connections and smaller packages thus ensuring smaller designs and lower system costs.

ZigBee™ - IEEE® 802.15.4 Compliant Platform-in-Package for 2.4 GHz

RoHS Compliant Available

freescale

The **MC13224V(R2)** is a ZigBee platform which incorporates a complete, low power, 2.4 GHz radio frequency transceiver, 32-bit ARM7 core based MCU, hardware acceleration for both the IEEE 802.15.4 MAC and AES security, and a full set of MCU peripherals into a 99-pin LGA Platform-in-Package (PiP). This ZigBee solution can be used for wireless applications ranging from simple proprietary point-to-point connectivity to complete ZigBee mesh networking. The **MC13224V(R2)** is designed to provide a highly integrated, total solution, with premier processing capabilities and very low power consumption.

RFID E-BLOCKS™ BOARD

RoHS Compliant Available

matrix multimedia

Features

- RFID Wireless communications
- Flowcode macros available
- 125KHZ or 13.56MHz operating frequency (125KHz RFID Module and Antenna available separately)
- Onboard 13.56MHz PCB Antenna
- Status LEDs
- Tuning Capacitors
- Range of approx 10cm

The **EB052 RFID E-Block** provides a RFID interface that can communicate with all common RFID devices running at either 125KHz or 13.56MHz. The RFID E-Block interfaces RFID devices, also known as 'tags', through a high frequency radio wave. This radio frequency burst acts as a dual function: to simultaneously provide power to the RFID device, and to communicate with the device.

Mfg. Part No.	Description	Supported Family	Stock No.	Price Each
EB052	Daughter Card: RFID scanner	PIC16	01P3429	137.26

(137250)

ZIGBEE™ AND MiWi™ TRANSCEIVERS

RoHS Compliant Available

MICROCHIP

Features

- Complete IEEE 802.15.4 Specification Compliant
- Supports MiWi™, ZigBee™ and Proprietary Protocols
- Simple, 4-Wire SPI Interface
- Integrated 20 MHz and 32.768 kHz Oscillator Drive
- 20 MHz Reference Clock Output: Available to drive microcontroller oscillator
- Supports Power-Saving mode
- Low-Current Consumption
- Typical 2 µA Sleep mode
- Available as a integrated module

HORNET REMOTE CONTROL SYSTEM

RoHS Compliant Available

Radiocons

Features:

- 433MHz FM Technology
- Up to 3 Channels
- 1,000W per Output channel
- Relays Rated 5A @ 230Vac
- Up to 150metres Range
- 12-30Vdc Or 230Vac versions available
- Waterproof Receiver (IP68)
- High Security RF Protocol
- Outputs Momentary or Latching
- Any Switch Map to Any Relay Output
- Systems supplied 'ready to Go'

Applications:

- General Purpose Remote Switching
- Garage Doors
- Electric Gates, Shutters
- All current Lighting types
- Access Control

HORNET is a rugged IP68 weatherproof remote control system supplied complete and ready to go. Installation is easy via screw Terminals for Power and outputs. Each receiver has 3 relay outputs, each capable of switching 1000watts. Each output can be momentary or latching action. Additional transmitters may be added using the 'easy-learn' process, any button on the transmitter can be used to control one or many outputs of the receiver.

REMOTE CONTROL SYSTEM

Mfg. Part No.	Description	Stock No.	Price Each
● HORNET-S1M	Hornet 1-CH 230Vac System w/ Transmitter	34R3576	103.50
● HORNET-S2M	Hornet 2-CH 230Vac System w/ Transmitter	34R3577	110.51
ADDITIONAL TRANSMITTERS AND ACCESSORIES			
● HORNET-TX1	Hornet 1-CH Transmitter	34R3578	24.88
● HORNET -TX2	Hornet 2-CH Transmitter	34R3574	25.20
● HORNET TX3	Hornet 3-CH Transmitter	34R3575	25.53
● HORNET -TX-IPKIT	Hornet Transmitter IP65 conversion Kit	34R3573	7.78

(177045)

VIPER REMOTE CONTROL SYSTEMS

RoHS Compliant Available

Radiocons

Features:

- 433MHz FM technology
- 1-4 channels each 1000W rated
- Up to 150m range
- 12-30Vdc / 230Vac supply
- Waterproof (IP68)
- High security RF protocol
- 4 relays 5A @ 230Vac
- Outputs momentary or latching
- Any switch map to any relay output
- Systems supplied 'ready to go'
- EMC / FCC compliant for Europe / USA

Applications:

- General purpose remote switching
- Garage doors
- Electric gates, shutters
- All current lighting types
- Access control

VIPER system is housed in a rugged IP68 weatherproof enclosure which makes it ideally suited to any outside remote switch requirement. Each receiver has 4 relays, using the 'easy-learn' process each relay can be controlled from any switch on any transmitter.

Mfg. Part No.	Description	Stock No.	Price Each
● VIPER-S1	Viper - 1 Channel Remote Control System - 150M Range	34R5488	131.48
● VIPER-S4	Viper - 4 Channel Remote Control System - 150M Range	34R5490	136.80

SINGLE CHIP RF TRANSCEIVERS

RoHS Compliant Available

TEXAS INSTRUMENTS

These highly integrated multichannel RF Transceivers offers a very low system cost radio and are designed for low-power wireless applications in the 868, 915 and 2.4 GHz Industrial Scientific Medial (ISM) band. Small footprint is ideal for wireless applications, home and building automation, industrial monitoring and control, and consumer electronics.

Mfg. Part No.	Operating Freq. (MHz)	Supply Voltage Max (V)	Modulation	Pkg.	Stock No.	Price Each 1-9

PUREPATH CC85xx WIRELESS DEVELOPMENT KIT

TEXAS INSTRUMENTS

Kit contents

- 2 x PurePath Wireless Audio Evaluation Boards
- 2 x CC85XXEM RF Evaluation Modules
- 2 x CC85XX-CC2590EM RF Evaluation Modules
- 2 x 2.4GHz antennas
- 1 x CC Debugger
- 2 x Mini USB cable
- 1 x Mini Jack to RCA male audio cable
- 1 x RCA male to RCA male audio cable
- Documentation

CC85XXDK will let the user fully evaluate PurePath Wireless technology and the CC8520 for wireless audio applications. Audio interfaces available with the kit include S/PDIF optical + coax input/output, line input/output, headphone output and microphone input. A TLV320AIC3101 audio codec is mounted on the PurePath Wireless Audio Evaluation Board, which also has connectors compatible with other TI Codecs. CC85XXDK works with PurePath Wireless Configurator PC tool which helps designers configure and test PurePath Wireless Audio devices.

BLUETOOTH SERIAL PORT MODULE

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:

- Bluetooth version 1.1 qualified
- Implemented in CMOS technology on FR4 substrate
- Temperature Range: -40°C to +85°C
- FCC certified on LMX9820ADONGLE,
- FCC ID ED9LMX9820ASM.

Applications:

- Personal data assistant
- POS terminals
- Data Logging Systems
- Audio gateway applications

The LMX9820A Bluetooth Serial Port module is a highly integrated radio, baseband controller, and memory device implemented on an FR4 substrate.

DEBUGGER AND PROGRAMMER FOR RF SYSTEM-ON-CHIPS

TEXAS INSTRUMENTS

Kit contents
- CC Debugger
- Mini USB cable
- 10-pin flat cable with 2x5 2.54mm connector
- 10-pin flat cable with 2x5 1.27mm connector
- Converter board 2.54mm-1.27mm connector
- Documentation

CC Debugger is a small programmer and debugger for the Low Power RF System-on-Chips. It can be used together with IAR Embedded Workbench for 8051 for debugging and SmartRF Flash Programmer for flash programming. The CC Debugger can also be used for controlling selected devices from SmartRF Studio. Note: CC Debugger supports all RF System-on-Chips except: CC1010 and CC430 (which uses the MSP-FET430UIF)

Mfg. Part No.	Description	Stock No.	Price Each
CC-DEBUGGER	IN-CKT, DEBUG / PROG, CCxxxx RF TX/RX	24R9068	50.00

(156345)

INFRARED ENCODER/ DECODER DEVICES

RoHS Compliant Available

MICROCHIP

Mfr. Part No. MCP2120 high-performance, low-voltage, fully-static infrared encoder/decoders modulate data received from any standard UART, outputting it as electrical pulses to an IR transceiver. These devices also demodulate electrical pulses output by the transceiver for transmission via the UART. Low power consumption: 1mA @ 3.3V, 8MHz typical. Operating voltage: 2.5 to 5.5V. **Mfr. Part Nos. MCP2150** and **MCP2155** protocol stack controllers provide UART to IrDA encoder/decoder functionality with low power consumption, while also implementing IrDA standard, including IrLAP, IrLMP, IAS, TinyTP and IrCOMM (9-wire "cooked" class) layers in addition to the bit encoding/decoding portion of the IrPHY layer. 1.63µs transmit/receive format. Operating voltage: 3.0 to 5.5V. *Suitable development systems available, call or go on-line.*

Mfg. Part No.	Max. Baud Rate (kHz)	Description	Package	Stock No.	Price Each 1-25
MCP2120-I/P	312.5	Infrared Encoder/Decoder	14-DIP	65K1033	1.06

WiFi RF TRANSCEIVER MODULE 802.11b COMPATIBLE

RoHS Compliant Available

MICROCHIP

Features
- IEEE 802.11 Wi-Fi Transceiver Module
- Supports low-power, low data-rate Wi-Fi
- FCC (USA), IC (Canada), ETSI (Europe) Certified
- Integrated PCB Antenna
- Simple four-wire SPI interface to PIC® microcontroller
- WEP, WPA-PSK, WPA2-PSK Security
- 36-pin Surface Mountable Module

MRF24WB0MA is an agency certified IEEE 802.11 Wi-Fi radio transceiver module that includes an integrated PCB antenna, matching circuitry, and supports Wi-Fi with the free TCP/IP protocol stack. The module connects to hundreds of PIC® microcontrollers via a 4-wire SPI interface and is an ideal solution for low-power, low data-rate Wi-Fi sensor networks, home automation, building automation and consumer applications.

Mfg. Part No.	Description	Stock No.	Price Each 1-25

CC2520 ZIGBEE EVALUATION MODULE KIT

TEXAS INSTRUMENTS

CC2520-CC2591EMK is used to evaluate the RF performance of the CC2520+CC2591 design, perform RF measurements and can be used as a ready-to-use module in existing designs. It includes two CC2520-CC2591EM evaluation modules and antennas. The CC2520-CC2591EM board combines the CC2520 802.15.4 transceiver and the CC2591 RF front end, providing a powerful solution for IEEE 802.15.4 and/or ZigBee™ applications requiring long range (higher output power) and improved sensitivity. To use the module, a motherboard where the EM can be plugged in is needed. Compatible moterhboards are SmartRF05EB and CCMSP-EM430F2618 (included in the CC2520DK).

Mfg. Part No.	Description	Stock No.	Price Each
CC2520-CC2591EMK	CC2520 Zigbee Evaluation Module Kit	12P7413	101.00

LF RFID APPLICATION KIT

RoHS Compliant Available

Atmel

The **ATA2270-EK1 LF RFID Application Kit** is a self-contained introduction kit for RFID systems for designers with little prior RFID experience includes an LCD and control buttons to interact with the RFID system. The kit supports e5530/TK5530, T5551/TK5551, ATA5567 (T5557), ATA5570, ATA5575, ATA5577, and ATA5558 IDIC®s and the U2270B. For more in-depth evaluation purposes, a GUI (graphical user interface) is supplied on the CD and allows to configure the tags into all available modulation and coding schemes. The combination of source code, building blocks, and reference designs let designers to quickly evaluate and prototype complete system-level designs. The kit supports all standard AVR development tools such as AVR Studio®, STK500, JTAG-ICE mkII, and more.

CC11xxx EVALUATION MODULES

TEXAS INSTRUMENTS

Benefits:
- Evaluate the SmartRF®04 products. Right out of the box, the user can do range testing (PER testing) and transfer data from one PC to another using the SmartRF®04DK. This enables the user to quickly find out how well the SmartRF®04 products fit the intended application. A number of demonstration applications serve to highlight the innovative features of the SmartRF®04 ICs.
- Perform RF measurements. Using SmartRF® Studio, the user can configure the radio ICs with parameters that suit the intended application and easily measure sensitivity, output power and other RF parameters.
- Develop a prototype.

Contents of Kits:
- Two evaluation modules
- CC11xxx corresponding chip
- Required external components
- 2 Antennas

Mfg. Part No.	Description	Stock No.	Price Each
CC1101EMK868-915	CC1101 Evaluation Module 868-915MHz	50M8832	101.00

COMMUNICATION IC & DEVELOPMENT KITS

1

CC1110 AND CC1111 DEVELOPMENT KIT

TEXAS INSTRUMENTS

Features:
- Evaluate the CC1110Fx and CC1111Fx: Right out of the box, the user can do range testing (PER testing) between two development boards with or without using a PC. This enables the user to quickly find out how well the CC1110Fx fits the intended application. A number of demonstration applications serve to highlight the innovative features of the SmartRF®04 ICs.
- Perform RF measurements: Using SmartRF® Studio, the user can configure the radio ICs with parameters that suit the intended application and easily measure sensitivity, output power and other RF parameters.
- Develop a prototype: By programming the CC1110Fx and utilizing the various peripherals included on the Evaluation Board, the user can easily make a prototype of the intended application. All signals are brought out on 0.1 pin-row connectors so easy connection of other required circuitry is possible. These connectors are also compatible with Agilent logic analyzer probes for easy debugging.

Contents of Kit:
- 2 SmartRF®04 evaluation boards
- 2 CC1110EM 433 MHz evaluation modules
- 2 CC1110EM 868/915 MHz evaluation modules
- 1 CC1111EM 868/915 MHz USB dongle
- Antennas
- Cables

The development kit is designed to help the user to achieve his/hers objectives as quickly as possible. A complete development kit can be used to evaluate both 433 MHz and 868/915 MHz operation.

Mfg. Part No.	Description	Stock No.	Price Each
CC1110-CC1111DK	CC1110 and CC1111 Development Kit	64M7649	661.98

CC1110 MINI DEVELOPMENT KIT

TEXAS INSTRUMENTS

Features:
- PCB antenna pre-tested for ETSI and FCC compliance
- battery holders for 2x AAA or 1x CR2032 coincell operation
- footprint for 2.54 mm connector connnected to CC1110Fx GPIO pins
- 2 buttons & 2 LEDs for simple application development
- pre-programmed with Link Test for RF range measurement
- SmartRF Studio and Packet Sniffer runs on the board in combination with the CC Debugger (included in the kit)

Contents of Kit:
- 2 x SmartRFCC1110-868 target boards
- 1 x CC Debugger
- 1 x 10- pin flat cable with 2x5 2.54 mm connector
- 1 x 10-pin flat cable with 2x5 1.27 mm connector
- 1 x Converter board 2.54 mm to 1.27 mm connector
- 1 x Mini USB cable
- Batteries
- CD with Evaluation Version of the IAR EW8051 (a free 16kb kickstart version is also available for full evaluation of SimpliciTI software)
- Documentation

The CC1110 Mini Development kit is an inexpensive and flexible development platform for TI's CC1110Fx RF System-on-Chip solution. The CC1110Fx features a 26MHz single-cycle 8051 microcontroller with integrated CC1101 RF transceiver, FLASH, RAM, 5 DMA channels, ADC, PWM, UART, SPI, I2S, 4 timers, and 21 GPIO pins. This kit is all you need to build a prototype of a wireless sensor node application!

- Documentation

The CC2510 Mini Development kit is an inexpensive and flexible development platform for TI's CC2510Fx RF System-on-Chip solution. The CC2510Fx features a 26MHz single-cycle 8051 microcontroller with integrated CC2500 RF transceiver, FLASH, RAM, 5 DMA channels, ADC, PWM, UART, SPI, I2S, 4 timers, and 21 GPIO pins. This kit is all you need to build a prototype of a wireless sensor node application!

CC2520 EVALUATION MODULE

TEXAS INSTRUMENTS

The CC2520EMK is an ad-on development kit for CC2520DK. The full stand-alone development kit is CC2520DK. The CC2520EMK development kit consists of 2 CC2520EM plug in modules and 2 antennas. The CC2520EMK is only usable together with a motherboard/host board, typically the SmartRF05EB and CCMSP-EM430F2618, which are both included in the CC2520DK. The board is also compatible with the MSP430F5438 Experimenter's Board.

Mfg. Part No.	Description	Stock No.	Price Each

CRYPTO PRODUCT AUTHENTICATION DEVICES

RoHS Compliant Available

Atmel

CryptoAuthentication™ family of solutions offers an extremely cost-effective hardware authentication capability to securely validate a wide variety of physical or logical elements in virtually any microprocessor-based system. The device family supports the latest algorithms like SHA-256 and AES approved by cryptographic experts and governments around the world. These devices feature hardware security fortifications like full active metal shields, multiple tamper detection schemes, internal encryption, and many other features designed to thwart the most determined attacks and include generous, secure storage segmented into zones which can be individually configured to meet a wide variety of applications.

CC2531 EVALUATION MODULE KIT

TEXAS INSTRUMENTS

Features
- CC2531 USB Firmware Library and Examples (downloadable from web)
- Works with RemoTI, TIMAC and ZStack for CC2530
- Supported by SmartRF® Studio, Packet Sniffer and Flash Programmer

The **CC2531EMK** kit provides one CC2531 USB Dongle and documentation to support a PC interface to 802.15.4 / ZigBee applications. The dongle can be plugged directly into your PC and can be used as an IEEE 802.15.4 packet sniffer or for other purposes. With the CC2531 USB Firmware Library available on the web you can develop your own software to utilize this part. To program the debugger, an external programmer (e.g. the SmartRF05EB) is required. This is not included in the kit. The USB dongle can be used as a reference module for prototyping of USB devices and for testing the RF performance of CC2531 with a small size PCB antenna.

2.4 GHZ ZIGBEE POWER OEM MODULES

RoHS Compliant Available

Atmel

Features:
- Ultra compact size
- High RX sensitivity
- Outperforming link budget
- Very low power consumption
- Ample memory resources (128K bytes of flash memory, 8K bytes RAM, 4K bytes EEPROM)
- Wide range of interfaces (both analog and digital)

Applications:
- Building automation & monitoring
- HVAC monitoring & control
- Inventory management
- Environmental monitoring
- Security
- Water metering
- Industrial monitoring
- Automated meter reading (AMR)

ZigBit™ is an ultra-compact, low-power, high-sensitivity IEEE 802.15.4/ZigBee® OEM module based on a mixed-signal hardware platform. It is designed for wireless sensing, control and data acquisition applications. ZigBit modules eliminate the need for costly and time-consuming RF development, and shortens time to market for a wide range of wireless applications.

PICDEM.net 2 DEVELOPMENT BOARD

RoHS Compliant Available

MICROCHIP

Features
- Web Server with HTML Support
- Microchip Free TCP/IP Stack Support
- 2 x Ethernet Interface (RJ-45 Connector)
- PICtailTM Connector for Future Expansion Boards
- 16 x 2 Character Alpha-numeric LCD Display
- ICSP™/MPLAB ICD 2 Interface Connector for In-circuit Programming and Debugging
- Programmable Buttons/LEDs
- Temp Sensor
- RS-232/RS-485 Interface
- Real Time Clock

The **PICDEM.net™ 2** Development Board is an Internet/Ethernet development board supporting both the popular ENC28J60 Ethernet Controller and the single-chip Ethernet microcontroller family, the PIC18F97J60. With this board, using Microchip's free TCP/IP stack, a web server can be developed showcasing the capability to remote monitor and control embedded applications over the Internet.

USB TO RS232 DEMONSTRATION BOARD

MICROCHIP

Features:
- Powered via USB
- Test points for all GPIO pins
- RS232 device and 9-pin D-sub connector for connecting to RS232 applications
- Tx and Rx LEDs for indicating USB to UART traffic (when enabled)
- Software for configuring special features of the device

MCP2200EV-VCP is a USB to RS232 development and evaluation board for the MCP2200 USB to UART device. The accompanying software allows the special device features to be configured and controlled. In addition, two I/O are connected to LEDs which are used to indicate USB to UART traffic when the associated pins are configured as TxLED and RxLED pins respectively.

NXP

Universal Asynchronous Receiver/Transmitter (UART) is a single-chip CMOS-LSI communications device that provides a full-duplex asynchronous receiver/transmitter. It is fabricated with Philips Semiconductors CMOS technology, which combines the benefits of high density and low power consumption. The operating speed of the receiver and transmitter can be selected independently as one of the fixed baud rates, a 16X clock derived from a programmable counter/timer, or an external 1X or 16X clock. The baud rate generator and counter/timer can operate directly from a crystal or from external clock inputs. The ability to independently program the operating speed of the receiver and transmitter make the UART particularly attractive for dual-speed channel applications such as clustered terminal systems. In addition, a handshaking capability is provided to disable a remote UART transmitter when the receiver buffer is full. The UART provides a power-down mode in which the oscillator is frozen but the register contents are stored, which results in reduced power consumption on the order of several magnitudes.

RS-232/RS-485/RS-422 MULTIPROTOCOL TRANSCEIVER EVALUATION BOARD

EXAR
A New Direction in Mixed-Signal

SP337EXXX-0A-EB boards allow for the evaluation of the SP337E dual mode serial transceiver containing both RS-232 and RS-485/422 line drivers and receivers. The RS-232 mode provides three drivers and five receivers to support all eight signals commonly used in the DB9 serial port connector (3TX/5RX). In RS-485 mode the device features two independent high speed RS-485/422 transmit and receive channels (2TX/2RX). **SP337EB** models feature a maximum data rate of 250kbps in RS-232 mode and a maximum data rate of 15Mbps in RS-485. **SP337EU** models features a maximum data rate of 1Mbps in RS-232 mode and a maximum data rate of 15Mbps in RS-485 mode.

INDUSTRIAL HART-PROTOCAL MODEMS

RoHS Compliant Available

ON Semiconductor

The **A5191HRT** is a single-chip, CMOS modem for use in highway addressable remote transducer (HART) field instruments and masters. The modem and a few external passive components provide all of the functions needed to satisfy HART physical layer requirements including modulation, demodulation, receive filtering, carrier detect, and transmit-signal shaping. The A5191HRT is pin-compatible with the SYM20C15.

Mfg. Part No.	Function	Drivers (#)	Receivers (#)	Supply Voltage (V)	Package	Stock No.	Price Each

MICROCHIP

The **MCP2510** is the easiest to use, most cost-effective stand-alone CAN 2.0B controller on the market today. It features an industry standard SPI™ serial interface, enabling an easy connection to virtually any microcontroller (MCU). Additional features: two-full message buffers with prioritized message storage, three full message transmit buffers with prioritization and abort features, masks and fillers for both recieve buffers, and interrupt generation.

Mfg. Part No.	Operating Temperature	Package	Stock No.	Price Each 1-25
● MCP2510-I/P	-40°C to +85°C	18-DIP	12C1807	3.11
● MCP2510-I/SO	-40°C to +85°C	18-SOIC	61K2944	3.11

The **MCP2515** is a second generation stand-alone CAN controller and successor to MCP2510. Intended for new designs, it's pin and function compatible with the MCP2510 and includes upgraded features like faster throughput, databyte filtering, and support for time triggered protocols. * Tape and reel packaging sold by the piece.

Mfg. Part No.	Package	Package	Stock No.	Price Each 1-25
● MCP2515-I/P	-40°C to +85°C	18-DIP	61K2945	1.82
● MCP2515-I/ST	-40°C to +85°C	20-TSSOP	61K2946	1.99
● MCP2515T-I/ST*	-40°C to +85°C	20-TSSOP	29H7140	1.99
● MCP2515T-I/SO*	-40°C to +85°C	18-SOIC	29H7139	1.82

I/O EXPANDERS

The **MCP2502X/5X** allows a simple CAN node to be implemented without the need for a microcontroller. Features a number of peripherals, including digital I/O, 4-channel 10-bit A/D (**MCP2505X**), and 2 PWM outputs, with automatic message transmission on change of input state, including when an analog input exceeds a preset threshold. Low power CMOS technology. Operates from 2.7V to 5.5V. 10mA active current typical. 30µA standby current (CAN Sleep mode).

Device	A/D	One-Wire CAN
MCP25020	No	No
MCP25050	Yes	No

Mfg. Part No.	Operating Temperature	Features	Package	Stock No.	Price Each 1-25
● MCP25020-I/SL	-40°C to +85°C	Digital CAN I/O Expander	14-SOIC	92C4173	2.55
● MCP25050-I/P	-40°C to +85°C	Mixed Signal CAN I/O Expander, 1-Wire Capable	14-DIP	59K0224	3.39

HIGH-SPEED TRANSCEIVERS

Externally controlled slope for reduced RFI emissions. Detection of ground fault (permanent dominant) on TXD input. Power-on reset and voltage brown-out protection. An unpowered node or brown-out event will not disturb the CAN bus. Low current standby operation. Protection against damage due to short circuit conditions (positive or negative battery voltage). Protection against high voltage transients. Automatic thermal shut-down protection. Up to 112 nodes can be connected. High noise immunity due to differential bus implementation.

Mfg. Part No.	Operating Temperature	Package	Stock No.	Price Each 1-25
● MCP2551-E/P	-40°C to +125°C	8-DIP	69K7603	1.18
● MCP2551-E/SN	-40°C to +125°C	8-SOIC	92C4186	1.18
● MCP2551T-I/SN	-40°C to +85°C	8-SOIC	92C4188	1.02

CAN BUS ANALYZER TOOL

MICROCHIP

Features

- Supports CAN 2.0b and ISO11898-2
- Intuitive PC User Interface for functions such as configuration, trace, transmit, filter, log etc
- Enhanced features in the PC GUI for Microchip's PIC microcontroller support such as ECAN register view in the GUI
- Direct access to CAN H and CAN L, CAN TX and CAN RX signals for robust debugging
- Flexible CAN bus interface options i.e. standard DB9 connector or screw terminals
- Software control of termination resistance and LED display for status, traffic, BUS error

Kit Contents

- CAN BUS Analyzer tool
- USB mini cable for PC connection
- User Guide/Software CD

CAN BUS Analyzer Tool is a simple to use low cost CAN bus monitor which can be used to develop and debug a high speed CAN network. The tool supports CAN 2.0b and ISO11898-2 and a broad range of functions which allow it to be used across various market segments including automotive, industrial, medical and marine. The toolkit comes with all the hardware and software required to connect a CAN network to a PC. The Graphical User Interface makes it easy to quickly observe and interpret bus traffic.

LOGARITHMIC AMPLIFIERS

RoHS Compliant Available

ANALOG DEVICES

Logarithmic amplifiers can be used for both RF and IF applications, with the ability to measure signals up to 8 Decades in dynamic range from DC to 8GHz. These products are ideally suited for use in wireless infrastructure, for both Receive Signal Strength Indication (RSSI) and transmit power level detection. In addition the range includes parts optimized for optical power measurement, radar / military applications, low power ASK demodulation and instrumentation.

PROGRAMMABLE GAIN AMPLIFIERS

RoHS Compliant Available

ANALOG DEVICES

Programmable gain amplifiers use technology which allows the amplifier gain to be varied as the dynamic range of the input signal changes. They can be used in a variety of remote sensing and communications equipment in an attempt to enhance dynamic performance. Applications include ultrasound, radar, lidar, wireless communications and even speech analysis.

ANALOG VOLTAGE GAIN CONTROL INTERFACE

TRANSIMPEDANCE AMPLIFIER

RoHS Compliant Available

ANALOG DEVICES

Specifications
- Operating Temperature Range: -40°C to 85°C
- Low Power Dissipation: 125 mW
- Minimum Data Rate: 155 Mbps

Features
- Differential Outputs
- Low Noise

The **AD8015 series** is a wide bandwidth, single supply transimpedance amplifier that converts photodiode current into a differential voltage output. It is optimized for use in a fiber optic receiver circuit (FDDI, SONET/SDH, Fiber Channel), as well as systems requiring a wide dynamic range preamplifier or single-ended to differential conversion.

TRIPLE DIFFERENTIAL DRIVERS FOR WIDEBAND VIDEO

RoHS Compliant Available

ANALOG DEVICES

Applications:
- Keyboard-video-mouse (KVM) networking
- Video distribution
- Digital signage
- Security cameras

The **AD8141ACPZ-R7** and **AD8142ACPZ-R7** are triple, low cost, differential or single-ended-input-to-differential-output drivers. Each amplifier has a fixed gain of 2 to compensate for the attenuation of the line termination resistors. The **AD8141ACPZ-R7** and **AD8142ACPZ-R7** are specifically designed for RGB signals but can be used for any type of signals. The amplifiers have very fast slew rate and settling time while being manufactured on a cost effective CMOS process.

Mfg. Part No.	Supply Voltage	Bandwidth (MHz)	Slew Rate (V/µs)	Package	Stock No.	Price Each 1-9
● AD8141ACPZ-R7	4.5V to 5.5V	275	1150	24-LFCSP	59T9898	4.16

PRAOPAMP EVALUATION BOARD

RoHS Compliant Available

ANALOG DEVICES

The EVAL-PRAOPAMP evaluation board accommodates single op amps in many packages. It is meant to provide the user with multiple choices and extensive fl exibility for different applications circuits and confi gurations. For evaluation in smaller packages, we currently have boards available that will accommodate the following packages: SOIC, MSOP, SC-70, and SOT-23.

Mfg. Part No.	Description	Stock No.	Price Each
● EVAL-PRAOPAMP-1KSZ	Single 5 Lead SC70 (KS-5) Eval Board	89M5157	18.98

PLASTIC AUTOMOTIVE MINIATURE ISOLATION AMPLIFIERS

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- ±2% Gain Tolerance @ 25°C
- 15 kV/µs Common-Mode Rejection at VCM = 1000V
- 30ppm/°C Gain Drift vs. Temperature
- 0.3 mV Input Offset Voltage
- Supply Voltage: 4.5V to 5.5V
- 100 kHz Bandwidth
- Qualified to AEC-Q100 Test Guidelines
- Automotive Operating Temperature -40 to 125°C
- Advanced Sigma-Delta A/D Converter Technology
- Fully Differential Circuit Topology

Applications:
- Automotive Motor Inverter Current/Voltage Sensing
- Automotive AC/DC and DC/DC converter Current/Voltage sensing
- Automotive Battery ECU
- Automotive Motor Phase Current Sensing
- Isolation Interface for Temperature Sensing
- General Purpose Current Sensing and Monitoring

IF AMPLIFIERS/ADC DRIVERS

RoHS Compliant Available

LINEAR TECHNOLOGY

LT5514 FEATURES
- Output IP3 at 100MHz: 47dBm
- Maximum Output Power: 21dBm
- Bandwidth: LF to 850MHz
- Propagation Delay: 0.8ns
- Maximum Gain: 33dB
- Noise Figure: 7.3dB (Max Gain)
- Gain Control Range: 22.5dB
- Gain Control Step: 1.5dB

LT5524 FEATURES
- Output IP3 at 100MHz: 40dBm
- Maximum Output Power: 16dBm
- Bandwidth: LF to 540MHz
- Propagation Delay: 0.8ns
- Maximum Gain: 27dB
- Gain Control Range: 22.5dB
- Gain Control Step: 1.5dB

A broad selection of high linearity upconverting and downconverting active mixers, direct-conversion I-Q demodulators, digitally programmable gain ADC driver/amplifier, and modulators designed to meet the performance of wireless basestations and cable infrastructure equipment.

POWER EFFICIENT DUAL RAIL-TO-RAIL I/O OP AMPS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Gain bandwidth product: 180MHz
- Fast output recovery
- Input common mode range includes both rails
- Output swings rail-to-rail

Applications:
- Low voltage, high frequency signal processing
- Driving A/D converters
- Active filters
- Video amplifiers
- Battery powered equipment

Mfg. Part No.	No. of Amplifiers	Input Bias Current (nA)	Offset Voltage (µV)	Supply Voltage (V)	Package	Stock No.	Price Each 1-99

PRECISION OPERATIONAL AMPLIFIERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's precision operational amplifiers (op amps) combine DC accuracy with low noise, low power, micro-packages, rail-to-rail in/out, and Over-the-Top circuitry. Precision amplifiers minimize post-assembly calibration and minimize drift over temperature and time. Precision amplifiers offer tested, guaranteed limits over the full operating temperature range for offset voltage, offset voltage drift, bias and offset currents, open loop voltage gain and more.

MICROCHIP

- Rail-to-Rail Output Swing
- Unity Gain Stable
- Low Bias Current
- Temperature Range: -40°C to +85°C
- Available on Tape and Reel; *Go online or call*

Gain bandwidth product: 1MHz. Operating voltage: 1.8V to 5.5V. I_Q (typical) = 140µA. V_{OS} = 7mV.

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-25

MCP6L04T-E/SL	Quad	14-SOIC	06R3493	0.40
Gain bandwidth product: 2.8MHz. Operating voltage: 2.7V to 5.5V. I_Q (typical) = 230µA. V_{OS} = 2mV.				
MCP601-I/P	Single	8-PDIP	69K7608	0.44
MCP601-I/SN	Single	8-SOIC	61K2952	0.44
MCP601T-I/OT	Single	8-TSSOP	73K1003	0.39
MCP602-I/P	Dual	8-PDIP	12C1812	0.57
MCP602-I/SN	Dual	8-SOIC	12C1813	0.57
MCP604-I/P	Quad	14-PDIP	12C1818	1.04
Gain bandwidth product: 10MHz. Operating voltage: 2.5V to 5.5V. I_Q (typical) = 1mA. V_{OS} = 500µV.				
MCP6021-I/SN	Single	8-SOIC	96K3736	1.02
MCP6024-I/P	Quad	14-PDIP	73K1004	1.91
MCP6024-I/SL	Quad	14-SOIC	61K2953	1.91
Gain bandwidth product: 150kHz. Operating voltage: 2.7V to 5.5V. Operating current: 20µA (typical). V_{OS} = <200µA (typical).				
MCP607-I/SN	Dual	8-SOIC	74K5406	0.98

ISOLATED AMPLIFIER FOR E-METERING

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Fixed Gain: 8 (0.5% Accuracy)
- Fully Specified Over the Extended Industrial Temperature Range

Applications:
- Energy Meters
- Green Energy
- Power Measurement Applications

AMC1100EVM

The **AMC1100** is a precision isolation amplifier with an output separated from the input circuitry by a silicon dioxide (SiO2) barrier that is highly resistant to magnetic interference. This barrier has been certified to provide galvanic isolation of up to 4250 VPEAK, according to UL1577 and IEC60747-5-2. Used in conjunction with isolated power supplies, this device prevents noise currents on a high common-mode voltage line from entering the local ground and interfering with or damaging sensitive circuitry.

Mfg. Part No.	Supply Voltage	No. of Amps	Power Consumption (mW)	Package	Stock No.	Price Each 1-9
AMC1100DUB	2.7V to 5.5V	1	82.5	8-SOP	94T9511	5.73

VARIABLE GAIN AND DIFFERENTIAL AMPLIFIERS

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications
- ADC Drivers
- Consumer Video
- Active Filters
- Pulse Delay Circuits

Specifications
- Unity Gain Bandwidth: Up to 600MHz
- Supply Current: Up to 4.5mA/channel
- Settling Time (to 0.01%): Up to 25ns

AUDIO AMPLIFIERS

RoHS Compliant Available

NXP

Features:
- Requires very few external components
- High output power
- Fixed gain
- Good ripple rejection
- Mute/standby switch
- Thermally protected
- Reverse polarity safe
- No switch-on/switch-off plop
- Electrostatic discharge protection

TPA741D	700mW, Mono, Low-Voltage, with Differential Inputs	8-SOIC	76C9873	1.65
ANALOG INPUT CLASS-D SPEAKER AMPLIFIERS				
TAS5414ATDKDMQ1	Four-Channel Digital Power Amp	36-SSOP	52M6048	26.24
TAS5630DKD	Analog input 300W Stereo (600W total) class D amplifier with integrated feedback	44-HSSOP	14R8281	15.91
TPA2026D2YZHT	3.2-W/Ch Stereo SmartGainTM Class-D Audio Amplifier	16-DSBGA	74R3115	2.86
TPA2001D1PW	1-W, Filterless, Mono, Class-D	16-TSSOP	76C9788	2.71
TPA2005D1DGN	1.4-W Mono, Fully Differential, Filter-Free Class-D Audio Amplifier, 8Ω min Load	8-MSOP	73J8370	1.47
TPA2005D1DRBR	1-4W Mono, Fully Differential, Filter-Free Class-D Audio Amplifier, 4Ω min Load	8-QFN	36K7655	1.23
TPA2006D1DRBR	1.45-W Mono Class-D, 1.8V Shutdown	8-SON	18M3207	1.09
TPA2018D1YZFT	3-W Mono Class-D Audio Amplifier with SmartGain™ AGC/DRC	9-DSBGA	29R0267	2.86
TPA2025D1YZGT	2W Constant Output Class-D Audio Amplifier with Adaptive Boost (DC/DC) Converter	12-DSBGA	93T6800	2.59
TPA2028D1YZFT	3-W Mono Class-D Audio Amplifier with Fast Gain Ramp SmartGain™ AGC/DRC	9-DSBGA	64R8564	1.91
TPA2036D1YZFT	1-Channel;2.5W; Impedance: 4Ω; Supply Voltage: 2.5-5.5V	9-DSBGA	19P7477	0.75
TPA2037D1YFFT	Fixed Gain 3.2 W Mono Class-D with Integrated DAC Noise Filter	9-WCSP	51R5928	1.63
TPA3001D1PWPR	20W Mono, High-Power, Filter-Free Class-D Audio Amplifier, 4Ω min Load	24-HTSSOP	74K3973	6.04
TPA3008D2PHP	High Efficiency, Class-D	48-HTQFP	21J9176	8.80
TPA3101D2PHP	10W Stereo, Class-D, 8Ω min Load	48-HTQFP	80K3364	6.48
TPA3110D2PWP	15W Filter-Free Class D Stereo Amplifier with SpeakerGuard™	28-HTSSOP	24R8484	2.99
TPA3112D1PWP	25-W Filter-Free Mono Class-D Audio Amplifier with SpeakerGuard™	28-HTSSOP	32R7817	3.22
TPA3113D2PWP	6-W Stereo Class-D Audio Power Amplifier with SpeakerGuard™	28-TSSOP	26R5218	2.69
TPA3117D2RHBT	15W Filter-Free Stereo Class-D Amplifier	32-QFN	13T5936	3.87
TPA3123D2PWP	Single-Ended Output; 2-Channels; 25W; Impedance:4Ω	24-HTSSOP	53M3994	5.25
DIGITAL INPUT CLASS-D SPEAKER AMPLIFIERS				
TAS5707PHP	2-Channels; Impedance: 6Ω	48-HTQFP	33P9827	6.38
TAS5710PHP	20-W Stereo Closed-loop I2S Audio Amplifier with Speaker EQ and 2-Band DRC	48-HTQFP	47P0635	5.85
TAS5711PHP	20-W Stereo I2S Audio Amplifier with Speaker EQ, DRC, and 2.1 support	48-HTQFP	60R2429	6.59
TAS5717PHPR	Digital input stereo amplifier with integrated CAP free headphone amp	48-HTQFP	13T8922	3.94
TAS5727PHP	25-W Digital Audio Power Amplifier with EQ and 2-Band DRC	48-HTQFP	32T3258	5.25
TAS5731PHP	20-W stereo digital audio power amplifier with dsp and 2.1 mode	40-HTQFP	76T8032	5.95
HEADPHONE AMPLIFIERS				
TPA1517DWPR	6-W, with Mute/Standby Function	20-SOIC	76C9773	2.66
TPA6130A2RTJR	138mW Stereo; 2-Channels; 16ohm	20-QFN	34M0132	2.18
TPA6138A2PW	40-mW DirectPath™ Stereo Headphone Driver with Adjustable Gain	14-TSSOP	27T6830	1.10
TPA6139A2PW	25-mW DirectPath™ Stereo Headphone Amplifier	14-TSSOP	27T6833	1.18
TPA6141A2YFFT	25-mW Class-G DirectPath™ Stereo Headphone Amplifier	16-DSBGA	32R8552	2.45
MICROPHONE PREAMPLIFIERS				
INA163UA	Mono, Low Noise, Low Distortion, Wide Bandwidth	14-SOIC	80K5909	7.44
PGA2500IDB	Gain Range: 0dB, and 10dB to 65dB in 1dB steps	28-SSOP	36K7585	17.88
PWM-INPUT POWER STAGES (PurePath TM)				
TAS5112ADCA	50-W/Ch., High Performance	56-HTSSOP	73J8317	10.05
TAS5261DKD	Integrated Self-Protection Circuit, Supports PWM.	36-SSOP	18M3142	11.80

ANALOG DEVICES

This extensive portfolio of high speed and low power comparators from Analog Devices expands its extensive breadth of product offerings to designers by offering them more complete signal chain solutions. The **AD790 series** is a fast, precise voltage comparator with a latching function that makes it suitable for applications requiring synchronous operation. The **AD8561/8564 series** comparator features a fast 7ns propagation delay, suitable for timing circuits and line receivers. The **AD8611 series** contains a latch function and complementary output, as well as a matched propagation delay that makes these comparators a good choice for clock recovery. The **CMP04 series** offers a low offset voltage, low output saturation voltage, high gain, and low power supply current suitable for precision applications requiring minimal power consumption. The **CMP401 series** provides independent input and output supplies and fast propagation that makes this comparator an excellent choice for interfacing to portable instrumentation.

LINEAR TECHNOLOGY

Applications:

- Crystal Oscillator Circuits
- Current Sense for Switching Regulators
- High Speed Sampling Circuits
- High Speed Triggers
- Window Comparators
- Zero-Crossing Detectors

Linear Technology specializes in high speed comparators and micropower comparators. The high speed comparator products offer propagation delays as fast as 4ns. The micropower comparator product line offers supply currents as low as 300nA while still offering excellent precision and innovative features.

OPEN DRAIN COMPARATOR

RoHS Compliant Available

MICROCHIP

- Rail to Rail Input / Output
- Low Quiescent Current: 600nA/comparator
- Open-Drain Output: $V_{OUT} \leq 10V$
- Propagation Delay 4µs (typ.)
- Wide Supply Voltage Range: 1.8V to 5.5V
- Industrial Temperature: -40°C to +85°C

Applications include laptop computers, mobile phones, metering systems, hand-held electronics RC timers and windowed comparators.

Mfg. Part No.	Description	Package	Stock No.	Price Each

LINEAR TECHNOLOGY

Linear Technology offers a broad line of series and shunt precision voltage references. Many of Linear Technology's voltage references are designed to operate in either series or shunt mode. The following products offer excellent initial accuracy and low drift over time and temperature.

HIGH-PRECISION VOLTAGE REFERENCES

RoHS Compliant Available

MICROCHIP

- 2.5V or 4.096V Output
- Initial Accuracy: ± 1% Max
- Temperature Coefficient: 50ppm/°C Max.
- Output Current: ± 2mA
- Industrial Temperature Range: -40°C to +85°C

Voltage references use a combination of advanced CMOS design and EEPROM trimming to provide an initial tolerance of 1% (max) and temperature stability of 50ppm/°C (max). Ideal for use in communication devices, data acquisition systems, instrumentation and process control, high-precision power supplies and battery-powered systems.

PRECISION VIRTUAL GROUND

RoHS Compliant Available

TEXAS INSTRUMENTS

2.5V virtual ground for 5v/GND analog systems. High output-current capability sink or source 20mA typ. Micropower operation ...170µA typ. Excellent regulation characteristics: Output regulation; -40µV typ @ I_L = 0 to -10mA, +15µV typ @ I_L = 0 to +10mA, Input regulation = 1.5µV/V typ. Low-impedance output 0.0075Ω typ. **Mfg. Part No.TLE2425** is a 2.5V virtual ground for 5V/GND analog systems. **Mfg. Part No.TLE2426** is a ½ Vl virtual ground for analog systems.

MICROCHIP

- DC to 100kHz (F/V) or 1Hz to 100kHz (V/F)
- Low Power Dissipation: 27mW Typ.
- Single/Dual Supply Operation: +8V to +15V or ±4V to ±7.5V
- Gain Temperature Stability: ±25ppm/°C Typ.
- Programmable Scale Factor
- Package: 14-Pin PDIP; Freq.: 100kHz; Temp.: 0°C to +70°C

14-pin SOIC and 14-pin ceramic DIP packages are also available. Change Mfg. Part No. suffix to **COD** for -40°C to +85°C SOIC version, or to **EJD** for 0°C to +70°C ceramic DIP version.

V-TO-F AND F-TO-V CONVERTER

RoHS Compliant Available

Burr-Brown Products from Texas Instruments

Type VFC32 provides output frequency accurately proportional to its input voltage. Digital open-collector frequency is compatible with all logic families. Its integrating input provides immunity and low nonlinearity. **Type VFC110AP** include higher frequency operation, an on-board precision 5V reference and a Disable function.

Mfg. Part No.	Description	Operational Frequency	Linearity	Package	Stock No.	Price Each 1-9
VFC32KP	V-to-F and F-to-V Converter	500KHz	±0.01%	14-DIP	80K6182	11.73
VFC32KU	V-to-F and F-to-V Converter	500KHz	±0.01%	14-SOIC	27C3318	10.86
VFC110AP	High Frequency V-to-F Converter	400MHz	±0.02%	14-DIP	80K6181	24.07
VFC320BP	V-to-F and F-to-V Converter	1MHz	±0.1%	14-DIP	77C3586	25.01

The **AD9262** Series are dual, 16-bit analog-to-digital converter (ADC) based on a continuous time sigma-delta architecture that achieves -87 dB of dynamic range over a 10 MHz input bandwidth. The integrated features and characteristics unique to the continuous time sigma-delta architecture significantly simplify its use and minimize the need for external components

INTEGRATING CONVERTERS WITH DISPLAY DRIVERS

Rollover and linearity error of less than one count. 40-pin plastic DIP package, commercial temperature range. Converters for 3½-digit LCD/LED 7-segment displays contain all necessary active devices. **ICL7136** is an improved version of **ICL7126**.

3½-DIGIT A/D CONVERTER FOR DIRECT DRIVE OF LCD/LED 7-SEGMENT DISPLAYS

Analog-to-digital converter provides a 3-digit, multiplexed BCD output.

Mfg. Part No.	Display	Conv. /Sec. Max.	Supply Voltage	Package	Stock No.	Price Each 1-24
ICL7106CPLZ	LCD Direct Drive	15	± 15V	40-DIP	61J6191	4.56
ICL7107CPLZ	LED Common Anode	15	+ 6V to –9V	40-DIP	61J6192	4.77
ICL7136CPLZ	LCD Direct Drive	4	± 15V	40-DIP	61J6197	7.24

5½-DIGIT LCD A/D CONVERTER

µP-COMPATIBLE INTEGRATING CONVERTERS

Monolithics. Up to 12-bit resolution and guaranteed accuracy of ±1 count or 1 LSB. Output may be directly accessed by two separate enables, except for **ICL7135CPI,** which has multiplexed BCD, count accuracy of ±1 in 20,000 and added functions for display applications and more sophisticated systems. Commercial temperature range.

Mfg. Part No.	Reso–lution	Conv./Sec. Max.	Supply Voltage	Package	Stock No.	Price Each 1-24
ICL7135CPIZ	4½-Digit	15	+6V to –9V	28-DIP	61J6196	5.45

16-BIT ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Communications
- Cellular Base Stations
- Software Defi ned Radios
- Portable Medical Imaging
- Multi-Channel Data Acquisition
- Nondestructive Testing

DELTA-SIGMA A/D CONVERTERS WITH NO LATENCY

RoHS Compliant Available

LINEAR TECHNOLOGY

No latency Delta Sigma analog to digital converters (Sigma Delta ADCs) are easy to use and are great for nearly any precision measurement application. Available in resolutions from 16 to 24-bit, up to 16 multiplexed inputs and either I2C or SPI serial interface. Also includes an internal clock.

GENERAL PURPOSE A/D CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

The general-purpose analog to digital converters are great for single input channel to multiplexed/simultaneous sampling applications. Available in a wide range from 8-bit to up to 16-bit resolutions they also feature excellent AC and DC performance at low power.

GENERAL PURPOSE SUCCESSIVE APPROXIMATION REGISTER (SAR) ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology offers a wide range of general purpose successive approximation register (SAR) analog to digital converters with sample rates up to 5Msps. Resolutions offered range from as low as 8 bits up to our industry leading 18-bit ADCs, from single channel to multiplexed/simultaneous sampling ADCs with parallel, serial SPI or I2C interfaces. Linear Technology's portfolio of SAR ADC offers fully tested and guaranteed AC and DC specifications which result in improved production yield and performance in the end product. Our new 18-bit and 16-bit SAR ADCs offer excellent DC performance including outstanding INL and DNL and very low offset and gain error. Better than 100dB SNR is achieved at 18-bits, along with guaranteed SFDR and THD performance over the full temperature range.

HIGH SPEED ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's extensive high speed ADC portfolio offers families of pin-compatible, high performance multi-channel ADCs in resolutions of 10-bit, 12-bit, 14-bit and 16-bit sampling from 1Msps up to 310Msps. Whatever your data acquisition needs, Linear Technology offers single, dual, quad and octal ADCs, with flexible serial or parallel interfaces, and lowest power consumption without compromising AC performance. Many of these ADCs offer unique features for reducing digital feedback in situations where even good layout practice may fail.

LOW POWER DUAL ANALOG-TO-DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Serial LVDS Outputs: 1, 2 or 4 Bits per Channel
- 76.8dB SNR
- 90dB SFDR
- Shutdown and Nap Modes
- Serial SPI Port for Configuration

Applications:
- Communications
- Cellular Base Stations
- Software-Defined Radios
- Portable Medical Imaging
- Multi-Channel Data Acquisition
- Nondestructive Testing

NO LATENCY DELTA SIGMA ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's family of No Latency Delta Sigma analog to digital converters (Sigma Delta ADCs) is unrivaled in performance and ease of use. With guaranteed resolutions from 16-bit ADCs up to 24-bit ADCs, with up to 16 multiplexed inputs and either I2C or SPI serial interfaces, we offer a data converter for nearly any precision measurement application. Unique features like the Easy Drive current cancellation technique enables external RC networks and high impedance sensors to directly interface to the Easy Drive ADC family without external amplifiers. If an external amplifier is used, the ADC automatically calibrates both the offset and drift of this circuit and the Easy Drive sampling scheme enables a wide variety of amplifiers to be used.

Linear Technology's portfolio of Delta Sigma ADCs offers ultralow noise with speeds ranging from 6.8Hz up to 8kHz, with versions offering line frequency rejection of 50Hz, 60Hz or simultaneous 50Hz/60Hz. The flexibility to select devices with single-ended and/or differential inputs, ultra-tiny package sizes, internal temperature sensors, PGAs, integrate references and an internal oscillator not only makes finding the perfect ADC easy, but also reduces the number of external components required for space constrained applications.

SAR ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:

- No Pipeline Delay, No Cycle Latency
- SPI- Compatible Serial I/O with Daisy-Chain Mode, Parallel I/O
- Digital Gain Compression Eliminates ADC Driver's Negative Rails (LTC2379 Family)

DC1813A-A

DC590B

Applications:

- Medical Imaging
- High Speed Data Acquisition
- Portable or Compact Instrumentation
- Industrial Process Control
- Low Power Battery-Operated Instrumentation
- ATE

Linear Technology's family of high performance 18- and 16-bit Successive Approximation Register (SAR) Analog to Digital Converters (ADCs) are supported with demonstration systems and evaluation software that demonstrates the correct layout and recommended device selection to achieve the highest performance design. The free, easy-to-use, and powerful QuikEval™ and PScope™ data acquisition and analysis software tools enable users to evaluate the performance of Linear Technology's ADCs, quickly and easily.

ANALOG-TO-DIGITAL CONVERTERS

RoHS Compliant Available

MICROCHIP

- 2.7V to 5.5V Supply
- No Missing Codes
- ±1 LSB DNL
- Serial Output with SPI Interface
- Standby Current: 0.5µA

Applications include data acquisition instrumentation and measurement, multichannel data loggers, industrial PCs, motor control, robotics, smart sensors, portable instrumentation, and home medical appliances.

DATA ACQUISITION DEVICES

RoHS Compliant Available

MICROCHIP

- Precision (Up to 17 Bits) A/D Converter
- 3-Pin Control Interface to Microprocessor
- Flexible: User Can Trade Off Conversion Speed for Resolution
- Single Supply Operation; Automatic Input Voltage Polarity Detection
- Low Power Dissipation: TC500A: 10mW, TC510: 18mW
- Wide Analog Input Range: ±4.2V
- Directly Accepts Bipolar and Differential Input Signals
- -5V Output PIN
- 4 Input, Differential Analog MUX
- Low Operating Current: 5mA Max.
- Wide Analog Input Range: ±4.2V Max.

The **TC500A/510** family are precision analog front ends that implement dual-slope A/D converters having a max. res. of 17 bits. Each device contains the integrator, zero-crossing comparator and processor interface logic. **Mfg. Part No. TC500A** (16-bit max. device) requires both positive and negative power supplies. **Mfg. Part No. TC510** adds on-board negative power supply converter for single supply operation.

PRECISION ANALOG FRONT ENDS

Mfg. Part No.	Temp. Range	Package	Stock No.	Price Each 1-25

DELTA-SIGMA ANALOG TO DIGITAL CONVERTERS

RoHS Compliant Available

MICROCHIP

Applications:
- Weigh Scales
- Direct Temperature Measurement
- 6-digit DVMs
- Instrumentation
- Data Aquisition
- Strain Gauge Measure

Features:
- 22-bit Resolution
- Automatic Internal Offset
- Low Output Noise
- Ultra Low Converstion Current
  100 µA @ V_{DD} = 2.7V
  120 µA @ V_{DD} = 5.0V
- 2.7 to 5.5V Single Supply
- -40 to 125°C Extended Temperature Range

SIX CHANNEL ANALOG-TO-DIGITAL CONVERTERS

RoHS Compliant Available

MICROCHIP

The **MCP3903** is a six-channel Analog Front End (AFE) containing three pairs made out of two synchronous sampling Delta-Sigma Analog-to-Digital Converters (ADC) with PGA, a phase delay compensation block, internal voltage reference, and high-speed 10 MHz SPI compatible serial interface. The converters contain a proprietary dithering algorithm for reduced idle tones and improved THD.

The internal register map contains 24-bit wide ADC data words, a modulator output register as well as six 24-bit writable control registers to program gain, over-sampling ratio, phase, resolution, dithering, shut-down, reset and several communication features.

The communication is largely simplified with various Continuous Read modes that can be accessed by the Direct Memory Access (DMA) of an MCU and with separate Data Ready pins that can directly be connected to the Interrupt Request (IRQ) input of an MCU. The **MCP3903** is capable of interfacing to a large variety of voltage and current sensors including shunts, current transformers, Rogowski coils, and Hall-effect sensors.

Mfg. Part No.	Supply Voltage Range	Supply Current (µA)	Sampling Rate (kSPS)	Resolution (Bits)	Package	Stock No.	Price Each 1-25
● MCP3903-E/SS	2.7V to 3.6V	7.1	64	24	28-SSOP	79R3452	4.39

(202099)

GENERAL PURPOSE A/D CONVERTERS

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- Single supply voltage: 2.7 to 5.25V
- 500ksps to 1Msps speed range
- SPI/QSPI/MICROWIRE/DSP compatible

Unique in the industry. Instead of selecting different ADCs for each application speed, these new ADCs offer guaranteed performance over a wide range of speeds.

Mfg. Part No.	Ch	Res (bits)	DNL+ (LSB)	INL+ (LSB)	Package	Stock No.	Price Each 1-9

POWERWISE ADCs

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- Internal Sample-and-Hold
- Choice of SDR or DDR output clocking
- Interleave Mode for 2x Sampling Rate
- Serial Interface for Extended Control
- Duty Cycle Corrected Sample Clock

Applications
- Direct RF Down Conversion
- Digital Oscilloscopes
- Satellite Set-top boxes
- Communications Systems
- Test Instrumentation

SENSOR AFE SYSTEM

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications:
- Temperature and Pressure Transmitters
- Strain Gauge Interface
- Industrial Process Control

The Sensor AFE has features and functions specific to each sensor type, including signal conditioning, calibration, diagnostic support, and sensor drive when required. The integrated design tool allows designers to select sensors, generate a solution, configure the signal path, and set diagnostics for each sensor. Configuration data can be saved and downloaded to a Sensor AFE for immediate prototyping. The software can be used online through WEBENCH Sensor AFE Designer or offline with a standalone bench-top system that also supports prototype evaluation. The **LMP90100** is designed to work with temperature sensors (RTDs, thermocouples, thermistors) and bridge sensors (pressure, force, load) and the **LMP91000** is designed for chemical sensing applications.

RMS-TO-DC CONVERTER EVALUATION BOARD

RoHS Compliant Available

ANALOG DEVICES

AD8436-EVALZ

The **AD8436** evaluation board is fully assembled, tested and ready to use after the power and signal sources are connected. The **AD8436-EVALZ** offers many options, without sacrificing simplicity. The board is tested and shipped with a 10 µF averaging capacitor (CAVG), 3.3 µF low-pass filter capacitor (C8) and a 0.1 µF (COPT) capacitor to optimize crest factor performance. Please see AD8436 data sheet available on-line for complete details.

Mfg. Part No.	Description	Stock No.	Price Each
● AD8436-EVALZ	AD8436, RMS TO DC CONVERTER, EVALUATION BOARD	58T8913	119.48

RMS-TO-DC CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features
- High Linearity
- Wide Input Bandwidth
- No-Hassle Simplicity
- Ultralow Shutdown Current
- Flexible Inputs
- Flexible Outputs
- Small Size

Applications
- True RMS Digital Multimeters and Panel Meters
- True RMS AC + DC Measurements

Linear Technology's simple, true RMS-to-DC converters use an innovative delta-sigma computational technique that features high linearity and accuracy suitable for a wide variety of AC measurement applications.

8-BIT DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

ANALOG DEVICES

These digital-to-analog converters (DACs) enable new system architectures that deliver breakthrough combinations of performance and function. They have the ability to deliver a varied range of resolutions and update rates in a small footprint at the low cost requirements that today's systems demand. They provide superior value for high-volume applications in cost-sensitive markets.

ANALOG DEVICES

These digital-to-analog converters (DACs) enable new system architectures that deliver breakthrough combinations of performance and function. They have the ability to deliver a varied range of resolutions and update rates in a small footprint at the low cost requirements that today's systems demand. They provide superior value for high-volume applications in cost-sensitive markets.

AUDIO AND VIDEO DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

ANALOG DEVICES

These monolithic audio and video DACs have been designed for a wide range of applications such as high-end compact disc players, digital audio amplifiers, digital video systems, and video signal reconstruction.

AUDIO

The **AD1851** is a single 16-bit PCM audio DAC that provides a voltage output amplifier, DAC, serial-to-parallel register and voltage reference. The output amplifier achieves fast settling and high slew rates, providing a full ±3 V signal at load currents up to 8 mA. When used in current output mode, the **AD1851** provides a ±1 mA output signal.

Mfg. Part No.	DNR (dB)	SNR (dB)	THD+N at 1kHz (-dB)	Settling Time (us)	Supply Voltage Max (V)	Package	Stock No.	Price Each 1-9
AD1851RZ	96	110	90	1.5	5	16-SOIC	19M8797	11.76

VIDEO

The **ADV7123, ADV7125, and ADV7127** are high speed video DACs with complementary outputs, a standard parallel CMOS/TTL input interface and a high impedance, analog output current source all on a single monolithic chip. The **ADV7123 and ADV7125** consist of three DACs with update rates of 330 MSPS while the **ADV7127** is comprised of only a single DAC with an update rate of 240 MSPS. All DACs have a differential and integral nonlinearity of +/-1 LSB and a maximum supply voltage of 5V.

Mfg. Part No.	Resolution	Number of DACs	Clock Frequency (MHz)	Package	Stock No.	Price Each 1-9
ADV7125KSTZ50	8bit	3	50	48-LQFP	19M8776	8.87

NANO DIGITAL TO ANALOG CONVERTERS

RoHS Compliant Available

ANALOG DEVICES

Applications:
- Optical transceivers
- Base-station power amplifiers
- Process control (PLC I/O cards)
- Industrial automation
- Data acquisition systems

Features:
- User selectable gain of 1 or 2 (GAIN pin)
- Reset to zero scale or midscale (RSTSEL pin)
- 1.8 V logic compatibility
- 50 MHz SPI with readback or daisy-chain

The **AD5686R/AD5685R/AD5684R**, members of the nanoDAC+® family, are low power, buffered voltage output DACs. The devices include a 2.5 V, 2 ppm/°C internal reference (enabled by default) and a gain select pin giving a full-scale output of 2.5 V (gain = 1) or 5 V (gain = 2).

The **AD5686R/AD5685R/AD5684R** also incorporate a power-on reset circuit and a RSTSEL pin that ensures that the DAC outputs power up to zero scale or midscale and remains there until a valid write takes place. Each part contains a per-channel power-down feature that reduces the current consumption of the device to 4 µA at 3 V while in power-down mode.

Mfg. Part No.	Resolution (Bits)	Interface	Update Rate (MSPS)	Accuracy	Package	Stock No.	Price Each 1-9

DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

MICROCHIP

Features

- 12-Bit resolution
- ±0.2LSB DNL (typ)
- ±2LSB INL (typ)
- Rail-to-rail output
- SPI™ interface with 20MHz clock support
- Simultaneous latching of the dual DACs w/LDAC
- Fast settling time of 4.5µs
- Selectable unity or 2x gain output
- 450 kHz multiplier mode
- External VREF input
- 2.7V to 5.5V single-supply operation
- Extended temperature range: -40°C to +125°C

14 BIT DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

TEXAS INSTRUMENTS

TI's portfolio of D to A Converters (DACs) includes high accuracy (+/- 1 LSB INL), two or four quadrant capable Multiplying D to A Converters (MDACs) provide high performance solutions. Choose your output buffer to meet your application needs, i.e., low offset, high voltage, high speed (fast slew rate).

18 BIT DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- Relative Accuracy: ±2 LSB Max
- Low-Noise: 24nV/√Hz
- On-Chip Output Buffer Amplifier w/ Rail-to-Rail Operation
- DAC Loading Control
- Selectable Power-On Reset to Zero-Scale or Midscale
- Power-Down Mode
- Operating Temp. Range: -40°C to +105°C

Applications
- Automatic Test Equipment
- Precision Instrumentation
- Industrial Control
- Data Acquisition Systems

20 BIT DIGITAL-TO-ANALOG CONVERTERS

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- Low Power: 2.5mW
- Maximum Linearity Error: ±0.0015%
- On-Chip Calibration

Applications
- Process Control
- ATE Pin Electronics
- Closed-Loop Servo Control
- Smart Transmitters
- Portable Instruments

NON-VOLATILE DIGITAL POTENTIOMETERS

RoHS Compliant Available

ANALOG DEVICES

Applications:

- Mechanical potentiometer replacement
- Portable electronics level adjustment
- Audio volume control
- Low resolution DAC
- LCD panel brightness and contrast control
- Programmable voltage to current conversion
- Programmable filters, delays, time constants
- Feedback resistor programmable power supply
- Sensor calibration

DIGITAL POTENTIOMETERS AND EVALUATION KIT

RoHS Compliant Available

MICROCHIP

- Operating Temperature: -40°C to +85°C, < 1µA Standby Current
- Operating Voltage: 2.7V to 5.5V
- 256 Taps; SPI Interface; Max. INL: +1 LSB; Max. DNL: +1 LSB
- Applications include Audio Equipment (Volume and Tone Controls), Servo-Motor Control, Battery Charging and Control, Communications (Line Impedance Matching), Power Supplies, Instrumentation (Gain, Offset Adjusts), LCD Contrast Control and Programmable Filters

MCP413X/415X/423X/425X SERIES VOLATILE DIGITAL POTENTIOMETERS

RoHS Compliant Available

MICROCHIP

Features:
- Potentiometer or Rheostat configuration options
- Zero Scale to Full-Scale Wiper operation
- Supports Split Rail Applications

The **MCP413X, MCP413X, MCP423X** & **MCP425X** devices offer a wide range of product offerings using an SPI interface. This family of devices support 7-bit and 8-bit resistor networks, and Potentiometer and Rheostat pinouts.

MCP434X/436X SERIES NON-VOLATILE DIGITAL POTENTIOMETERS

RoHS Compliant Available

MICROCHIP

Features:
- Single or Dual Resistor Network options
- Potentiometer or Rheostat configuration options
- Zero-Scale to Full-Scale Wiper operation

The **MCP444X** and **MCP446X** devices offer a wide range of product offerings using an SPI interface, This family of devices support 7-bit and 8-bit resistor networks, Non-Volatile memory configurations, and Potentiometer and Rheostat pinouts. WiperLock Technology allows application-specific calibration settings to be secured in the EEPROM.

ACTIVE ANALOG FILTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's line of continuous time and switched capacitor filters provide simple, flexible frequency discrimination solutions. Their specially designed filters can accomodate any frequency response (lowpass, highpass or bandpass) and a wide range of frequencies.

DIGITALLY CONTROLLED ANTIALIASING FILTER

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Antialias or Reconstruction Filtering
- DSP Systems
- Communications Systems
- Scientific Instruments
- High Resolutions (16 Bits to 20 Bits)
- Processing Signals Buried in Noise
- Audio Signal Processing
- Programmable Data Rates
- Automatic Gain Control (AGC)
- Single Part Replacing Multiple Filters

Features:
- No External Components
- 122dB Total System Dynamic Range
- Rail-to-Rail Input and Output Range
- Low Noise Mute Mode
- Low Power Shutdown Mode

The **LTC®1564** is a new type of continuous time filter for antialiasing, reconstruction and other band-limiting applications. No other analog components or filter expertise are needed to use it. There is one analog input pin and one analog output pin. The cutoff frequency (f_C) and gain are programmable while the shape of the lowpass response is fixed. A latching digital interface stores (f_C) and gain settings or it can be bypassed for control directly from the pins. The LTC1564 is a rail-to-rail high resolution 8th-order lowpass filter with two stopband notches, giving approximately 100dB attenuation at 2.5 times the passband cutoff frequency f_C (a de-facto standard for DSP front ends).

Mfg. Part No.	Supply Voltage (V)	Cutoff Frequency	Supply Current (mA)	Package	Stock No.	Price Each 1-99
● LTC1564IG#PBF	2.7 to 10.5	10kHz to 150kHz	22	16-SSOP	56M2179	11.67

BUTTERWORTH SWITCH-CAPACITOR FILTER

RoHS Compliant Available

TEXAS INSTRUMENTS

- Low Clock-to-Cutoff-Frequency Ratio Error: ±0.8%
- Filter Cutoff Frequency Dependent Only on External-Clock Frequency Stability
- Minimum Filter Response Deviation Due to External Component Variations Over Time and Temperature
- Cutoff Frequency Range From 0.1Hz to 30kHz, $V_{CC}\pm = \pm 2.5$ V
- 5V to 12V Operation
- Self-Clocking or TTL-Compatible and CMOS-Compatible Clock Inputs
- Low Supply-Voltage Sensitivity
- Designed to be Interchangeable With National MF4-50

Mfg. Part No.	Description	Stock No.	Price Each 1-9	10-24	25-49

ANALOG MULTIPLIERS/DIVIDERS

RoHS Compliant Available

ANALOG DEVICES

These devices accept analog voltages and multiply, divide, square and/or square-root the signals over wide frequency range (DC to 500MHz). The 4-quadrant multipliers/dividers accept any combination of input signal polarity and provide output signals of appropriate polarity. Various signal processing functions can be implemented, including modulation and demodulation, fixed and variable remote gain adjustment, power measurement and mathematical operations in analog computing, curve computing and linearizing.

ANALOG SWITCHES

RoHS Compliant Available

FAIRCHILD

The Fairchild Switch FSAL200 is a rail-to-rail quad 2:1 high-speed CMOS TTL-compatible analog multiplexer/demultiplexer switch. The low On Resistance of the switch allows inputs to be connected to outputs without adding propagation delay or generating additional ground bounce noise

VIDEO MULTIPLEXERS

RoHS Compliant Available

LINEAR TECHNOLOGY

The **LT1205** is a dual buffered 4-input, 2-output multiplexer. These multiplexers act as SPDT video switches with 10ns transition times at toggle rates up to 30MHz. Both have a 25ns switch time and are manufactured using LTC's proprietary complementary bipolar process.

LT6555 and **LT6556** are high speed triple 2:1 video multiplexers that are ideal for driving very high resolution video signals. Separate power supply pins for each amplifier boost channel separation to 72dB, allowing them to excel in many high speed applications.

Mfg. Part No.	Number of Channels	Bandwidth Max (MHz)	Supply Voltage Max. (V)	Package	Stock No.	Price Each 1-24

IL4- and IL3- SERIES ISOLATED RS-422, RS-485, PROFIBUS, AND CAN TRANSCEIVERS

RoHS Compliant Available

NVE CORPORATION

Features:

- 3 V or 5 V Power Supply
- Low Quiescent Supply Current
- Digital and Passive Input Versions
- 25,000 Year Barrier Life
- 0.15″ and 0.3″-Wide 16-pin SOIC

NVE's award-winning **IL4-** and **IL3-Series** single-chip isolated transceivers dramatically reduce chip count and board area compared to traditional optocouplers. Unique 0.15″ SOIC packages for some parts reduce board area even more.

ST7538 POWER LINE TRANCEIVER EVALUATION KIT

ST

The **EVALST7538DUAL** board integrates the ST7538 power line transceiver along with the power supply section, the signal coupling interface section, crystal oscillator and device protections. The coupling interface section has been realized for communication on CENELEC Band A used mainly for AMR applications, with the possibility of programmable switching between 72kHz and 86kHz communication channels. This half-duplex "dual channel" communication feature has been implemented through optimized receiving and transmitting filters on the board. EVALST7538DUAL board must be connected to a PC through the EVALCOMMBOARD general purpose board.

Mfg. Part No.	Description	Stock No.	Price Each Each
EVALST7538DUAL	Dual-channel Power Line Transceiver Evaluation Board based on ST7538	09R4579	157.50
EVALCOMMBOARD	Communication/ control board based on ST72F651AR6 microcontroller for power line communication and industrial products	09R4573	105.00

MULTIPOINT TRANSCEIVERS

RoHS Compliant Available

TEXAS INSTRUMENTS

The **DS36276M/NOPB** FAILSAFE Multipoint Transceiver is designed for use on bi-directional differential busses. It is compatible with existing TIA/EIA-485 transceivers, however, it offers an additional feature not supported by standard transceivers. The **DS485TM/NOPB** low-power transceiver for RS-485 and RS-422 communication. The device contains one driver and one receiver.

Mfg. Part No.	Channels	Max Data Rate (MBPS)	Supply Voltage (V)	Package	Stock No.	Price Each 1-9
● DS485TM/NOPB	1	2.5	4.75 - 5.25	8-NSOIC	41K1913	2.62
● DS64BR401SQE/NOPB	8	6400	2.375 - 2.625	54-LLP	27R1771	17.11

CERTIFIED EMC COMPLIANT RS-485 INTERFACE DESIGN TOOL

RoHS Compliant Available

ANALOG DEVICES

Features
- Robust EMC compliant RS-485 transceiver interface
- Tested to specific ESD, EFT, and surge levels

Applications
- Building Control & Automation
- Electronic Test & Measurement
- Field Instruments/ Smart Transmitters
- Heating, Ventilation & Air Conditioning
- Instrumentation
- Motor and Power Control
- Programmable Logic Controllers/ Distributed Control Systems
- Sensors and Sensor Interface

DUAL-CHANNEL ISOLATORS WITH INTEGRATED DC-TO-DC CONVERTERS

RoHS Compliant Available

ANALOG DEVICES

Features:
- 15 ns propagation delay
- Regulated 3.15 V to 5.25 V output
- Up to 150 mW output power
- Dual dc-to-100 Mbps (NRZ) signal isolation channels
- Soft start power supply

Applications:
- RS-232 transceivers
- Power supply start-up bias and gate drives
- Isolated sensor interfaces
- Industrial PLCs

ISOLATED CAN TRANSCEIVER W/INTEGRATED VOLTAGE, BUS-SIDE, LINEAR REGULATOR

RoHS Compliant Available

ANALOG DEVICES

Features:
- Short-circuit protection on bus pins
- Integrated bus miswire protection
- Unpowered nodes do not disturb the bus
- Complies with ISO 11898 standard

The **ADM3052** is an isolated controller area network (CAN) physical layer transceiver with a V+ integrated linear regulator. The device employs Analog Devices, Inc., iCoupler® technology to combine a 3-channel isolator, a CAN transceiver, and a linear regulator into a single package.

ISOLATED PRECISION HALF-BRIDGE DRIVERS

RoHS Compliant Available

ANALOG DEVICES

Features:
- High frequency operation: 1 MHz maximum
- CMOS input logic levels
- Default low output

Applications:
- Switching power supplies
- Isolated IGBT/MOSFET gate drives
- Industrial inverters

EVAL-ADUM3223AEBZ

The **ADuM3223/ADuM4223** are 4 A isolated, half-bridge gate drivers that employ the Analog Devices, Inc., iCoupler® technology to provide independent and isolated high-side and low-side outputs. The **ADuM3223/ADuM4223** isolators each provide two independent isolated channels. Combining high speed CMOS and monolithic transformer technology, these isolation components provide outstanding performance characteristics superior to the alternatives, such as the combination of pulse transformers and gate drivers.

Mfg. Part No.	Supply Voltage	Minimum Output Voltage (V)	Isolation Voltage	Package	Stock No.	Price Each 1-9

ISOPOWER® & ICOUPLER® RS-422/RS-485 TRANSCEIVERS

RoHS Compliant Available

ANALOG DEVICES

Applications:
- Isolated RS-485/RS-422 interfaces
- Industrial field networks
- Multipoint data transmission systems

iCoupler® products with isoPower™ technology offer a new approach that greatly reduces size and cost without compromising on data rate and isolation rating. isoPower technology, a new family of devices integrates 50 mW of isolated power and two 10 Mbps data channels with 2.5 kV isolation, provides a total solution in one package.

Mfg. Part No.	Data Rate (MSPS)	Isolated Rating (kVrms)	Supply Voltage (V)	Package	Stock No.	Price Each 1-9

ADM2587EBRWZ	0.5	2.5	3 - 5.5	20-SOIC	33R2688	10.53

The converters expand ADI's isolated power portfolio by providing designers with a compact, easy-to-implement, cost-effective approach to meeting both isolated power and data requirements. The combination of size and output power also addresses the growing space and power constraints engineers must consider when designing control systems, test and measurement equipment, power supplies, motor drives, and other industrial and instrumentation applications.

HIGH STABILITY ISOLATED ERROR AMPLIFIER

NEW — RoHS Compliant Available — ANALOG DEVICES

Features:
- Compatible with Type II or Type III compensation networks
- Compatible with DOSA
- Safety and regulatory approvals (pending)
- UL recognition: 2500 V rms for 1 minute per UL 1577
- CSA Component Acceptance Notice #5A
- VDE certificate of conformity
- DIN V VDE V 0884-10 (VDE V 0884-10):2006-12
- VIORM = 560 V peak

Applications:
- Linear power supplies
- Inverters
- Uninterruptible Power Supply (UPS)
- DOSA-compatible modules
- Voltage monitors

The **ADuM3190** is an isolated error amplifier based on Analog Devices, Inc., iCoupler® technology. The **ADuM3190** is ideal for linear feedback power supplies. The primary side controllers of the **ADuM3190** enable improvements in transient response, power density, and stability as compared to commonly used optocoupler and shunt regulator solutions. Unlike optocoupler-based solutions, which have an uncertain current transfer ratio over lifetime and at high temperatures, the **ADuM3190** transfer function does not change over its lifetime and it is stable over a wide temperature range of -40°C to +125°C. Included in the **ADuM3190** is a wideband operational amplifier for a variety of commonly used power supply loop compensation techniques. The ADuM3190 is fast enough to allow a feedback loop to react to fast transient conditions and overcurrent conditions. Also included is a high accuracy 1.225 V reference to compare with the supply output setpoint.

SIGNAL & POWER ISOLATED CAN TRANSCEIVER W/ ISOLATED DC-DC CONVERTER

RoHS Compliant Available — ANALOG DEVICES

Features:
- Connect 110 or more nodes on the bus
- Slope Control for reduced EMI
- Thermal shutdown protection
- Complies with ISO 11898 standard

Applications:
- CAN data buses
- Industrial field networks

Mfg. Part No.	No. of Channels	Isolation Voltage (KVrms)	Supply Voltage	Package	Stock No.	Price Each 1-9
● ADM3053BRWZ	1	2.5	4.5V to 5.5V	20-SOIC	55T8905	10.79

SIGNAL AND POWER ISOLATED RS-485 TRANSCEIVERS

RoHS Compliant Available — ANALOG DEVICES

Features:
- Connect up to 256 nodes on one bus
- Open- and short-circuit, fail-safe receiver inputs
- Thermal shutdown protection

Applications:
- Isolated RS-485/RS-422 interfaces
- Industrial field networks
- Multipoint data transmission systems

Mfg. Part No.	Supply Voltage	No. of Channels	Data Rate (kbps)	Package	Stock No.	Price Each 1-9
● ADM2687EBRIZ	3V to 5.5V	1	500	16-SOIC	58T8846	12.76

(197169)

FST BUS SWITCHES

RoHS Compliant Available — FAIRCHILD

Bus switches provide CMOS/TTL-compatible bus switching. The low ON resistance allows the bus switches to connect two buses directly, without adding propagation delay or generating additional ground bounce noise.

Mfg. Part No.	Description	Input	Pkg./Pins	Stock No.	Price Each 1-9
● FST16211MTD	24-Bit Bus Switch	24	TSSOP, 56	82C4508	1.40
● FST16233MTDX	16 to 32-Bit Multiplexer Switch	16	TSSOP, 56	38C7290	0.84
● FSTD16211MTDX	24-Bit Bus Switch w/ Level Shifting	24	TSSOP, 56	78K5964	2.07

(73667)

MICROPROCESSOR PERIPHERALS

RoHS Compliant Available — intersil

Mfg. Part No. 82C50A asynchronous communications element (ACE) support data rates from DC to 625k baud (0-10MHz clock). **Mfg. Part No. CP82C52** support data rates up to 1M baud asynchronously with 16x clock (16MHz clock frequency). **Mfg. Part No. CP82C55A** has 24 I/O pins. Individually programmable in 2 groups of 12 and used in 3 major modes of operation. Operating voltage: 5.0V. Operating temperature: 0°C to +70°C.

Mfg. Part No.	Operating Freq. (max)	Features	Package	Stock No.	Price Each 1-24
● CP82C55AZ	8MHz	Programmable I/O	40-DIP	79K6035	7.51

DUAL ISOLATED RS232 µMODULE TRANSCEIVERS

RoHS Compliant Available — LINEAR TECHNOLOGY

Features:
- Isolated RS232 transceiver: 2.5 kV_{RMS}
- High common mode transient immunity: 30kV/µs
- No external components required

The **LTM2882** addresses a wide range of RS232 applications, including industrial communications and test/measurement equipment, where breaking ground loops or working with large common mode voltages is demanded. The ±10kV ESD-protected transceiver operates at up to 1Mbps and only consumes 30µA of shutdown current when disabled. The two drivers can be enabled and disabled in less than 2µs using the uncommitted auxiliary isolated digital channel and are protected from short-circuits to any voltage within the absolute maximum range of ±15V. Their receiver counterparts are protected from common mode voltages within the absolute maximum range of ±25V. The **LTM2882** meets RF and magnetic field immunity test requirements per European standard EN 550024. Users will appreciate how the self-powered **LTM2882** takes many precautions to guarantee safe and reliable communications in RS232 systems.

Mfg. Part No.	Supply Voltage (V)	Temperature Range	Package	Stock No.	Price Each 1-24

SPI/DIGITAL or I²C µMODULE ISOLATORS + POWER

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- 6-Channel Logic Isolator: 2500V_{RMS}
- No External Components Required
- High Common Mode Transient Immunity: 30kV/µs
- Common Mode Working Voltage: 560V_{PEAK}
- Low Current Shutdown Mode (<10µA)

Applications:
- Isolated SPI or I²C Interfaces
- Industrial Systems
- Test and Measurement Equipment
- Breaking Ground Loops

The **LTM®2883** is a complete digital µModule® galvanic isolator. The **LTM2883's** internal inductive isolation barrier breaks ground loops by isolating the logic level interface for SPI, I²C or general purpose I/O. An onboard DC/DC converter provides power to the internal communications interface and to three adjustable isolated power supply outputs, nominally 5V, 12.5V and –12.5V. Each supply can be adjusted from its nominal value using a single external resistor. The **LTM2883's** 2500V_{RMS} isolation, onboard secondary power, digital communications interface and guaranteed uninterrupted communication through common mode transients greater than 30kV/µs, provides a simple, highly integrated µModule solution for isolated serial data communications.

SMBUS/I2C ACCELERATOR

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Notebook and Palmtop Computers
- Portable Instruments
- Battery Chargers
- Industrial Control Application
- TV/Video Products
- ACPI SMBus Interface

Features:
- Improves SMBus Rise Time Transition
- Ensures Data Integrity with Multiple Devices on the SMBus
- Improves Low State Noise Margin
- Auto Detect Low Power Standby Mode

The **LTC™1694** is a dual SMBus active pull-up designed to enhance data transmission speed and reliability under all specified SMBus loading conditions. The **LTC1694** is also compatible with the Philips I²C™ Bus. The **LTC1694** allows multiple device connections or a longer, more capacitive interconnect, without compromising slew rates or bus performance, by using two bilevel hysteretic current source pull-ups. During positive bus transitions, the **LTC1694** current sources provide 2.2mA to quickly slew the SMBus line. During negative transitions or steady DC levels, the current sources decrease to 275µA to improve negative slew rate and improve low state noise margins. An auto detect standby mode reduces supply current if both SCL and SDA are high.

The **LTC4311** is a dual I2C active pull-up designed to enhance data transmission speed and reliability for bus loading conditions well beyond the 400pF I2C specification limit. The **LTC4311** allows multiple device connections or a longer, more capacitive interconnect, without compromising slew rates or bus performance, by using two slew limited pull-up currents. During positive bus transitions, the **LTC4311** provides slew limited pull-up currents to quickly slew the I2C or SMBus lines to the bus pull-up voltage. During negative transitions or steady DC levels, the currents are disabled to improve negative slew rate, and improve low state noise margins. An auto detect standby mode reduces supply current if both SCL and SDA are high. When disabled, the **LTC4311** goes into low (<5µA) current shutdown.

Mfg. Part No.	Supply Voltage (V)	Supply Current (µA)	Package	Stock No.	Price Each 1-24

TRIPLE RS232 DRIVER/ RECEIVER w/SHUTDOWN

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- 125kBd Operation with 3kohms/2500pF Load
- 250kBd Operation with 3kohms/1000pF Load
- Fully Protected Against Overload
- Outputs Can Be Driven ±30V Without Damage
- Three-State Outputs; Outputs Open When Off
- Bipolar Circuit - No Latchup
- No Supply Current in Shutdown
- 30kohms Input Impedance
- Meets All RS232 Specifications

Applications:
- RS232 Interface
- Terminals
- Modems

The **LT®1039A** is a triple RS232 driver/receiver that includes shutdown. Each receiver will accept up to ±30V input and can drive either TTL or CMOS logic. The RS232 drivers accept TTL logic inputs and output RS232 voltage levels. The outputs are fully protected against overload and can be shorted to ground or up to ±30V without damage to the drivers. Additionally, when the system is shut down or power is off, the outputs are in a high impedance state allowing data line sharing. On-chip ESD protection eliminates the need for external protection devices. A bias pin allows one receiver to be kept on while the rest of the part is shut down. A bias pin allows one receiver to be kept on while the rest of the part is shut down.

Mfg. Part No.	Supply Voltage (V)	Drivers/ Receivers	ESD (kV)	Package	Stock No.	Price Each 1-99

(210174)

RS485/RS422 µMODULE TRANSCEIVERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Isolated RS485/RS422 interface
- Industrial networks
- Breaking RS485 ground loops

The RS485 standard (formally TIA-485) specifies differential data transmission over a terminated twisted pair at up to 10Mbps. The standard specifies electrical characteristics of a driver and receiver, and does not specify any data protocol or connectors. RS485 is popular for inexpensive local networks, multidrop communication links and long haul data transfer over distances of up to 4,000 feet. The use of a balanced line means RS485 has excellent noise rejection and is ideal for industrial and commercial applications. The RS422 standard is similar to the RS485 standard but does not permit multiple drivers on a bus. Similarly, the Profibus (Process Field Bus) protocol uses RS485's popular physical medium when deploying fieldbus solutions in factory and process automation environments.

Linear Technology offers a broad selection of industry standard, low power CMOS RS485 and RS422 interface transceivers featuring high data rates, high ESD protection, failsafe receivers, and high voltage versions for rugged environments. Our latest RS485/RS422 transceivers feature pin-controlled switchable 120ohm termination resistors that minimize physical user intervention when reconfiguring networks, and fully balanced receiver thresholds that help maintain good duty cycle symmetry at low signal levels.

LINEAR TECHNOLOGY

Drivers and receivers for traditional serial port applications such as RS232, RS485, V.35 and multi-protocol combinations. Key features are ruggedness, 10-15kV ESD protection and availability in industry-standard footprints. Industry standard single and dual drivers and receivers for RS232 and RS562 are available for power supplies from 1.8V to 5.5V with high ESD protection. Industry standard low power CMOS RS485 and RS422 transceivers also feature high ESD protection, failsafe, high speed and high voltage versions. Ideal for serial ports in networking and telecom applications, these multiprotocol transceivers support RS232, V.35, X.21 and a host of other legacy protocols. Linear Technology's CAN Transceiver provides fault protected communcations for industrial and automotive environments.

IL600-ISOLATOR EVALUATION BOARD

RoHS Compliant Available

NVE NVE CORPORATION

The IL600-Series Isolator evaluation board lets you try a variety of NVE's unique IL600-Series Isolators. The board has four isolators in four package types: IL613E (wide-body SOIC-16), IL614-3E (narrow-body SOIC-16), IL611-3E (SOIC-8), Open-drain IL610A-1E (MSOP-8)

Mfg. Part No.	Description	Stock No.	Price Each
IL600-01	Evaluation Board for IL600 Series Passive-Input Isolators	94T5283	49.99

IL700/IL200 HIGH SPEED DIGITAL SIGNAL ISOLATORS

RoHS Compliant Available

NVE CORPORATION

Features:

- 1.5mA/output channel Quiescent Current
- Up to 150 Mbps (S-Series)
- PWD to 300 ps (S-Series)
- 100ps Typical Pulse Jitter
- 10ns Typical Propagation Delay
- Up to 125°C (T-Series)
- 25,000 Year Barrier Life
- Low EMC Footprint
- MSOP, SOIC, and PDIP Packages
- UL1577 & IEC 61010-2001 Approved

IL700 / IL200 series are the original high-speed optocouplers from NVE. Popular applications include serial interfaces, isolated Controller Area Network (CAN Bus), isolated Serial Peripheral Interface (SPI), isolated A/D converters, and isolated power interfaces. An evaluation board is available.

3G HD/SD SDI LOW POWER EXTENDED REACH ADAPTIVE CABLE EQUALIZER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:

- Output de-emphasis to compensate for FR4 board trace losses
- Optional SPI register access
- Internally terminated 100Ω LVDS outputs with programmable output common mode voltage and swing
- Programmable launch amplitude optimization
- Cable length indicator

Applications:

- SMPTE 424M, SMPTE 292M, SMPTE 344M, and SMPTE 259M serial digital interfaces
- Broadcast Video routers, switchers, and distribution amplifiers

DISPLAY INTERFACES

RoHS Compliant Available

TEXAS INSTRUMENTS

PanelBus provides a universal interface to allow a glue-less connection to most commonly available graphics controllers. Advantages of this universal interface include selectable bus widths, adjustable signal levels, and differential and single-ended clocking. The adjustable 1.1-V to 1.8-V digital interface provides a low-EMI, high-speed bus that connects seamlessly with 12-bit or 24-bit interfaces. The DVI interface supports flat panel display resolutions up to UXGA at 165 MHz in 24-bit true color pixel format.

PANELBUS (DVI)

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-9

EMI/ESD SOLUTIONS

RoHS Compliant Available

TEXAS INSTRUMENTS

An Electrostatic Discharge strike is a constant threat to device reliability and functionality. Many low-voltage core chips or system ASICs only offer device-level human-body model (HBM) ESD protection, which doesn't address the risks of system-level ESD strikes. TI's stand-alone ESD solutions provide a space-saving and cost-effective solution to protect the system interconnects from external ESD strikes. The TPD product family of devices from TI provides IEC 61000-4-2 level ESD protection, with solutions for multiple external interfaces, including video, audio and serial data transfer. TI's family of devices meet requirements for low-power, small footprint applications making them ideal for multiple markets, including mobile computing, mobile handsets and consumer electronics. TI produces ESD devices with solutions that protect the majority of external connections to the outside world.

EMI FILTER W/INTEGRATED VCC CLAMP FOR SIM CARD INTERFACE

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Bidirectional EMI/RFI Filtering and Line Termination with Integrated ESD Protection
- Low Noise C-R-C Filter Topology
- Integrated VCC Clamp Eliminates the Need for External ESD Protection

Applications:
- Mobile handsets
- PDAs
- Video Consoles
- Portable Computers

The **TPD3F303** is a 3-ch integrated EMI filter for SIM interface. This device integrates a VCC clamp to provide system level ESD protection at the VCC line. Termination resistor value of 47ohm is included on the CLK line, while a 100ohm termination is employed at the DATA and RST line. The **TPD3F303** is designed to suppress EMI/RFI noise in systems subjected to electromagnetic interferences.

Mfg. Part No.	No. of Channels	Ctotal (Typ) pF	Breakdown Voltage (V)	Package	Stock No.	Price Each 1-9

PRECISION PHYTER - IEEE 1588 PRECISION TIME PROTOCOL TRANSCEIVER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- IEEE 1588 V1 and V2 Supported
- UDP/IPv4, UDP/IPv6, and Layer2 Ethernet Packets Supported
- IEEE 1588 Clock Synchronization
- Selectable Frequency Synchronized Low Jitter Clock Output
- Timestamp Resolution of 8 ns
- Allows Sub 10 ns Synchronization to Master Reference
- 12 IEEE 1588 GPIOs for Trigger or Capture
- Deterministic, Low Transmit and Receive Latency
- Dynamic Link Quality Monitoring
- TDR Based Cable Diagnostic and Cable Length Detection

Applications:
- Telecom
- FactoryAutomation
- Test and Measurement
- Video Synchronization
- Real Time Networking

The **DP83630** Precision PHYTER device delivers the highest level of precision clock synchronization for real time industrial connectivity based on the IEEE 1588 standard. The **DP83630** has deterministic, low latency and allows choice of microcontroller with no hardware customization required. The integrated 1588 functionality allows system designers the flexibility and precision of a close to the wire timestamp

SECOND GENERATION FOUR PORT SUPERSPEED USB (USB 3.0) HUB

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Supports Operation as a USB 3.0 or USB 2.0 Compound Device
- Supports Per Port or Ganged Power Switching and Over-Current Notification Inputs
- Provides 128-Bit Universally Unique Identifier (UUID)
- Optionally Supports USB 2.0 Compliant Port Indicator LEDs
- Configurable SMBus Address to Support Multiple Devices on the Same SMBus Segment
- Supports On-Board and In-System EEPROM Programming Via the USB 2.0 Upstream Port
- Single Clock Input, 24-MHz Crystal or Oscillator

Applications:
- Computer Systems
- Docking Stations
- Monitors
- Set-top Boxes

TUSB8040AEVM

The **TUSB8040A** is a four-port USB 3.0 compliant hub and is available in a 100-pin QFN package. The device is designed for operation over the commercial temperature range of 0°C to 70°C. The **TUSB8040A** provides simultaneous SuperSpeed USB and high-speed or full-speed connections on the upstream port and provides SuperSpeed USB, high-speed, full-speed, or low-speed connections on the downstream ports. When the upstream port is connected to an electrical environment that only supports high-speed, full-speed or low-speed connections, SuperSpeed USB connectivity is disabled on the downstream ports. When the upstream port is connected to an electrical environment that only supports full-speed or low-speed connections, SuperSpeed USB and high-speed connectivity are disabled on the downstream ports. The **TUSB8040A** supports up to four downstream ports. It may be configured to report one to four downstream ports by pin selection or by an attached EEPROM or SMBus controller. The configuration options provide the ability to scale the device by application.

I/O PORT EXPANDERS

RoHS Compliant Available

MICROCHIP

- I²C™and SMBus Compatible Interface
- Compatible With Most Microcontrollers
- Internal Power On Reset
- Operating Supply Voltage: 2.0V to 5.5V
- Temperature Range: -40°C to +85°C

The MCP23016 device provides 16-bit, general purpose, parallel I/O expansion for I²C™ bus applications. This device includes high-current drive capability, low supply current and individual I/O configuration. I/O expanders provide a simple solution when additional I/Os are needed for ACPI, power switches, sensors, push buttons, and LEDs.

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-25

WIDEBAND SYNTHESIZER W/ INTEGRATED VCO

RoHS Compliant Available

ANALOG DEVICES

Features:
- Fractional-N synthesizer and integer-N synthesizer
- Low phase noise VCO
- Programmable output power level
- RF output mute function
- Analog and digital lock detect
- Switched bandwidth fast-lock mode
- Cycle slip reduction

Applications:
- Wireless infrastructure (W-CDMA, TD-SCDMA, WiMAX, GSM, PCS, DCS, DECT)
- Test equipment
- Wireless LANs, CATV equipment
- Clock generation

The **ADF4351** allows implementation of fractional-N or integer-N phase-locked loop (PLL) frequency synthesizers if used with an external loop filter and external reference frequency. The **ADF4351** has an integrated voltage controlled oscillator (VCO) with a fundamental output frequency ranging from 2200 MHz to 4400 MHz. In addition, divide-by-1/2/4/8/16/32 or 64 circuits allow the user to generate RF output frequencies as low as 35 MHz. For applications that require isolation, the RF output stage can be muted. The mute function is both pin- and software-controllable. An auxiliary RF output is also available, which can be powered down if not in use.

Mfg. Part No.	Supply Voltage (V)	Supply Current (mA)	Freq. Max (GHz)	Package	Stock No.	Price Each 1-9

CLOCK DRIVERS

RoHS Compliant Available

intersil

Features:
- Industry Standard Driver Replacement and Improved Response Times
- Matched Rise and Fall Times
- Reduced Clock Skew
- Low Output Impedance and Input Capacitance
- High Noise Immunity
- Improved Clocking Rate
- Low Supply Current
- Wide Operating Voltage Range (+4.5V to +16V)

Applications:
- Clock/Line Drivers
- CCD Drivers
- Ultra-Sound Transducer Drivers
- Power MOSFET Drivers
- Switch Mode Power Supplies

The **EL7104C** is a matched driver IC that improves the operation of the industry-standard TC-4420/29 clock drivers. Very high speed driver delivers peak currents of 1A into highly capacitive loads. The **EL7202C/EL7222C** ICs are matched dual-drivers ICs that improve the operation of the industry standard DS0026 clock drivers. Very high speed drivers deliver peak currents of 2.0A into highly capacitive loads.

TimerBlox FAMILY OF TIMING BUILDING BLOCKS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- 500µs start-up time
- VCO bandwidth >300kHz at 1MHz
- CMOS logic output sources/sinks 20mA
- 50% duty cycle square wave output
- Output enable (selectable low or Hi-Z when disabled)

Applications:
- Low cost precision programmable oscillator
- Voltage-controlled oscillator
- High vibration, high acceleration environments
- Replacement for fixed crystal and ceramic oscillators
- Portable and battery-powered equipment

LTC6905-XXX SERIES SILICON OSCILLATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- No External Components to Set Frequency
- Frequency Error ±0.5% Typical
- Fast Start-Up Time: 100µs Typical
- Includes Output Enable
- Includes Divide by 1, 2 or 4
- CMOS Output Drives 600 Ohm Load

Applications:
- Data Clocks for High Reliability Applications
- High Vibration, High Acceleration Environments
- Replacement for Fixed Crystal and Ceramic Oscillators

The **LTC6905-XXX** series of parts are precision, fixed frequency, silicon oscillators designed to minimize board space while maximizing accuracy and ease of use. Programmed at the factory to a fixed frequency, the **LTC6905-XXX** series of parts need no external trim components. An internal three-state divider allows for division of the master clock by 1, 2 or 4, providing 3 frequencies (for each device).

Mfg. Part No.	Number of Outputs	Program Method	Freq. Max. (MHz)	Package	Stock No.	Price Each 1-24
● LTC6905CS5#PBF	1	Resistor	170	5-SOT-23	78T3494	3.56
● LTC6905CS5-80#PBF	1	Resistor	80	5-SOT-23	78T3492	1.71

ULTRALOW NOISE & SPURIOUS INTEGER-N SYNTHESIZER W/VCO

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Configurable Status Output
- SPI Compatible Serial Port Control
- PLLWizard™ Software Design Tool Support

Applications:
- Wireless Base Stations (LTE, WiMAX, W-CDMA, PCS)
- Broadband Wireless Access
- Military and Secure Radio
- Test and Measurement

The **LTC6946** is a high performance, low noise, phase-locked loop (PLL) with a fully integrated VCO, including a reference divider, phase-frequency detector (PFD) with phase-lock indicator, ultralow noise charge pump, integer feedback divider, and VCO output divider. The charge pump contains selectable high and low voltage clamps useful for VCO monitoring.
The integrated low noise VCO uses no external components. It is internally calibrated to the correct output frequency with no external system support.

Mfg. Part No.	Frequency Tuning	Spurious (dBc)	Package	Stock No.	Price Each 1-24

PHASED LOCKED LOOP (PLL) ICs

RoHS Compliant Available

NXP

The **74HC/HCT4046A** are high-speed Si-gate CMOS devices and are pin compatible with the '4046' of the '4000B' series. They are specified in compliance with JEDEC standard no. 7A. They are phase-locked-loop circuits that comprise a linear voltage-controlled oscillator (VCO) and three different phase comparators (PC1, PC2 and PC3) with a common signal input amplifier and a common comparator input. The **HEF4046B** is a phase-locked loop circuit that consists of a linear Voltage Controlled Oscillator (VCO) and two different phase comparators with a common signal input amplifier and a common comparator input. A 7 V regulator (Zener) diode is provided for supply voltage regulation if necessary.

Mfg. Part No.	Type	Supply Voltage Range	Freq. Typ. (MHz)	Logic Level	Package	Stock No.	Price Each 1-9

3G/HD/SD VIDEO CLOCK GENERATOR WITH AUDIO CLOCK

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications:
- Triple rate (3G/HD/SD) SDI SerDes
- FPGA reference clock generation/cleaning
- Audio embed/de-embed
- Video cameras
- Frame synchronizers (Genlock, DARS)
- A-D/D-A conversion, editing, processing cards
- Keyers and logo inserters
- Format/standards converters
- Video displays and projectors
- A/V test and measurement equipment

Features:
- 3 x 2 Video clock crosspoint
- Flexible PLL bandwidth to optimize jitter performance and lock time
- Soft re-synchronization to new reference
- Digital holdover or free-run on loss of reference
- Status flags for loss of reference and loss of PLL lock

TIMER ICS

RoHS Compliant Available

TEXAS INSTRUMENTS

LinCMOS™ timer circuits are fully compatible with CMOS, TTL, and MOS logic and operate at frequencies up to 2MHz. High input impedance means smaller timing capacitors may be used. Sink: 100mA (typ.). Rail-to-rail CMOS output.

AUDIO SPEAKER DRIVERS

RoHS Compliant Available

wolfson microelectronics

Applications:
- Mobile phones
- Laptop computers and portable gaming devices
- Portable navigation & media devices

The **WM9001** is a powerful, high quality speaker driver which can operate in class D or AB mode, providing total flexibility to the system designer. Low leakage, high PSRR and pop/click suppression enable direct battery connection to the speaker supply. RF noise suppression techniques and differential design are used to suppress undesired noise. A single-ended input option has been included for complete system flexibility

ADV212BBCZ-150	Video Codec	144-BGA	28M3952	47.54
ADDI7100BCPZ	12-Bit CCD Signal Processor	32-LFCSP	86T6055	11.19

The **ADV7179 series** is an integrated digital encoder that converts digital CCIR-601 4:2:2 8-bit component video data into a standard analog baseband television signal compatible with worldwide standards. The **ADV7311/7321 series** include six high-speed NSV video D/A converters with TTL compatible inputs. The **AD725 series** is a general purpose RGB to NTSC/PAL encoder that converts red, green, and blue color component signals into their corresponding luminance and chrominance signals in accordance with either NTSC or PAL standards.

ENCODERS

Mfg. Part No.	Resolution (Bits)	Number of DACs	Supply Voltage Max (V)	Package	Stock No.	Price Each 1-9

32-SEGMENT CMOS LCD DRIVERS

RoHS Compliant Available

MICROCHIP

Features:

- Drives up to 32 LCD Segments of Arbitrary Configuration
- Voltage Range: +3V to +8.5V
- Low-Power Operation: 13µA Typical LCD OSC> 100Hz
- CMOS and TTL-Compatible Inputs
- Electrostatic Discharge Protection on All Pins
- Cascadable
- On-Chip Oscillator
- Requires Only 3 Control Lines

Driver latches the data to be displayed and relieves the microprocessor from the task of generating the required waveforms. The AC frequency of the LCD waveforms can either be supplied by the user or generated by attaching a capacitor to the LCD input, which controls the frequency of an internal oscillator. Applications include: industrial displays, consumer product displays, telecom product displays, and automotive dashboard displays.

LDO AND SHUNT REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

LT1761 and **LT1964** series are micropower, low noise, low dropout regulators. With an external 0.01µF bypass capacitor, **LT1761** output noise drops to 20µVRMS over a 10Hz to 100kHz bandwidth. Low 20µA quiescent current (0.1uA shutdown). **LT1964** series is capable of supplying 200mA of output current with a dropout voltage of 340mV. Low quiescent current (30µA operating and 3µA shutdown). Both series are ideal for battery-powered applications.

VOLTAGE SHUNT REGULATORS

LT1431 series is an adjustable shunt voltage regulator with 100mA sink capability, 0.4% initial reference voltage tolerance and 0.3% typical temperature stability. On-chip divider resistors allow the **LT1431** to be configured as a 5V shunt regulator, with 1% initial voltage tolerance and requiring no additional external components.

Mfg. Part No.	Voltage Ref. (V)	Output Current (mA)	Supply Voltage Max (V)	Package	Stock No.	Price Each 1-24

VOLTAGE REGULATORS

The **LT323A** is an improved version of the popular **LM323** 5 Volt, 3 Amp Regulator. These new devices offer maximum initial output voltage tolerance of 1% and maintain a maximum tolerance of 3% over worst case operating conditions. Line and load regulation are also improved by a factor of 2.

Mfg. Part No.	Voltage Ref. (V)	Output Current (mA)	Supply Voltage Max (V)	Package	Stock No.	Price Each 1-24
LT323AT#PBF	5	3	20	3-TO-220	57M8068	4.28

POSITIVE LOW DROPOUT LINEAR REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology manufactures a broad line of high performance low dropout linear regulators. These LDOs offer the very low dropout, fast transient response, excellent line and load regulation, and have a very wide input voltage range, anywhere from 0.9V to 80V. Output currents range from 100mA to 10A, with positive and multiple outputs.

GENERAL PURPOSE LOW DROPOUT REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- General purpose linear regulator
- Battery-powered systems
- Microprocessor core/logic supplies
- Post regulator for switching supplies
- Tracking/sequencing power supplies

Features:
- Current: 500mA per channel
- Reverse-battery and reverse output-to-input protection
- Low noise: 20 uVRMS (10Hz to 100kHz)

LT3015 SERIES NEGATIVE LOW DROPOUT VOLTAGE REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Precision Current Limit with Foldback
- Precision Positive or Negative Shutdown Logic
- Fast Transient Response
- Controlled Quiescent Current in Dropout

Applications:
- Post-Regulator for Switching Supplies
- Negative Logic Supplies
- Low Noise Instrumentation
- Industrial Supplies

LT3081 SERIES LINEAR DROPOUT REGULATORS

NEW

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Extended Safe Operating Area
- Stable with or without Input/Output Capacitors
- Single Resistor Sets Output VoltageParallel Multiple Devices for Higher Current or Heat Spreading
- Programmable Current Limit
- Reverse-Battery and Reverse-Current Protection

Applications:
- All Surface Mount Power Supply
- Rugged Industrial Power Supply
- Post Regulator for Switching Supplies
- Low Output Voltage Supply
- Intrinsic Safety Applications

The **LT®3081** is a low dropout linear regulator designed for rugged industrial applications. Key features of the IC are the extended safe operating area (SOA), output current monitor, temperature monitor and programmable current limit. The **LT3081** can be paralleled for higher output current or heat spreading. The device withstands reverse input and reverse output-to-input voltages without reverse current flow. The output current monitor (IOUT/5000) and die junction temperature output (1µA/°C) provide system monitoring and debug capability. In addition, a single resistor programs current limit. Internal protection circuitry includes reverse-battery and reverse-current protection, current limiting and thermal limiting.

LINEAR TECHNOLOGY

Linear Technology manufactures a broad line of high performance low dropout linear regulators. These LDOs offer the very low dropout, fast transient response, excellent line and load regulation, and have a very wide input voltage range, anywhere from 0.9V to 80V. Output currents range from 100mA to 10A, with negative outputs.

Mfg. Part No.	Dropout Voltage (mV)	Output Current (A)	Output Voltage Max.	Output Voltage Min.	Package	Stock No.	Price Each 1-24

150 mA, 28V LDO REGULATORS With SHUTDOWN

RoHS Compliant Available

MICROCHIP

Features:
- 50 µA typical quiescent current
- 0.01 µA typical shutdown current
- Output voltage accuracy: ±2%
- Stable with Ceramic output capacitors
- Current limit protection with current foldback
- Shutdown pin
- High PSRR: 50 dB typical @ 1 kHz

Applications:
- Cordless phones, wireless communications
- PDAs, notebook & netbook computers
- Digital cameras
- Microcontroller power
- Car audio & navigation systems
- Home appliances

The **MCP1804** is a family of CMOS low dropout (LDO) voltage regulators that can deliver up to 150 mA of current while consuming only 50 µA of quiescent current.

Mfg. Part No.	Dropout Voltage (mV)	Supply Voltage (V)	Package	Stock No.	Price Each

150mA CMOS LDO WITH SHUTDOWN

RoHS Compliant Available

MICROCHIP

Features

- Supply voltage: 2.7-6V
- Space-saving 5-Pin SC-70 and SOT-23 packages
- Extremely low operating current for longer battery life: 53µA (typ.)
- High output voltage accuracy: ±0.5% (typ.)
- Power-saving shutdown mode: 0.05µA (typ.)
- Overcurrent and overtemperature protection
- Pin-Compatible upgrade for bipolar regulators

LDO VOLTAGE REGULATORS

RoHS Compliant Available

MICROCHIP

Features:

- Very Low Dropout Voltage: 120mV typ. @ 100mA, 380mV typ. @ 200mA
- High Output Current: 250mA(V_{OUT}=5.0V)
- High Accuracy Output Voltage: ±0.5%
- Wide Output Voltage Range: 1.1-6.0V
- Low Power Consumption: 1.1µA typ.
- Low Temperature Drift: ±100ppm/°C typ.
- Excellent Line Regulation: 0.2%/V typ.
- Operating Temperature: -40°C to +85°C

OUTPUT VOLTAGE: 0.8 V

SWITCHING REGULATORS

RoHS Compliant Available

ANALOG DEVICES

The **ADP1111** is part of a family of step-up/step-down switching regulators that operates from an input voltage supply of 2 V to 12 V in step-up mode and up to 30 V in step-down mode. The **ADP1111** can be programmed to operate in step-up/step-down or inverting applications with only 3 external components.
The **ADP3050** is a current-mode monolithic buck (step-down) PWM switching regulator that contains a high current 1A switch and all control, logic and protection functions. It uses a unique compensation scheme which allows the use of any type of output capacitor (tantalum, ceramic, electrolytic, OS-CON).

SWITCHING REGULATORS WITH INTEGRATED FET SWITCHES

RoHS Compliant Available

ANALOG DEVICES

These switching regulators come in step up, step down, and inverting modes and are capable of generating a fixed or adjustable output voltage offering up to 2A of output current. Some of the features available are low battery detector, user adjustable current limit, a variety of switching frequencies, and a reduced number of external components.

ISOPOWER® AND ICOUPLER® DC/DC CONVERTERS

RoHS Compliant Available

ANALOG DEVICES

Applications:
- RS-232/RS-422/RS-485 transceivers
- Medical isolation
- AC/DC power supply startup bias and gate drives
- Isolated sensor interface

iCoupler® products with isoPower™ technology offer a new approach that greatly reduces size and cost without compromising on data rate and isolation rating. isoPower technology, a new family of devices integrates 50 mW of isolated power and two 10 Mbps data channels with 2.5 kV isolation, provides a total solution in one package.

SUPIRBUCK ™ 2ND GENERATION INTEGRATED VOLTAGE REGULATORS

RoHS Compliant Available

International IOR Rectifier

Applications:
- Server applications
- Storage applications
- Embedded telecom systems
- Distributed point of load power architectures
- Netcom applications
- Computing peripheral voltage regulators
- General DC-DC Converters

The **IR384XW** SupIRBuck™ is an easy-to-use, fully integrated and highly efficient DC/DC synchronous Buck regulator. The MOSFETs copackaged with the on-chip PWM controller make **IR384XW** a space-efficient solution, providing accurate power delivery for low output voltage applications.

DC-DC BUCK µMODULE® REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Clock Synchronization
- Output Current Sharing (Parallelable)
- Wide Temperature Range (-55°C to +125°C)
- Remote Output Voltage Sensing
- Positive to Negative Output (Inverting)

Linear Technology's recent technical achievements in the performance of switching regulators and innovative packaging methods have finally allowed a new generation of power converters which include all the circuit component such as the inductor, controller, and power switches to be encapsulated in such a tiny size that they resemble a surface mount IC. family of DC/DC step-down µModule® regulators support input voltages up to 60V and output currents up to 60A in parallel.

DC-DC BUCK-BOOST µMODULE® REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Clock Synchronization
- Output Current Sharing (Parallelable)
- Wide Temperature Range (-55°C to +125°C)

LTM4607EV#PBF

Linear Technology's family of DC/DC buck-boost µModule® regulators deliver an output voltage above, below or equal to the input voltage

µMODULE REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

LTM4620EV#PBF

Linear Technology's recent technical achievements in the performance of switching regulators and innovative packaging methods have finally allowed a new generation of point-of-load DC/DC regulators, including all the circuit components such as the inductor and power MOSFETs, to be shrunk and encapsulated in such a tiny size that they resemble a surface mount IC. These high-end point-of-load µModule regulators are complete solutions containing the DC/DC controller, MOSFETs, inductor, input and output bypass capacitors and compensation circuitry in only 2.25cm. Supported by Linear Technology's rigorous testing and high reliability processes, the µModule family simplifies the design and layout of your next power supply. A broader selection of Linear Technology's µModule Regulator may be found online or call.

CHARGE PUMPS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's family of charge pumps offers the widest selection of simple and compact inductorless DC/DC converter designs. These converters can be used to step-up, step-down or invert an input voltage. By eliminating the inductor, these switched capacitor converters provided small solution footprint and a simpler design. Furthermore, by incorporating Spread Spectrum technology on-chip, both input and output noise are significantly reduced.

ENERGY HARVESTING DEMO BOARDS AND ICs

RoHS Compliant Available

LINEAR TECHNOLOGY

LTC3588EDD-1#PBF

DC1584A

Linear Technology manufactures a wide range of ultra-low power products targeted for Energy harvesting applications. Power management products that convert energy from Vibration (Piezo), PhotoVoltaic (Solar) and Thermal (TEC, TEG, Thermopiles, Thermocouples) sources provide high efficiency conversion to regulated voltages or to charge batteries and super capacitor storage elements. Boost converters that operate from as little as 20mV or Battery chargers with Maximum Power Point capability expand the possibilities for a wide variety of industrial automation and control, wireless sensor, transportation, automotive and building management applications.

Mfg. Part No.	Description	Pkg.	Stock No.	Price Each 1-24
● LT3652EMSE#PBF	Power Tracking 2A Battery Charger for Solar Power	12-MSOP	64R8539	6.52
● LTC4070EDDB#PBF	Li-Ion/Polymer Shunt Battery Charger System	8-DFN	67R4286	2.94
● LTC3526LBEDC-2#PBF	Synchronous Step-Up DC/DC Converter; 550mA 1MHz	6-DFN	51R1506	2.64
● LTC3534EGN#PBF	Synchronous Buck-Boost DC/DC Converter; 7V, 500mA	16-SSOP	56P2477	4.50
● LTC3588EDD-1#PBF	Piezoelectric Energy Harvesting Power Supply	10-DFN	63R1665	6.30

SWITCHED-CAPACITOR VOLTAGE CONVERTER W/REGULATOR

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Voltage Inverter
- Voltage Regulator
- Negative Voltage Doubler
- Positive Voltage Doubler

Features:
- External Shutdown
- External Oscillator Synchronization
- Can Be Paralleled

The **LT®1054** is a monolithic, bipolar, switched-capacitor voltage converter and regulator. The **LT1054** provides higher output current than previously available converters with significantly lower voltage losses. An adaptive switch driver scheme optimizes efficiency over a wide range of output currents. The **LT1054** also provides regulation, a feature not previously available in switched-capacitor voltage converters. By adding an external resistive divider a regulated output can be obtained. This output will be regulated against changes in both input voltage and output current.

Mfg. Part No.	Input Voltage (V)	Output Current (mA)	Operating Temperature	Package	Stock No.	Price Each 1-24
LT1054LCS8#PBF	7	125	0°C to +100°C	8-SOIC	57M1202	4.28
LT1054ISW#PBF	15	100	-40°C to +100°C	16-SOIC	57M1194	9.32

(209454)

ISOLATED FLYBACK CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Feature:
- Boundary mode operation
- BIAS Pin for internal bias supply and power NPN driver
- Programmable power switch current limit
- Programmable soft-start

Applications:
- Industrial, Automotive and Medical Isolated Power Supplies

ISOLATED CONVERTERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Internal Galvanic Isolation 100% Production Tested at Rated Voltage
- Wide Input Voltage Range
- Wide Adjustable Output Voltage Range
- Operating Junction Temperature up to +125°C
- Low Output Voltage Ripple (select part numbers)

Linear Technology's family of DC/DC Isolated µModule Converters include an internal galvanic transformer providing a complete Isolated DC/DC power solution with a few capacitors and resistors in a small surface mount BGA package.

SINGLE OUTPUT

SWITCHING REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology manufactures a broad line of high performance switching regulator ICs with both synchronous and non-synchronous internal switches. These switching voltage regulators offer typical input voltage capability from 2.25V up to 60V, switching frequencies up to 4MHz and high efficiency operation up to 96%. Also with Burst Mode operation, quiescent currents in the tens of micro-amps level can be attained. This combination of features allows very small, low profile circuit implementations with minimum external components. Topologies include buck (step-down) switching regulators, boost (step-up) switching regulators, buck-boost switching regulator, inverting switching regulators, and flyback and isolated topology switching regulators. Other features include adjustable or synchronizable switching frequency, small size, low external component count and more.

STEP DOWN BUCK SWITCHING REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology manufactures a broad line of high performance step-down buck switching regulator ICs and buck switching controller ICs with both synchronous and non-synchronous switches. These switching voltage regulators offer typical input voltage capability from less than 2V up to 100V+, switching frequencies up to 4MHz and high efficiency operation up to 96%. Also with Burst Mode operation, quiescent currents in the tens of micro-amps level can be attained. This combination of features allows very small, low profile buck switching regulator circuit implementations with minimum external components. Other features of these step down switch mode voltage regulators include micropower operation (Burst Mode), high efficiency, adjustable or synchronizable switching frequency, small package size and more.

SYNCHRONOUS RAIL-TO-RAIL SINGLE RESISTOR STEP-DOWN REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Integrated Power N-Channel MOSFETs (200mΩ Top and 100mΩ Bottom)
- Current Mode Operation for Excellent Line and Load
- Transient Response
- <1µA Supply Current in Shutdown

Applications:
- Point-of-Load Power Supplies
- Portable Instruments
- Distributed Power Systems
- Battery-Powered Equipment
- Voltage Tracking Supplies

The **LTC3600** is a high efficiency, monolithic synchronous buck regulator whose output is programmed with just one external resistor. The accurate internally generated 50µA current source on the ISET pin allows the use of a single external resistor to program an output voltage that ranges from 0V to 0.5V below VIN. The VOUT voltage feeds directly back to the error amplifier in unity gain fashion and equals the ISET voltage.

Mfg. Part No.	No. of Outputs	Input Voltage (V)	Output Current (A)	Package	Stock No.	Price Each 1-24

INVERTING SWITCHING REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's line of DC/DC invertering switching regulators is specifically designed to invert input voltages to negative outputs. They offer input voltage ranges from 1V to 64V with switch currents from as little as 100mA up to 10A. Notable features include integrated Schottky diodes, fixed frequency operation, programmable current limit and low noise operation.

LCD/CCD/OLED Bias SWITCHING REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology manufactures a broad line of high performance switching regulators specifically for generating bias voltages in CCFL and LCD applications. These boost regulators offer typical input voltage capability from 0.9V to 30V, output voltages as high as 60V, switching frequencies up to 3MHz, switch current up to 1.5A, and multiple output capability. This combination of features allows very small circuit implementations and optimizes battery run time in battery operated handheld devices.

2-QUADRANT CVCC STEP-DOWN µMODULE REGULATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Constant-Frequency Voltage Regulation Even at No Load
- Peltier Driver
- Battery Tester
- Battery/Supercap Charging and Cell Balancing
- Motor Drive Power Regulator
- High Power LED Drive

Features:
- Complete Step-Down Switch Mode Power Supply
- CVCC: Constant-Voltage Constant-Current
- 2-Quadrant: Sources and Sinks Output Current
- Adjustable Output Current
- Forced Continuous Operation
- Programmable Soft-Start

The **LTM8052** is a 36V input constant frequency step-down µModule® regulator with an adjustable output current limit up to 5A. The adjustable current limit helps system designers set the maximum power delivered to a load, minimizing the output rating of the upstream AC/DC or DC/DC power supply. Additionally, the **LTM8052** is capable of sourcing or sinking current while regulating an adjustable output voltage. For simple noise filtering, the LTM8052 operates at a constant frequency throughout the entire output current range.

Mfg. Part No.	Input Voltage	Output Voltage	Selectable Switching Frequency	Package	Stock No.	Price Each 1-24
● LTM8052AEV#PBF	6V to 36V	1.2V to 24V	100kHz to 1MHz	81-LGA	**24W5388**	21.43

SYNCHRONOUS BUCK REGULATOR

RoHS Compliant Available

MICROCHIP

Applications:
- Cellular telephones
- Portable computers
- Organizers / PDAs
- USB powered devices
- Digital cameras
- Portable equipment

Mfg. Part No. **MCP1603** is a high efficiency fully integrated 500 mA 2.0 MHz synchronous buck regulator ideally suited for Li-Ion/NiMH Battery powered application powered. At heavy loads, Mfg. Part No. **MCP1603** operates in the 2.0 MHz fixed frequency PWM mode which provides a low noise, low output ripple, small-size solution. When the load is reduced to light levels, Mfg. Part No. **MCP1603** automatically changes operation to a PFM mode to minimize quiescent current draw from the battery. No intervention is necessary for a smooth transition from one mode to another. These two modes of operation allow Mfg. Part No. **MCP1603** to achieve the highest efficiency over the entire operating current range.

Mfg. Part No.	Output Voltage Typ. (V)	Package	Stock No.	Price Each 1-25

HIGH VOLTAGE, LOW POWER REGULATORS

RoHS Compliant Available

NVE CORPORATION

Features:
- Reverse Battery Protection
- Excellent Immunity to Transients and ESD
- High Temperature Operation
- Small, Low Profile Surface Mount Package

Applications:
- Industrial Sensors and Controls
- Automotive Sensors and Controls

DC-Series voltage regulators are designed for harsh, noisy environments where immunity to large voltage transients and high input voltages are required. These regulators protect sensitive electronic components while providing a stable regulated supply. They are rated for high temperature operation, up to 170°C. The low-profile small footprint package features an exposed die-attach pad for direct heat sinking to the circuit board.

SWITCHING REGULATORS

RoHS Compliant Available — ON Semiconductor

Features:
- Adjustable 200-2200 kHz Operation allows optimization of efficiency and size
- 0.8 ±1.5% FB reference voltage for good system level accuracy across temperature
- External soft-start
- Enable/Disable Capability provides ability to turn off each channel into a low power state
- Hiccup overload protection
- Low shutdown power (Iq < 100 uA)
- Applications:
  LCD-TV logic board
  Set top box (STB)
  xDSL and cable modem

ON Semiconductor Introduces it's New Family of PWM Buck Regulators Featuring Unique Auto-Tracking and Sequencing Capabilities.

The dual 2.0 A NCP3120 and NCP3122 and dual 3.0 A NCP3121 and NCP3123 from ON Semiconductor are a pin equivalent family of dual output buck regulators. The converters reduce input capacitance requirements by switching 180 degrees out-of-phase at a frequency of 200 kHz up to 2.2 MHz. Switching frequency is adjustable by an external resistor. A unique built-in auto-tracking and sequencing feature allows exact timing and control over both outputs and several devices can be daisy chained together to control multiple outputs. Programmable options include sequential, ratio-metric and tracking. Input voltage for +5 V to +12 V designs and output voltages down to 0.8 V. Protection features include cycle-by-cycle current limit and under voltage lockout (UVLO).

3A STEP-DOWN SWITCHING REGULATOR DEMONSTRATION BOARDS

RoHS Compliant Available

ST

Features:
- 3A DC output current
- 2.9V to 18V input voltage
- Output voltage adjustable from 0.6V to 16V
- 250 kHz switching frequency, programmable up to 1 MHz
- Internal soft-start and inhibit
- Low dropout operation: 100% duty cycle
- Zero-load current operation
- Overcurrent and thermal protection
- VFQFPN8 3 mm x 3 mm package or HSOP8 for the L5987A

The EVAL5987/A demonstration board provides the design engineer with a fully functional stepdown switching regulator with an output current of up to 3 A. The board integrates STMicroelectronics' L5987/A step-down switching regulator, together with all the external components required for a typical application. The rated voltage of the input capacitor and the Schottky diode rectifier repetitive peak reverse voltage are both 25 V, making the board capable of covering the entire 2.9 V - 18 V input voltage range of the L5987/A device. The board features an external resistor divider (R1 and R2) designed for an output voltage of 1.8 V. The output voltage can be set to a level from 0.6 V up to the input voltage. The compensation network on the demonstration board allows the use of MLCC as output filter to keep the loop stable. The inductor saturation current and forward current of the Schottky diode are within the current limit values. The switching frequency on the demonstration board is set to 500 kHz by means of the R5 resistor connected to pin Fsw.

VERTICAL INTELLIGENT POWER ENHANCED REGULATOR (VIPer)

RoHS Compliant Available

ST's **VIPer series** includes a PWM controller, a power MOSFET, an integrated high voltage current source and built-in protection. VIPer devices are used to build AC/DC converter in Buck or Buck-Boost or Fly-back topologies reducing the number of components by a half against a discrete approach. The VIPer family represents the easiest solution to comply with the "Blue Angel" and " Energy Star" Eco Norms, with extremely low total power consumption from the mains when the system is in stand-by mode. Can be used in video systems, power supplies and much more.

Mfg. Part No.	Max. Supply Voltage (Vdd)	Drain Source Withstand Voltage (Vdss)	Max. Output Current (A)	On State Drain To Source Resistance (Ohm)	Switching Freq. (kHz)	Stock No.	Price Each 1-9

SIMPLE SWITCHER POWER MODULES

RoHS Compliant Available

TEXAS INSTRUMENTS

Key Features:
- Integrated shielded inductor
- Flexible startup sequencing using external soft-start,tracking, and precision enable
- Protection against in-rush currents and faults such as input UVLO and output short-circuit
- Single exposed pad and standard pinout for easy mounting and manufacturing

Applications:
- Point-of-load conversions from 3.3V and 5V rails
- Space constrained applications
- Extreme temperatures/no air flow environments
- Noise sensitive applications (i.e. transceiver, medical)

PowerWise® SYNCHRONOUS REGULATORS

RoHS Compliant Available

TEXAS INSTRUMENTS

Features
- External soft-start
- Tracking
- Precision enable
- Power good
- Pre-biased start-up
- Enhanced system reliability
- High accuracy current limit
- Over-voltage protection, under voltage lockout, and over-current protection

Texas Instruments' new family of full-featured PowerWise synchronous buck regulators provides high efficiency DC-DC step-down power conversion for point-of-load applications. The family offers a full range of features and options enabling the designer to fully customize their power solution to meet system needs.

SWITCHING REGULATORS INTEGRATED POWER SOLUTIONS

RoHS Compliant Available

TEXAS INSTRUMENTS

The **TPS8267x** devices are series of high-frequency, synchronous, step-down dc-dc converters optimized for battery-powered portable applications. Intended for low-power applications, these devices support up to 350-mA load current, and allow the use of low-cost chip inductors and capacitors. The devices support applications powered by lithium-ion (Li-Ion) batteries with extended voltage ranges. The **TPS84620RUQ** is an easy-to-use integrated power solution that combines a 6-A DC/DC converter with power MOSFETs, an inductor, and passives into a low profile, BQFN package. This total power solution allows as few as 3 external components and eliminates the loop compensation and magnetics part selection process. The TPS84620 offers the flexibility and the feature-set of a discrete point-of-load design and is ideal for powering performance DSPs and FPGAs.

CHARGE PUMPS

RoHS Compliant Available

TEXAS INSTRUMENTS

The **TPS6040 series** is a family of devices that generate an unregulated negative output voltage from an input voltage ranging from 1.6 V to 5.5 V. The devices are typically supplied by a preregulated supply rail of 5 V or 3.3 V. Due to its wide input voltage range, two or three NiCd, NiMH, or alkaline battery cells, as well as one Li-Ion cell can also power them.

INVERTING CHARGE PUMP REGULATORS

SYNCHRONOUS CURRENT-MODE BUCK CONTROLLER

RoHS Compliant Available

ANALOG DEVICES

Features:
- Supports all N-channel MOSFET power stages
- No current-sense resistor required
- Resistor-programmable current-sense gain
- Thermal overload protection
- Short-circuit protection
- Precision enable input
- Integrated bootstrap diode for high-side drive

Applications:
- Telecom and networking systems
- Mid to high end servers
- Set-top boxes
- DSP core power supplies

PUSHBUTTON ON/OFF CONTROLLERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:

- Automatic Turn-On Via Voltage Monitor Input
- Wide Input Supply Range: 1.5V to 36V
- ±25kV ESD HBM on PB Input
- ±36V Wide Input Voltage for PB Input
- Low Leakage EN Output Allows DC/DC Converter Control (LTC2955-1)
- High Voltage EN Output Drives External P-Channel MOSFET (LTC2955-2)
- Simple Interface Allows Graceful µP Shutdown
- Adjustable Turn-Off Timer
- Operating Temperature Range: LTC2955C = 0°C to 70°C LTC2955I = –40°C to 85°C

SWITCHING CONTROLLERS

RoHS Compliant Available

ON Semiconductor

Features:
- Internal Thermal Shutdown
- X2 Capacitor in EMI Filter Discharging Feature
- Frequency Modulation for Softened EMI Signature
- Adjustable Overpower Protection Dependant on the Bulk Voltage
- Latch-off Input Combined with the Overpower Protection Sensing Input

Applications:
- AC-DC Adapters for Notebooks, LCD, and Printers
- Offline Battery Chargers
- Consumer Electronic Power Supplies
- Auxiliary/Housekeeping Power Supplies
- Offline Adapters for Notebooks

Analog Devices

The ADM690 family of supervisory circuits offers complete single chip solutions for power supply monitoring and battery control functions in microprocessor systems. These functions include µP reset, backup battery switchover, watchdog timer, CMOS RAM write protection, and power failure warning.

The ADP2291 is a constant-current/constant-voltage linear charger for a single cell lithium ion battery, requiring just a few components to provide a simple and safe charging system that operates from a wide 4.5 V to 12 V input voltage range. It features an internally controlled, multistep charging cycle that improves battery life.

FLASH MEMORY PROGRAMMING SUPPLY

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- No Inductors
- Guaranteed 30mA Output
- Low Power: I_{CC} = 500mA
- I_{CC} in Shutdown: 0.5mA

Applications:
- 12V Flash Memory Programming Supplies
- Compact 12V Op Amp Supplies
- Battery-Powered Systems

The **LTC®1262** is a regulated 12V, 30mA output DC/DC converter. It is designed to provide the 12V ±5% output necessary to program byte-wide flash memories. The output will provide up to 30mA from input voltages as low as 4.75V without using any inductors. Only four external capacitors are required to complete an extremely small surface mountable circuit. The TTL compatible shutdown pin can be directly connected to a microprocessor and reduces the supply current to less than 0.5mA. The **LTC1262** offers improved shutdown current performance and requires fewer external components than competing solutions.

Mfg. Part No.	Supply Voltage (V)	Supply Current (mA)	Output Voltage (V)	Package	Stock No.	Price Each 1-99
LTC1262IS8#PBF	4.75 to 5.5	0.5	12	8-SOIC	55M9819	3.20

µMODULE BATTERY CHARGERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Programmable Charge Current: Up to 2A
- Dynamic Charge Rate Programming/Soft-Start Pin
- Programmable Input Current Limit
- Optional Reverse Input Protection
- NTC Resistor Temperature Monitor
- 0.5% Float Voltage Accuracy
- Bad-Battery Detection with Auto-Reset

Applications:
- Industrial Handheld Instruments
- 12V to 24V Automotive and Heavy Equipment
- Professional Video/Camera Chargers

The battery chargers are complete solutions containing the DC/DC controller, MOSFETs, inductor, input and output bypass capacitors and compensation circuitry in only 2.25cm.

ENERGY HARVESTING POWER MANAGEMENT

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Remote sensors and radio power
- Surplus heat energy harvesting
- HVAC systems
- Industrial wireless sensing
- Automatic metering
- Building automation
- Predictive maintenance

Features:
- Operates from inputs of 20mV
- Power good indicator
- Uses compact Step-Up transformers

Mfg. Part No.	Input Voltage (V)	Output Current (mA)	Output Voltage (V)	Package	Stock No.	Price Each 1-24

(177929)

PIEZOELECTRIC ENERGY HARVESTING POWER SUPPLY

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Integrated low-loss full-wave bridge rectifier
- Up to 100 mA of output current
- High efficiency integrated hysteretic buck DC/DC
- Selectable output voltages: 1.8V, 2.5V, 3.3V & 3.6V

The **LTC3588-1** integrates a low-loss full-wave bridge rectifier with a high efficiency buck converter to form a complete energy harvesting solution optimized for high output impedance energy sources such as piezoelectric transducers. An ultralow quiescent current undervoltage lockout (UVLO) mode with a wide hysteresis window allows charge to accumulate on an input capacitor until the buck converter can efficiently transfer a portion of the stored charge to the output. In regulation, the **LTC3588-1** enters a sleep state in which both input and output quiescent currents are minimal. The buck converter turns on and off as needed to maintain regulation.

Mfg. Part No.	No. of Outputs	Input Voltage (V)	Temperature Range	Package	Stock No.	Price Each 1-24

USB CHARGING PORT POWER SWITCH & CONTROLLER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- D+/D– CDP/DCP Modes per USB Battery Charging Specification 1.2
- D+/D– Shorted Mode per Chinese Telecommunication Industry Standard YD/T 1591-2009
- D+/D– Divider Modes 2.0V/2.7V and 2.7/2.0V Compliant with 1A and 2A Apple Mobile Digital Devices
- Automatic Selection of D+/D– Mode for an Attached Device
- Supports Sleep-Mode Charging and Mouse/Keyboard (Low-Speed Only) Wake Up
- Load Detection for Both Power Supply Control in S4/S5 Charging and Port Power Management in all Charge Modes
- Compatible with USB 2.0 and 3.0 Power Switch Requirements

Applications:
- USB Ports (Host and Hubs)
- Notebook Desktop PCs
- Universal Wall Charging Adapters

The **TPS2543** is a USB charging port controller and power switch with an integrated USB 2.0 high-speed data line (D+/D–) switch. The **TPS2543** can be configured to automatically select the D+/D– mode needed to charge an attached device. The **TPS2543** provides load detection via the STATUS pin that allows for both power supply control in S4/S5 charging and the ability to manage port power in a multi-port application. Additionally, system wake up (from S3) with a mouse/keyboard (low speed only) is fully supported in the **TPS2343**. The **TPS2543** 73-mΩ power-distribution switch is intended for applications where heavy capacitive loads and short-circuits are likely to be encountered. Two programmable current thresholds provide flexibility for setting current limits and load detect thresholds.

Mfg. Part No.	Supply Voltage	Current Limit (A)	Package	Stock No.	Price Each 1-9
TPS2543RTET	4.5V to 5.5V	2.7	16-WQFN	94T6069	2.41

BATTERY FUEL GUAGE EVALUATION MODULE INTERFACE BOARD

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- USB-based interface board for evaluation of battery fuel gauge circuits developed with fuel gauge ICs using the HDQ and SMBus communication protocol
- Provides interface between intelligent battery circuit and a Windows-based PC
- Connects to the USB port of a PC
- Allows for on screen display and programming of gas gauge register functions when used with the appropriate PC software

The **EV2300** is a USB-based interface board for a PC that can be used to evaluate battery fuel gauge circuits designed with Texas Instruments' ICs. It has connections on it for a USB cable and also accepts inputs from a battery fuel gauge circuit's communication port (SMBus or HDQ).

Mfg. Part No.	For Use With	Interface	Stock No.	Price Each
EV2300	Texas Instrument's Battery Fuel Gauge Circuits	USB	66H9717	100.98

SYNCHRONOUS SWITCH-MODE BATTERY CHARGER CONTROLLER FOR SOLAR POWER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Resistor Programmable Float Voltage
- Charge Status Outputs for LED or Host Processor
- Charge Enable on MPPSET Pin
- Programmable MPPT Setting

Applications:
- Solar Powered Applications
- Remote Monitoring Stations
- Portable Handheld Instruments
- 12V to 24V Automotive Systems
- Current-Limited Power Source

BQ24650EVM-639

The **BQ24650** is a highly integrated switch-mode battery charge controller. It provides input voltage regulation, which reduces charge current when input voltage falls below a programmed level. When the input is powered by a solar panel, the input regulation loop lowers the charge current so that the solar panel can provide maximum power output.

Mfg. Part No.	Supply Voltage (V)	Charge Current (A)	Package	Stock No.	Price Each 1-9
BQ24650RVAT	5 - 28	10	16-QFN	83R9416	5.49

ULTRA LOW POWER BOOST CONVERTER W/BATTERY MANAGEMENT FOR ENERGY HARVESTER APPLICATIONS

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications:
- Energy Harvesting
- Solar Charger
- Thermal Electric Generator (TEG) Harvesting
- Wireless Sensor Networks (WSN)
- Industrial Monitoring
- Environmental Monitoring
- Bridge / Structural Health Monitoring (SHM)
- Smart Building Controls
- Portable and Wearable Health Devices
- Entertainment System Remote Controls

BQ25504RGTT

The **bq25504** is the first of a new family of intelligent integrated energy harvesting Nano-Power management solutions that are well suited for meeting the special needs of ultra low power applications. The product is specifically designed to efficiently acquire and manage the microwatts (µW) to milliwatts (mW) of power generated from a variety of DC sources like photovoltaic (solar) or thermal electric generators. The **bq25504** is the first device of its kind to implement a highly efficient boost converter/charger targeted toward products and systems, such as wireless sensor networks (WSN) which have stringent power and operational demands. The design of the **bq25504** starts with a DCDC boost converter/charger that requires only microwatts of power to begin operating.

Mfg. Part No.	Input Voltage (V)	Input Power (W)	Package	Stock No.	Price Each 1-9

HOT SWAP CONTROLLERS

RoHS Compliant Available

ANALOG DEVICES

Hot Swap products perform all the housekeeping functions necessary to hot swap plug-in boards. These parts also integrate with industry-leading converter and amplifier cores for power monitoring and control with patented circuitry delivering unmatched ±3% monitoring accuracy. Hot swap controllers play a key role in keeping central office switching stations and server banks operating at peak efficiency. These devices safely and accurately monitor the power usage in a typical server rack system which enables operators to remotely monitor each rack individually thus saving energy and minimizing system downtimes.

HOT SWAP CONTROLLERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:

- -48V or +48V Telecom and Networking
- Power Over Ethernet (PoE)
- ATCA
- PCI
- CompactPCI
- Low Voltage Supply Sequencing

Linear Technologies controllers limit in-rush current, provide current limiting during normal operation and offer other supervisory features.

Mfg. Part No.	# of Poles	Type	Voltage Range (V)	Package	Stock No.	Price Each 1-24

DIGITAL POWER FACTOR CORRECTION CONTROLLER W/ACCURATE AC POWER METERING

RoHS Compliant Available

ANALOG DEVICES

Features:
- Flexible digital power factor correction (PFC) controller
- True rms ac power metering
- Enhanced dynamic response
- Inrush current control
- Extensive fault protection for high reliability systems
- Programming via easy-to-use graphical user interface (GUI)

Applications:
- AC/DC power supplies for applications
- Computing server and storage
- Network and communication infrastructure
- Industrial and medical

Mfg. Part No.	Supply Voltage Range	Frequency (MHz)	Supply Current (mA)	Package	Stock No.	Price Each 1-9
ADP1048ARQZ-R7	3V to 3.6V	400	17	24-QSOP	82T5460	8.10

(203719)

HIGH EFFICIENCY THERMOELECTRIC COOLER CONTROLLER

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- High Efficiency, Low Noise Topology
- Adjustable Output Slew Rate Reduces EMI
- Full-Bridge Controller for Bidirectional Current Control
- Adjustable Pulse-by-Pulse Bidirectional TEC Current Limit
- Open/Shorted Thermistor Indication
- TEC Voltage Clamping
- TEC Current, Voltage and Heat/Cool Status Outputs
- Adjustable/Synchronizable Oscillator Frequency
- Reduces Filter Component Size and System Noise

Applications:
- Laser-Based Fiber Optic Links
- Medical Instruments
- CPU Temperature Regulators

The **LTC®1923** is a pulse width modulator intended for thermoelectric cooler (TEC) or heater applications requiring either unidirectional or bidirectional drive circuits. All of the necessary control circuitry and two sets of complementary output drivers are integrated into the **LTC1923** to drive a full bridge, providing an efficient means of bidirectional current flow to the TEC. An accurate temperature control loop to stabilize the temperature of a laser diode system is easily achieved with the addition of just a few external components.

Mfg. Part No.	Input Voltage	Supply Current (mA)	Function	Package	Stock No.	Price Each 1-99
LTC1923EUH#PBF	2.7 to 5.5	3	Thermoelectric Cooler Full Bridge Controller	32-QFN	56M4352	28.07

COMPBO8 PFC & HALF-BRIDGE BALLAST IC

RoHS Compliant Available

International IOR Rectifier

Features:
- PFC, ballast control and half-bridge driver in one IC
- Critical-conduction mode boost-type PFC
- Internal VBUS sensing and regulation
- Internal PFC loop compensation
- Programmable PFC over-current
- Ignition voltage regulation (current or voltage control)
- Half-bridge non-ZVS protection
- Half-bridge over-current protection using low-side MOSFET Rds(on)
- Programmable preheat time
- Programmable preheat frequency
- Programmable ignition ramp time
- Programmable run frequency
- Voltage-controlled oscillator (VCO) analog input
- Latched EOL window comparator on VCC
- Internal EOL fault timer
- Fixed dead-time (1.7µsec typ.)
- DC bus under-voltage reset
- Lamp insert auto-restart
- Micro-power start-up current
- Under-voltage lock-out mode

Mfg. Part No.	Output Source Current Min. (mA)	Output Sink Current Min. (mA)	Supply Voltage Range	Package	Stock No.	Price Each 1-9
● IRS2580DSTRPBF	180	260	11 to 18	8-SOIC	54T9277	3.44

(203763)

POWER FACTOR CORRECTION ICs AND POWER SUPPLY SUPPORT

RoHS Compliant Available

Texas Instruments

Features
- Industry standard architecture
- Deliver PF>0.993
- New BiCMOS generation reduces complexity
- Optimized PFC/PWM "combo" controllers
- Superior applications support

From 50 W to 5 kW, TI PFC controllers deliver EN61000-3-2 compliance.

LOGIC CONTROLLED HIGH-SIDE LOAD SWITCH

RoHS Compliant Available

Analog Devices

Applications:
- Mobile phones
- Digital cameras and audio devices
- Portable and battery-powered equipment

The **ADP198** is a high-side load switch that provides power domain isolation, thereby helping to keep subsystems isolated and powered independently and enabling reduced power consumption. The **ADP198** contains a low on-resistance P-channel MOSFET that supports a continuous load current. The **ADP199** is a high-side load switch that provides power domain isolation, thereby helping to keep subsystems isolated and powered independently, and enabling reduced power consumption. The **ADP199** contains a low on-resistance, N-channel MOSFET to minimize power loss, and supports a continuous load current.

Mfg. Part No.	Input Voltage Range	Load Current (A)	Package	Stock No.	Price Each 1-9
● ADP198ACBZ-R7	1.65V to 6.5V	1	4-WLCSP	82T5462	1.11
● ADP199ACBZ-R7	0.9V to 3.6V	0.5	4-WLCSP	82T5463	1.01

(203721)

HIGH SIDE OR-ING FET CONTROLLER

RoHS Compliant Available

Texas Instruments

Features:
- +100 Volt transient capability
- Charge pump gate driver for external N-Channel MOSFET
- Fast 50ns response to current reversal
- 2A peak gate turn-off current
- Minimum VDS clamp for faster turn-off

Applications:
- Active OR-ing of Redundant (N+1) Power Supplies

The **LM5050-1** High Side OR-ing FET Controller operates in conjunction with an external MOSFET as an ideal diode rectifier when connected in series with a power source. This ORing controller allows MOSFETs to replace diode rectifiers in power distribution networks thus reducing both power loss and voltage drops.

Mfg. Part No.	Input Voltage Range (V)	Topology	Package	Stock No.	Price Each 1-9
● LM5050MK-1/NOPB	5V to 75V	NMOSFET Controller	6-TSOT	47T7502	2.37

(196463)

QUAD HIGH SIDE SMART POWER SOLID STATE RELAY EVALUATION BOARD

RoHS Compliant Available

ST

Features:
- Shorted load protections
- Over-temperature protection
- Protection against loss of ground
- Current limitation
- Undervoltage shut-down
- Open drain diagnostic outputs
- 3.3V CMOS/TTL compatible inputs
- Fast demagnetization of inductive loads

The purpose of this design is to demonstrate the features of the VNI4140K quad high side smart power solid state relay. The application offers robustness and complies with EMC industrial standards. It implements short-circuit/overload protection and thermal management as well, achieving best-in-class MTBF values. The reference design is suitable for use in programmable logic controllers (PLCs) as well as to drive generic loads which require up to 0.7A of nominal current (the typical current limitation is 0.7 - 1.7A). Thanks to the very low RDS(on) (only 80mΩ at 25°C per channel) the device allows very low power consumption during operation and for this reason making it an ideal solution for IP65 / IP67 requirements. The device is compliant with IEC 61131-2 (Programmable Controllers International Standard).

Mfg. Part No.	Description	Stock No.	Price Each
● STEVAL-IFP006V1	Quad high side smart power solid state relay evaluation board using the VNI4140K	09R5858	74.82

(191907)

12-PORT POE/POE+/LTPOE++ PSE CONTROLLERS

RoHS Compliant Available

Linear Technology

Features:
- 12 Independent PSE Channels
- Compliant with IEEE 802.3at Type 1 and 2
- Supports 2-Pair and 4-Pair Output Power
- 1MHz I2C Compatible Serial Control Interface

Applications:
- PoE PSE Switches/Routers
- PoE PSE Midspans

The **LTC4270/LTC4271** chipset is a 12-port power sourcing equipment (PSE) controller designed for use in IEEE 802.3at Type 1 and Type 2 (high power) compliant Power over Ethernet (PoE) systems.
Advanced power management features include per-port 12-bit current monitoring ADCs, DAC-programmable current limit, and versatile fast shut-down of preselected ports. Advanced power management host software is available under a no-cost license. PD discovery uses a proprietary dual-mode 4-point detection mechanism ensuring excellent immunity from false PD detection.

Mfg. Part No.	PoE Type	Max Power (W)	IEEE-Compliant Detection	Package	Stock No.	Price Each 1-99

POWER-OVER-ETHERNET (PoE) INTERFACE CONTROLLERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Complete Power Interface Port for IEEE 802®.3af Powered Device (PD)
- Onboard 100V, UVLO Switch
- Constant-Frequency 300kHz Operation
- Precision Dual Level Inrush Current Limit
- Integrated Current Mode Switching Regulator
- Onboard 25k Signature Resistor with Disable
- Programmable Classification Current (Class 0-4)
- Thermal Overload Protection
- Power Good Signal
- Integrated Error Amplifier and Voltage Reference

Applications:
- IP Phone Power Management
- Wireless Access Points
- Security Cameras

The LTC®4267-3 combines an IEEE 802.3af compliant Powered Device (PD) interface with a 300kHz current mode switching regulator, providing a complete power solution for PD applications.

CONFIGURABLE HIGH POWER POWER MANAGEMENT IC

RoHS Compliant Available — LINEAR TECHNOLOGY

Features:
- Pushbutton ON/OFF/RESET
- Independent 1A Boost and 1A Buck-Boost DC/DCs
- I2C Read Back of DC/DC, LED Driver, Fault Status

Applications:
- High Power (5W to 10W) Single Cell Li-Ion/Polymer Applications
- Portable Industrial Applications, Handy Terminals, Portable Instruments
- Multioutput Low Voltage Power Supplies

The **LTC3675EUFF#PBF** is a digitally programmable high efficiency multioutput power supply plus dual string LED driver IC optimized for high power single cell Li-Ion/Polymer applications. The DC/DCs consist of four synchronous buck converters, one synchronous boost DC/DC, and one buck-boost DC/DC all powered from a 2.7V to 5.5V input. The 40V LED driver can regulate up to 25mA of current through two LED strings with up to 10 LEDs each. The LED driver may also be configured as a general purpose high voltage boost converter.

Mfg. Part No.	No. of Channels	Supply Voltage (V)	Package	Stock No.	Price Each 1-24
● LTC3675EUFF#PBF	7	2.7 to 5.5	44-QFN	13T3891	10.79

(195452)

DUAL 4A IDEAL DIODES W/ADJUSTABLE CURRENT LIMIT

RoHS Compliant Available — LINEAR TECHNOLOGY

Features:
- Low Reverse Leakage Current (1μA Max)
- 15mV Forward Drop in Regulation
- Smooth Switchover in Diode ORing
- Load Current Monitor
- Precision Enable Thresholds to Set Switchover
- Soft-Start to Limit Inrush Current on Start-Up
- Status Pins to Indicate Forward Diode Conduction
- Current and Thermal Limit with Warning

Applications:
- High Current PowerPath™ Switch
- Battery and Wall Adapter Diode ORing
- Backup Battery Diode ORing
- Logic Controlled High Current Power Switch
- Supercapacitor ORing
- Multiple Battery Sharing

The **LTC4415** contains two monolithic PowerPath ideal diodes, each capable of supplying up to 4A with typical forward conduction resistance of 50mΩ. The diode voltage drops are regulated to 15mV during forward conduction at low currents, extending the power supply operating range and ensuring no oscillations during supply switchover.

Mfg. Part No.	Voltage Range (V)	Typical Current Capability (A)	Package	Stock No.	Price Each 1-24
● LTC4415EMSE#PBF	1.7 to 5.5	4	16-MSOP	78T3428	6.30

(201292)

EIGHT-OUTPUT REGULATOR ICS

RoHS Compliant Available — LINEAR TECHNOLOGY

Applications:
- Handheld instruments and scanners
- Portable industrial devices
- Automotive infotainment
- Medical devices
- High end consumer devices
- Multirail systems
- Supports Freescale i.MX, Marvell PXA and Other Application Processors

Features:
- Pushbutton ON/OFF control with system reset
- Flexible pin-strap sequencing operation
- I2C and independent enable control pins

Mfg. Part No.	Supply Voltage (V)	Output Voltage (V)	Operating Temperature	Package	Stock No.	Price Each 1-24

● LTC3589HUJ#PBF	2.7 - 5.5	5	-40°C to +150°C	40-QFN	84R4964	12.18

(190318)

HIGH VOLTAGE SURGE STOPPERS

RoHS Compliant Available — LINEAR TECHNOLOGY

Features:
- Rugged Floating Topology
- Adjustable Output Clamp Voltage
- Controls N-Channel MOSFET
- Adjustable Protection Timer
- Internal 9 Second Cool-Down Timer

Applications:
- Industrial, Automotive and Avionic Surge Protection
- High Voltage DC Distribution

The **LTC4366** surge stopper protects loads from high voltage transients. By controlling the gate of an external N-channel MOSFET, the **LTC4366** regulates the output during an overvoltage transient. The load may remain operational while the overvoltage is dropped across the MOSFET. Placing a resistor in the return line isolates the **LTC4366** and allows it to float up with the supply; therefore, the upper limit on the output voltage depends only on the availability of high valued resistors and MOSFET ratings.

Mfg. Part No.	Input Voltage	Overvoltage Threshold Accuracy (%)	After Fault Attempt	Package	Stock No.	Price Each 1-99
● LTC4366IDDB-1#PBF	4.5V to 12V	3	Latch Off	8-DFN	78T3410	4.36

● LT4363IDE-2#PBF	4.5V to 12V	12	Auto-retry	12-DFN	78T4100	6.09

(201307)

POWER CONTROLLERS

RoHS Compliant Available — LINEAR TECHNOLOGY

Linear Technology controllers are configurable in step-up, step-down, inverter, flyback, forward, SEPIC and buck-boost topologies. Furthermore, these controllers can feature wide input voltage ranges, multiple output capability, PolyPhase operation, and output tracking. They also come in voltage-mode and current-mode topologies, offer easy synchronization to external clocks and have comprehensive protection features.

PFC ONTROLLER IC

Mfg. Part No.	Features	Supply Voltage Range (V)	Package	Stock No.	Price Each 1-24
● LT1248CS#PBF	Power Factor Correction	11.5 to 25	16-SOIC	57M3016	7.41
● LT1248IS#PBF	For universal off-line power systems	11.5 to 25	16-SOIC	57M3022	8.61
● LT1249CN8#PBF	High Power Factor Over Wide Load Range	11.5 to 25	8-DIP	57M3026	6.27

(102092)

QUAD DIGITAL POWER SUPPLY MANAGER

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Computers
- Network Servers

The **LTC2974** is a quad, digital power-supply monitor, supervisor, sequencer, and margin controller. Supervisory functions include over and under threshold limits for current, voltage and temperature on four output channels as well as OV/UV threshold limits for a single input channel.

Mfg. Part No.	External Input Cap. (pF)	External Output Cap. (pF)	Input Voltage Range	PWM Input Frequency (kHz)	Pkg.	Stock No.	Price Each 1-24
LTC2974IUP#PBF	10	10	3V to 15V	110	64-QFN	82T3897	17.43

(203720)

FAN MANAGERS

RoHS Compliant Available

MICROCHIP

FAN MANAGERS REQUIRING EXTERNAL TEMP SENSORS

Temperature range: 0°C - +85°C. Vcc range: +3.0V to +5.5V. Max. supply current: 1000µA. These devices use an external temperature sensor. Accuracy of the total solution is a function of the accuracy of the external sensor. -40°C to +85°C temperature range option available; *go online or call.*

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-25
TC642VOA	FanSense™ Fan Monitor, Min. Fan Speed Control	SOIC-8	69K7655	1.48

PREDICTIVE FAN MANAGERS

The TC670 is an integrated fan speed sensor that predicts and/or detects fan failure, preventing thermal damage to systems with cooling fans.

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-25
TC670ECHTR*	Predictive Fan Failure Detector	SOT-23A-6-TR	92C2504	1.32

SMPS CONTROLLERS

RoHS Compliant Available

FAIRCHILD

Features:
- Low start up current
- Maximum duty clamp
- UVLO with Hysteresis
- Output current of 1 A at maximum

The **UC3842AN**, **UC3842N** & **UC3843N** are designed for Off - Line and DC-to-DC converter applications with minimum external components. These integrated circuits feature a trimmed oscillator for precise duty cycle control, a temperature compensated reference, high gain error amplifier, current sensing comparator, and a high current totempole output ideally suited for driving a power MOSFET.

IRS2453xxx

Features
- Improved Input Filter
- Lower Pulse Distortion
- Reliable Spike Noise Rejection
- Short Pulse Rejection
- Improved Temperature Stability
- Improved Clamping Structure Provides Additional Spike Protection
- Allows Higher PWM Control
- Higher Signal to Noise Rejection at Input and Improved Logic Threshold Values
- Improved DC Operation Under Negative Vs Conditions
- Improved Matching Time
- Increased Blanking Time to Increase Overcurrent Detection Reliability
- Increased Blanking Time Reduces the Need for External Noise Filters at the ITRIP Pin

Applications
- Automotive
- Lighting
- Audio
- Air Conditioner & Refrigerator Compressors
- Vacuum Cleaners
- Washing Machines
- Dish Washers
- Ventilation Fans
- Circulating Pumps
- Industrial Drives

A new series of next-generation 500V and 600V half-bridge and high- and low-side high-voltage integrated circuits (HVIC) address a wide range of applications including motor control, lighting, switch-mode power supplies, audio, and flat-panel displays. They are offered with single or dual inputs, under-voltage lockout protection, fixed or programmable deadtime for half-bridge drivers, and drive currents up to 2A.

ENHANCED, HIGH-EFFICIENCY POWER FACTOR CONTROLLERS

RoHS Compliant Available

ON Semiconductor

NEW

Features:
- Near-Unity Power Factor
- Critical Conduction Mode (CrM)
- Current Controlled Frequency Fold-back (CCFF): Low Frequency Operation is Forced at Low Current Levels
- On-time Modulation to Maintain a Proper Current Shaping in CCFF Mode
- Skip Mode Near the Line Zero Crossing
- Fast Line / Load Transient Compensation (Dynamic Response Enhancer)
- Valley Turn on

Applications:
- PC, TV, Adapters Power Supplies
- LED Drivers and Light Ballasts (including dimmable versions)
- All Off-Line Applications Requiring Power Factor Correction

The **NCP1611** is designed to drive PFC boost stages based on an innovative Current Controlled Frequency Fold-back (CCFF) method. In this mode, the circuit classically operates in Critical conduction Mode (CrM) when the inductor current exceeds a programmable value. When the current is below this preset level, the **NCP1611** linearly decays the frequency down to about 20 kHz when the current is null. CCFF maximizes the efficiency at both nominal and light load. In particular, the stand-by losses are reduced to a minimum.

Mfg. Part No.	Supply Voltage (V)	Topology	Drive Cap. (mA)	Package	Stock No.	Price Each 1-9

BIPOLAR STEPPER MOTOR DRIVERS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features
- Output Capability of 8-35 V and ±1.5 A (2 A Peak)
- 3.3V and 5V Logic Compatible (3.0V to 5.5V)
- Low R_{on} DMOS Outputs
- Synchronous Rectification Reduces Power Dissipation - Typically a 20% Power Savings
- Automatic Slow, Fast and Mixed Decay
- Less Than 10 mA Sleep Mode Current

Operate bipolar stepper motors in full, half (**Mfg. Part No. A3982**).

Mfg. Part No.	Description	Package	Stock No.	Price Each 1-7999
A3950SLPTR-T	DMOS Full-Bridge Motor Driver	16-TSSOP	65K5224	1.68

DMOS FULL-BRIDGE PWM MOTOR DRIVER

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features
- High Output Rating
- Low rDS(on) Outputs
- Mixed, Fast, and Slow Current-Decay Modes
- Synchronous Rectification for Low Power Dissipation
- Internal UVLO and Thermal-Shutdown Circuitry
- Crossover-Current Protection
- Internal Oscillator for Digital PWM Timing
- Operating Temp: -20°C to 85°C

The **A3959** is designed for PWM current control of DC motors. Input terminals are provided for use in controlling the speed and direction of a DC motor with externally applied PWM-control signals. Special power-up sequencing is not required.

Mfg. Part No.	Supply Voltage Max (V)	Output Current Max (A)	R_{DS} (on) Typ. (Ω)	Package	Stock No.	Price Each 1-9

FULL-BRIDGE PWM MOTOR DRIVER

RoHS Compliant Available

Allegro MicroSystems, Inc.

The **A4970** motor driver drives both windings of a bipolar stepper motor or bidirectionally controls two DC motors. Both bridges are capable of sustaining 45 V and include internal pulse-width modulation (PWM) control of the output current to 750 mA.

The**A4973** is capable of continuous output currents to ±1.5 A and operating voltages to 50 V. Internal fixed off-time PWM current-control circuitry can be used to regulate the maximum load current to a desired value. The peak load current limit is set by the user's selection of an input reference voltage and external sensing resistor. The fixed off-time pulse duration is set by a user- selected external RC timing network. Internal circuit protection includes thermal shutdown with hysteresis, transient-suppression diodes, and crossover current protection. Special power-up sequencing is not required.

The **A4975** is designed to drive one winding of a bipolar stepper motor in a microstepping mode. The outputs are rated for continuous output currents to ±1.5 A and operating voltages to 50 V. Internal pulse width modulated (PWM) current control combined with an internal three-bit nonlinear digitalto- analog converter allows the motor current to be controlled in full-, half-, quarter-, or eighth-step (microstepping) modes. Nonlinear increments minimize the number of control lines necessary for microstepping. Microstepping provides increased step resolution, and reduces torque variations and resonance problems at low speed.

Mfg. Part No.	Supply Voltage Range (V)	Output Current Max (A)	Package	Stock No.	Price Each 1-9

AUTOMOTIVE DMOS MICROSTEPPING DRIVER WITH TRANSLATOR

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features
- Low R_{DS}(ON) outputs
- Automatic current decay mode detection/selection
- 3.0 V to 5.5 V logic supply voltage range
- Mixed, fast, and slow current decay modes
- Synchronous rectification for low power dissipation
- Internal OVLO and thermal shutdown circuitry
- Crossover current protection

Applications
- Automotive stepper motors
- Engine management
- Headlamp positioning

DUAL FULL BRIDGE LOW VOLTAGE MOTOR DRIVER

RoHS Compliant Available

Allegro MicroSystems, Inc.

- Low $R_{DS(on)}$ outputs
- Full- and half-stepping capability
- Small package
- Forward, reverse, and brake modes for dc motors
- Sleep mode with zero current drain
- PWM control up to 250 kHz
- Crossover-current protection
- Thermal shutdown (TSD)

The **A3901** is a dual full-bridge motor driver, designed for low voltage portable applications involving bipolar stepper or brush DC motors. Outputs have been optimized for low voltage drop, with currents up to ±400 mA (±800 mA with outputs paralleled) and operating voltage range of 2.5 to 5.5 V. The four inputs (IN1 to IN4) can control a bipolar stepper motor in full- or half-step mode, or dc motors in forward, reverse, or brake mode. The inputs can be PWMed for current or speed control at frequencies up to 250 kHz. Internal protection circuitry includes thermal shut down (TSD) and crossover (shoot-through) protection. The **A3901** is supplied in a 3 x 3 x 0.75 mm nominal, 10-lead DFN/MLP package, with exposed thermal pad (package "EJ"). Small footprint package, lead (Pb) free, with 100% matte tin-lead frame plating.

ANALOG DEVICES

Analog DSP AC motor control ICs are single-chip DSP-based controllers suitable for high-performance control of AC induction motors, permanent magnet synchronous motors, and brushless DC motors. DSP processor and a high-performance ADC system address speed and accuracy requirements. Other on-chip peripherals include a flexible encoder interface, a 16-bit PWM generator, power-on reset, and programmable digital I/O, allowing OEMs to implement a complete motor control drive system on one integrated IC. Features a 16-bit main PWM, with a bus frequency of 20kHz. Evaluation kits are recommended for intial program development. They contain hardware (controller, evaluation/processor board, and connector board), software (assembler, linker, and debugger), documentation, and serial cable for connection to a personal computer.

H-BRIDGE MOTOR DRIVER

RoHS Compliant Available

freescale

Features:
- TL/CMOS Compatible Inputs
- PWM Frequencies up to 10kHz
- Active Current Limiting via Internal Constant OFF-Time PWM (with Temperature-Dependent Threshold Reduction)
- Output Short-circuit Protection
- Under-voltage Shutdown
- Fault Status Reporting

Applications:
- DC-motor acme lead screw actuators
- Servo gear actuators
- Bi-directional thrust solenoids
- Fractional horsepower DC-motor control
- Medical/Healthcare - Powered Patient Beds

The **MC33886** is a monolithic power IC comprising control logic, charge pump, gate drive, and low R DS(on)MOSFET output H-Bridge circuitry into a small surface mount package. It is designed to drive inductive loads with rms currents to 5.2 A in both directions. In addition,the current drive can be pulse width modulated (PWM)at frequencies to 10 kHz. Undervoltage, overtemperature, and overcurrent conditions are detected and reported via a status flag output. Output control is via two independent inputs (forward, reverse, free- wheeling low, and freewheeling high are possible active output states). Two disable inputs are provided, one Low =True and one High =True, either of which will place the outputs into a high impedance OFF state.

Mfg. Part No.	Supply Voltage	Output Current (A)	R_{DS}(ON) (mohms)	Package	Stock No.	Price Each 1-9

CONSTANT-CURRENT CONTROL VOICE COIL MOTOR DRIVER

RoHS Compliant Available

ON Semiconductor

Features:
- Built-in current detection resistor
- Built-in thermal protection circuit
- Constant current control enabled by 10bit DAC
- Less External Component
- Constant current driver for voice coil motors

End Products:
- Portable & Wireless
- Smartphone
- Tablet
- Camera for mobile phone
- Pocket movie Camera

Benefits:
- Easy control
- Wide power supply application
- Current limit protection
- Small mounting space
- Voltage drop protection
- Thermal protection
- Improving the converging stability of the AF-VCM
- Simple Design
- Low consumption

Applications:
- Portable & Wireless

The **LV8498CT** is a constant current driver IC for voice coil motors that supports I2C control integrating a digital/analog converter (DAC). It uses an ultraminiature WLP package and includes a current detection resistor for constant current control, which makes the IC ideal for miniaturization of camera modules intended for use in camera-equipped mobile phones. The output transistor has a low on-resistance of 1 Ω and the resistance of the built-in current detection resistor is 1 Ω, which minimizes the voltage loss and helps withstand voltage drop in VCC. The function is incorporated, which, by changing the current in a stepped pattern while taking time at rise and fall of the output current, provides the current a slope, improving the converging stability of the voice coil motor (current slope function).

IR2011(S) & (PbF) SERIES HIGH AND LOW SIDE DRIVERS

RoHS Compliant Available

International IOR Rectifier

Features
- Floating channel designed for bootstrap operation
- Tolerant to negative transient voltage, dV/dt immune
- Independent low and high side channels
- Undervoltage lockout for both channels
- 3.3V and 5V input logic compatible
- CMOS Schmitt-triggered inputs with pull-down
- Matched propagation delay for both channels

Applications
- Audio Class D amplifiers
- High power DC-DC SMPS converters
- Other high frequency applications

Specifications
- V_{OFFSET}: 200V max.
- I_O: ±1.0A /1.0A typ.
- V_{OUT}: 10 - 20V
- t_{on}/t_{off}: 80 & 60ns typ.
- Delay Matching: 20ns max.

MOSFET DRIVER ICs

RoHS Compliant Available

LINEAR TECHNOLOGY

Linear Technology's growing portfolio MOSFET drivers provides a simple and effective solution to drive single, dual, triple or quad N-Channel or P-Channel FETs. Key features include wide input range of operation, extended temperature range of operation, powerful gate drive and short circuit protection.

ON Semiconductor

Features

- 4.0A peak drive current
- Rise and fall times under 15ns
- Propagation delay from inputs to outputs are under 20ns
- Adaptive nonoverlap time optimized for large power MOSFETs
- Floating top driver accommodates applications up to 25V
- Undervoltage lockout
- Thermal shutdown protection
- Less than 1.0mA quiescent current — enabled
- 25μA quiescent current — disabled
- Internal TG to DRN pulldown resistor

IGBT GATE DRIVERS

RoHS Compliant Available

POWEREX

Features:

- Single in-line Package
- 2500VRMS Isolation
- Optically Isolated Input Interface
- Wide Output Voltage Swing (+15/-10V)

Applications:

- Inverter
- AC Servo
- UPS
- Welding
- Power Supply

Opto-isolated hybrid integrated circuits designed to drive Powerex brand IGBT modules.

PHOTOVOLTAIC FULL BRIDGE DRIVER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:

- Renewable Energy Grade
- Independent High and Low driver logic inputs
- Bootstrap supply voltage range up to 115V DC
- Two current sense amplifiers with externally
- Programmable gain and buffered outputs
- Programmable over voltage protection
- Supply rail under-voltage lockouts with power good indicator

The **SM72295** is designed to drive 4 discrete N type MOSFET's in a full bridge configuration. Current sensing is provided by 2 transconductance amplifiers with externally programmable gain and filtering to remove ripple current to provide average current information to the control circuit. The current sense amplifiers have buffered outputs available to provide a low impedance interface to an A/D converter if needed. An externally programmable input over voltage comparator is also included to shutdown all outputs. Under voltage lockout with a PGOOD indicator prevents the drivers from operating if VCC is too low.

Mfg. Part No.	Supply Voltage (V)	Peak Output Current (A)	Propagation Delay (ns)	Package	Stock No.	Price Each 1-9

LED DRIVER ICS

3-BIT CONSTANT CURRENT LED DRIVER

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features

- 5 V to 17 V operation
- 3×7-bit Dot Correction current settings
- 31-bit shift register
- 3×10-bit PWM luminance settings
- Buffered output control pins
- Up to 5 MHz serial / PWM clock frequency
- Thermal Shutdown / UVLO
- Operating temperature: -40°C to 85°C

The **A6280** controls LED luminance with a pulse width modulation (PWM) scheme that gives the application the capability of displaying a billion colors. It is designed to minimize the number of components needed to drive LEDs with large pixel spacing.

µMODULE LED DRIVERS

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Open LED Protection
- Up to 2MHz Adjustable Switching Frequency
- 3000:1 LED Dimming Range
- Well suited for use with µModule Battery Chargers

Members of the µModule® LED driver family are preconfigured to deliver up to 1A through an LED string in a buck, boost or buck-boost topology. These products deliver a wide dimming range with excellent current regulation accuracy in a compact solution

OFFLINE ISOLATED FLYBACK LED CONTROLLER WITH PFC

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Isolated PFC LED Driver with Minimum Number of External Components
- TRIAC Dimmable
- Low Harmonic Content
- No Opto-Coupler Required
- Open LED and Shorted LED Protection

Applications:
- Offline 4W to 100W+ LED Applications
- High DC VIN LED Applications

The **LT3799** has a unique current sensing scheme that delivers a well regulated current to the secondary side without using an opto-coupler. This not only reduces cost but also improves reliability. Its single stage PFC regulator design requires minimal external components.

CONSTANT CURRENT REGULATORS & LED DRIVERS

RoHS Compliant Available

ON Semiconductor

Features:
- Wide operating voltage range
- Immediate turn-on
- Voltage surge suppressing - protecting LEDs
- AEC-Q101 Qualified
- SBT (Self-Biased Transistor) technology
- Negative temperature coefficient

Applications:
- Automotive lightings
- Switch contact wetting
- LED drive
- Contact wetting

The linear constant current regulator (CCR) is a simple, economical and robust device designed to provide a cost-effective solution for regulating current in LEDs. The CCR is based on patent-pending Self-Biased Transistor (SBT) technology and regulates current over a wide voltage range. It is designed with a negative temperature coefficient to protect LEDs from thermal runaway at extreme voltages and currents

LED LIGHTING POWER CONTROLLER

The **UCC28810 and UCC28811** are general lighting power controllers for low to medium power lumens applications requiring power factor correction and EMC compliance. It is designed for controlling a flyback, buck or boost converter operating in critical conduction mode. It features a transconductance voltage amplifier for feedback error processing, a simple current reference generator for generating a current command proportional to the input voltage, a current-sense (PWM) comparator, PWM logic and a totem-pole driver for driving an external FET.

ANALOG DEVICES

The **ADM1232 series** is a microprocessor monitoring circuit that monitors microprocessor supply voltage, microprocessor lock-up, and external interrupts. It also contains a watchdog timer and a debounced manual reset input. The **ADM690/691 series** are supervisory circuits for power supply monitoring and battery control functions in microprocessor systems. Functions include uP reset, backup battery switchover, watchdog timer, CMOS RAM write protection, and power failure warning. The **ADM705/706/708 series** are microprocessor supervisory circuits suitable for monitoring the 5V power supply/battery and can also monitor microprocessor activity. They also contain a debounced active low manual reset input, a threshold detector for power-fail warning, and power-on reset output during power-up, power-down and brownout conditions. The **ADM705/706 series** include an independent watchdog timeout. The **ADM706P series** contains an active high reset output. The **ADM706S/T series** contain an active low reset output. The **ADM708T series** includes an active high reset output in addition to the active low output. The **ADM809 series** supervisory circuits monitor the power supply voltage in microprocessor systems. They provide an active low reset output during power-up, power-down and brownout conditions. The **ADM811 series** are voltage monitoring devices suitable for use in most voltage monitoring applications. It is designed to monitor six different voltages and includes a debounced manual reset input as well as an active low reset output.

MICROPOWER VOLTAGE SUPERVISORS

RoHS Compliant Available

MICROCHIP

Features
- Ultra low supply current: 1.75µA
- Active-Low RST pin
- 120ms typical reset delay timer
- Available in SOT23-3, TO-92 and SC70 packages
- Lead Free Packaging

UNIVERSAL VOLTAGE MONITORS

RoHS Compliant Available

ON Semiconductor

- Unique Mode Select Input Allows Channel Programming
- Over, Under and Window Voltage Detection
- Positive and Negative Voltage Detection
- Fully Functional at 2.0V for Positive Voltage Sensing, 4.0V for Negative Voltage Sensing
- Pinned Out 2.54V Reference with Current Limit Protection
- Low Standby Current
- Open Collector Outputs for Enhanced Device Flexibility

ANALOG DEVICES

The **AD607** is a low power receiver IF subsystem - It consists of a mixer, IF amplifiers, I and Q demodulators, a phase-locked quadrature oscillator, AGC detector, and a biasing system with external power-down.
The **AD8343** is a high-performance broadband high IP3 active mixer, with very low intermodulation distortion and an integrated LO driver.

TEXAS INSTRUMENTS

Features:
- Very Low Noise Floor: –163 dBm/Hz · CDMA: IS95, UMTS, CDMA2000, TD-SCDMA
- OPI3 of 23 dBm · TDMA: GSM, IS-136, EDGE/UWC-136
- P1dB of 9 dBm · Wireless Local Loop
- Wireless MAN Wideband Transceivers · Unadjusted Carrier Feedthrough of –40 dBm
- Unadjusted Side-Band Suppression of –40 dBc
- Single Supply: 4.5 V–5.5 V Operation
- Silicon Germanium Technology

The **TRF370x** series consists of very low-noise direct quadrature modulators, capable of converting complex modulated signals from baseband or IF directly up to RF. The TRF370x is ideal for high-performance direct RF modulation from 400 MHz up to 4 GHz. The modulators are implemented as a double-balanced mixer. The RF output block consists of a differential to single-ended converter and an RF amplifier capable of driving a single-ended 50-W load without any need of external components. The **TRF371109** is a highly linear direct-conversion quadrature receiver. The TRF371109 integrates balanced I and Q mixers, LO buffers, and phase splitters to convert an RF signal directly to i and Q baseband. The on-chip programmable gain amplifiers allow adjustment of the output signal level without the need for external variable gain (attenuator) devices.

Mfg. Part No.	Frequency Min. to Max.	Package	Stock No.	Price Each 1-9

RMS DETECTORS

RoHS Compliant Available

ANALOG DEVICES

The **AD8361 series TruPwr™ Detector** is a mean-responding power detector for use in high frequency receiver and transmitter signal chains. It is intended for true power measurement of simple and complex waveforms. The output is a linear-responding DC voltage. The **AD8362 series** is a true rms-responding power detector. It is intended for use in a variety of high frequency communication systems and in instrumentation requiring an accurate response to signal power. The output is linear in decibels. Both series are particularly useful for measuring high crest-factor (high peak-to-rms ratio) signals such as CDMA and W-CDMA. Operating temperature range: -40°C to 85°C.

Mfg. Part No.	Supply Voltage (V) Min	Supply Voltage (V) Max	Supply Current (mA)	Freq. Max (MHz)	Dyn. Range (dB)	Accuracy (±)	Package	Stock No.	Price Each 1-9

ACTIVE DOWNCONVERTING MIXER WITH WIDEBAND IF

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- 1.9dB Conversion Gain
- LO Input 50Ω Matched when Shutdown
- Very Small Solution Size
- –40°C to 105°C Operation (TC)

Applications:
- Wireless Infrastructure Receivers
- DPD Observation Receivers
- CATV Infrastructure

The **LTC®5567** is optimized for RF downconverting mixer applications that require wide IF bandwidth. The part is also a pin-compatible upgrade to the **LT5557** active mixer, offering higher linearity and 1dB compression, wider bandwidth, and lower output spurious levels. Integrated RF and LO transformers and LO buffer amplifiers allow a very compact solution.
The **LTC®5569** dual active downconverting mixer is optimized for diversity and MIMO receiver applications that require low power and small size. Each mixer includes an independent LO buffer amplifier, active mixer core, and bias circuit with enable pin. The symmetry of the IC assures that a phase and amplitude coherent LO is applied to each mixer.

Mfg. Part No.	Frequency	Supply Voltage	Package	Stock No.	Price Each 1-24

HIGH LINEARITY DIFFERENTIAL RF/IF AMPLIFIER/ADC DRIVER

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Differential ADC Driver
- Differential IF Amplifier
- OFDM Signal Chain Amplifier
- 50Ω Balanced IF Amplifier
- 75Ω CATV Amplifier
- 700 MHz to 800MHz LTE Amplifier

Features:
- Insensitive to V_{CC} Variation
- 100Ω Differential Gain-Block Operation
- Input/Output Internally Matched to 100Ω Diff

PLLs / FREQUENCY SYNTHESIZERS

RoHS Compliant Available

ANALOG DEVICES

These synthesizers are designed for use in a variety of communication applications featuring best in class performance, phase noise and integration.

ANALOG DEVICES SYNTHESIZER

PLLs / FREQUENCY SYNTHESIZERS

The **ADF41xx family** of frequency synthesizers can be used to implement local oscillators in the up-conversion and down-conversion sections of wireless receivers and transmitters. The **ADF4153** uses fractional-N PLL technology to achieve a 10 dB improvement in phase noise compared to devices based on integer-N technology. It is pin-compatible with the ADF4110/1/2/3 products. The **ADF4252** Fractional-N Synthesizer when combined with a VCO and loop filter forms a complete phased locked loop (PLL). This solution creates state-of-the-art LO's (local oscillator) for the upconversion and downconversion of RF signals in Wireless applications. The **ADF4360** family are fully integrated integer-N synthesizer and voltage-controlled oscillator (VCO), control of all the on-chip registers is through a simple 3-wire interface. The **ADF5001** divide by four prescaler is a low noise, low power, fixed RF divider block that can be used to divide down frequencies to a lower frequency suitable for input into a the PLL.

DIRECT DIGITAL SYNTHESIZERS (DDS)

The **AD9852** can be configured to serve as a synthesized LO agile clock generator and FSK/BPSK modulator. The **AD9858** coupled with an internal high-speed, high performance D/A converter forms a digitally-programmable, complete high-frequency synthesizer capable of generating a frequency-agile analog output sinewave at up to 400+ MHz. It is designed to provide fast frequency hopping and fine tuning resolution (32-bit frequency tuning word).

- Consumer Electronics
- Human Interface Devices (Keyboard, Mouse, Remote Control)
- USB Dongles
- Health Care and Medical

CC2540F128RHAT

The **CC2540** is a cost-effective, low-power, true system-on-chip (SoC) for Bluetooth low energy applications. It enables robust BLE master or slave nodes to be built with very low total bill-of-material costs. The **CC2540** combines an excellent RF transceiver with an industry-standard enhanced 8051 MCU, in-system programmable flash memory, 8-KB RAM, and many other powerful supporting features and peripherals. The **CC2540** is suitable for systems where very low power consumption is required. Very low-power sleep modes are available. Short transition times between operating modes further enable low power consumption.

INTEGRATED WIRELESS POWER SUPPLY RECEIVER, Qi (WIRELESS POWER CONSORTIUM) COMPLIANT

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Dynamic Rectifier Control for Improved Load Transient Response
- Dynamic Efficiency Scaling for Optimized Performance Over any Range of Output Power
- Adaptive Communication Limit for Robust Communication During High Levels of Load Current Noise
- Thermal Shutdown
- Multifunction NTC and Control Pin for Temperature Monitoring, Done Charging and Fault Host Control
- Stand-alone Digital Controller

Applications:
- WPC Compliant Receivers
- Cell Phones, Smart Phones
- Headsets
- Digital Cameras
- Portable Media Players
- Hand-held Devices

The **bq5101x** is an advanced, integrated, receiver IC for wireless power transfer in portable applications. The device provides the AC/DC power conversion while integrating the digital control required to comply with the Qi v1.0 communication protocol. Together with the **bq500210** transmitter controller, the **bq5101x** enables a complete contact-less power transfer system for a wireless power supply solution. By using near-field inductive power transfer, the receiver coil embedded in the portable device receives the power transmitted by the transmitter coil via mutually coupled inductors. The AC signal from the receiver coil is then rectified and regulated to be used as a power supply for down-system electronics. Global feedback is established from the secondary to the transmitter in order to stabilize the power transfer process via back-scatter modulation. This feedback is established by using the Qi v1.0 communication protocol supporting up to 5 W applications.

Qi COMPLIANT WIRELESS POWER TRANSMITTER MANAGER

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Intelligent Control of the Power Transfer between Base Station and Mobile Device
- Conforms to the Wireless Power Consortium (WPC) Wireless Power Transfer 1.0.2 Specification
- Digital Demodulation Significantly Simplifies Solution Over bq500110
- Improved Parasitic Metal Object Detection (PMOD) Promotes Safety During Wireless Power Transfer
- Enhanced Charge Status Indicator

Applications:
- Mobile and Smart Phones
- MP3 Players
- Global Positioning Devices
- Digital Cameras
- Hermetically Sealed Devices, Tools, and Appliances
- Furniture Built-In Wireless Chargers
- Toy Power Supplies and Chargers

The **bq500210** is a second generation Wireless Power dedicated digital controller that integrates the logic functions required to control Wireless Power Transfer in a single channel WPC compliant contactless charging base station. The **bq500210** is an intelligent device that periodically pings the surrounding environment for available devices to be powered, monitors all communication from the device being wirelessly powered, and adjusts power applied to the transmitter coil per feedback received from the powered device. The **bq500210** also manages the fault conditions associated with the power transfer and controls the operating modes status indicator. The **bq500210** supports improved Parasitic Metal Object Detection (PMOD). The controller in real time analyzes the efficiency of the established power transfer using Rectified Power Packets and protects itself and the power receiver from excessive power loss and heat associated with parasitic metal objects placed in the power transfer path.

STELLARIS® & CC2560 BLUETOOTH® PLATFORM

TEXAS INSTRUMENTS

Features:
- Bluetooth 2.1 + Enhanced Data Rate (EDR) with best-in-class Bluetooth RF performance
- Complete, validated, certified, productionreadymodule offered by Panasonic: CC2560-PAN1325, CC2560-PAN1315
- Stellaris LM3S9000 series pre-integrated with Bluetooth software stack and Panasonic modules
- Full-featured evaluation boards for hardware and software prototyping

What's Included:
- Bluetooth software stack
- Serial Port Profile
- Advanced Audio Distribution Profile
- Audio/Video Remote Control Profile

Mfg. Part No.	Description	Stock No.	Price Each
DK-EM2-2560B	Stellaris Bluetooth Eval. Module	45T8620	199.40

VALUE LINE TRANSCEIVER

RoHS Compliant Available

TEXAS INSTRUMENTS

RF PERFORMANCE:
- Programmable output power up to +12dBm
- Receive sensitivity down to -116 dBm at 0.6 kbps
- Programmable Data Rate from 0.6 to 600 kbps

Digital Features:
- Flexible Support for Packet Oriented Systems
- On-chip Support for Sync Word Insertion, Flexible Packet Length, and Automatic CRC Calculation

Low-Power Features:
- 200 nA Sleep Mode Current Consumption
- Fast Startup Time; 240 µs From Sleep to RX Mode or TX mode
- 4-byte RX and TX FIFO

LOGIC LEVEL TRANSLATORS

RoHS Compliant Available

ANALOG DEVICES

ADG3123 series is a noninverting CMOS to high voltage level translator capable of operating at high supply voltages up to +35V, while maintaining ultralow power consumption. **ADG3304 and ADG3308 series** are low voltage logic level translators that can be used in multivoltage digital system applications such as data transfer between a low voltage DSP controller and a higher voltage device. Supply Voltage Max: 5.5V Operating temperature range: -40°C to 85°C

UNIDIRECTIONAL TRANSLATION

74ACT SERIES FACT ™ (ACT) CMOS LOGIC

RoHS Compliant Available

FAIRCHILD

FACT™ (Fairchild Advanced CMOS Technology) logic attains superior speeds while retaining the ultra-low power consumption of CMOS. It offers system designers superior line driving characteristics as well as excellent ESD and latch-up immunity. FACT™ ACT series offers standard logic functions with CMOS-compatible inputs and TTL- and MOS-compatible outputs.

Mfg. Part No.	Description	Inputs	Pkg.	Stock No.	Price Each 1-9

74VHC SERIES -- VHC CMOS LOGIC

RoHS Compliant Available

FAIRCHILD

VHC logic is an enhanced version of the industry's most popular CMOS family — high-speed CMOS (HC/HCT). VHC is the logical upgrade from HC and is ideal where the full drive of CMOS FACT is not needed. VHC logic offers all the advantages of HCMOS with the addition of higher drive and lower propagation delays (e.g., faster) with no noise penalty. **74VHC series** offers standard logic functions with CMOS-compatible inputs and TTL- and MOS-compatible outputs. Minimum supply voltage: 2V. Maximum supply voltage: 5.5V.

Mfg. Part No.	Description	Inputs	Pkg./Pins	Stock No.	Price Each 1-9

TINYLOGIC® HIGH SPEED CMOS LOGIC

RoHS Compliant Available

FAIRCHILD

Tiny Logic offers single-gate functions in very small packages. **Mfg. part numbers with suffix X are supplied on cut tape.**

NC7S TINYLOGIC™ HS SERIES
Tiny High Speed (HS) series performance similar to HC/VHC. CMOS-compatible inputs. Supply voltage: 2V-6V.

Mfg. Part No.	Description	Inputs	Pkg.	Stock No.	Price Each 1-9
NC7S08M5X	Single 2-Input AND Gate	2	5-SOT-23	58K1991	0.44
NC7S08P5X	Single 2-Input AND Gate	2	5-SC-70	58K1992	0.35
NC7S00M5	2-Input NAND Gate	2	5-SOT-23	67K0816	0.48
NC7S00P5	2-Input NAND Gate	2	5-SC-70	83C0034	0.41
NC7S32M5	2-Input OR Gate	2	5-SOT-23	67K0821	0.40
NC7S32M5X	2-Input OR Gate	2	5-SOT-23	58K1994	0.44
NC7S32P5X	2-Input OR Gate	2	5-SC-70	38C7613	0.22
NC7S86M5	Single 2-Input Exclusive OR Gate	2	5-SOT-23	34C1580	0.49
NC7S02M5	2-Input NOR Gate	2	5-SOT-23	67K0817	0.42
NC7S04M5X	Single Inverter Open Drain Ouput	1	5-SOT-23	38C7606	0.42
NC7S04P5X	Single Inverter Open Drain Ouput	1	5-SC-70	38C7607	0.37
NC7S14M5	Single Inverter w/Schmitt Trigger	1	5-SOT-23	67K0819	0.61
NC7S14M5X	Single Inverter w/Schmitt Trigger	1	5-SOT-23	58K1993	0.43
NC7S14P5X	Single Inverter w/Schmitt Trigger	1	5-SC-70	38C7611	0.33
NC7SU04M5X	Unbuffered Inverter	1	5-SOT-23	38C7563	0.45

NC7ST SERIES
Tiny High Speed (HST) series offers performance similar to HC/VHC and is available with TTL-compatible inputs.

NC7ST04M5X	Single Inverter	1	5-SOT-23	38C7556	0.46
NC7ST04P5X	Single Inverter	1	5-SC-70	38C7557	0.23
NC7ST08M5X	Single 2-Input AND Gate	2	5-SOT-23	58K1969	0.48
NC7ST08P5	Single 2-Input AND Gate	2	5-SC-70	67K0812	0.43
NC7ST32M5	Single 2-Input OR Gate	2	5-SOT-23	82C9963	0.43

NC7NZ, NC7SZ, NC7WZ SERIES
Tiny Ultra High Speed (UHS) series has faster speeds and higher drive than HS series. 5V-tolerant inputs. Supply voltage: 1.8V-5.5V.

NC7NZ14K8X	Triple Inverter w/Schmitt Trigger Input	3	8-US8	58K1967	0.49
NC7SZ08M5	Single 2-Input AND Gate	2	5-SOT-23	34C1561	0.40
NC7SZ08M5X	Single 2-Input AND Gate	2	5-SOT-23	58K1975	0.46
NC7SZ08P5	Single 2-Input AND Gate	2	5-SC-70	34C1562	0.69
NC7SZ11P6X	3-Input AND Gate	3	6-SC-70	58K9467	0.43
NC7SZ00M5	Single 2-Input NAND Gate	2	5-SOT-23	34C1555	0.48
NC7SZ00M5X	Single 2-Input NAND Gate	2	5-SOT-23	58K1972	0.46
NC7SZ00P5X	Single 2-Input NAND Gate	2	5-SC-70	38C7570	0.36
NC7SZ38M5X	2-Input NAND Gate Open Drain Output	2	5-SOT-23	55R1154	0.49
NC7SZ32M5	Single 2-Input OR Gate	2	5-SOT-23	34C1570	0.50

(70549)

AHC AND AHCT FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

The **AHC** devices have CMOS input switching levels and supply voltage range 2V to 5.5V. The **AHCT** devices have TTL input switching levels and supply voltage range 4.5V to 5.5V.

AHC FAMILY

GATES

(190416)

ALVC AND LVC FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

The **ALVC and LVC** family devices are high-performance, low-power, low-voltage, Si-gate CMOS devices, superior to most advanced CMOS compatible TTL families. Inputs on the LVC family can be driven from either 3.3V or 5V devices. This feature allows the use of these devices as translators in a mixed 3.3 and 5 V environment.

LVC FAMILY GATES

HC AND HCT FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

HC and **HCT** family devices are high-speed Si-gate CMOS devices and are pin compatible with low power Schottky TTL (LSTTL). The **HC** family devices have a supply voltage range of 2V to 6V. The **HCT** devices have a supply voltage range of 4.5V to 5.5V. Both families are specified in compliance with JEDEC standard no. 7A.

HEF FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

HEF family devices have fully buffered outputs for highest noise immunity and pattern insensitivity to output impedance variations. They operate over a recommended V_{DD} power supply range of 3V to 15V referenced to V_{SS} (usually ground). Unused inputs must be connected to V_{DD}, V_{SS}, or another input. These devices are suitable for use over both the industrial (-40°C to +85°C) and automotive (-40°C to +125°C) temperature ranges.

AC AND ACT FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

ON Semiconductor

The **AC logic family** from ON Semiconductor provides 24 mA of drive current and operates with Vcc of 3.0 to 5.5 V. The **ACT logic family** from ON Semiconductor provides 24 mA of drive current and operates with Vcc of 3.0 to 5.5 V. The ACT logic family has TTL-compatible inputs.

HCT FAMILY STANDARD LOGIC GATES

RoHS Compliant Available

ON Semiconductor

The **HCT logic family** from ON Semiconductor operates with Vcc of 2 to 6 V, and provides ESD protection exceeding three industry standards (HBM, MM, CDM). The HCT logic family has TTL-compatible inputs.

VHC AND VHCT FAMILY STANDARD LOGIC ICs

RoHS Compliant Available

ON Semiconductor

- Over 60% Faster than HCMOS (Close to FACT)
- Very Low Noise (0.3 V_{OLP} Typ.)
- Inputs Tolerate Voltages from 0V to 7V (At Any Specified Voltage)
- Low Static I_{CC}
- 8mA Sink/Source Current @ V_{CC} = 4.5V (4mA @ V_{CC} = 3.0V)

VHC series CMOS logic is designed for operation from V_{CC} = 2V-5.5V. **VHCT series** CMOS logic is designed for operation from V_{CC} = 4.5V-5.5V. Feature 5V-tolerant inputs to aid 3V-5V mixed system designs, when operating at supply voltages less than 5V. Low power, low switching noise, and fast switching speeds make this series perfect for low-power, low-cost portable applications. Latch-up immunity: >±300mA.

74ABT SERIES ADVANCED BiCMOS BUS INTERFACE PRODUCTS

RoHS Compliant Available

TEXAS INSTRUMENTS

Uses latest 0.8μ BiCMOS process for high drive up to 64mA and propagation delays below 5ns range, while maintaining very low power consumption. Well suited to live-insertion applications with an I_{off} specification of 0.1A.

74AC SERIES ADVANCED CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

AC/ACT series devices are manufactured in 1μ CMOS with more than 70 functions available, including gates, flip-flops, drivers, counters, and transceivers. Includes standard end-pin products and center-pin V_{CC} and ground configuration products with output edge control (OEC™) circuitry. AC devices offer CMOS-compatible inputs and ACT devices offer TTL-compatible inputs.

74AUP SERIES CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

AUP series is TI's premier solution to the industry's low power needs in battery-powered portable applications. This family ensures a very low static and dynamic power consumption across the entire VCC range of 0.8 V to 3.6 V, resulting in an increased battery life. This product also maintains excellent signal integrity.

74AVC SERIES CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

With the patented Dynamic Output Control (DOC™) circuitry, **AVC Series** has the shortest propagation delay time (t_{pd}) at 3.3V, 2.5V, and 1.8V supply voltages (Vcc). This enables the fastest performance while also providing the lowest noise and mixed-voltage mode system support.

74CB3T SERIES CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

The new **CB3T** family provides high-performance, low-power replacements for standard bus-interface devices when signal buffering (current drive) is not required. The CB3T 2.5-V/3.3-V bidirectional voltage-translator bus-switch family fully supports mixed-mode signal operation on all data ports, and is ideally suited for mixed 2.5-V, 3.3-V and 5.0-V system environments.

Mfg. Part No.	Description	Prop. Delay (nS)	Pkg.	Stock No.	Price Each 1-9

(82416)

74CBT SERIES CROSSBAR TECHNOLOGY

RoHS Compliant Available

TEXAS INSTRUMENTS

Enables a bus-interface device to function as a very fast bus switch, isolating buses when the switch is open and causing very little propagation delay when the switch is closed. Also can be used as a 5V to 3.3V translator, allowing both types of devices to be used in the same system.

74LV-A SERIES CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

LV-A (Low-Voltage CMOS Technology) family offers better flexibility in your 3.3V or 5V system. The new LV-A devices have improved operating characteristics and new features such as 5-V tolerance, faster performance, and partial power down making it a superior migration path from LV, HC, and VHC.

74LVT/LVTH SERIES LOW-VOLTAGE BiCMOS

RoHS Compliant Available

TEXAS INSTRUMENTS

5V-tolerant 3.3V devices use latest 0.72µ BiCMOS technology. Operate at LVTTL or TTL signal levels in point-to-point or distributed load backplanes applications. Maximum propagation delays of 3.5ns at 3.3V for buffers. Provide up to 64mA of drive at $3.3V_{VCC}$, consuming less than 330µW of standby power.

SN74AHC/AHCT SERIES ADVANCED CMOS LOGIC

RoHS Compliant Available

TEXAS INSTRUMENTS

AHC series features same low noise of HCMOS without the overshoot and undershoot typical of higher drive devices usually needed to achieve **AHC** speeds with half the static power consumption of HCMOS. With typical propagation delays of 5.2ns for octals, **AHC** provides 3 times the speed of HCMOS. Output current: ±8mA at 5V, ±4mA at 3.3V. With input diode to V_{CC} removed, **AHC** is specified for both 5V and 3.3V operation.

BUFFERS AND ACCELERATORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Bus buffers, multiplexers, accelerators and isolators address a wide variety of issues that commonly arise when many nodes are added to a bus. A bus buffer is commonly used in high availability (Hot Swap) environments to provide level translation or level shifting capabilities for 1V, 1.2V, 1.5V, 1.8V, 2.5V, 3.3V and 5V buses, and break down bus capacitances into smaller compliant pieces. Stand alone or built-in rise time accelerators help speed up signal rise times to help devices meet I2C requirements. Aside from increasing fan-in or fan-out, our software-programmable and pin-selectable multiplexers help resolve address limitations.

10H/100H FAMILY ECL BASED LOGIC ICs

RoHS Compliant Available

ON Semiconductor

The **10H family** is a functional/pinout duplication of the standard MECL 10K family part, with 100% improvement in counting frequency and no increase in power-supply current. The **100H family** is compatible with 100K levels.

EL FAMILY ECL BASED LOGIC ICs

RoHS Compliant Available

ON Semiconductor

The **10EL/100EL families** are 5V Differential Logic (ECL) devices. With propagation delays and output transition times significantly faster than the 10E/100E families, they are ideally suited for those applications which require the ultimate in AC performance. The 100 Series contains temperature compensation.

LOW VOLTAGE ECL BASED LOGIC ICs

RoHS Compliant Available

ON Semiconductor

The **LVEL family** is functionally equivalent to the EL family Differential Logic (ECL) devices, operating from a 3.3V supply. With output transition times and propagation delays comparable to the EL family, LVEL devices are ideally suited for interfacing with high frequency sources at 3.3 V supplies. The **LVEP family** is functionally equivalent to the EL, EP and LVEL devices, operating from 2.5 & 3.3V supplies. With output transition times significantly faster than the EL and LVEL devices, the LVEP devices are ideally suited for interfacing with high frequency and low voltage (2.5V) sources.

ADXL345BCCZ

8-CLCC, 8-CLC

iMEMS® inertial sensing components are part of Analog Device, Inc's growing family of Motion Signal Processing™ solutions. They are more reliable, power efficient, user friendly, compact, cost-effective, and offer more robust performance under severe conditions. All iMEMS® devices are equipped with a temperature sensor output and a precision voltage reference output. The **ADXL series accelerometers** are commonly used in a variety of cost-sensitive, low power, motion- and tilt-sensing applications including mobile devies, gaming systems, disk drive protection, image stabilization, and sports and health devices. The **ADXRS series gyroscopes** are commonly used in a variety of applications including automotive safety, navigation, image stabilization, inertial measurement units, and platform stabilization.

ANALOG OUTPUT ACCELERATION SENSOR DEVELOPMENT TOOL

RoHS Compliant Available

freescale

Freescale's analog power-select acceleration sensors are designed to detect on one, two or three axes, allowing your end application the freedom of movement detection it needs. In addition, for multifunctional applications, these devices allow you to select between 1.5g to 12g levels of acceleration. Freescale accelerometers have a fast response time, low current consumption, low voltage operation and a standby mode all in a small profile package to detect orientation, shake, tap, double tap, fall, tilt, motion, positioning, shock or vibration.

MICROPOWER THERMOCOUPLE COLD JUNCTION COMPENSATOR

RoHS Compliant Available

LINEAR TECHNOLOGY

Applications:
- Thermocouple Cold Junction Compensator
- Centigrade Thermometer
- Temperature Compensation Network

The **LT™1025** is a micropower thermocouple cold junction compensator for use with type E, J, K, R, S, and T thermocouples. It utilizes wafer level and post-package trimming to achieve 0.5°C initial accuracy. Special curvature correction circuitry is used to match the "bow"' found in all thermocouples so that accurate cold junction compensation is maintained over a wider temperature range.

ADXRS64x FAMILY iMEMS® GYROSCOPES

RoHS Compliant Available

ANALOG DEVICES

The **ADXRS64x family** of low noise, vibration rejecting yaw rate gyroscopes are drop-in performance upgrades to existing designs using the ADXRS62x family. These devices are high-performance, low-power iMEMS® gyroscopes with analog output specifically for angular rate (rotational) sensing in harsh environments. They incorporate ADI's advanced, differential quad-sensor technology, which rejects the influence of linear acceleration and vibration to enable these new MEMS gyros to offer exceptionally accurate and reliable rate sensing even where severe shock and vibration are present.

GYROSCOPES

Mfg. Part No.	Range (± °/s)	Sensitivity	Supply Voltage	Pkg./ Case	Stock No.	Price Each 1-4	Price Each 5-9
ADXRS642BBGZ	250	7 mV/°/s	4.75V to 5.25V	32-CBGA	47T4688	65.28	63.51

The **EVAL-ADXRS64x** evaluation boards allow quick evaluation of the performance of the ADXRS64x yaw rate gyroscopes. No additional external components are required for operation. The boards have a 20-lead, dual in-line (0.3 inch width × 0.1 inch pin spacing) interface that allows easy prototyping of products.

XTRINSIC 3-AXIS, DIGITAL MAGNETOMETER

RoHS Compliant Available

freescale

NEW

Features:
- Full-scale range ±1000 µT
- Sensitivity of 0.10 µT
- Noise down to 0.25 µT rms
- Output Data Rates (ODR) up to 80 Hz
- 400 kHz Fast Mode compatible I2C interface
- Low-power, single-shot measurement mode

Applications:
- Electronic Compass (e-compass)
- Location-Based Services

Freescale's **FXMS3110** is a small, low-power, digital 3-axis magnetometer qualified for the industrial market. The device can be used in conjunction with a 3-axis accelerometer to realize an orientation independent electronic compass that can provide accurate heading information. It features a standard I2C serial interface output and smart embedded functions. The **FXMS3110** is capable of measuring magnetic fields with an output data rate (ODR) up to 80 Hz; these output data rates correspond to sample intervals from 12.5 ms to several seconds.

MOTION SENSORS - MEMS

RoHS Compliant Available

ST

Based on our advanced proprietary technologies, **ST's MEMS** address the most innovative features required on the market, ranging from mobile and consumer applications to the innovative needs of the healthcare and automotive markets. Housed in ultra-compact packages, MEMS achieve a high level of motion-control detection, embedding the most useful smart functions and minimizing the power consumption.

ACCELEROMETERS

ST's state-of-the-art analog and digital **accelerometers** feature up to ±24g full scale, high resolution, smart embedded functionalities and advanced power-saving features. A set of smart SPI/I²C programmable embedded functions, such as low-power mode, auto wake-up function, free-fall and 6D-orientation detection are integrated into the LIS331DLx family.

GYROSCOPES

ST's portfolio of single-, dual- and tri-axis **gyroscopes** covers a wide full-scale range (from 30 to 6000 dps) in small LGA packages. The innovatively designed sensors can provide different combinations of analog and digital outputs. The embedded power-down mode together with the innovative sleep mode guarantee a fast turn-on time for efficient power cycling. ST's new gyroscopes feature excellent stability over a wide temperature range and time, with a resolution lower than 0.08 dps/°C for zero-rate level. This avoids the use of further temperature compensation in the same application.

FUNCTIONAL SENSORS

STMicroelectronics offers a complete range of **multi-function sensors** optimized for specific applications. The **FC30 sensor** performs smart 3D orientation and click detection. The device automatically recognizes screen rotation (portrait/landscape) and 6 different orientations of an handheld device with respect to the gravity field. When a single or double mechanical tap is detected, the FC30 provides an interrupt signal, enabling a mouse button-like function for intuitive man-machine user interfaces.

HALL-EFFECT LATCH / BIPOLAR SWITCH

RoHS Compliant Available

Allegro MicroSystems, Inc.

The **A1250** Hall-effect sensor IC is a temperature stable, stress-resistant bipolar switch. This device is the most sensitive Hall-effect device in the bipolar switch family and is intended for ring-magnet sensing. Superior high-temperature performance is made possible through a patented dynamic offset cancellation that utilizes chopper-stabilization. This method reduces the offset voltage normally caused by device overmolding, temperature dependencies, and thermal stress.

GEAR-TOOTH HALL EFFECT SPEED SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features:

- Integrated, series resistor on VCC pin for improved transient immunity
- Self-calibrating for tight timing accuracy
- First-tooth detection
- Immunity to air gap variation and system offsets
- Large air gap capability
- Optimized magnetic circuit

Mfg. Part No.	Supply Voltage (V)	Output Type	Min. Speed (Hz)	Package	Stock No.	Price Each
ATS617LSGTN-T	4.5 to 24	3-wire	10	4-SIP	04R7133	5.80
ATS682LSHTN-T	4 to 24	2-wire	...	4-SIP	04R7134	5.39

ACS709 SERIES CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features:

- 3 to 5.5 V single supply voltage
- 2100 VRMS isolation voltage between primary current path and sensor IC electronics
- 120 kHz bandwidth through proprietary amplifier and filter design techniques
- Ratiometric output from supply voltage
- 1.1 mohm primary conductor resistance for low power loss

Applications:

- Motor control and protection
- Load management and overcurrent detection
- Power conversion and battery monitoring / UPS systems

Mfg. Part No.	Linear Sensing Current (A)	Sensivity (mV/A)	Package	Stock No.	Price Each

ACS710 ISOLATION CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Applications::

- Motor control and protection
- Load management and overcurrent detection
- Power conversion and battery monitoring / UPS systems

The **ACS710** current sensor IC provides economical and precise means for current sensing applications in industrial, commercial, and communications systems. The device is offered in a small footprint surface mount package that allows easy implementation in customer applications. The **ACS710** consists of a precision linear Hall sensor integrated circuit with a copper conduction path located near the surface of the silicon die. Applied current flows through the copper conduction path, and the analog output voltage from the Hall sensor linearly tracks the magnetic field generated by the applied current. The accuracy of the **ACS710** is maximized with this patented packaging configuration because the Hall element is situated in extremely close proximity to the current to be measured.

Mfg. Part No.	I_P (A)	Sensitivity (Typ @ VCC = 5 V) (mV/A)	Supply Voltage (V)	Package	Stock No.	Price Each 1-9

ACS71X FULLY INTEGRATED, HALL EFFECT-BASED LINEAR CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features

- Low-noise analog signal path
- Device bandwidth is set via the new FILTER pin
- 5 µs output rise time in response to step input current
- 50 kHz bandwidth
- Total output error 1.5% at TA = 25°C, and 4% at –40°C to 85°C
- Small footprint, low-profile SOIC8 package
- 1.2 mΩ internal conductor resistance
- 2.1 kVRMS minimum isolation voltage from pins 1-4 to pins 5-8
- 5.0 V, single supply operation
- Output voltage proportional to AC or DC currents
- Factory-trimmed for accuracy
- Extremely stable output offset voltage
- Nearly zero magnetic hysteresis
- Ratiometric output from supply voltage

The Allegro® **ACS712** and **ACS713** provide economical and precise solutions for AC (ACS712) or DC (ACS712 and ACS713) current sensing in industrial, automotive, commercial, and communications systems. The device package allows for easy implementation by the customer. Typical applications include motor control, load detection and management, switched-mode power supplies, and overcurrent fault protection.

ACS716 VOLTAGE ISOLATION CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features:
- Industry-leading noise performance with greatly improved bandwidth
- Small footprint package suitable for space-constrained applications
- 1 mΩ primary conductor resistance for low power loss
- High isolation voltage, suitable for line-powered applications
- User-adjustable Overcurrent Fault level
- Overcurrent Fault signal typically responds to an overcurrent condition in < 2 µs
- Filter pin capacitor improves resolution in low bandwidth applications

ACS716 current sensor provides economical and precise means for current sensing applications in industrial, commercial, and communications systems. The device is offered in a small footprint surface mount package that allows easy implementation in customer applications. The **ACS716** consists of a precision linear Hall sensor integrated circuit with a copper conduction path located near the surface of the silicon die. Applied current flows through the copper conduction path, and the analog output voltage from the Hall sensor linearly tracks the magnetic field generated by the applied current. The accuracy of the **ACS716** is maximized with this patented packaging configuration because the Hall element is situated in extremely close proximity to the current to be measured.

ACS755SCB-XXX CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features
- Monolithic Hall IC for high reliability
- Single +5 V supply
- 3 kVRMS isolation voltage between terminals 4-5
- Ultra-low power loss: 100 µΩ internal conductor resistance
- Ratiometric output from supply voltage
- Extremely stable output offset voltage
- Output proportional to ac and dc currents

Applications
- Automotive systems
- Industrial systems
- Power conversion
- Battery monitors

ACS758 CURRENT SENSORS

RoHS Compliant Available

Allegro MicroSystems, Inc.

Features:
- Monolithic Hall IC for high reliability
- 3.0 to 5.5 V, single supply operation
- Industry-leading noise performance through proprietary amplifier and filter design techniques
- Ultra-low power loss: 100 µΩ internal conductor resistance
- Output voltage proportional to AC or DC currents
- Total output error improvement through gain and offset trim over temperature
- 120 kHz typical bandwidth

PRESSURE SENSORS

RoHS Compliant Available

freescale

UNCOMPENSATED PRESSURE SENSORS

This series of silicon piezoresistive pressure sensors provide a very accurate and linear voltage output — directly proportional to the applied pressure. These standard, low-cost, uncompensated sensors permit manufacturers to design and add their own external temperature compensation and signal conditioning networks.

Mfg. Part No.	Pressure Rating Max. (psi)	Pressure Rating Max. (kPa)	Sup. Volt. Typ. (V)	Sensitivity (mV/kPa)	Package	Stock No.	Price Each 1-9

ADXL335 3-AXIS ACCELEROMETER EVALUATION BOARD

RoHS Compliant Available

ANALOG DEVICES

The **EVAL-ADXL335Z** is a simple evaluation board that allows quick evaluation of the performance of the ADXL335 three-axis accelerometer. The EVAL-ADXL335Z has a 6-pin, 0.1 inch spaced header for access to all power and signal lines that the user can attach to a prototyping board (breadboard) or wire using a standard plug. Four holes are provided for mechanical attachment of the EVAL-ADXL335Z to the application.

HIGH ACCURACY DIGITAL TEMPERATURE SENSORS

RoHS Compliant Available

ANALOG DEVICES

Applications:
- RTD and thermistor replacement
- Thermocouple cold junction compensation
- Medical equipment
- Industrial control and test
- Food transportation and storage
- Environmental monitoring and HVAC
- Laser diode temperature control

Features:
- Programmable interrupts
- Easy implementation

The **ADT7320** & **ADT7420** are high accuracy digital temperature sensors offering breakthrough performance over a wide industrial range. It contains an internal band gap reference, a temperature sensor, and a 16-bit ADC to monitor and digitize the temperature to 0.0078°C resolution. The ADC resolution, by default, is set to 13 bits (0.0625°C). The ADC resolution is a user programmable mode that can be changed through the serial interface.

Mfg. Part No.	Output Interface	Accu. (°C)	Temp. Range (°C)	Supply Voltage Range (V)	Package	Stock No.	Price Each 1-9
ADT7320UCPZ-R2	I2C	±0.25	-40 to +150	2.7 to 5.5	16-LFCSP	66W1258	7.67
ADT7420UCPZ-R2	SPI	±0.25	-40 to +150	2.7 to 5.5	16-LFCSP	66W1259	7.67

EVALUATION BOARD

The evaluation kit allows the user to evaluate the performance of the **ADT7320** and **ADT7420** temperature sensors using a PC. The kit consists of two boards; a main board connected to the PC through the USB port and an external board. The external board is attached to the main board using wires that can withstand high temperatures, and can be used for remote temperature measurements in oil baths or ovens where the temperature exceeds the specifications of the USB cable. The evaluation software allows the user to select either the main board or the external board, as well as the desired temperature sensor device.

LINEAR TECHNOLOGY

Applications:
- Network Servers
- Core, I/O Voltage Monitors
- Desktop and Notebook Computers
- Environmental Monitoring

Features:
- Converts Remote Sensor or Internal Diode
- Temperature to Analog Voltage
- Built-In Series Resistance Cancellation

The **LTC®2995** is a high accuracy temperature sensor and dual supply monitor. It converts the temperature of an external diode sensor and/or its own die temperature to an analog output voltage while rejecting errors due to noise and series resistance. Two supply voltages and the measured temperature are compared against upper and lower limits set with resistive dividers. If a threshold is exceeded, the device communicates an alert by pulling low the correspondent open drain logic output.

Mfg. Part No.	No. of Channels	Temp. Sense Accuracy (%)	Output Type	Package	Stock No.	Price Each 1-24

RESISTOR PROGRAMMABLE TEMPERATURE SWITCH

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Temperature Threshold Set By 1% External Resistor
- Low Quiescent Current: 40µA Typical
- Open-Drain, Active-Low Output Stage
- Pin-Selectable 2°C or 10°C Hysteresis

Applications:
- Computers (Laptops and Desktops)
- Servers
- Industrial and Medical Equipment
- Storage Area Networks
- Automotive

TMP709AIDBVT

The **TMP709** is a fully-integrated, resistor- programmable temperature switch with a temperature threshold that is set by just one external resistor within its entire operating range. The TMP709 provides an open-drain, active-low output.

Mfg. Part No.	Supply Voltage (V)	Temperature Accuracy	Supply Current (µA)	Package	Stock No.	Price Each 1-9
● TMP709AIDBVT	2.7V to 5.5V	± 0.5°C	40	5-SOT-23	93T6799	1.15
● TMP708AIDBVT	2.7V to 5.5V	± 0.5°C	40	5-SOT-23	82T4199	1.15

TOUCH CONTROLLER ICS

RoHS Compliant Available

Atmel

Features:
- Long Range Proximity Sensing
- Cutting-edge interfaces
- Exacting precision
- Design flexibility
- Low power consumption
- Robust operation

Touch controller devices enhance the user experience by implementing nonmechanical buttons, sliders, and wheels with excellent precision and reliability. They also deliver superb low-power characteristics, a critical requirement for today's battery-powered handheld and mobile devices.

STM8S TOUCH SENSING EVALUATION KIT

RoHS Compliant Available

Features:
- Touch-sensing interface
- LCD display
- Configurable operation
- RC acquisition principle
- Supports up to 24 capacitive sensing touchkeys
- Supports up to 2 capacitive sensing wheels
- Up to 8-bit resolution wheel/slider using 8 channels
- Autocalibration, debounce filtering
- Environment control system (ECS)
- Detection exclusion system
- Free C source code library

The STM8S touch sensing evaluation kit enables designers, who are familiar with standard STM8S microcontrollers, to create higher-end look-and-feel user interfaces by replacing conventional electromechanical switches with touch sensing controls. Designers can thus combine touch sensing functions with traditional MCU features such as communication, LED control, beeper, LCD control, and so on. The kit contains an STM8/128-EVAL board, and an STM8S touch sensing evaluation daughterboard (STM8Sxxx-TS1) which provides an evaluation platform for the resistor-capacitor acquisition principle. The touch sensing library is a complete, free source-code solution to transform any 8-bit STM8 microcontroller into a capacitive touchkey controller.

Mfg. Part No.	Description	Stock No.	Price Each Each
STM8/128-EV/TS	STM8S evaluation board with Touch Sensing solution evaluation	55R6963	178.75

6-AXIS XTRINSIC SENSOR w/INTEGRATED LINEAR ACCELEROMETER & MAGNETOMETER

RoHS Compliant Available

freescale

Features:
- Highly integrated
- Wide dynamic range ±1200 µT
- Embedded vector magnitude detection
- Embedded autonomous hard iron calibration
- Low-power consumption

Applications:
- eCompass in mobile devices
- User interface (menu scrolling by orientation change, tap detection for button replacement)
- Orientation detection (portrait/landscape: up/down, left/right, back/front position identification)
- Augmented Reality (AR), gaming, and real-time activity analysis (pedometry, freefall and drop detection for hard disk drives and other devices)
- Power management for mobile devices using inertial and magnetic event detection
- Shock and vibration monitoring (mechatronic compensation, shipping and warranty usage logging)

RD4247FXOS8700

FXOS8700CQ is a small, low-power 6-axis linear accelerometer and magnetometer combined into a single package. The device features a selectable digital I2C or SPI serial interface with 14-bit accelerometer and 16-bit magnetometer resolution along with smart-embedded functions.

Mfg. Part No.	Sensing Axis	Supply Voltage	Package	Stock No.	Price Each 1-9

S-TOUCH CAPACITIVE TOUCHKEY CONTROLLER ICs

Features
- Up to 24 highly-sensitive channels
- Automatic channel calibration
- Auto-tuning without external components
- 8 independent PWMs to control up to 16 LEDs
- Ultra-low-power consumption: 50 µA
- 400 kHz I²C interface

S-Touch capacitive touchkey controllers are based on an impedance-change detection engine with an all digital, ultra-low-power capacitance measurement architecture. The high sensitivity of the devices ensures excellent performance, even with a relatively small sensor pad size (0.30 cm²) under a few millimeters of plastic/glass overlay. Touch capacitive touch-key controllers are suitable for a wide range of touchkey sensing applications, such as keypads, rotators or buttons.

Mfg. Part No.	# of Chan.	Supply Voltage Range	Pkg.	Stock No.	Price Each 1-9

SIGNAL CONDITIONING IC FOR OPTICAL PROXIMITY SENSORS

RoHS Compliant Available

AVAGO TECHNOLOGIES

Applications
- PDA and mobile phones
- Portable and Handheld devices
- Personal Computers/Notebooks
- Amusement/Games/Vending Machines
- Industrial Automation
- Contactless Switches
- Sanitary Automation

APDS-9700 is a single chip solution that consists of a LED driver circuit, sunlight cancellation and built-in LED stuck high protection circuit integrated into a single chip. The APDS-9700 device has artificial light immunity and is also operational under the sun. Design flexibility is optimized as APDS-9700 can be paired up with an integrated proximity sensor or discrete pair solution.

LOW POWER, CAPACITIVE BUTTON TOUCH & PROXIMITY CONTROLLERS

RoHS Compliant Available

SEMTECH

Features:
- Proximity Sensing up to several centimetres
- Complete 8 Sensors Capacitive Touch-Button Solution
- Support of buzzer for audible feedback
- Programmable Scanning Period from 15ms to several seconds
- No External Components per Sensor Input
- Internal Clock Requires No External Components
- Differential Sensor Sampling for Reduced EMI

Applications:
- LCD TVs, Monitors
- White Goods
- Notebook/Netbook/Portable/Handheld computers
- Consumer Products, Instrumentation, Automotive
- Mechanical Button Replacement

The **SX8661** & **SX8661** are ultra low power, fully integrated 8-channel solutions for capacitive touch-button and proximity detection applications. Unlike many capacitive touch solutions, the **SX8661** & **SX8661** features dedicated capacitive sense inputs (that requires no external components) in addition to 8 general purpose I/O ports (GPIO).

COMPACT PRECISION INERTIAL SENSORS

RoHS Compliant Available

ANALOG DEVICES

ADIS16445AMLZ

Features:
- SPI-compatible serial interface
- Embedded temperature sensor

Applications:
- Platform stabilization and control
- Navigation
- Robotics

The **ADIS16445** iSensor® device is a complete inertial system that includes a triaxial gyroscope and a triaxial accelerometer. Each sensor in the **ADIS16445** combines industry-leading iMEMS® technology with signal conditioning that optimizes dynamic performance. The factory calibration characterizes each sensor for sensitivity, bias, alignment, and linear accel-eration (gyroscope bias). As a result, each sensor has its own dynamic compensation formulas that provide accurate sensor measurements. The **ADIS16445** provides a simple, cost-effective method for integrating accurate, multiaxis inertial sensing into industrial systems, especially when compared with the complexity and investment associated with discrete designs. All necessary motion testing and calibration are part of the production process at the factory, greatly reducing system integration time. Tight orthogonal alignment simplifies inertial frame alignment in navigation systems. The SPI and register structures provide a simple interface for data collection and configuration control.

The **ADIS16448** iSensor® device is a complete inertial system that includes a triaxial gyroscope, a triaxial accelerometer, a triaxial magnetometer, and pressure sensors. Each sensor in the **ADIS16448** combines industry-leading iMEMS® technology with signal conditioning that optimizes dynamic performance. The factory calibration characterizes each sensor for sensitivity, bias, alignment, and linear acceleration (gyroscope bias). As a result, each sensor has its own dynamic compensation formulas that provide accurate sensor measurements. The **ADIS16448** provides a simple, cost-effective method for integrating accurate, multiaxis inertial sensing into industrial systems, especially when compared with the complexity and investment associated with discrete designs.

Mfg. Part No.	No. of Degrees	Supply Voltage	Gyro Range (°/s)	Package	Stock No.	Price Each 1-4
● ADIS16445AMLZ	6	3.15V to 3.45V	± 250	ML-20-3	47W4400	578.02
● ADIS16448AMLZ	10	3.15V to 3.45V	± 1000	ML-20-2	27W3688	671.67

The **ADIS16445/PCBZ** is a "breakout board," which provides (1) **ADIS16445AMLZ**, (1) flexible cable and (1) interface PCB to simplify the process of developing a prototype connection with an existing embedded processor system. It is required for connecting the ADIS16445AMLZ directly to the EVAL-ADIS evaluation system as well.

Mfg. Part No.	Description	Stock No.	Price Each
● ADIS16445/PCBZ	ADIS16445 BREAKOUT BOARD	47W4399	774.30

NANOPOWER DIGITAL SWITCHES

RoHS Compliant Available

NVE CORPORATION

Features:
- Precise Detection of Low Magnetic Fields
- Digital Switch Output
- Continuously Operating or Duty-Cycled Versions
- They feature the extremely small 1.1mm X 1.1mm X 0.4mm ULLGA package

ADL-Series sensors are Giant Magnetoresistive (GMR) Digital Switches designed to run at low voltages and extremely low currents. The devices are manufactured with NVE's patented spintronic GMR technology for unmatched miniaturization, sensitivity, precision, and low power.

Mfg. Part No.	Magnetic Operate Point Max. (Oe)	Quiescent Current (µA)	Supply Voltage	Package	Stock No.	Price Each 1-9
● ADL021-14E	25	0.350	2.4V to 3.6V	4-ULLGA	72W1059	2.89
● ADL024-14E	34	0.350	2.4V to 3.6V	4-ULLGA	72W1061	3.11
● ADL921-14E	25	120	2.4V to 3.6V	4-ULLGA	72W1063	2.89
● ADL924-14E	34	120	2.4V to 3.6V	4-ULLGA	72W1065	2.89

NVE's AFL-Series Sensors are digital switches designed to run at very low voltages and currents. The parts can operate from a single battery. The output is configured as a switch to detect magnetic fields, switching on at a specified magnetic field, and off when the field is removed. Current-sinking or current-sourcing output configurations are available.

Mfg. Part No.	Magnetic Operate Point Max. (Oe)	Quiescent Current (µA)	Supply Voltage	Package	Stock No.	Price Each 1-9
● AFL000-10E	13	55	0.9V to 1.3V	6-TDFN	72W1070	8.35

(209480)

AA SERIES ANALOG SENSORS

RoHS Compliant Available

NVE CORPORATION

Features:
- Excellent Sensitivity to Applied Magnetic Fields
- Wheatstone Bridge Analog Output
- Wide Linear Range of Operation
- Near-Zero Voltage Operation
- DC to >1MHz Frequency Response

Applications:
- General Motion, Speed, and Position Sensing
- Low Power, Low Voltage Applications
- Low Field Sensing for Magnetic Media Detection
- Current Sensing

AA-Series sensors use NVE's patented spintronic materials to provide a directionally-sensitive output. These sensors are sensitive in one direction in the plane of the IC, with a cosine-scaled fall-off in sensitivity as the sensor is rotated away from the sensitive direction. These devices provide omnipolar output, that is the same output for magnetic fields in the positive or negative direction along the axis of sensitivity. All sensors use a temperature compensating Wheatstone bridge configuration. The AAH-Series GMR sensors are manufactured with a high sensitivity GMR material, making them ideally suited for any low magnetic field application. They are also extremely temperature tolerant, to 150°C operating temperatures. The AAL-Series GMR sensors are manufactured with a low hysteresis GMR material, for use in magnetometer applications where minimum hysteresis is important. They are also extremely temperature tolerant, to 150°C operating temperatures.

Mfg. Part No.	Saturation Field (Oe)	Linear Max. (Oe)	Sensitivity Max. (mV/V-Oe)	Resistance (Ohms)	Package	Stock No.	Price Each 1-9
● AAH002-02E	6	3	18	2K	8-SOIC	72W1044	13.94
● AAL002-02E	15	10.5	4.2	5.5K	8-SOIC	72W1045	13.03

The NVE GMR Engineering Evaluation Kit (**AG001-01E**) was created as an aid to the technical user of GMR sensors to facilitate laboratory experimentation and development. The kit consists of an assortment of NVE sensors, printed circuit boards and permanent magnets sufficient to demonstrate sensor functionality in the laboratory.

DIGITAL MAGNETOMETER

RoHS Compliant Available

freescale

Applications:
- Electronic Compass (eCompass)
- Location-Based Services

Features:
- Full-scale range ±1000 µT
- Sensitivity of 0.10 µT
- Noise down to 0.25 µT rms
- One-shot triggered measurement mode to conserve power

RD4247MAG3110

LFSTBEB3110 MAG3110FCR1

The device can be used in conjunction with a 3-axis accelerometer to realize an orientation independent electronic compass that can provide accurate heading information. It features a standard I2C serial interface output and smart embedded functions.

Mfg. Part No.	Description	Supply Current (µA)	Package	Stock No.	Price Each 1-9
MAG3110FCR1	1.62V to 3.6V	900	10-DFN	07W3591	1.08

CAPACITANCE-DIGITAL-CONVERTER IC FOR ELECTROSTATIC CAPACITIVE TOUCH SENSORS

RoHS Compliant Available

ON Semiconductor

Features:
- Detection system: Differential capacitance detection (Mutual capacitance type)
- Input capacitance resolution: Can detect capacitance changes in the femto Farad order
- External components for measurement: Not required
- Detection operations: Switch
- Interface: I²C compatible bus or SPI selectable.

Applications:
- White goods
- Black goods
- PC peripherals

End Products:
- Washing machine
- Refrigerator
- Cooking appliances
- TV
- OA
- Printer

LTC2990/LTC2991: QUAD/OCTAL I²C TEMPERATURE, VOLTAGE & CURRENT MONITORS

RoHS Compliant Available

LINEAR TECHNOLOGY

Measures:
- External Temperature
- Internal Temperature
- Single-Ended Voltage
- Differential Voltage
- Rail-to-Rail Current
- Internal VCC

LTC2990CMS#PBF LTC2991CMS#PBF

The **LTC®2990/LTC2991** are temperature, voltage and current monitors for 3V to 5.5V systems that integrate a 14-bit ADC, 10ppm/°C reference and I2C interface to provide sub-millivolt voltage resolution and 1% current measurement, as well as ±1°C accuracy internally and up to ±0.7°C accuracy remotely when making temperature measurements. The **LTC2990/LTC2991** use up to eight single-ended inputs to conveniently measure any combination of parameters simultaneously.

Mfg. Part No.	Supply Voltage	Ext. Temp Accuracy (typ)	Int. Temp Accuracy (typ)	Package	Stock No.	Price Each 1-24
LTC2990CMS#PBF	2.9V to 5.5V	±0.5°C at –40°C to 85°C	±1°C at 0°C to 85°C	10-MSOP	13T3887	4.81
LTC2991CMS#PBF	2.9V to 5.5V	±0.7°C at –40°C to 85°C	±1°C at 25°C	16-MSOP	59T5575	9.61

(208437)

SECONDARY-SIDE OPTOCOUPLER DRIVER

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Overshoot Control Function Prevents Output Overshoot on Start-Up and Short-Circuit Recovery
- High Bandwidth Error Amplifi er Permits Simple Loop
- Frequency Compensation
- Ground-Referenced Opto-Coupler Drive
- 10mA Opto-Coupler Drive with Current Limiting

Applications:
- 48V Input Isolated DC/DC Converters
- Isolated Telecommunication Power Systems
- Distributed Power Step-Down Converters
- Offline Isolated Power Supplies
- Industrial Control Systems
- Automotive and Heavy Equipment

The LT®4430 drives the opto-coupler that crosses the galvanic barrier in an isolated power supply. The IC contains a precision-trimmed reference, a high bandwidth error amplifier, an inverting gain of 6 stage to drive the optocoupler and unique overshoot control circuitry.

Mfg. Part No.	Supply Voltage	Output Current (A)	Package	Stock No.	Price Each
LT4430ES6#PBF	3V to 20V	2.3	6-TSOT-23	78T4110	3.71

LTC2995/LTC2996/LTC2997: FAST, SMALL & SIMPLE V_{PTAT} MONITORING

RoHS Compliant Available

LINEAR TECHNOLOGY

Features:
- Int Temp Measurement
- Ext Temp Measurement
- Series Resistance Cancellation
- V_{PTAT} Output
- 1.8V Reference Output

LTC2997CDCB#PBF

LTC2995IUD#PBF

The **LTC®2995/LTC2997/LTC2997** are analog temperature monitors for low voltage systems that provide a 3.5ms-updated voltage proportional to absolute temperature (VPTAT) so that systems can quickly react with subdegree accuracy when making internal or external temperature measurements. The full-featured **LTC2995** provides equally impressive high voltage monitoring capabilities for two rails, as well as temperature and voltage alerts, for a truly comprehensive thermal monitoring solution. No code is required to configure these tiny devices.

Mfg. Part No.	Supply Voltage	Ext. Temp Accuracy (typ)	Int. Temp Accuracy (typ)	Package	Stock No.	Price Each 1-24
● LTC2995IUD#PBF	2.25V to 5.5V	±0.25°C at –40°C to 125°C	±0.5°C at 25°C	20-QFN	94T1241	6.02
● LTC2996CDD#PBF	2.25V to 5.5V		±0.25°C at –40°C to 125°C	10-DFN	27W9437	4.18
● LTC2997CDCB#PBF	2.5V to 5.5V	±0.25°C at –40°C to 125°C	±0.25°C at –40°C to 100°C	6-DFN	78T3129	2.07

POWERLINE COMMUNICATIONS ANALOG FRONT-END

RoHS Compliant Available

TEXAS INSTRUMENTS

Features:
- Supports FSK, S-FSK, and OFDM
- Supports PRIME, G3, IEC 61334
- Receive Sensitivity: 20 µVRMS, Typical
- Programmable Tx and Rx Gain Control
- Four-Wire Serial Peripheral Interface
- Two Integrated Zero Crossing Detectors
- Two-Wire Transceiver Buffer

Applications:
- eMetering
- Lighting
- Solar
- Pilot Wire

AFE031AIRGZT

The **AFE031AIRGZT** is a low-cost, integrated, powerline communications (PLC) analog front-end (AFE) device that is capable of capacitive- or transformer-coupled connections to the powerline while under the control of a DSP or microcontroller.

Mfg. Part No.	Supply Voltage	Quiescent Current (mA)	Slew Rate (V/µs)	Package	Stock No.	Price Each 1-9
● AFE031AIRGZT	7V to 26V	60.3	19	48-VQFN	91T4739	6.16

(202132)

QUAD CHANNEL TIME MEASUREMENT UNIT

RoHS Compliant Available

TEXAS INSTRUMENTS

Applications:
- Automatic Test Equipment
- Benchtop Time-Measurement Equipment
- Radar and Sonar
- Medical Imaging
- Mass Spectroscopy
- Nuclear/Particle Physics

Features:
- High-Speed LVDS-Compatible Serial-Result Bus per Channel
- Programmable Serial-Result Bus Length
- Temperature Sensor

The **THS788** is a four-channel timing measurement unit (TMU) that incorporates a time-to-digital converter (TDC) architecture for fast and accurate measurements. The TMU is able to provide 8 ps of single-shot accuracy. The TDC has 13 ps resolution (LSB), which is derived from an external master clock of 200 MHz. It uses fast LVDS-compatible interfaces for all of its event inputs and serial result outputs, which allows for fast and reliable data transfer. Each channel can process time stamps at a maximum speed of 200 MSPS

Mfg. Part No.	Supply Voltage	Package	Stock No.	Price Each 1-4
● THS788PFD	3.135V to 3.465V	100-TQFP	48T4624	147.96

(196588)

INSENSOR™ INCLINOMETER/ ACCELEROMETER EVALUATION BOARD

RoHS Compliant Available

ANALOG DEVICES

The **ADIS1620x/PCB** are simple evaluation boards that provide convenient access to the ADIS1620x family of products, using a standard 2 mm, 2 × 6, connector interface. These connectors can be accessed using a variety of cable options, including standard 1 mm ribbon cables. The ADIS1620x/PCB is designed to be evaluated in an existing digital platform (such as MCU, DSP, FPGA, PLD) or as part of the ADISEVAL system. Four mounting holes (sized for 2-56 or 2 mm screws) have been provided to secure the board during evaluation.

Mfg. Part No.	Description	Stock No.	Price Each
● ADIS16209/PCBZ	ADIS16209, INCLINOMETER, ACCEL, 2 AXIS, EVAL BOARD	77M9918	107.67

(200568)

ADM1062 SUPER SEQUENCER EVALUATION KIT

RoHS Compliant Available

ANALOG DEVICES

Kit Contents:
- EVAL-ADM1062-69CASZ Evaluation Board
- SOCKET-ADM106xTQZ IC Socket
- 8-way, 150 mm Micromatch ribbon cable
- Patch cables

Additional Equipment Needed:
- USB-to-I²C dongle USB-SMBUS-CABLEZ
- 9 V to 14.4 V power supply

Mfg. Part No.	Description	Stock No.	Price Each
● EVAL-ADM1062TQEBZ	ADM1062 Evaluation Board Kit	34M5969	284.63

(203974)

APPLICATION SPECIFIC REFERENCE DESIGN BOARDS

RoHS Compliant Available

ANALOG DEVICES

The **EVAL-CN0196-EB1Z** is an H-bridge composed of high power switching MOSFETs that are controlled by low voltage logic signals. The circuit provides a convenient interface between logic signals and the high power bridge. The bridge uses low cost N-channel power MOSFETs for both the high and low sides of the H-bridge. The circuit also provides galvanic isolation between the control side and power side. This circuit can be used in motor control, power conversion with embedded control interface, lighting, audio amplifiers, and uninterruptable power supplies (UPS).
